estimate was because it included uncoined bullion and some that was used in the arts. Franco is understood to have \$57 gold, silver and paper money *per capita*; while the United States has \$24 *per capita*, counting greenbacks, national bank notes, gold, silver and subsidiary coinage. It will surprise some people to learn that there are \$600,000,000 of five franc silver pieces circulating in the Latin Union, of which, according to last accounts, some \$250,000,000 were in the Bank of France. Taking only the latter figure, without counting the five francs in actual circulation, there are sixteen twenty-five hundred five franc pieces *per capita* in France. Of the equivalent coin, the American standard dollar, there is less than one dollar per capita in the United States Treasury. There does not seem to be much reason for any alarm at the excess of silver coinage in this country in view of the state of things in France.

THE SITUATION OF THE COMSTOCK.

The great lode as yet gives no signs of life. It was expected that the cross-cutting on the 2,500 foot level of the Union Consolidated would, in a few weeks, strike the ore body which had been worked on the 2,400 foot level, and that a "boom" along the whole line would be the result. The Union Consolidated, on the prospects, advanced from 16 to 36; but the ore has not yet been found, and the price, at last quotations, had receded to about 20. John Mackey, who represents the bonanza capitalists, so-called, has discouraged any undue excitement, and has helped to keep the market from advancing too sharply. It is now nearly two years since the excitement in Sierra Nevada, and the holders of the Comstock shares have in that time paid out some \$25,000,000 for assessments. The only dividends paid has been by the Consolidated Virginia, which have amounted to less than a million of dollars.

A bonanza is really a miracle. Enormous bodies of high grade ore are very rare in the history of mining; and, when found, it is not reasonable to suppose that they can be duplicated in the same neighborhood. Still every mining investor who has dabbled in stocks has an abiding faith that some time another, a new bonanza, will be developed in the lower levels of the Comstock. There have been five such already, which have caused fluctuations in the price of stocks unexampled in the history of speculation. Shares of Consolidated Virginia at one time sold for fifty cents each. At their highest point they touched \$800 each. In November, 1870, shares in the Crown Point sold at \$2.50 each; in eighteen month they reached \$1,900 each. In 1870 the shares of all the mines of the Comstock aggregated in market value something less than \$5,000,000. In the fall of 1875 the market value of these same mines was \$270,000,000. These figures tell the story of the abiding faith of every holder of a few shares of the Comstock; that he has a possible fortune if he will only wait. Although it has been proven, time and again, that the managers do not treat the stockholders and the public fairly, yet still the hope remains that despite extravagant or dishonest

inmanagement, there is so much possible money in the Comstock lode, that the public submits patiently to the continuous, extravagant and often needless assessments.

Without going into details, we fail to see one encouraging sign in all the published reports. The theory held by "Col. Deane" and tens of thousand of speculative holders, that the bonanza firm are keeping back developments, and that they know of great bodies of ore which they could open up at any time, is not worthy of serious attention. There is every reason to believe that Mackey and his associates are as eager to develop great ore bodies as is the poorest "chipper" on Montgomery street. They are the owners of mills, timber and water rights, which are now unproductive, because of the impoverished condition, so far as developed ore is concerned, of the mines on the Comstock lode.

If an ore body of any considerable magnitude should be opened, it would stimulate mining speculation in all parts of the country. The probabilities are against the discovery of any such bonanzas as those found in Gould & Curry, Crown Point and Consolidated Virginia. Still, the extraordinary profits made by those who held stocks in the past induces tens of thousands of persons to keep dabbling in the Comstocks.

Within the limits of the United States there is the largest mineral belt on earth. We have more mining camps, and a greater diversity of mineral production than any other nation can lay claim to. Comstock is not alone. No doubt, in the next generation twenty locations will have been developed as rich as that which lies on the sides of Mount Davidson. There are, undoubtedly, other Comstocks in Arizona, New Mexico, Colorado, along the spur of the Sierras, and wherever volcanic action shows itself, from Mexico to the lakes. The Comstock may fail, but mining as an industry and a speculation will last.

IF.

If the leading Leadville mines had been honestly and wisely managed what a vast change it would have made in the mining situation.

If the manipulators of Little Pittsburg, Little Chief, Chrysolite, Amie, etc., had only acted in good faith, how much better off would they not have been in reputation and even in pocket.

If the capitalization of these mines had borne some just relation to their original cost and real value, what lots of money the investing public would have saved.

If, instead of \$1 dividends monthly and a forced production to pay it, only 25 cents per month had been declared, and the mines had been opened and worked properly, what was to prevent them lasting for years and becoming a standard advertisement of the value of mining securities.

If the example of the owners of the Black Hill mines, of the Ontario and Standard had been followed, Leadville would have commanded all the money it would require for the legitimate development of its resources.

If Messrs. Roberts, Chaffee, Tabor, Moffatt,

Potter, De Kay, Keyes, Daly, Elkins and their associates from California and Colorado had not been such—that is to say, if they had only acted—well, if they had behaved differently, how much better they would have stood with their friends, the public and their own consciences.

If there was some way of punishing the swindlers, who have robbed the New York public by "mining deals," how much more confidence would have been felt by investors when good mining properties were offered to them.

If—well, there is much virtue in an IF.

SOMETHING ABOUT MINES.

THE BULWER MINE OF BODIE.

A correspondent asks us about the Bulwer mine. It is under the same management as the Standard; but it seems to us the public has been unfairly dealt with in the matter of this property. There was one vein of very high grade ore in this mine. It averaged \$182 to the ton. Enough ore was taken out to build a mill which cost \$30,000, and to run the mine without levying an assessment. The ore was worked in the Bodie Mill, but on the discovery of the last bonanza in the Bodie work was stopped, of course, on the Bulwer ore; but the impression was left, by the management, that there was an abundance of rich ore still left in the mine. The stock was sold on this market at prices varying from \$10 to \$14 a share, purchasers being confident that when the mill got to work Bulwer would pay handsome dividends, at the very least, 25 cents per share. Last spring some 30,000 shares were sold on this market at the high figures at which time there was every reason to believe the officers and insiders knew that all the rich ore known to be in the mine had been exhausted. There is not much likelihood of an assessment on the Bulwer, as its mill is used by the Standard, and there will always be sufficient custom work to pay the running expenses of the mine, but we doubt whether it will ever be a dividend paying property. If there was a consolidation of the Bulwer, Belvedere and Consolidated Pacific, and if \$15 ore could be made to pay, it is possible that the consolidated companies might pay some dividends, if the management was honest. The Standard, which is, and promises to remain a splendid mine, has been injured in its reputation by its connection with people who have been manipulating Bodie and Bulwer stocks on this market.

THE BORTAIL.

Why don't the officers and stockholders of this company deal in its shares on the Mining Exchange? Large blocks of the stock are held by well known Brooklyn capitalists. The territory belonging to the company is large and valuable. It has a hundred and twenty stamps in operation, and the most powerful steam pump anywhere east of the Comstock. It is a stock that would command a value, once its merits were known. But, as we have said, its stock is closely held and the owners do not seem to care to have it speculated in. Ex-senator Chaffee is one of the large owners, which is the only bad thing we know of in connection with this company.

This mine has paid few dividends, not having averaged more than 25 cents each year. It has lately got into richer ore. That is to say, it now averages \$14 to the ton, where formally it averaged only \$7 to the ton. It has several rich claims which are not yet worked.

KINGS MOUNTAIN.

What has become of the stock of this company? It was one of the pets of Trask and Francis. Gov. Curtin is president of the company; and at one time there was a good deal of interest in the

mine. John Mackay was at one time a director; but for some time there have been no dealings in the stock. Can the mine have petered out? will Trask and Francis answer? In our list of Chat-tel Mortgages, published this week, may be found the name of this company, it is also represented in our Judgment columns. This does not look particularly cheering.

CENTRAL ARIZONA.

This much manipulated property is very quiet just now. It is said that over a hundred thousand dollars was paid out to the brokers who had this stock in charge. The mine itself was a good one, and if it could be worked would be a valuable one to-day. It is situated nine miles from water. An attempt is making, however, to get water to the mine, but it has to be forced up a somewhat steep grade. Should water in abundance be supplied there is a large body of low grade ore to work. Probably outside of the Black Hills there is no larger body of ore anywhere in the country. The Wall street manipulation has been unfortunate, and has left the impression that the mine has been worked as a stock speculation rather than as a business enterprise. It was originally owned by some six great grain speculators in Chicago, and it was they, it is said, who made the market for it in the "street" in order to get rid of some of their stock at high figures.

THE COPPER KNOB.

We would advise investors to leave this stock severely alone. As yet no property on the Atlantic coast has proved profitable to shareholders. From the Merrimac Mines down to the Findley and Dahlenega they all have proved disappointments. A great deal of intelligent effort has been made to develop paying properties in Virginia, North Carolina, Georgia, Maine and others of the Atlantic States, but while promoters may have made some money investors have lost theirs. It is useless to reason about this matter, this is the simple fact, as those who have put their money in a hundred such ventures can testify. The Copper Knob is a North Carolina property, and Mr. Brandeth, its principal promoter, was also conspicuous in Granville and Bertha and Edith. This ought to be sufficient.

BULL DOMINGO.

Governor Dorsheimer, one of the directors and a very large stockholder of this mine, is just back from Silver Cliff, and speaks in glowing terms of the Bull Domingo. He says there is enough ore on the dump and in sight to keep the concentrators at work for a year ahead. It is proposed to double the number of jigs, which will take about \$40,000. Dividends are promised by the first of January.

THE SILVER CLIFF.

The stock of this company is weak and has sold as low as \$2.50 per share. The syndicate price of this stock was \$4, and the original subscription price to the public was \$7.50. A new mill is being put up, and Mr. James R. Keeue, has, it is said, offered a large bonus to the builder if he will have it ready by the close of the year. Unless all the reports are deceptive, the class of mines represented by the Silver Cliff are likely to prove good paying properties, but there are some "queer" names on the direction of Silver Cliff.

THE ONTARIO.

This mine has a magnificent history. Those who subscribed \$20 a share for it in May, 1877, have had all their money paid back to them and \$10 besides. The mine is likely to continue for years to come. There is one cloud in its future, and that a serious one. It may become a cistern. It is situated in a valley, and drains the higher surrounding country about. The water problem is a serious one now, but the streams may change into torrents, and then good bye to the Ontario.

THE PALMETTO.

This is a San Juan property in which the Dick

inson Brothers, of this city, are largely interested. It is not yet on the market, and perhaps may never be, as the owners consider it so valuable that they think of running it as a private enterprise. From all accounts it is one of the most promising mines of the country. The ore is silver with a large percentage of gold. A mill is under way and will soon be completed. There is every reason to believe that certain districts in the San Juan region will equal the Comstock in mineral wealth.

THE COURSE OF PRICES.

"How do things look?" asked the writer, of a very conservative banker.

"Treacherous—due partly to political causes. The sudden change of front in the street is wholly due to Gould and Sage. They have been feeding the street with their Western stocks for a year past. Keene thought he would take advantage of the dubious outlook, and he sold Kansas and Texas, Wabash and Hannibal, while he supported Erie and St. Paul. The pool in the latter stock have practically got a 'corner' on Gould, who is short of St. Paul. Gould saw something must be done, and he jumped in and put the market up, forcing Keene and the whole 'street' to 'cover' on their stocks. Jay Gould, I hear, has gone West ostensibly to settle up the difficulties between the Wabash and Burlington."

"That can hardly be," said the writer; "for I saw Gould at the office of the American Telegraph Company on Thursday at three o'clock."

"That's strange, for only an hour ago I heard David Dows say, 'I hear the "little joker" has gone West to "play bluff." I supposed Dows meant Gould, of course.'

Said an ultra-conservative Pin street banker, "My richest clients are very dubious about the future. They believe in the higher prices, but they remember that last spring the price of securities were put down without rhyme or reason. That depression showed them that they were at the mercy of daring operators. Then the political future is so uncertain that I am sure that investors are keeping out of the street. It is understood that the Park Bank has sold \$800,000 worth of government bonds, and has withdrawn a large part of its circulation. If this movement to withdraw the National Bank issues continues, that means contraction. Then, perhaps, the fall in governments may alarm foreign investors and help check the drain of gold to this side."

A broker, who is well known in the literary world, said, "I think we have seen top prices for the present. I hear, on good authority, that Gould and Sage have together made \$32,000,000 during the past year. Sage owns up to \$12,000,000 himself. Those who ought to know, credit Gould with \$25,000,000 cash ready to use to put the market up or down."

"What will Vanderbilt do when he returns?"

"He will strike hands with Gould. The market will have another fit of "blues" before the 12th of October, and a partial panic if Ohio goes Democratic.

THE STOCK MARKET AND THE PRICE OF IRON.

To the Editor of THE REAL ESTATE RECORD:

Is it not true that the price of iron in some way determines, or at least indicates, prices on the stock market? A book has been written to prove this proposition. And has not the course of the stock market for the last year confirmed it. The price of iron began to go up in the spring of 1879—so did stock values. The summer of 1879 put iron at higher figures—ditto stock values. The boom commenced in the fall of 1879, when iron reached its highest figures. The tumble in the prices of iron commenced early in the spring of 1880—stock values immediately followed suit.

Although the country was prosperous during last spring, the price of stocks kept on the down grade until the middle of June. Then there was a rally and a better market all summer, which exactly corresponds with the iron market. Within two weeks past, iron is again for some reason weaker, and the result is at once seen in the stock market. Everyone in the iron trade expects to see a good market this fall. If so, I predict higher stock values.

September 28.

CURIOUS.

THE RIDGE ROAD.

To the Editor of THE REAL ESTATE RECORD:

Will you not call the attention of property holders on Washington Heights to the condition of the Ridge Road, running from One Hundred and Seventy-sixth street to Inwood? It is as bad as any back country road in Arkansas. Since its construction it has been washed by the rains and, has, I judge, never been repaired. For natural beauty nothing can equal the Washington Heights property. The public have been kept in ignorance of its picturesqueness and natural advantages, but it was supposed that the two roads, which it was agreed General Vile should lay out, would make our citizens acquainted with this region. The Ridge Road has been completed for some little time past, but the drive, which gives the river views, has not even been commenced. Instead of a favorable, most persons now using the Ridge Road would get a most unfavorable idea of this really desirable part of Manhattan Island. Will you not call upon Mr. Charles O'Connor, Mr. Hosea Perkins, and, especially that public spirited editor, Mr. James Gordon Bennett, to see to it that the road itself is not only kept in repair but that the private grounds beset arranged as to give visitors a pleasant impression of the neighborhood? The whole road and the adjoining fields are in bad repair. This, however, cannot be said of the grounds of Mr. Hays, President of the Union Bank; they are in a splendid condition and the buildings are charmingly located for river views. Their owner should be credited with a willingness to do something for the public. I am sure you have only to call the attention of the property-holders of Washington Heights to this matter to have it attended to.

KNICKERBOCKER.

New York, Sept. 28.

TWO GRAND HOUSES ON FIFTY SEVENTH STREET.

Two first class houses on the north side of Fifty-seventh street, between Fifth and Sixth avenues, numerically designated as Nos. 35 and 37, have just been finished by Messrs. E. D. Connolly and Sons, and, so far as interior finish and exterior appearance are concerned, they ought not only to be visited, but studied as to detail by every one desirous of purchasing a really grand residence. The two houses are each 25x91.6, four-story brown stone and basement, with bay windows on the first and second floors. Observed from the southern side of the street, they at once arrest the attention of passers-by, owing to their height as well as the careful manner in which the brown stone has been carved and cut so as to add to the pleasing exterior. On going through the house, the widely constructed basement makes at once a very favorable impression upon the visitor. Ash and cherry there alternate, and the numerous closets are all provided with double moulding. The laundry, the kitchen, the pantries—all contain the very latest of improvements; porcelain wash-tubs in the laundry, double refrigerators in the halls for fruits and meats, dumb-waiters and lifts, all in their appropriate places, without in the least decreasing the width of the hall or basement proper. It should be mentioned, in connection with this part of the house, that Mr. Connolly has constructed an independent iron sewer for these houses, and that the details of the lower parts of these houses have been as carefully attended to as the upper parts.

The dining-room on the parlor floor, trimmed with mahogany, is the most unique that has come under our observation in recently constructed houses, the buffet alone, being a study in itself, for the sake of its elaborate and artistic carving, with various designs illustrative of food served on the dining table. The effect of this room, with its beautiful encaustic tiles, ornamental hearth and the floor inlaid with mahogany and ash, is strikingly elegant. Flanked, as it is, by two hutler's pantries, all provided with statuary marble and ample closets for silverware, it presents a complete picture of comfort and luxury

which cannot be called gaudy. It is artistic and excellently designed and executed. The back parlor is trimmed in walnut, the front in rosewood, with ample and well carved sliding doors, which, in fact, are to be found all over the house thus economizing a great deal of room. The newels and twisted balusters are all of mahogany, the Cathedral glass, over the front doors, throwing a peculiarly pleasant light over the main hall. The second floor, arranged in ample chambers, is trimmed in walnut and cherry. Here, too, are encaustic tiles in the hearths with carefully selected designs, the saloon style of toilet-room dividing the front and backrooms with an ample supply of mirrors over all the basins and statuary marble everywhere. The third floor is in ash and cherry, constructed on the same principle as the lower floor. On the upper stories are servants rooms, with an ample billiard room in front, provision having even been made for the queue racks. Of course there are double stairways throughout these houses, those in the rear being for the use of the servants. Electric bells everywhere, dumbwaiters and lifts for trunks are supplied in both houses. It should be added that the timber for these houses has been carefully selected by Mr. Connolly himself, who takes great pride, as he has reason to have, in the manner upon which these houses are finished. He has expended a great deal of time and money upon the same, hut, located as they are on the best part of Fifty-seventh street, he will not be long in finding purchasers, who will pay him a handsome return for his investment. It only remains to be said further that Mr. J. G. Prague, whose reputation is so well known, was the architect who assisted Mr. Connolly in the designing of these excellent houses.

MR. BIRDSALL'S HOUSES IN HARLEM.

While the houses described above will no doubt be readily taken by capitalists, desirous of residing in the immediate vicinity of Central Park, there have been constructed recently in Harlem a few houses that really challenge investigation and criticism on the part of the most fastidious, and which can be had at what should be considered a very low figure. Mr. W. P. Birdsall, who, during the past few years, has built no less than forty-two houses in the section lying due north of One Hundred and Twenty-fifth street, has just finished two houses, Nos. 9 and 11 East One Hundred and Twenty-sixth street, which really defy competition. They are three story and basement brown stone houses, within a few feet of Fifth avenue, and built with all the care and supervision as to details that so much characterize the best modern built house on Manhattan Island. They front twenty feet on the street, and along with the extension cover sixty-four feet of the lot. Throughout these houses there are double floors, and from basement to the top every possible improvement is found that is generally looked for in houses of greater pretensions. Even in the basements, where the wainscoting is at least four feet high and where ash, ash-root and mahogany prevail, not the least detail has been overlooked that tends to make these houses exceedingly marketable. The hutler's pantries, the servant's stairs, the ample refrigerators are all there provided in a manner which shows careful supervision on the part of the owner and builder. The foresight of the owner in securing the newly patented picture rods from George H. Brown, in Walker street, ought to be followed up by other builders, who ought to take the same precaution as displayed in these houses against the walls being tampered with in the most reckless manner, as so frequently is the case, by those desirous of hanging up their pictures. Beveled glass has been used wherever required on the various floors, and the balusters, constructed, as they are, in excellent design, give an aspect to the main and upper halls exceedingly pleasing and cheerful. All of the stairs are of bardwood and ash, cherry and maple predominating through the house. Open fire places, lined with soapstone, are to be found on the various floors, while the hardwood mantels, artistically carved, add to the cheerful appearance of the various upper rooms. The plumbing throughout this house has been done in the most scientific manner. Fuller's improved faucets having been used throughout. The sashes and window frames are all of ash and cherry, and every possible detail of construction has been attended to in a manner deserving the closest attention of those desirous of purchasing a house honestly con-

structed, nicely arranged with all the modern improvements, in a locality that just now is coming to the front in a most rapid and extraordinary manner.

Since the above article was written, we are informed that Mr. Birdsall has sold No. 11, one of these houses, for \$20,000, to Mr. A. A. Esdra. This is just what we expected, in view of the numerous callers who examined the houses, when THE RECORD's representative visited them.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv and v of advertisements.

The Exchange Salesroom, during the past week gave ample evidence of increased interest felt in the real estate market by investors and operators. In fact, on Wednesday last, the room was crowded; the attendance being the largest seen on the floor of the Exchange since the Mutual Life auction sale. It was evident that a large number were on the lookout for bargains, and though the offerings were more numerous than they had been since the close of the summer months, they were not sufficient to satisfy all those desirous of securing eligible parcels of property. Mr. Harnett had the lion's share of the public sales, and his stand, both on Wednesday and Thursday, was surrounded by a crowd, containing many spirited bidders. Two lots on the south side of Fifty-seventh street, containing a two-story building, were sold by this auctioneer for \$12,000, and No. 411 East Fifty-seventh street, opposite, 17.9x100.4, was disposed of at \$9,200. No. 160 Grand st, 19.7x75, was sold by C. S. Brown, for \$12,500. No. 230 West Fifty-second street was disposed of for \$11,550, by Bleeker & Son, and Mr. John T. Boyd sold 617 and 619 Hudson street for \$16,400. Several other sales of minor importance were made by various auctioneers, details of which will be found in the list at foot. The foreclosure sale of the Buena Vista Stone Works, at the corner of Eleventh avenue and Sixtieth street, was adjourned by the Messrs. Bleeker for two weeks. Yesterday, also, there was a large attendance at the Exchange, and a few sales, as will be seen below, were effected. A house on Thirtieth street, 116 feet east of Ninth avenue, 20x98.9, a three-story brick dwelling, was secured by Mr. T. Donovan for \$6,917.

GOSSIP OF THE WEEK.

The market continues to retain a very firm tone, but transactions are not numerous as yet, though several offers have been made by various brokers on behalf of those desirous of taking advantage of the now expiring period of inactivity. Another month will see the end of political uncertainty, when immediate resumption of active operations in real estate is anticipated.

Some notable transactions, however, have been reported to us even during the past week, showing steady confidence in the future, whatever may be the result of the elections. The firm of L. & I. Phillips have sold a piece of Eighth Ward property for \$162,000, thus confirming what has always been said in THE RECORD in regard to the desirability of investing in a business section of the city that stands pre-eminent in the process of development.

The block lying between One Hundred and Sixth and One Hundred and Seventh streets, Third and Lexington avenues, comprising thirty-four lots, owned by Mr. Benjamin Richardson, has been sold by Mr. C. L. Meade to a number of Californians, for \$165,000. The title of this property will be passed next week, Mr. Chas. Peters being one of the purchasers, who propose to erect a market there.

Mr. Wm. H. De Forest is reported to have sold the northeast corner of Fifth avenue and Forty-ninth street for \$130,000. This property comprises 33.10x100 on the avenue, and one lot on the north side of Forty-ninth street. It is presumed that Mr. Kemp, of the Buckingham, has secured it.

Messrs. Riker & Co., of 998 Sixth avenue, in a letter addressed to us, confirm the sale of the eight lots on the southeast corner of Park avenue and Fifty-ninth street, six lots on avenue and two on the street, for \$83,000, alluded to in this column last week. It should be stated, in this connection, that the recent sale on the southeast corner of Fifth avenue and Seventy-fourth street, made for Mr. Kenyon Cox, was also conducted by Messrs. Riker & Co.

Messrs. Scott & Myers have sold two lots on the

south side of Ninety-sixth street, and two on the north side of Ninety-fifth street, 250 feet west of the Ninth avenue, for \$13,200.

About three lots (63.9) on the west side of Second avenue, 50 feet south of One Hundred and Thirteenth street, have been sold to Dean & Chamberlain, by Ex-Mayor Ely, for \$11,000.

Messrs. Lespinasse & Friedman have sold, for ex-Mayor Ely, one lot on the north side of One Hundred and Sixth street, between Eighth and New avenues, for \$7,250. The same firm have sold, for other parties, four lots on the south side of One Hundred and Forty-ninth street, 280 feet west of St. Nicholas avenue, for \$7,500.

The lots on One Hundred and Twenty-third street, reported as having been sold last week by Benner & Zeller, were 300 feet west of the Sixth avenue instead of First avenue, as erroneously printed.

Mr. Geo. H. Petrie has sold the house No. 2 East Fifty-third street, full width, three-story diningroom extension, to Mr. Howard Jaffray, for \$67,000.

V. K. Stevenson, Jr., has sold No. 20 East Sixty-sixth street, a four-story high stoop house, 20x75x100, to Mr. A. Stone, for \$34,000.

The action of the Board of Health in calling upon the Comptroller to notify lot owners that the shanties along East Sixty-seventh street must be removed within thirty days, gives general satisfaction to numerous builders and others now actively engaged in improving this section of the city.

The transfer of the Ninth Avenue Railroad Company's depot on Ninth avenue, near Fifty-third street, to the Eighth Avenue Railroad Company, the consideration being \$250,000, was recorded on Thursday. This is said to be preliminary to the transfer of the latter company's tracks from the Eighth avenue above Fifty-ninth street to the Ninth avenue.

The plans for the construction of Mr. Clark's French hotel, at Seventy-second street and Eighth avenue, have at last been filed. The cost of the building is stated at \$1,000,000. It will be eight stories high, of brick and Dorchester stone. A more detailed description of the building will shortly appear in these columns.

The New York City & Northern Railroad (West Side & Yonkers) is pushing along very fast. The caisson for the middle and last pier of the bridge over the Harlem River, which will connect the road with the Sixth Avenue Elevated Railway, has been put in place. It is the intention of the company to have the road open for freight traffic by November 15, and ready for passenger travel by January 1, at the latest. The road will then run from the One Hundred and Fifty-fifth street station of the elevated railway to Brewster's, a distance of about fifty miles. It will there connect with the New York & New England Railway. There will be stations at North and South Yonkers, which are from one to two miles from the city, with stages to connect with the centre of the city.

The following are the sales at the Exchange Salesroom for the week ending Oct. 1:

** Indicates that the property described has been bid in for plaintiff's account:*

Grand st, No. 160, n s, 25.11 w Centre st, 19.7x75, two-story frame (brick front) store and dwell'g. John G. Wendet. Partition sale.	\$12,500
Hudson st, w s, 19 s Jane st, 37.4x53.3x31x55, Meta J. B. Johnson, a defendant. (Amount due, abt \$4,500)	16,400
Monroe st, No. 98, s e cor Pelham st, 37.6x127, four-story brick store and tenem't and four-story brick tenem't in rear. H. Hoops. Partition sale	10,136
Rutgers st, No. 53, e s, 75 s Monroe st, 25x100, five-story brick store and tenem't and two-story brick shop in rear. Herman Kahrs, a party in interest. Partition sale	10,900
*West 1th st, Nos 232 and 234, s s, 35x95x30x95, Aug. Widdel. (Amount due, abt \$3,600)	14,350
27th st, s s, 175 w 1st av, 50x98.9, one and three story brick stables. John Matthews. Partition sale	9,650
*52d st, No. 230, s s, 385.6 e 8th av, 14.6x109.2x44.6, irreg. Wm. C. Lester. (Amount due, abt \$15,000)	11,550

BUILDING MATERIAL MARKET.

BRICKS.—An absence of anything really new is shown on about all the reports obtained upon this market. The tone continues cheerful and healthy, former rates are obtained, and the demand is full enough to exhaust the supplies, about as fast as it comes to hand. Dealers as yet make no pretension to accumulate winter supplies, but when a good attractive cargo is available they are rather inclined to take it in out of the cold, and this with the continuation of a comparatively full consumption keeps the arrivals pretty much all in motion. As for a week or two past "Up Rivers" have the first call on a range of say \$4.50@5.00 according to quality, but there is a fair proportion of Haverstraw selling, and these range at \$5.00@5.50 per M. A few odd Jerseys come in, but they are in the main special brands, and sold before arrival. Pales have found a somewhat irregular market, but still were sold pretty closely to the supply, and ranged at \$2.75@3.25 per M, according to quality. As near as can be learned there is no unanimity of action among the makers, about the stoppage of production, but the colder condition of the weather and liability to frost is likely to settle this matter very soon, without the necessity for agreement. Front bricks continue to sell very well, and are generally commanding full former rates on all first-class grades.

The following extract from the interview of an *Inter Ocean* reporter, with a prominent manufacturer of Chicago, gives some idea of the brick trade in that city, and may prove of interest to our dealers here:

"You personally have found prices satisfactory?"

Inquired the scribe.

"Yes, if you wish, take my own case, for example. I shall manufacture this season 13,000,000 brick. I have already delivered a little over 6,000,000, and have on hand about 5,000,000, and hope to make 2,000,000 more. Of the 6,000,000 already delivered the price has averaged about \$7, and this average has been brought up by the large prices received for sewer brick. Of 5,000,000 on hand 4,200,000 are sold at from \$6.75 to \$7.50. For common I have one contract for 1,500,000 at \$6.75, of which not a brick has been delivered. Now this is a fair sample of the condition of every brickmaker in Chicago."

HARDWARE.—Pretty much all the reports are of a strong and cheerful character again, and dealers appear well satisfied with the position. Many of the more recent buyers have handled larger amounts than anticipated, and there is every reason to expect that the interior will absorb a full supply. Local wants are also large and general. On prices the average tone is firm, and manufacturers generally claim to be able to resist any downward turn. On Copper Rivets and Burs there is an advance to 35 per cent. discount instead of 45 per cent. as heretofore. The manufacturers of Cast Butts have changed discounts to 55 per cent. Loose Pin Japanned and Silver Acorn; 60 per cent. on Parliament, and 55 per cent. on Mayer's.

LATH.—A strong and advancing market is still reported. Demand does not make much display at the moment, but sellers who have anything to offer find that there is a great many customers looking for stock, and the anxiety to secure it is sufficient to keep bids on the upward turn. Since our last, sales have been made at \$2 per M, and reports are current of \$2@10c. more having been paid. Receivers continue to report strong accounts from primary points, and are very confident that no reaction on values can take place during the balance of the season.

LIME.—There is a strong market at about former rates, with moderate supplies available of all kinds. Accounts from the primary points also seem to indicate that shipments cannot greatly increase, and agents here talk somewhat buoyantly.

LUMBER.—The local distribution trade gathers volume to some extent, with promises of a still further increase. For building, manufacturing and box-making the daily sales are very fair, and besides this many dealers are furnishing assortments to small operators at suburban points, whose limited capital will not permit them to purchase entire cargoes, etc., and especially so when the specification contains sizes unsuited to their particular line of trade. More hopeful signs are noticeable on the export market also though, as some dealers assert, there is no certainty about the shipping trade until contracts are closed. To meet the present call there is quite enough stock, but this accumulation against future wants is moderate, and in some cases very small, with evidences of some anxiety among dealers to secure contracts. This is more particularly directed toward varieties likely to be first shut off by the closing of navigation, or such grades as may surely be calculated upon as scarce. Advices from the primary points North, East, West and even South, are all quite firm, and in a few cases show great strength.

Prices, according to the reports of most receivers, could scarcely become plenty enough this season to satisfy the outlet waiting for it, and it is probably useless to add that all quotations on values are full and strong. Some of the representatives of the principal Eastern millers are constantly refusing orders owing to the impossibility of meeting the demands of buyers either on size of stuff or time of delivery, and this in the face of occasional bids at almost fancy prices. There is in the meantime a good sale for anything in the way of attractive random and \$17@17.50 are inside rates with really not many sellers below \$18, and on specials the cost ranges up as high as \$22 per M.

White Pine is moving without much of a flurry or excitement, and occasional disparaging remarks are heard. In a quiet sort of way, however, a great deal of stock finds sale and only a few of the larger dealers are making any additions to the accumulation. It looks as though there had been too much "holding off" on this class of stock. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do.; \$15.50@16.50 for box boards; \$17@17.50 for do wide and sound do.

Yellow Pine shows no great change. Not much stock is wanted for immediate delivery and the supply here has few customers, but there is some call from exporters, contracting for shipments direct from the sources of production, and also more or less demand for special cuts from local consumers. Prices on the general range remain about as before. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$16@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwoods are firm in price and have an average demand with not many desirable offerings available. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. cills, \$18@20 do cherry, \$45@47 do.; white wood, 1/2 and 3/4 inch, \$25@27.50, and do. inch, \$33@35 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

Shingles still sell very well on home account and also meet with some export call and all grades are reported steady. We quote Cypress at about \$6 for saps, and \$8.50@9 for hearts; pine shipping stocks, \$4 for 18-inch, and Eastern saw grades at \$2.50@4.50 for 16 inch as to quality and to quantity. Machine dressed cedar shingles quoted as follows: For 30-inch, \$16@22.25 for A and \$23.75@33.25 for No 1; for 24-inch, \$6.50@16 for A and \$16.75@23 for No. 1; for 20-inch \$5@10.50 for A and \$11.25@11.75 for No 1.

At the yards there is a full seasonable business at steady rates and the situation generally cheerful and encouraging.

From among the lumber charters recently reported we select the following:

A Br Barque, 719 tons, from Picton to Liverpool-Lumber, private terms; a Br barque, 699 tons, from Mirimichi to a direct port United Kingdom, deals, 65s; a new Br Ship, about 1,110 tons, from Mirimichi to Bristol, 63s; a Br barque, from Doboy to the United Kingdom, or Continent, sawn timber, £5 12s 6d; a Br barque, 410 tons, from St. Simon's Island to Montevideo or Buenos Ayres, lumber, \$20 net; an Am schr, 161 tons, hence to Jacksonville, general cargo, private terms, thence to St. Vincent, lumber, \$12; an Am schr, 197 tons, hence to Wilmington, private terms, thence to Bermuda, lumber, \$10; an Am schr, 199 tons, hence to Jacksonville, railroad iron, \$1.50, thence to Porto Cabello, lumber, \$12 and port charges; a schr 280 tons, hence to Wilmington, salt, private terms, thence to Greytown, Nic., lumber, \$2.00 and foreign port charges; a Br brig, 186 tons, from Charleston to

Jamaica, bulk cargo shingles \$2.75 per M, balance lumber \$10; a schr, 131 tons, from St. John, N. B., to Providence, lumber, \$2.50; a schr, 300 M lumber, from Brunswick to Balimore, \$4.25; a schr, 220 M lumber, from Port Royal to Boston, \$7.50; a schr, 300 M lumber and limber, from Savannah to New York, \$7; a schr, 110 M lumber, from Jacksonville to New York \$9, option of Philadelphia, \$4.50; a schr, 300 M lumber, from Pensacola to New York, \$9; a schr, hence to Fernandina, stone, \$1.50, and back with lumber, \$7; a schr, 180 M lumber, from Jacksonville to Philadelphia, \$8.50; a schr, 180 M lumber, from Cedar Keys to New York, \$9; a schr, 250 M lumber, from Pensacola to New York, \$9; a brig, 250 M lumber, from Brunswick to Philadelphia, \$6.75; a schr, 350 M lumber, from Pensacola to New York, \$3.25.

Exports of lumber from the port of New York:

	This Week, feet.	Since Jan. 1, feet.
West Indies	604,666	22,244,834
South America	729,407	14,281,618
East Indies, Africa, etc	275,347	5,559,449
Europe, Continent	32,500	2,398,646
Europe, United Kingdom	98,600	6,791,765
Total	1,730,520	51,236,312

GENERAL LUMBER NOTES.

STATE.

The Albany lumber market, for the week ending September 28, is reported by the *Argus* as follows:

A steady trade in Pine Lumber is reported at our quotations, which have not undergone any change during the week. Receipts continue free and stocks are in good assortment. Shipments from the District to Long Island and the East are active as shown by more than the usual number of sailing vessels at the Lumber District docks taking on cargoes. One lot of 700,000 feet of common box has sold within a few days for down the river.

Coarse Lumber shows no change in any feature of the market. Receipts continue very light for want of water at the mills.

The receipts of Lumber by lake at Buffalo for the week are 3,920,000 feet; by rail, — cars. At Oswego, 6,819,000 feet.

The receipts at Albany by canal from the opening of navigation to September 23d were:

	1879.	1880.
Bds & Sctg ft. Shingles, M. Timber, c.f. Staves, M	216,150,100	8,215
	275,211,500	3,190 5,400 257,000

Freights from Bay City to Buffalo and Tonawanda, \$2.25 per M. feet; from Saginaw, \$2.37. From Buffalo to Albany \$2.50; from Tonawanda to Albany, \$2.40 per M. feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 per M. feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$2.00. From Ottawa to Albany \$4.00 per M. feet.

River freights are without change.

THE WEST.

[Special correspondence of REAL ESTATE RECORD].

CHICAGO, Sept. 29, 1880.

The present week has been a rather quiet one at the cargo market in this city, though the sales have averaged from a dozen to eighteen loads per day. The arrivals continue free, and the market is well supplied with cargoes. For the past week or ten days the buyers have been chiefly confined to the city dealers, and as many of these have already as much lumber on their docks as they can take care of for the present, they do not buy quite as freely as would be desirable to the commission men. Up to this time, however, there has been no decline in the prices quoted, and it is believed that no material concessions have been made. There has been some talk among cargo buyers about the probability of a drop in prices, and some have even gone so far as to predict a reduction of from 50 cents to one dollar per thousand through the list; but the prediction has not been realized yet, and among the non-conservative operators it is not now looked upon as likely to be. There is no particular desire felt even on the part of buyers to force prices much, if any, below their present range, it being well-known that any such movement would prove more injurious to the yard men in the weakness that it would inevitably produce in their prices, than to the sellers of lumber afloat. For this reason there is no great pressure brought to bear upon the brokers in the interest of lower prices, and no attempt is made, as frequently happens earlier in the season, to get up an organized "bear" movement. It does not follow from this that the prices of lumber are at all certain to keep up. Other causes, such, for instance, as the arrival of a very large fleet, and the consequent temporary over-supplying of the market may lead to a small reduction, and possibly pave the way to a more serious break. Still, such a thing is now looked upon merely as a possibility, and by many only as a very remote one. Most of the manufacturers

have made money pretty freely this season, and are therefore in a position to hold their surplus stock, if they find there is danger that they will not be able to obtain current prices, and undoubtedly most of them would not be long in making up their minds what to do in the event of a break occurring.

The transactions to-day afford no opportunity of changing the quotations printed in the last communication to THE RECORD from this point, except in the case of shingles, which have been bringing higher figures for several days. As will be noted from the list following, standard shingles are now worth \$2.40 @ 2.50, and extras \$2.60 @ 2.75. The demand for shingles is excellent and has been so all the season. This fact is due partly to the increased trade in them from the yards and partly to the limited supply. The receipts to this time are only about equal to those for the same portion of last year, and as there was less than the usual amount on hand to start with at the beginning of the season, the dealers have had some difficulty in keeping a fair assortment in their yards. Lath are steady and slightly firmer than they were. As before stated, the remainder of the list requires no revision. As far as can be discovered the prices named are those which actually rule, though it may be that slight concessions are made privately. But if so, they are not general enough to form a fair basis for a change in the list.

Green joist and scantling	\$9 00@ 9 50
Green boards and strips, common	11 00@11 50
Green boards and strips, medium	12 00@14 50
Green boards and strips, good to choice	15 00@18 00
Standard Shingles,	2 40@ 2 50
Extra shingles	2 6 @ 2 75
Lath	1 75@ 1 85

Lake freights are a trifle higher for grain cargoes, but the slight change made has not extended to the lumber-carrying fleet, and the rates are the same as they have been for some weeks. Shippers are using about all the carrying capacity they can get, in anticipation of an advance before long, that may force many of them to discontinue shipping altogether. How soon such a move will be made cannot now be determined.

The general situation of trade at the yards has not changed much. The demand for lumber continues heavier than last year, the increase being in about the proportion heretofore noted. It is, in fact, pretty definitely settled now what the fall trade is to be, and operations generally are proceeding upon the assumption that the relative increase in the business done, as compared with last year, will not vary much from what it is now. Advices from interior points, as well as from competing markets, are encouraging, and go to show that there is a large consumptive demand yet to be supplied as farmers begin to see their way through the fall work, they are looking out for lumber to make improvements and repairs, and the retailers who supply them, are, of course, buying to some extent with these wants in view. Orders are coming in as fast as the dealers can fill them, and in some cases faster. Some difficulty is experienced in shipping, owing to a lack of cars upon some of the roads, but the annoyance is not so great as it was a few weeks ago. Most yards have an accumulation of orders on their books, and they do not expect, and do not particularly care to get rid of it until the season closes. In a word it may be said that trade is as good, and the outlook as promising, as at any time this year.

As to prices, there is very little to say that has not already been said. They are held firm upon the basis of the August list, it being understood that this is to be taken with allowance enough to cover the concessions that are made upon such grades, as some of the dealers hold rather more of than is desirable. There is considerable disposition shown to cut prices in this way, though it has not extended far enough yet to produce a quotable change in the figures. It is hoped that the advance of the season will correct this slight evil, and ultimately bring the trade to such a degree of firmness as will lead to a demand for another price list meeting and a higher list of prices.

The supply of lumber in this market is ample for all the requirements of the trade. It is expected that the coming inventory of stock will show an increase of about 100,000,000 feet over last year, but no complaint is made of the excess, nor are any fears entertained apparently that it will prove a stumbling block to the trade. It is not easy, even with this large increase to get dry lumber suitable for shipping, and in order to keep orders moving it is necessary for the operators to do considerable trading around among their neighbors. This confidence in the ability of the trade to take care of the stock that is or will be available this season extends to all important markets in the Northwest, proving that the activity and firmness here are watched by similar conditions elsewhere.

SAGINAW VALLEY.
Lumberman's Gazette.

There has been no interruption of the steady confidence prevailing in this market throughout the season. The past week has been marked by no heavy transactions, though sales have been numerous at prices quoted. A sale of 25 M feet, 3 inch upper at \$45 cash here, is reported.

Freights continue at \$2.25@2.50 from Bay City and East Saginaw to Buffalo and Tonawanda, and \$1.75 to \$2 to Ohio ports, outside figures being from Saginaw.

The weekly review of the general situation by the Chicago Northwestern Lumberman furnishes the following:

From Philadelphia we learn of a fairly active demand for nearly all kinds of lumber, with thick uppers in good request at full and advancing prices. Yellow pine is in light receipt and spruce difficult to obtain, from the continuance of the drought and consequent scarcity of logs in the northern and north-eastern waters, while the usual supplies of pine from the Susquehanna district are restricted from the same cause. From personal conversation with parties well posted regarding the operations at Williamsport and Lock Haven, we learn that the hung up stock of that section will reach from 125,000,000 to 150,000,000 feet, the recent rise in the streams being caused simply by a thunder shower, which passed away too quickly to be of benefit except to such logs as could be quickly reached, of which not more than 30,000,000 feet were brought within reach of the mills in place of 50,000,000, as at first estimated. Philadelphia and Delaware buyers have appeared on the Chicago and Michigan markets during the week, seeking stock to make good the shortage caused by the condition of affairs upon the Susquehanna. Albany reports a quiet market at firm and unchanged quotations. Stocks are ample and in good assortment, with a fair demand, while no large lots are reported in the sales. The receipts for the first time this year have fallen off, the first week in September showing a reduction as compared with the corresponding week of 1879, the total receipts of the season, however, aggregating 33½ per cent. more than those to a corresponding date last year. Northward, we find the mills on the Connecticut River and in Maine still waiting for logs, and the water, which, while supplying them, will enable the mills to start up. This state of things has had a decided effect upon the trade in spruce and hemlock throughout the entire East. Burlington, Vt., reports a good outlook for fall trade, with prices on all descriptions firm. This point feels the influence of the Northern drought, in its effect not only upon Maine and the Connecticut, but in those portions of Canada which are similarly situated as regards a lack of water. Spruce is particularly scarce. The Canadian market is quiet, with few sales reported either in lumber or timber. At Quebec there are more buyers than goods reported, with good grades of timber held at higher rates than buyers think they can stand or at present inclined to pay, yet with holders firm in their views. At Ottawa, the sales of the season, combined with contracts ahead, have about killed anything in the line of quotations, for want of stock to offer.

Boston has an active market with an increasing firmness, yet no advance in price. A fair demand for the African trade is reported, and the yard trade is reported brisk. Western pine is firm, but no higher than last week. Eastern grades are scarce, and higher by from \$3 to \$5 on 4x12 lengths. Southern pine is firm and advancing, with receipts for the week of 1,100,000 feet. Turning West, Toledo has been blessed with "Fair week," and the usually resulting quietude in trade, but with an aggregate of sales quite satisfactory. Stocks of dry lumber are small, and held firmly at quotations, as, indeed, are all lumber stocks. Detroit wants more stock for its winter use, and, with a good demand at full prices, does not care to urge sales.

Saginaw and the Lake Huron shore report all the firmness of the past, with a continued scarcity in the better lines of stock, but with common grades in fair accumulation. Shingles continue active and firm, with a present prospect that the aggregate of the season's cut will fall short of last year's figures. The woods exodus has commenced, and a strong endeavor will be made all over the state to condense two winters into one in the amount of stock which will be got out. The experience of the unfavorable conditions for logging which produced the crop of last winter, shows us in advance what may be expected as the result of an ordinarily favorable winter. It would be useless to advise moderation in the amount to be cut, for every logger would imagine that the advice was intended for t'other fellow, and that he must strain every nerve to put in the last log. About three years more will wind up the operations of all but about 60 of the t'other fellows, and some now sanguine operators will wish they had taken the advice to themselves. Several of the largest holders of pine lands will do no logging this winter, realizing that stumpage, which has doubled in value during the past year, will again double itself in the next two years, if not in the next 12 months. We are assured, by those fully competent to judge, that our recent estimate of 50,000,000 feet of pine now standing in Michigan, is too high by 20,000,000 feet. If this be true, eight years is the outside limit of the present rate of cutting.

The markets of the West are active and firm, at increasing values, and from all parts of the Mississippi river we get statements, which are so uniform in their character that we may condense them into one broad assertion that, at every point, trade is good enough to please the most exacting, while the lower river points are finding a difficulty in getting needful supplies. There will evidently be more logs left over in the upper streams than has been cal-

culated upon, and the quantity will reach in the neighborhood of 300,000,000 feet in the Chippewa and Black rivers alone. Wisconsin lumbering operators are making an active commencement, and a severe contest may be expected between the Wisconsin and Minnesota loggers, in the endeavor to see if they cannot denude the forests of these sections as quick, or a little quicker, than the Michigan men do theirs.

LUMBERMAN AND MANUFACTURER, {
MINNEAPOLIS, Minn. }

Chicago has a business of 25,000,000 feet per week and is making addition to it daily with prices firm as a rock. St. Louis is selling 5,000,000 feet per week without effort at quotations. Hannibal is close behind her and makes no concessions to anyone. Davenport, Clinton and Dubuque are handling a trade far in excess of last year's business, and all of these places are discussing a farther advance. Minneapolis, Stillwater and Eau Claire are happy in having all the orders they can fill. Neither of these places desire to change their lists, but no one is hunting after trade or cutting prices on anything.

Reports from the Southern States show an unusually brisk demand for lumber, both on shipping account and domestic consumption. Great complaint is made of the enormous freights demanded by the lines running north from Tennessee, by which the business of the Ohio valley is forced north to Michigan for nearly its entire supply. Business in Florida and from there to Texas is in better condition than ever before. The heavy cotton and sugar crops enable planters to improve liberally and the lumber trade expands accordingly. A subscriber at Vicksburg says, "We can't handle any more business than we have got."

The Eastern States are drawing heavily on Canada for a supply. One shipment of 8,000,000 feet is reported. The New York, Boston and Albany markets are favorably elsewhere. Choice lots of uppers now being \$38 at Saginaw and are scarce at that.

Immense preparations are being made all along the line from Bay City to Minneapolis for log cutting this winter. We warn our readers to look out for a market or a chance to saw their logs before cutting them. A hint to the wise, &c.

The Northwestern Lumberman has the following report upon the Chicago market for Hardwoods:

A visit to the yards disclose a continued vigorous trade. "Completely worked out," was the salutation one dealer greeted us with. During the past week men and teams from outside had to be pressed into service for the prosecution of the business. "Why," he said, "if it was in my power to sell the stock that is wanted in this city, but can't be had, I would retire from business in six months." Another dealer said, "We draw our supplies from seven states, and have several mills at our command, but our yard is undergoing a drought." Short stocks is the universal complaint, and at one large yard we saw a customer turned away who wanted a grade in maple that, ordinarily, is lying around loose. Some of the yards do not contain more than from one-third to one-half the stock usually piled at this season. One large yard, that last year at this time contained 2,500,000 feet of ash, now has barely 500,000 feet. The scarcity of this wood is discomforting the manufacturers of agricultural implements, and they are using maple and other woods in its stead. Cherry is perhaps the scarcest wood in market, but the demand for it promises to lessen. For some time it has been considered by furniture makers about the best wood to ebonize, but maple is now taking its place, and some houses are ebonizing walnut. The scarcity of whitewood is a special subject of comment with many. This unprecedented call for hardwood is not likely to let up for a while at least. Most of our woodworking industries are running to their fullest capacity; nearly all of our furniture manufacturers are advertising for extra help, and that means a larger consumption of lumber.

The state of trade at distant points is of a varied nature. In Baltimore, receipts of black walnut are quite free, and the demand has somewhat slackened.

In Louisville for the past few days the receipts of black walnut have been large, and the stock mostly of fine quality. There is no marked decline in prices, but some concessions have been made. The surplus supply has been shipped East.

THE EAST.

The Boston Advertiser has the following:

The lumber market is in a better position than for many years past, and, with a legitimate demand for seasonable consumption fully up to the supply offering, prices for nearly all descriptions continue to improve. This change in the relations of supply and demand, due to various causes, has been very marked during the last few months, and the prospects of a fairly remunerative fall trade, for both manufacturers and dealers, seem to be generally conceded. While there has been a material advance in prices from the lowest point of depression, yet these are not high, as compared with former years, when business generally was good, and real estate improvements were on a liberal scale. The latter have again started up, especially in the great manufacturing centres, while here in Boston there are now a greater number of building enterprises in progress than for a long series of years. The stocks and receipts of all kinds of lumber in this market are very moderate for the season, while the supplies to come forward from Maine and provincial ports during the balance of the shipping season are likely to be smaller than usual. So far as Eastern lumber is concerned, the manufacturers, for the first time in many years, seem to be complete masters of the situation, and are able to dictate prices to their customers instead of the latter making prices for them. The supply of both spruce

frame dimensions and hemlock boards is very short at the mills, which have not been able to run full time during the summer, owing to low water, while the receipts of logs from up-stream have also been largely curtailed from the same cause. Prices are now 40@50 per cent. higher than last year, and have advanced about \$2 per thousand feet since last summer. One year ago cargoes of 2x8@2x12 inch spruce plank were slow of sale at about \$10 per M., while to-day they are quick and sold ahead at \$15@15.50 per M. Rough hemlock boards, which last year were selling at \$8@8.50, are now worth \$11@12 per M. Canada pine is in good demand, but the receipts are now light, owing to an advance of about \$2 per M. at shipping points, which, added to the duty of \$1@2, makes the cost of the article laid down here too great for any profit. Moreover, there are at this season, in the Canadian and other provincial markets, an urgent call for deals for shipment to England. Prices of these now rule high, and manufacturers find it more for their advantage to turn their attention to this branch of trade than to cater for the American markets. Hence the fall imports of lumber from all points over the border will probably be small. The season has now arrived when considerable shipments are usually made to this market from New Brunswick and Nova Scotia, but thus far only a few cargoes have been received. Western pine lumber is in fair supply, but stocks are not large, as it is not now sent forward to commission dealers without regard to the condition and capacity of the Eastern markets, as in former times, but only ordered from here in lots as wanted. Prices are steady and very firm, but not much higher than last year, while the supply available for eastern shipment is growing less from year to year, owing to the enormous and rapidly increasing consumption of the Western settlements, which is continually opening up new and more profitable markets nearer to the producing regions of Michigan and the great Northeastern tier of forest growing states.

THE PROVINCES.

The Montreal Journal of Commerce says:

There is no new feature in the lumber market. Immense quantities are being shipped from the mills, which is principally for the States. As this season's manufacture is almost all disposed of, there is no change of prices to note. Never before were such preparations made to get out logs and timber, which may result in an over production unless the season should be unfavorable. The cost of getting logs will be at least one-fifth more than last season. Retail trade in this city is all upset, owing to the excitement of the Exhibition, &c. Advances from the Upper Ottawa report unusually heavy preparations for getting out logs the coming season, and high wages to shanty men consequently prevail. In St. John, N. B., the price of lumber has greatly advanced within the last two weeks. On August 1st, deals, which were selling at \$8.50 per thousand, were advanced by the middle of the month to \$9.25, from which they have gradually increased in price till now they stand at \$11.

The Toronto Monetary Times has the following:

A new lumber company, with a capital of \$1,000,000 has been organized. As the name "British Canadian Lumbering Company" indicates, it is composed of capitalists on both sides of the Atlantic. The principal office of the company is in Edinburgh, as a considerable portion of the stock is owned in Scotland. In Canada the principal office will be in Toronto, but there will also be branch offices at Quebec and at Midland. The Bank of Scotland will be the company's banker. The timber limits and lands in fee simple over which the operations of the company will extend are situated on the River Ottawa and the north shore of the Georgian Bay in the Muskoka and Parry Sound districts, and in the States of Michigan and Wisconsin, covering in all an area of about 1,300 square miles. These lands formerly belonged to the well-known firm of Cook Bros. and to Mr. Allen Grant, and have been transferred by them to the new company, in consideration of which they hold about half the capital stock, and will take a leading part in the management of the company's affairs. Already operations have been commenced by sending a large number of men up the Ottawa. The company have arranged to cut between 500,000 and 600,000 feet of timber on the Ottawa and 5,000,000 at Midland, and they will employ during the winter somewhere in the neighborhood of 400 men. For wages and supplies they expect to spend annually between \$200,000 and \$300,000.

FOREIGN.

The Rio News with Rio Janeiro dates to Sept. 5th, has the following:

Pitch Pine—There have been no further arrivals, and in view of the small supply afloat holders are asking higher prices.

NAILS.—Holders continue to make considerable display of firmness, and the offerings of stock are closely gauged to the current wants of the market. The demand somewhat irregular with buyers refusing to anticipate their necessities to any great extent, but still the outward movement of supplies is comparatively full, and there is apparently no great accumulation in first hands. We quote 10d to 60d common fence and sheathing, per keg, \$3.15@3.25; 8d and 9d, common do, per keg, \$3.40@3.50; 6d and 7d, common do, per keg, \$3.65@3.75; 4d and 5d, common do, per keg, \$3.90@4.00; 3d and 4d, light, per keg, \$4.65@4.75; 3d, fine, per keg, \$5.40@5.50; 2d, per keg, \$5.4@5.50.

Cut spikes, all sizes, \$3.40@3.50. Floor casing and box, \$3.90@4.65. Finishing, \$4.15@4.90.

CLINCH NAILS.

1½ inch, \$5.65@5.80; 1¼ inch, \$5.40@5.50; 2 inch \$5.15@5.30; 2½ inch, \$4.90@5.00; 3 inch and longer, \$4.65@4.75.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date

H. E. SEWALL & CO.—THE GENERAL CO.
partnership heretofore existing between the undersigned, under the firm name of H. E. SEWALL & CO., is this day dissolved by mutual consent.
Dated, New York, September 30th, 1880.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

H. E. SEWALL & CO.—THIS IS TO CERTIFY
that the undersigned have formed a limited Partnership, pursuant to the provisions of the revised Statutes of the State of New York.

1. That the name or firm under which said partnership is to be conducted is H. E. SEWALL & CO.
2. That the general nature of the business to be transacted is the purchase and sale of coal.

3. That the names of all the general and special partners and the residences of each are as follows: Henry E. Sewall, who resides in the City of New York, in the State of New York; Rufus R. Sewall, who resides in Keyport, in the State of New Jersey, are the general partners, and Anthony V. Winans, who resides in the City of New York, in the State of New York, is the special partner.

4. That the said Anthony V. Winans, the said special partner has contributed the sum of eighteen hundred (1,800) dollars in cash, as capital to the common stock.

5. That the said partnership is to commence on the first day of October, one thousand eight hundred and eighty, and is to terminate on the thirtieth day of September, one thousand eight hundred and eighty-five, unless sooner dissolved by mutual consent, in accordance with the provisions of the aforesaid statutes.

Dated this 29th day of September, one thousand eight hundred and eighty.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

C. W. SWEET,
NO. 137 BROADWAY

NOTES, POINTS AND FORECASTS.

Every body believes in a "boom," and in the highest figures of the year for securities some time before February 1st, 1881.

The exchanges during September show that there has been a falling off in business compared to the same month last year. This is accounted for by the extraordinary activity in the stock market last year. Judged by the exchanges, the volume of business is reduced nearly \$600,000,000.

The money market continues easy; and there is no prospect of an advance until stock speculation becomes more active.

Imports of merchandise show a heavy falling off—not one-half as much as during the early weeks of September—exports continue large: so no present stoppage of specie imports is to be feared.

Grain improves in price as the deficiency abroad becomes more and more marked.

Everybody is waiting for the October elections. Next Wednesday will see an active stock market, as prices will either go up or down in a very marked way.

"Chippers" and small brokers have had the market all to themselves during the past week. Big operators and the investing public are waiting.

Dealings in Western Union are very limited, awaiting the result of the elections. Gen. Grant's name has been suggested for President. He ought to be secured for the chief executive of the World's Fair.

From the contradictory statements put forth by the managers of the elevated roads, the outside public is led to believe these corporations are controlled by queer book-keepers. Jose F. Navarro and Cyrus W. Field are not fools.

Things look better in the real estate market. Weak holders were shaken out some time ago, and realty in and near New York is strongly held; but the uncertainty attending the Presidential election checks active operations.

The specie reserve of the country is gradually finding its way into general circulation, silver certificates and silver dollars being in greater demand all the time.

More stores on Fifth avenue above Twenty-sixth street. Several private houses have been converted into show-rooms for the sale of goods; and, more ominous than anything

that has yet occurred, a milliner has hung out a sign opposite the A. T. Stewart mansion, and just above Stewart's old house. We have said, more than once, in these columns, that Fifth avenue, between Twenty-sixth and Thirty-fourth streets, was pretty sure to become a business thoroughfare. Ladies who shop in carriages do not like to venture below Twenty-third street. That part of Broadway which runs along Madison avenue is fast becoming a densely thronged thoroughfare. As the retail business and population of the city grows, the crush opposite the Fifth Avenue Hotel will continually increase. The omnibus lines and street cars are continually becoming more numerous at that spot; and persons who drive their own teams prefer not to run the risk of collision or accident. Hence it follows that the "carriage" trade, so to speak, will seek some quiet avenue where costly, dainty and tasteful goods are made specialties. The fate of Fifth avenue below Twenty-third street, and as far down as Washington square, is more difficult to forecast. It will never be a fashionable thoroughfare for business purposes; and when the clubs move up-town, as they will do in the next five years, this part of the famous avenue will be given over to boarding houses, flats and eccentric businesses. But Fifth avenue above Twenty-sixth street is destined to become more and more a business thoroughfare.

THE SITUATION OF THE REAL ESTATE MARKET.

It is [about a year since the Real Estate market recovered from the depression that set in shortly after 1873, and while our weekly reviews keep our readers abreast of all that is transpiring in matters affecting realty, it will certainly not be considered out of place, at this season of the year, to take a retrospective view of the changes that have occurred, in order that the actual situation can be defined with the more accuracy.

While to-day there is an absence of speculative feeling in the market, owners of property in the City of New York and suburbs certainly have no reason to find fault with this situation. On the contrary, taking an impartial view of the various changes that have been noted from week to week, they have every reason to be satisfied. More than this, the solidity of investments and the very absence of speculation, while they deprive the market for the time being of an inflated activity, nevertheless demonstrate the healthy condition of the general business of our city. Our market never leads, neither does it predict; it follows other enterprises, whether private or public, and reflects in its transactions the solidity of these enterprises. It is

not by any means a barometer as the stock market attempts to be occasionally, but it is a savings bank, or rather a safe deposit company, wherein are gathered the fruits and profits of the general trade and business of the country. As such it naturally is the very last of all markets where this prosperity is felt. Neither is it swayed by temporary reverses in this or that line of trade, or affected in the least by trivial causes that can so easily upset the stock market, for instance. It stands patiently awaiting the result of various enterprises, well knowing that the spare capital gathered therefrom must come within its channels. It just now reflects, in the very best manner, the changes that have come over the majority of business men who, now-a-days, buy no more than they require for the legitimate demands of their trade. There is an absence of overtrading in the merchandise markets, the same as there is an absence of speculation in the real estate market.

And yet, as we have said before, owners of real estate have manifold reasons to be satisfied, not only with the actual situation of the market, but with its immediate future. Beginning at the lower end of the island, we find a section that has been lying dormant for years, suddenly rise in demand and value, owing to the enormous increase of the number of banking and shipping offices, and the definite character fixed for that section by the termini of the elevated roads. Further up the dry-goods district, which always commands the highest rents, is slowly creeping up even as far as Houston and Bleecker streets. Special causes, such as the increase of manufacturing and the establishment of the Gansevoort market, have infused activity into the real estate of the Eighth and Ninth Wards, on the West Side. Fourteenth street, Union square and Twenty-third street are being crowded by the retail establishments of heavy firms, and everywhere concerns like Arnold, Constable & Co., A. T. Stewart & Co., McCreery and the like, continue to build more palatial warehouses, either for their own accommodation or for investment. Sixth avenue, instead of having been injured by the elevated roads, is growing in power and prosperity almost by the month, while leading cross streets hardly supply sufficient accommodation to convey the enormous travel that is constantly crowding from the East to the West Side of our city, and vice versa.

In the residence part, the Lenox Hill district is outrivalling Murray Hill in palatial mansions, and there is constant demand for more and more houses in that choice centre, and notably more so to the eastward. Up along Yorkville and Harlem building operations continue with an unprecedented activity, and rapid transit trains as well as horse

cars are taxed to their utmost capacity in order to move the constant rush of passengers.

The West Side, too, under the leadership of Mr. Edward Clark, is slowly beginning to show signs of improvement, and everything indicates that another year will find the greater part of that section also in the hands of builders. Everywhere vacant property, though no longer used as a football for speculators, is being held with a firmness indicative of a steady belief in early improvements. Already do we hear of a determination on the part of several lot owners to build, for instance, along the Boulevard and the Sixties at a period much earlier than was anticipated at the beginning of the year.

Across the Harlem in the annexed district there is no end to operations under way and projected, and the early drainage of that section, along with the improvement of the Harlem River, have recently become simply questions of months instead of years.

Brooklyn, also, during the entire summer months has given ample evidence of a healthy revival of activity. More houses and lots have been sold there during the year than during the corresponding months of the previous four years. With the obstructions for the great highway across the East River removed from the New York side, Brooklyn citizens are for the first time beginning to realize the changes that will be wrought by the completion of the great bridge, when along with New York's constantly increasing termini of railroads, the City of Churches also will share that increased addition to her traffic which always follows increased accommodation.

Wherever then, we cast our eye on and around Manhattan Island, there is constantly accumulating evidence of a healthy tone in the real estate market. If here and there activity is not quite so visible, as some would like to see it, it must be borne in mind that dealings in realty are by their very nature exceedingly slow, and that the market itself is always the very last to be affected as well during an era of prosperity as during a period of depression.

WANTED—A UNIFORM SYSTEM OF TAXATION.

The large number of cases on the Supreme Court calendar, for the October term, against the Tax Commissioners, for relief from assessments claimed to have been improperly levied, ought to remind those in authority that a more perfect system for the raising of taxes ought to be improvised without delay. It is true, no doubt, that questions of wider scope are just now agitating the minds of those whose votes at the coming elections will decide the political complexion of the National Administration; nevertheless the importance of the tax law revision should not be overlooked even in a political crisis like the present. The parties who have brought suits against the Tax Commissioners represent banks, insurance, railroad and steamship companies, and their complaints are certainly worth listening to. If, as they claim, they are being taxed twice

this year, owing to the multiplicity of laws and enactments, and owing to various conflicting provisions of the laws, it is certainly the duty of the next Legislature to codify these laws and have them engrafted on the statute book, in a manner so that everybody can read and understand them. Too much expenditure has already been wasted in litigation, based upon these conflicting laws, and it is time that they should be codified in a manner creditable at once to legislators and to the administrators of justice. Do not let it be said that our system of administration will fall by its own weight, owing to this very accumulation of conflicting laws, as has been charged so openly by enemies of our political institutions. It is bad enough, indeed, that it takes one-half of a lawyer's time now-a-days to keep posted in regard to changes affecting the status of his clients in other States, owing to the incessant amendment of State laws in various localities, without embarrassing him with conflicting sections of laws in the very State where he resides and transacts his business.

A NEW ESTIMATE OF JAY GOULD.

Unquestionably, Jay Gould is the most extraordinary stock operator that ever appeared in any of the money markets of the world. To call him a stock operator, however, does not exactly describe him, for he is far more than a manipulator of the market. He is a man of daring schemes; of great combinations and wonderful fertility of resources. In this respect he differs from any of the prominent stock operators who have figured on the New York Stock Exchange. Jacob Little was a "bear," Vanderbilt was always a "bull," Drew was for many years a dexterous manipulator of certain stocks, but he never had the ambition to perfect railway systems, or consolidate trans-continental lines. He lasted long enough in Wall street to be ruined, but he had outlived a generation of speculators.

It was the peculiarity of nearly every man who came to the front on the "street" to have been either a "bull" or a "bear," but Jay Gould seems to have no preferences. At one time he sells the market; at another buys it. It has not infrequently happened that at the same time he was a "bull" on Western securities and a "bear" on Eastern railway stocks. He can take any side, or both sides, as seems to him wise, and the result is that to-day Jay Gould has the market completely at his control. With all his vast operations, he is yet able to conceal his hand. The street does not know what he is doing, and his *coups* are unsuspected until after they have succeeded.

In nearly every respect Gould is a phenomenal operator. He was bitterly reviled for years, and because he was a "bear" and attacked properties, his name was held up to universal condemnation, but these old enmities have died out, and, while it cannot be said that he is popular, it is certain that the "street" and the community have outlived many of their prejudices against him. It may be true that he has shown no conscience, but, then, money and its owners are not noted for any sentimental quality. If he

attacked a property, it was because there was some rottenness that had to be exposed. From 1873, down to resumption, Jay Gould was the great detective of the "street." If there was a weak spot anywhere, it was his mission to find it out. The people who were injured by the depreciation of their securities did not like what was done, but, after all, the effect was wholesome, even if it was to their loss. Railway stocks got down to hard pan; many abuses were corrected, and the foundation was laid for the superstructure of railway prosperity, which is now taking place. While Mr. Gould has made no claim to special generosity, it must be borne in mind that he has always improved the roads of which he secured the ownership. To this day he is one of the most popular men of the country on the line of the Erie road. When that property was surrendered by him, it was in every way in a better condition than when it first came into his possession. He found the Union Pacific, the very pariah of our railroads. Condemned of all men, cursed by the country (because it had debauched Congress), alone of the railway men of the country, he saw its possibilities and realized the money that could be made by fostering the industries of the Pacific coast and connecting them with the East by means of this road, which would, in time, draw its business from the whole railway system of the country. His reputation was under a cloud, and it was naturally difficult for him to make the necessary combinations on account of the personal prejudices which he had excited. But some far-seeing Boston capitalists, wiser than their New York contemporaries, followed his leadership, and the result was that the stock which sold for \$16 was brought up within a point or two of par. The continuous line of railroad from the Atlantic to the Pacific, and all controlled by him, is not yet a reality, but it is not far from one. It is morally certain, that, within the coming three years, that this one man, if he should live and be able to hold his own, will not only be the controlling power in the railway line or lines extending from San Francisco to New York, but, in all probability, he will own or control the steamship lines which connect New York with Europe, and San Francisco with Asia.

Jay Gould did not set out to be a benefactor of mankind. He is simply a man of signal ability, of great courage, of keen insight, who has the wisdom to not only form vast plans, but the daring and skill to execute them. Probably he had not designed to do more than make money and secure authority over the railway system of the country, but he "has builded wiser and better than he knew," for he has certainly been a benefactor to the country in unifying and perfecting its railway system. These vast railway combinations are of direct advantage to the nation at large. Some time or other the government may be called upon, in the interests of the whole people, to control, modify, or watch over the transportation lines, but Jay Gould and Vanderbilt have made this task much easier than it would have been, had the nation had to deal with hun-

dreds of small corporations rather than two great trans-continental railways systems. The corporations are abundantly able to take care of themselves, but it will be difficult for them to get any advantage over the government, watched, as they will be, by the great producing and consuming interests of the country. It is quite time that a more just estimate should be put upon the work of Jay Gould than that which obtained at the beginning of his railway career. He is, as we have said, one of the most remarkable men of the country, and if he can maintain the prominence in the stock market and in the railway world which he now holds, he will, in time, become the richest capitalist, as well as the most powerful railway potentate on earth.

SILVER POSSIBILITIES.

The *Public* is an able hebdomadal, but it is a little "daft" on the silver question. It finds that the silver dollars are passing into general circulation; and that the use of silver certificates is increasing. It says:

The amount of silver certificates in use has also largely increased. The Treasury has increased its issue over \$5,000,000, and there are now outstanding, not in the Treasury, \$12,203,191 of this kind of paper. In the absence of gold certificates and an adequate supply of legal tenders for immediate calls, the silver certificates are taken, and with readiness, wherever they can be immediately utilized, as well as gold, by means of payments for duties. As a consequence, the Treasury now holds in silver of all kinds only \$78,012,360.14 against \$79,028,293.35 last month, and of silver in excess of certificates in use only \$65,809,169.14, against \$71,409,074.35 September 1st. This change, too, causes an increase in the stock of gold on hand, which has increased over \$7,000,000. The gold not covered by certificates out of the Treasury is now \$127,764,733.65, and a month ago it was only \$120,018,179.45, an increase of \$7,746,554.20.

This increased use of silver coin and certificates the *Public* regards as gratifying. It accounts for the increase by the possible withdrawal of one and two dollar greenbacks. It suspects that not only is the government taking them out of circulation, but that they are hoarded. This we consider improbable. People do not hoard small bills. But Secretary Sherman could not do a wiser thing than limit the issue of one and two dollar notes. Indeed, it would be wise if the five dollar notes were also withdrawn and the place filled by small gold coins, eagles, half eagles and quarter eagles. Our currency would then assimilate to that of other civilized nations. Says the *Public*, again:

It is in the power of the government to increase this vacuum to be filled, and thus the demand for silver coins, in one way only—by the withdrawal of small notes. We suspect, from signs which those who handle much money have observed, that something has been done to diminish the number of small bills in circulation, and yet there has been no known step to that end taken or announced by the Treasury. * * * The amount of one dollar and two dollar bills in circulation one year ago was only \$43,918,365, out of \$631,315,520 in notes of all kinds, or only 6.6 per cent. But, moreover, the loss or destruction of small notes during nearly twenty years of use has been considerable. For reasons explained four years ago, it was thought that the loss of small notes had then been over \$4,000,000, and it is now probably over \$5,000,000. This would leave less than \$39,000,000 of notes smaller than five dollars each in actual use.

But, continues the editor, there is danger from the use of silver; the dollars will be found to be a nuisance. Now, it is true, the

trade dollars are a nuisance, because they are not a legal tender, and the government which issues them will not take them back. The Latin Union has 600,000,000 five-franc pieces, which contain three per cent. less silver than our American dollar, yet they circulate side by side with gold, and are a great popular convenience. We have less than \$80,000,000 of silver dollars in and out of the Treasury: and our retail trade could easily absorb \$300,000,000 of that coin. The withdrawn one, two and five dollar bills would, under the law, have to be re-issued in larger denominations, as Secretary Sherman has no power to contract the greenback currency. The gold and silver coin which would fill the vacuum caused by the withdrawal of the small bills would be an actual addition to the currency, which would healthily stimulate general trade. There is no danger in adding any amount of gold or silver to the currency of the country.

GOSSIP OF WALL STREET.

"What do you think of the situation?" said the writer to a well known operator.

"The market is strong, due to a belief that the Republican party will succeed in the October elections, or, at least, that they will come out well enough to give them a fair assurance of success in November. I am a Democrat myself, and I believe this commercial argument, as applied to politics, is all nonsense, but still, it does affect men's minds. The argument in business circles is, that the country is prosperous; we are doing very well, why make a change? I hear from all the manufacturing districts that a dead set is being made at the operatives not to vote the Democratic ticket. The reference to the tariff in the Democratic Platform is made use of to warn working people that there will be some meddling with the import duties, which may result in embarrassing American industry. The Republicans are working very shrewdly, from a political point of view, but as a Democrat, I think that their predictions of disaster are all hosh. Were Hancock elected, the country would soon get over its scare, and you would see stocks 'boom,' just as surely as they would if James A. Garfield was chosen President of the United States. I have reasons to believe that there is something going on in Michigan Central. Lake Shore has been put up by Vanderhilt's brokers, who had orders at one time to buy all they could get at \$169. We expect when Vanderhilt comes here, if the October elections are over, and we are all right, to see a jump in the market. No matter who is elected, before the first of February you will see the highest prices ever made on our Stock Exchange."

Said another well known operator: "What a queer place the street is! When it was reported that Jay Gould's son had been shot, and that Gould had taken the train back to Irvington, the 'hoys' immediately jumped upon the Gould specialties and sold them down. The market opened very strong, with a 'boom,' in fact, and continued until the news of the accident to Mr. Gould's family was known. It shows how important a person Gould is considered in the street. He can make or unmake the market at his will. He has more autocratic power over stock values than any man who ever appeared on Wall Street. But I believe he will come to grief some day. 'Napoleon finally had his Waterloo.' The remarkable thing about the Exchange is the small number of shares that are sold. Money stiffened up a little on Tuesday afternoon, only to become easier again on Wednesday. It seems impossible to advance

the price of money, and yet it is unnatural that it should sell on this market at such low figures, for an active business usually involves high prices for money."

THE TRUTH ABOUT MINES.

THE HORN SILVER.

We fear this great mine is destined to prove a disappointment. The management is honest but we fear ignorant and wasteful. In the first place the Horn Silver has a monstrous capital. It has 400,000 shares and is capitalized for \$10,000,000. At the price which it is now selling it represents nearly \$12,000,000. The time has come when this mine is expected to pay dividends. We fear they will be both few and small, solely due to incapable management. Their first trouble was with the Utah Southern Road. There was a time when the mine owners could have made a bargain or a contract running through a series of years with the owners of the railroad, but they failed to take advantage of the situation and the prices asked for doing the business of the mine to Salt Lake City are so exorbitant that it is an open question whether it would not pay to convey the ores to the smelters by teams. The Horn Silver contains an immense body of ore, but it requires special and wise treatment. The mineral is not uniform, it varies from hanging to foot wall. Some of it is free milling. The bulk of it is a smelting ore, or rather it is of several varieties of smelting ore. Some of the managers have interests in Chicago, whereupon the smelting works were erected in that city. Now Chicago is not a centre for the metal trade. It costs unnecessarily to send the smelting ore from the mine to that point. The proper place for smelting Horn silver ore is at Salt Lake City; and the managers could at one time have purchased reduction works at that place very cheaply. From there the lead could have been shipped west to the same market which commands so much of the lead products of the Eureka mines, which are distributed from San Francisco by sea. The money spent upon the works at Chicago is thrown away. Every thing we hear of the management of the mine, is in keeping with the Chicago folly or worse. Much was expected from the Horn Silver Mine. Its immense body of ore, the high business character of the president and officers, seemed to have given an assurance of permanency and profit for many long years. But if the reports that have reached us are trustworthy, we fear that another great disappointment is in store for the mining public and the investors in mining securities.

THE GREATEST MINE IN THE WORLD.

A correspondent wishes to know what is the greatest lullion mine in the world. We judge the Richmond Consolidated, of Eureka, has the largest body of ore of any known mine—that it will last the longest and pay dividends for a greater length of time than any American mine known to the world. It has the advantage of honest and more intelligent direction than any of the great American mines we know of. It is owned in England and controlled by Loudon directors. The Standard of Bodie is the only dividend paying mine we can now think of, which is as intelligently and as fairly managed. The Richmond will probably pay dividends for twenty years to come. It is a base metal mine. The adjoining mine, the Eureka, is owned by Americans. It has also been a magnificent property; but has not been as well managed as the Richmond. Keyes, of Chrysolite fame, was once its superintendent. The mine apparently "petered out" under his care, whereupon he sold the stock "short." The manager put in a new superintendent who found another body of ore, and Keyes lost money and reputation. He made a great deal of money by his operations in Chrysolite; but he should never have been appointed super-

intendent of any mine, in view of his previous record. But doubtless he and his partners understood each other.

EXPERT REPORTS.

Prof. J. S. Newberry has, it seems, reported upon the Stormont properties at Silver Reef, Utah. It is said he confirms the elaborate and able report made by Mr. R. P. Rothwell. Prof. Newberry stands very high as a scientist and is justly popular for his ability as a teacher of geology, but, as yet, his name has not been associated in the public mind with any really valuable mine. At least none that we can now recall. He reported upon the Wyandotte mining properties in Southern Nevada, but those mines are unworkable because of the absence of water. He reported upon the Colorado Prince, which has turned out to be a great disappointment to those who invested their money. They state that his opinions and judgments have not been confirmed so far by the workings of the mine. The rock does not assay one-third of what he said it would do, and work on the property has been temporarily suspended until fresh capital can be raised to recommence operations. It may be that further developments will indicate the favorable judgment of Prof. Newberry, but at present the purchasers of the mine are criticising his reports, and that in no friendly temper.

SUTRO TUNNEL.

The break in the stock of Sutro Tunnel Company, during the past few weeks, was due to the telegram in the *Tribune*, to the effect that the Bonanza firm had stopped the continuance of the north drift of the tunnel through their mines. We learn from inside sources, that the Bonanza firm did not want to levy assessments more than were needed, and that they requested the Tunnel Company to stop work for a while, guaranteeing, however, the royalty from the north end mines. The failure to find ore in the cross-cuts on the Union Consolidated, is really what is the matter with the Bonanza Kings, and this in turn has affected the price of Sutro Tunnel stock. We further learn that before Adolph Sutro left the superintendency of the company, he had managed to run it into debt to himself \$150,000. When he sold out, he did not expect that the debt could be paid, and he looked for a foreclosure by the English mortgagees. However, the money, as we understand, has been raised, and the Tunnel Company is in a better condition than it has been for some time past. If there is any revival of interest on the Comstock, Sutro Tunnel will be handy to have in the house.

THE MAMMOTH MINE.

The history of this property is like that of many other mines. It is located in the Sierras, some sixty miles from Bodie, and only two and a half miles from the Divide. There is an abundance of timber and water in the country, and the mine has developed some very high grade ore, and a great deal of it. The stock has sold as high as \$20. It is now selling for less than a dollar, yet nearly a million dollars have been spent upon it, in assessment work. It has, as we have said, an abundance of ore, the bulk of it running \$40 to the ton. It has a magnificent mill, and a fine tramway, yet the stock sells for little or nothing. It is suspected that the ores are refractory; that they are not free milling, for if they were, there is nothing to prevent the mine from paying large dividends, in view of the extensive developments, and the great body of ore which is in sight.

THE CLIMAX.

Another Leadville mine has come to grief. The Climax, which started out with excellent auspices, which had on its board of direction some of the best men in the city, including David A. Wells, is now found to be without ore. The President, Secretary, and Resident Superintendent

all admit that the ore bodies have suddenly disappeared. It now looks as if the Montana suit and injunction was simply to enable the insiders to get out at the expense of the public. The whole matter has a suspicious appearance. An injunction is granted to stop the working of the mine. The officers are very indignant. They tell of the large surplus; of the fine bodies of ore in the mine which they are unable to get at, and the price of the stock is kept up by these representations. But now the President, Mr. Harry Allen, in a printed advertisement under his own name, says that when they recommenced working the mine the fine bodies of ore in the face proved to be mere shells. Mr. Allen was formerly of the firm of Barton & Allen. He is a grandson of Commodore Vanderbilt. The firm failed just previous to the panic of 1873 and their creditors never received a cent. Mr. Allen was also a manipulator of the famous Moose mine, which at one time sold as high as \$8 on this market, but which is now offered for thirty-five cents. Mr. Allen is also an influential member in the La Plata Mining and Smelting Company. It is to be hoped that the stockholders of that organization will be more fortunate than have been those that have bought Climax and Moose stock.

SECOND AVENUE BRIDGE.

There are some legal difficulties connected with the charter to build a bridge over the Harlem at the Second avenue. The Rapid Transit Commissioners have made provision for a bridge to be used by the rapid transit roads and the New Haven road; but new legislation will be needed at Albany, which it is supposed there will be no great difficulty in procuring. When this is secured, it is understood that the bridge will be immediately constructed, and the New Haven road will commence running rapid transit trains on its Portchester branch, between New Rochelle and the Harlem River. Fifteen minutes time will be consumed between these two points, and it is understood that matters will be so arranged that the trip from New Rochelle to Hanover square will be done in forty-five minutes. But this will scarcely be effected before the fall of 1881. We hear there is quite a demand for dwellings in the 23d and 24th Wards. Houses to rent are scarce even in Mount Vernon. A proper system of drainage is now being provided for in these two wards, and, if there were but little danger from malaria, there would be a heavy demand for property along the lines of the proposed elevated and surface roads.

THE UNION LEAGUE CLUB HOUSE.

The writer happened upon a group of intelligent men, who were surveying and criticising the Union League Building at the corner of Fifth avenue and Thirty-ninth street. A transcript of some of the remarks struck us as being interesting enough to publish for the benefit of the readers of THE RECORD.

"I confess I am disappointed," said a Madison avenue physician—"it is an effective building in some respects, but why those isolated chimneys? It gives a 'finicky' look to what might be a noble structure. Then the architecture is composite—it belongs to no well defined style."

"Well, my objection to it," said a legal gentleman, "is from a somewhat different point of view. It looks too much like a public institution, like an hospital or orphan asylum—and then the front is on Thirty-ninth street, instead of Fifth avenue. The Fifth avenue view is spoiled also, because the club takes up only a portion, instead of the whole of the block. The brown stone house at the corner of Fortieth street looks like the *Sun* building which joins the tall tower of the *Tribune*."

Said another gentleman, a merchant: "A club ought to suggest sociability, coziness. A sumptuous dining hall would be in order for state occasions, but then there ought to be a number of private rooms for dinner parties, cards, conversation as well as retirement. But this club house is too magnificent—the ceilings are high, the windows broad—the front pillared and pretentious. One would feel oppressed and made solemn by entering so stately a palace. It is a club house for exhibition, not for comfort."

"Gentlemen, you are all wrong," said another speaker. "The Union League is not a social but a political club. It does not permit card playing—it wants a large room in which to hold its meetings. It has been in the past and expects in the future to be a power in the politics of the city, State and nation. Its design is to impress visitors from abroad. It permits billiards and bowling; but does not desire the reputation of a gambling club. It has a very wealthy membership; and all its characteristics are those which should distinguish a club of influential, wealthy citizens."

Said another speaker, "I avow that I like the architecture. The objection that it is composite, and belongs to no particular era, does not hold good; for this is true of all modern architecture. The purists say that we ought to follow the old types—Corinthian, Doric, Byzantine, Gothic or Elizabethan, but as modern life sums up all the past, so modern architecture reproduces and includes all that is valuable or artistic in the various structures erected by man. It is a pity that the whole front on Fifth avenue was not secured; for then the entrance, which is certainly noble, could have been on that thoroughfare."

The above gives a very fair idea of the kinds of remarks made about the new building of the Union League Club, which is certainly a very notable and remarkable structure.

THE MAMMOTH FAMILY HOTEL.

Two years, at least, will be required for the completion of the grand family hotel for which the foundations have just been laid on the Eighth avenue, between Seventy-second and Seventy-third streets. The situation is, indeed, unsurpassed, it being high ground facing Central Park, and on the broad street forming the great connecting link with Riverside Park.

Of course, it is well known that Mr. Edward Clark, President of the Singer Manufacturing Company, and a large holder of West Side real estate, is to carry out this enterprise. He has a double object in erecting this extensive building, namely, to give an impetus to the improvement of the West Side, as well as to define the character of the buildings which should grace it, and to offer the city such an hotel as it is now greatly in need of, where persons of means can find a home equal in all its comforts and luxuries to our first class private dwellings, surpassing them in location and without their entailed discomforts and inconveniences; in short, such a place of residence as can be found in some of the capitals of Europe, where persons of the highest rank occupy the different *etages* of similar family hotels, and live in great elegance.

In this country the conditions of living are different from those of all other countries except England, requiring the appointments of such an hotel to be superior to those of like buildings abroad, and it is the intention to make this one more complete in every detail of comfort, luxury and elegance than any yet erected.

The building has been designed by Mr. H. J. Hardenbergh, and will be erected under his supervision. It will be nine stories in height above the basement, will occupy the whole frontage of 204 feet of the block on Eighth avenue, and present a front of 200 feet on each of the streets named. The style will be Renaissance, of the period of

Francis Ist. The materials of fronts will be Nova Scotia stone and fine pressed brick, the former profusely used, handsomely moulded and carved. In plan the building encloses a large court, the pavement of which is on a level with the street and having an opening on the north side extending from the pavement to the roof line.

The main entrance is on the south (or Seventy-second street front), through a broad, open arched driveway into the court, in the four angles of which are the entrances and stairways to the different suites of apartments. The rooms for the porter or *concierge* open on this passage and command a view at all times. On the north front is a second or inferior entrance for persons on foot only. On the west side of the building will be a driveway running through from street to street, and this will be inclined to the level of the basement floor and be for the service of the building and of the tradespeople. Under the main court will be a second court reached by the driveway just named, where all the working of the great house may take place unseen.

There will be between forty and fifty suites of apartments, of sizes varying from five to twenty rooms, all of large proportions. On the main floor, fronting Eighth avenue and Seventy-second street, will be a fine restaurant, comprising main dining hall, cafe, and private dining rooms. This will have an entrance from the street direct, and will offer accommodations to transient visitors as well as to persons living in the house. Many of the suites will be arranged with kitchens attached, others with dining rooms only, so that it may be optional with tenants whether they are served from the restaurant or not.

The basement will be devoted to kitchens, engine rooms, janitor's apartments and private storage rooms; the attics to servants rooms and laundries.

The building will be entirely fireproof in every part and constructed in the most thorough manner. Seven large hydraulic elevators will run to different floors and as many staircases of iron and marble will be placed in different parts of the building.

The woodwork throughout will be of the finest varieties in use, in many cases elaborately finished.

The building will cost over a million dollars.

A GRAND HYGIEARIUM PROPOSED.

To the Executive Committee of the World's Fair:

Permit me to offer a suggestion before you decide definitely upon a site for the World's Fair, to be held in New York, in 1883. One of the embarrassments of these international exhibitions, is the fact that they call into existence edifices which are useless after the display is over. In Philadelphia a successful attempt was made to erect and save two buildings out of the many which should be permanent, and in London the Alexandria Palace survived the last exhibition. But, in nearly every other instance, the edifices constructed with so much cost and expenditure of time and taste, had to be removed. One of the sites suggested for the New York World's Fair is fitted for permanent structures. In every case the materials used for the buildings would have to be removed, thereby involving great loss. Why should not this International Fair not only exceed any ever held since the first great British Exhibition, but mark a new departure, by being devoted to some use which would render it of permanent value to mankind?

I suggest a great sanitarium, or rather hygiearium. It is within the possibilities of modern science to construct an edifice, or rather a series of them, in which could be found, at all seasons,

every condition suitable to treat the various chronic diseases which flesh is heir to. Why should physicians send their patients to Italy, France, Germany, Florida, Minnesota, the Pacific Coast, when here, right within ten miles of New York, it is possible to create the soil, the flora, the atmosphere of any country or climate on earth? We can have tropical plants and tropical atmospheric conditions; we can reproduce the moist sea air of Florida, and the dry tonic air of Colorado or Minnesota. We can here, at our very doors, erect an immense building, taking in, if need be, a thousand acres of ground separated into different compartments, each one suitable for some prevailing complaint. Is the dry, stimulating air needed? I affirm that it is possible to have it here, within ten miles of New York City, as well as in Minnesota. Some consumptives require a moist, warm climate. Sufferers from kidney troubles. This can easily be reproduced, and the temperature be made equitable the year round. My proposition is, therefore, that the gentlemen who will control the World's Fair, should erect a series of buildings, keeping in view their ultimate conversion into a vast sanitarium where artificial agencies can be employed to restore those chronically ill of lung, nervous, kidney and other complaints to healthful conditions. As I have said, not less than a thousand acres should be secured, and the scheme of the grounds and the buildings should have the advantage of the best architectural and professional skill that could be obtained. After the great exhibition was over the plans for the Hygiearium could be completed. When finished, the lamentable necessity which now exists for sending weak and ailing people away from their homes, to distant climes, to their very great loss and detriment, could be avoided, and if they must die they would have the comfort of dying at home, surrounded by friends. The physician could be near his patient, the sick or weakly merchant or banker would be within telephonic or telegraphic communication with his business house, able to have frequent conferences with his family or with his business partners or employees. Parents who have children sick and in peril from some dangerous chronic disease could be near them to attend to their wants, welcome them back to society, or, if inevitable, soothe their dying moments. That such conditions can be created is admitted by the most eminent medical authority. It is simply a question of expense. Being a novelty, it would be difficult, ordinarily, to procure money to make the necessary experiments, but in view of the inevitable outlay which accompanies a World's Fair, in view also of the fitness for a sanitarium, of the kind of buildings to be erected, and keeping in mind the waste which will come in removing these buildings, it would seem as if an enlightened economy, as well as a spirit of progress should urge a consideration upon your attention an experiment of this kind. But such a structure could be used not only for health but pleasure. It could be a resort—could embrace a thousand objects of interest to the traveler from all parts of the earth. It might involve the flora and fauna of many climes. All kinds of singing birds and rare animals and beautiful insects could be protected and propagated. Its refrigerated departments would be popular in summer time, while its milder climates would make it a resort during winter. It would involve grounds and walks, room for bicycle contests, cricket, ball, athletic exercises, croquet parties and lawn tennis, and the grounds would be open to patrons all the year round. The amusements from the outside world would help to enliven the invalids. In short, the same gaiety which now characterizes the summer health resorts would be cultivated in the sanitarium I propose. Medical science would be ad-

vanced by the experiments which could be made on a large scale of the effects of the temperature and medicated atmosphere, for lung, throat and nervous ailments.

No help for this fair can be expected from the general government. The Centennial Exhibition, in Philadelphia, was not only a credit to the locality in which it was held, but a great benefit to the country at large. Yet the United States Government, unlike any other power on earth, claimed the money it had advanced, and the people who made sacrifices, who gave their time and energies to making the Centennial successful were also forced to pocket the loss. As yet, it is understood, that as pecuniary speculations, every great fair has failed; not one has paid its expenses out of the gate money. It behooves, therefore, the gentlemen who embark on this enterprise, that they should in some way reimburse themselves, and that after the fair is over they can utilize the grounds for other purposes. Should they succeed they would confer an inestimable boon upon humanity for the successful establishments of a sanitarium, such as I suggest, would be followed by similar establishments near all the large capitals of the world. It seems to me that the medical profession; that all in delicate health (and their numbers are legion) should help to forward this enterprise, to say nothing of the humanitarian feeling which should be invoked in its behalf. Nay, more, if it is possible to establish a great health resort, such as I speak of, it would solve many important problems in the science of therapeutics. It is admitted by the medical faculty that the absorption and the inhalation of medicinals have not been tested as they should have been. We do not, as yet, know the good results likely to follow from creating those artificial conditions which would allay nervous excitement, promote sleep, soothe the lungs and keep the skin active. I speak with great reserve of this part of the subject as it is one which could be better treated by a physician.

D. G. CROLY.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv and v of advertisement.

There were a few more offerings at the Exchange Salesroom during the past week, but again they did not come up to the expectations of buyers, who, upon scanning the lists of auction sales, found but little to satisfy their demands. The executor's sale, held by Van Tassel & Kearney, on Wednesday, attracted considerable attention; No. 124 East Eighty-fourth street, 15.6x102.2, being sold, for \$6,370, to Mrs. Sarah J. Singer, other property, forming part of this estate and located in Houston street and South Fifth avenue, was sold at fair prices, as will be seen at foot, to outside investors. On the same day, Messrs. E. H. Ludlow & Co. sold the northeast corner of Seventh avenue and Thirteenth street, for \$15,350, to Mr. H. F. Howenstein.

In Brooklyn, during the past week, Mr. Jacob Cole sold, at auction, to Mr. James A. Mossell, fifty-nine lots, forming part of the Lafferts estate, as follows: twenty-seven lots, on Jefferson street, between Bedford and Nostrand avenues, at \$400 each—\$11,600, and thirty-two lots, forming part of the same farm, at \$50 each, total \$6,600, making an aggregate of \$18,200 invested by this gentleman in that section of Brooklyn.

GOSSIP OF THE WEEK.

The sales at private contract include but very little vacant property, most of the transactions being houses in the very best part of the city. Mr. Crates, however, has sold the southeast corner of Seventieth street and Ninth avenue, three lots, two of which are on the avenue and one on the street, for \$14,000, all cash. Messrs. Scott & Myers have sold the northeast corner of Madison avenue and Eighty-sixth street, 100.8 on avenue and 62.2 on the street for \$33,000.

Scott & Myers have also sold, during the week for Mr. Wm. F. Croft, the builder, No. 17 East Sixty-fourth street, a twenty foot house for \$45,000.

Messrs. L. J. & I. Phillips have sold for Mr. Lynd, the builder, No. 21 West Forty-sixth street for \$60,500.

Messrs. McCafferty & Buckley have sold, through E. H. Ludlow & Co., No. 50 West Fifty-third street, for about \$60,000 to Mr. Percy Pyne.

The New York Life Insurance Company have sold No. 1 East Fifty-third street to one of their tenants for \$75,000.

The Messrs. Wallach, shirt manufacturers of Thomas street are reported to have sold the four-story high stoop, brown stone house No. 10 East Sixtieth street, 25x65x100 to Mr. Cohen for about \$48,000.

Mr. V. K. Stevenson, Jr., has sold the four-story brown stone dwelling, No. 116 East Thirty-seventh street, 21x55, and fifteen feet extension, lot 100, for \$33,000 to Mr. H. H. Parker, also No. 61 East Fifty-fifth street, a four-story brown stone house, 16.8x60 and extension lot of 100 for \$25,000.

Mr. Thos. A. Walters has sold his four-story brown stone house, 2.8 East Sixty-first street, 17x50x100, for \$14,000.

We also hear of the sale of No. 427 Fifth avenue, 17x60x100 a five-story English basement house, to Dr. Henry, for \$50,000; also the sale of a Columbia College leasehold house, 30 West Forty-eighth street, by Mr. Constant A. Andrews of Newport, 21x60x100, for \$30,000, and the sale of 39 East Thirty-third street, for \$16,000, to Mr. Wm. S. Andrews. In order to give a correct idea of the sales of residences at private contract during the week, we condense the above details in the following table:

No. 39 East Thirty-third street.....	\$16,000
116 East Thirty-seventh street.....	33,000
21 West Forty-sixth street.....	60,500
30 West Forty-eighth street.....	30,000
1 East Fifty-third street.....	75,000
50 West Fifty-third street.....	60,000
61 East Fifty-fifth street.....	25,000
10 East Sixtieth st.....	48,000
208 East Sixty-first street.....	14,000
17 East Sixty-fourth street.....	45,000
427 Fifth avenue.....	50,000
Total.....	\$456,500

In addition to the above, we hear of the sale, at private contract, of No. 11 Thirty-seventh street, 270 feet west of Fifth avenue, 25x98 9, by Sarah A. Townsend to Edward H. Ludlow, for \$40,000.

We are also informed that Mr. Willett Bronson has sold two of his fine houses on East Sixty-sixth street, a Philadelphia lady, Mrs. Parry, having secured the title to No. 69.

We desire to call the attention of our readers to the valuable corner plot along Fifth avenue, below Thirtieth street, offered in another column, by Messrs. A. H. Muller & Son. It can be easily converted into a large store property for a term of years.

We also direct the attention of investors to the eligible houses in first class localities, offered in our advertising columns, by Messrs. E. H. Ludlow & Co.

While time is passing, and legal obstacles appear to be in the way of the construction of a bridge across the Harlem River from One Hundred and Twentieth street, so as to connect with the annexed district, property owners there, for the time being, are quite satisfied with the action of the Board of Aldermen, taken on Tuesday, in establishing a ferry on the southerly side of Harlem River to the opposite shore, at or near the present depot of the New Haven & Harlem Railway. In passing said resolution, it was claimed that a steam ferry will be less of an obstruction to navigation than a bridge, and hence, the Commissioners of the Sinking Fund have been directed to sell at public auction, to the highest responsible bidder, the right to operate this ferry.

The death of Mr. S. V. Hoffman, whose presence in the market has for years past infused activity, was generally regretted by operators and brokers during the past week. As an owner of considerable property in Fifth avenue, and the East Side as well as the West Side, his operations were always marked with that sense of rectitude and straight-forwardness, which tend to give tone and strength to the market.

The following is the Committee on Sites, appointed by the temporary Executive Committee of the United States International Commission: Samuel A. Haines, E. N. Dickerson, Charles K. Graham, A. M. Hoyt, Jose F. Navarro, James H. Rutter, Thomas Rutter, Thomas McElrath, Rufus Hatch, W. B. Dinsmore and Thomas Barbour. Of course, this committee has no

power but to suggest, and its suggestions cannot have but full and due weight with the sub-committee, when appointed by the Board of Finance. This latter board cannot be selected until after January 10 up to which time the subscription books will remain open, in accordance with law.

Mr. J. Cleveland Cady has been selected as the architect of the new opera house. The plans are for a structure of pressed brick, with terra cotta trimmings, fronting 200 feet on Madison avenue and 190 on the side streets. The walls will be 90 feet high surmounted on the side of the main entrance by a pitched roof and tower, the whole 110 feet in height. The architecture is a mixture of Italian and composite, without too much ornamentation. The auditorium will seat between 3,000 and 3,100 persons, and will be divided into the parquet, or orchestra, the parterre, or first row of boxes, two additional tiers of boxes, a balcony and a gallery. There will be 110 boxes, altogether, with small salons, or ante-rooms, opening out of them.

Brooklyn is also active in the construction of new buildings. Fourteen three-story flats, costing \$7,500 each, are to be erected on Fourth avenue, Bergen and Wyckoff streets, and fourteen more on Halsey street east of Bedford avenue.

The following are the sales at the Exchange Sales room for the week ending Oct. 8:

* Indicates that the property described has been bid in for plaintiff's account:

*Christie st, w s, 150 n Delancey st, 25x140. Ed. Hincken and ano., exrs. (Amount due, abt \$14,500).....	\$13,500
Houston st, No. 66, n s, 25 w Wooster st, 23x75, three-story brick dwell'g. Mathias Shaw. Executor's sale.....	8,550
*Rivington st, s s, 18 9 e Sheriff st, 18 9 x60. Tristram B. Mackay. (Amount due, abt \$1,625).....	4,250
55th st, s s, 475 e 7th av, 25x100.5 new build'gs projected. W. C. Lester.....	4,500
55th st, s s, 500 e 7th av, 25x100.5, new build'gs projected. W. C. Lester.....	4,900
55th st, s s, 525 e 7th av, 2 x100.5, new buildings projected. W. C. Lester.....	5,600
69th st, s s, 2'0 w 10th av, 25x100.5, vacant. Michael Cashman. (Amount due, abt \$1,800).....	2,200
84th st, No. 124 s s, 587 9 w 3d av, 25 6 x102 2, three-story frame dwell'g. Sarah J. Singer. Executor's sale.....	6,350
114th st, No. 339, n s, 225 w 1st av, 10x100, two-story brick dwell'g. Robert J. Hayward. South 5th av, No. 83, e s, 120 s Houston st, 25x100, two story brick build'g. C. W. St. John. Executor's sale.....	10,050
4th av, e s, 75.5 n 53d st, 25x70, vacant. Frederick W. Loew. (Amount due, abt \$8,500). 7th av, No. 41, n e cor 13th st, 25 9 x100, three-story brick dwell'g. H. F. Howenstein. (Amount due, abt \$10,650).....	6,350
10th av, Nos. 507 and 509, w s, 46 n 38th st, 52 9 x150, three-story brick packing house and one-story frame stable in rear, by Van Tassel & Kearney. (Two mortg. amount due, abt \$12,350 and \$6,400. B. Gonzales).....	17,650
Same property. Same purchaser.....	14,000
Total.....	\$114,650

BROOKLYN. N. Y.

In the City of Brooklyn, Messrs. J. C. Eadie, T. A. Kerrigan and J. Cole, have made the following sales for the week ending Oct. 6:

*Adams st, Nos. 73 and 75, e s, abt 140 n York st, 35x50. Warren G. Sammis.....	\$1,200
*Bergen st, n w cor Kingston av, 40x100. Hannah E. Miller. (Amount due, abt \$3,736).. Cambridge pl, w s, 75 s Greene av, 2x100. Henry Merz.....	3,000
*Hayward st, n s, 25 e Wythe av, 17.6x100. Rose Downey, extr.....	6,500
*Lawrence st, e s, 250 n Willoughby av, runs east 107 6 x north 50 x west 30 x south 33 x south west 10 x west 69 to Lawrence st. x south 10 to beginning. James C. Bergen, guard.....	1,500
*Quincy st, s s, 450 w Ralph av, 25x100. Margaret Brown.....	2,350
*Skillman st, w s, 327 9 n Myrtle av, 20x100. William Bennett, trustee.....	500
Tillary st, n s, 75 e Bridge st, 25x100. A. E. DeBaun.....	2,300
*4th av, n w s, 60.2 n e 17th st, 20x60. Hendrick R. Wyckoff.....	3,225
Lots 31 to 57, 515 to 527, 538 to 550, 551 to 556 on map of Leffert's Estate, 59 lots. J. A. Monsell. (Partition sale).....	3,000
Total.....	37,600
Total.....	\$61,175

BUILDING MATERIAL MARKET.

BRICKS.—For Common Hard Brick there is a continued prosperous and cheerful market, and very generally the selling interest is to be

found expressing satisfaction over the ruling condition of affairs. The receipts run pretty full, but there appears quite enough demand to exhaust the offering about as fast as made, and full, or even better rates are realized without difficulty. Up Rivers still retain the most advantageous position, and have crept up in value until only ordinary cargoes can now be reached below \$5.00 per M, and some of the best have sold a fraction higher while Haverstraw continue to be quoted at \$5.00 @ 5.50 per M. This small difference in price between the two grades is quite an unusual occurrence, and is accounted for by the fact that the "Up Rivers" are unusually fine in quality this season, and even at the light fraction in their favor are taken by consumers who have entered into contracts on the expectation of lower rates for Brick, and are, therefore giving preference to anything that will answer their purpose and make a saving on cost, however small it may be. The production has not as yet wholly ceased, but is greatly reduced, and the frosty weather must soon wind up the manufacture for the season. Pale Brick have also improved in tone, and the supply finds sale as rapidly as offered, with prices now standing at \$3.00 @ 3.25 per M. The bulk of the stock goes to Brooklyn, and, indeed, this is supposed to be the only source of consumption, but there is reason to believe that occasionally a little of this quality is run in on some of the junks in this city. The prohibition against the use of pales, like a new broom, swept clean at first, but it is intimated that as inspectors gradually "get the hang of the thing," they never happen to be present when stock of this description is delivered for use upon work supposed to be under surveillance. Fronts are firm in price and finding a good average sale on pretty much all qualities.

GLASS.—Of domestic stock the available supply is very small and values on parcels from first hands to a large extent nominal. French meets with a fair demand and as the supplies continue comparatively small, prices are maintained without much difficulty. From an exchange we clip the following: The first glass factory in America was erected in 169 near Jamestown, Va., and the second followed in the same colony twelve years later. In 1639 some acres of ground were granted to glassmen in Salem, Mass., probably the first year of the industry which was prosecuted there for many years. The first glass factory in Pennsylvania was built near Philadelphia in 1683, under the direction of Wm. Penn, but it did not prove successful. The first glass factory west of the Alleghenies was set up by Albert Gallatin and his associates in 1785, at New Geneva, on the Monongahela river. A small factory was established on the Ohio river, near Pittsburg, in 1790 and another in 1795. The earlier attempt failed, the later was quite successful. In 1810 there were twenty two glass factories in the country, with an annual product valued at \$1,147,000. There are now about five times as many factories, producing eight times as much glass. According to the returns received under the recent census, our flint glass factories turn out 210,554 tons of table and other glassware; and the window-glass works produce 2,644,440 boxes. The total value of the product is nearly \$1,750,000.

HARDWARE.—The market appears to be in good shape as a rule, and reports generally are strong and cheerful from dealers in both domestic and foreign descriptions. The country certainly wants supplies, and the jobbing and retail dealers seem prepared to take stocks accordingly, the orders now given covering more business in anticipation of future wants than for a long period past. Distant points appear to have nearly satisfied their wants and the current call is more generally from nearby customers. Prices as a rule are steady and manufacturers say no reduction will for some time be made, but occasional rumors of small cuttings on list rates are to be heard, and buoyancy is certainly held in check. Supplies are fair and selections not difficult.

LATH.—The selling interest has lost nothing during the period intervening since our last report, the advance then noted being well maintained, and offerings finding a quick sale at \$2, with demand still unsatisfied, both on local and out-of-town account. Buyers are also willing to contract for parcels to arrive at the same figures, but to this receivers will not agree, feeling confident they can lose nothing by holding off, and considering the chances favorable for still better terms. Accumulations in hand are small, and dealers in want of stock, while the accounts from all primary sources are growing stronger instead of weakening. Indeed, it is set down as positive that supplies must run short, and unless offerings are attracted from irregular sources there will be, scarcely enough to meet home wants.

LIME.—Demand from all regular sources has been full, and covered all kinds of stock from both the eastward and this State, with generally light offerings. On this basis sellers had much advantage, and full former rates have been maintained without difficulty.

LUMBER.—Not much in the way of new features can be found this week. The movement of supplies holds its own, and full prices are secured on all desirable stocks, with the indications more favorable for an advance than a downward turn. Business lacks snap and vigor sufficient to create any great excitement or infuse a positive buoyancy, but, in a steady, quiet sort of a way, a full volume of stock is finding an outlet, and buyers meet the views of holders with-

out much hesitation. Exactly what is being done to replace the current distribution and prepare for winter it is in many cases a difficult matter to ascertain. Desirable parcels of Spruce are unquestionably secured whenever they come within reach, but the purchase of other grades are kept secret when completed. From the accounts published at primary points, however, and other evidences of comparatively positive character, there is pretty good reason to believe that our dealers have been, in a quiet way, picking up desirable parcels for some time, and are still buyers of parcels likely to come through without an increase over the prevailing cost of transportation. Our local and suburban consumption continues full and promising; the domestic shipping orders are on the increase if anything, and the outlook for the sale of export parcels is considered good.

Spruce has about the same strong features upon which it has so long been supported. The accounts from the eastward still show a scarcity of logs, many manufacturers with orders enough in hand to require their full productive capacity up to the very close of the season are virtually out of the way, and the advantage of the position is with sellers. Cost, as now established, however, is very extreme, and we again hear of operators who want size, but care less for quality, resorting to cheaper substitutes. Quotations range at about \$17.50@18.50 for random, and \$19@22 for special.

White Pine has had fair sale and all the regular home outlets, and met with a very good market on export orders with holders ideas quite firm and tending to strengthen. Those who have stock secured and in good shape for carrying offer with great indifference, and, in some cases, refuse to sell at all. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do; \$15.5@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine, in the way of random is not much wanted, and the call on orders is somewhat uncertain but the amounts seeking an outlet are also small and owners refuse to modify cost. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$16@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwoods, of fine quality, are wanted to a considerable extent, and would command a pretty full rate but buyers say their best bids fail to draw out additional offerings. Shipments of parcels on through consignment continue. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. cills, \$18@20 do. cherry, \$45@47 do.; white wood, 1/2 and 5/8 inch, \$25@27.50, and do. inch, \$33@35 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

Among the yard dealers business appears to be full and quite satisfactory with the cost of all kinds of stuff well maintained, while on the most desirable grades the tendency is somewhat buoyant.

From among the lumber charters recently reported we select the following:

A Br Barque, 435 tons, from Montreal to Rosario, lumber, \$17 net; a Br brig, 275 M. lumber, from Brunswick to Montevideo or Buenos Ayres, \$19 net; a Br brig, 372 tons, from Brunswick to Buenos Ayres, lumber, \$20, outfit of discharge at Boca wharf, \$1, extra; an Am barque, 608 tons, hence to Montevideo or Buenos Ayres, white pine lumber, \$14 net; an Am schr, 217 tons, from Wilmington to Savanna-la Mar, Jamaica, lumber, \$11; a schr, 171 tons, from Bucks-ville, S. C., to Martinique, lumber, \$11.50; a Br brig, 342 tons, from Pensacola to the north side of Cuba, lumber, \$9 November loading, or \$8 December loading; a schr, 150 M. lumber, from Jacksonville to Lag-uayra, \$13; a Br brig, 348 tons, from Baltimore to Trinidad, cooerage, \$1,700, and from Pensacola to the north side of Cuba, lumber, \$9; a schr, from Jacksonville to Demerara, lumber, \$12; a Nor. Barque, 775 M. resawed lumber or hewn timber, from Savannah to Ferrol, \$16; a schr, 150 tons, from Musquash, N. B., to New York, lath 65c; three schrs, from Gardiner to New York, lumber, \$2.25; a schr, from Bowdoinham to New York, lumber, \$2.50; a schr, 160 M. lumber, from Brunswick to New York, \$7.25; a schr, 240 M. lumber, from Pensacola to Philadelphia, \$9; a schr, 285 M. lumber, from Cedar Keys to New York, \$9.50 free of lighterage; a schr, 281 tons, same voyage, hewn timber, \$12, and resawed lumber, \$9.50; a schr, 250 M. lumber, from Brunswick to New York, \$7.25; a schr, 324 tons, from Albany to Richmond, sycamore lumber, \$2.50; a schr, 150 M. lumber, from Norfolk to New York, \$3.25; a schr, from Portland to New York, lumber, \$2; a schr, 140 M. lumber, from Norfolk to New York, \$3.50; a brig, 449 tons, from Pascagoula to New York, lumber, \$9.25.

Exports of lumber from the port of New York:

	This Week, feet.	Since Jan. 1, feet.
West Indies.....	669,553	22,874,387

Europe, United Kingdom.....	102,000	6,893,765
Total.....	1,654,009	52,890,321

GENERAL LUMBER NOTES.

STATE.

The Albany lumber market, for the week ending October 5, is reported by the *Argus* as follows:

We can report a good trade in Lumber during the past week. To-day, many buyers are present, and with numerous orders by mail an active business will

be had before the day closes. September, which has just closed, is reported as the "biggest month" of this season, with the trade and largely ahead of September, 1879. Many houses report more trade so far this season than for the whole of 1879. The shipments from the District, from the slips in the District and from the river front continue to be free. The retail yards in New York are reported to be in light stock with a good demand. The trade during the week has been mainly from New York and Brooklyn. We have not any deviation in prices to report.

A light supply of water has set some of the Northern mills to work, and we have some receipts of Coarse Lumber. The prospect now is they will continue sawing to the close. Prices are very firm, with no change of moment to note. Trade is as brisk as the limited stock will permit.

Canada is about closing one of its most successful seasons in Lumber; the bulk of what is in shipping order has already gone forth to the States. An Ottawa paper says that 47,000,000 feet sold to American parties will be wintered over at Chaudiere Falls.

The receipts of lumber by lake at Buffalo for the week are 4,588,000 feet; by rail, 137 cars. At Oswego 3,432,000 feet.

The receipts at Albany by canal from the opening of navigation to October 1st were:

Bds. & Sctg.	ft. Shingles.	M. Timber, c.f.	Staves, D
1879..	229,291,600	8,666	
1880..	289,493,800	3,872	5,400 638,200

Freights from Bay City to Buffalo and Tonawanda, \$2.25 @ M. feet; from Saginaw, \$2.37. From Buffalo to Albany \$2.50; from Tonawanda to Albany, \$2.40 @ M. feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 @ M. feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$1.90@1.95. From Ottawa to Albany \$3.50 @ M. feet.

River freights are without change.

THE WEST.

SAGINAW VALLEY.

Lumberman's Gazette.

There is little of monetary interest and no perceptible change in the market this week. The close of navigation is approaching and vessels are readily chartered upon their arrival, lumber being shipped as rapidly as transportation can be secured. A sale of 500,000 feet of lumber at \$7.50, \$15 and \$35 is reported; also 2,000,000 feet to Cleveland parties at \$6.50, \$13, \$28@32.

Lake freights are unchanged: Bay City to Buffalo, \$2.25; to Ohio ports, \$1.75. From East Saginaw, 25 cents above these rates.

The weekly review of the general situation by the *Chicago Northwestern Lumberman* contains the following:

The eastern part of the country is just now engaged in preparing for winter, and as the season of shipments will practically close within the next eight or ten weeks, those who have not secured stocks to supply their trade for the winter months are awaking to the necessity of being up and doing.

The Canadian market presents no new features of interest in sawed lumber, the extraordinary activity of the season having depleted stocks to such extent that but little is available for offering. Our Quebec advices mention a continued scarcity in waney board pine, with advancing prices, on a very active demand, 18 inch average being wanted at 35 cents, 19 inch 38 cents, and 20 inch at 40 cents per square foot, and any quantity finding a ready sale. Turning southward we find the markets of Philadelphia, Delaware and Baltimore in want of more stock than they have been able to obtain, and the influx into this and other northern sections of buyers, who are simply "looking to see what the country looks like," but invariably inquire particularly as to the best sections for obtaining stocks suitable for their market, evidences the want which is felt for lumber which they have heretofore depended upon the Williamsport district to supply, but which has this year been denied them from the amount of logs hung up in the streams of the upper Susquebanna. Cleveland reports no changes in pine except an increased rigidity for grades most difficult to fill in the now short season of navigation.

At Detroit the market continues firm and active, with shingles presenting an extraordinary local demand, indicating the satisfactory condition of the farming community as the result of great crops and fair prices. Cedar is also mentioned as commanding values 100 per cent. greater than a year ago.

Saginaw and the Lake Huron shore continue firm in their estimate of the value of lumber, and report no concessions as to pine, the better grades of stock being taken readily at full quotations, and the lower grades of desirable shapes and sizes, keld at figures which forbids its shipment to this market. A temporary lull in the volume of trade is apparent, however, which our correspondent thinks is accounted for in the vast supplies which the receiving markets have realized, and it is probable that an improvement in this respect will soon take place, or as soon as the receivers shall be able to take care of an increased quantity upon their docks. We learn of sales of one million feet small dimension sizes at a port near the straits at \$7.75 on the dock, equal to fully \$9.75 in this market. The better grades of lumber in this entire district are wanted to fill both Eastern and Western demand. The railroad mills have all they can do at points where summer stocking is feasible, and from all the roads we hear of a lively trade at firm prices. Cadillac reports a tendency to stiffening prices, dry stock in excellent demand and figures readily obtained.

In Wisconsin, Stevens Point reports an immense trade on a firm market, with not half cars enough to fill orders, dry stock exhausted and lath and shingles sent off as fast as made.

Minneapolis, Stillwater and Eau Claire report the enjoyment of as large volume of trade as is desirable or convenient, and there is a quiet discussion going on upon the question of a further advance in prices, which is not at all unlikely, in the course of a week or two. Other river towns report the same condition of trade, although Davenport speaks of a falling off in orders during the week on account of delays in shipping caused by lack of cars, and private advices suggest that State and County fairs have also occupied more attention than business, in this and other sections. A scarcity of car facilities is found in its influence upon the October trade.

Rock Island advices are to the same effect, as are those from points lower down the river. Hannibal reports a market firm and steady, with no shading of prices, and a demand as large as is desired. We learn of no stringency in the supply of cars at Hannibal, and, in fact, the principal difficulty in this respect seems to be at the localities which depend upon the Chicago, Rock Island & Pacific road for their facilities.

The general situation of the South is highly favorable, and our advices from many independent sections represent the demand for timber and lumber as highly satisfactory. We may from our review assure our readers that in no section of the country do we discern any signs of distress or demoralization in the lumber trade, but that all express a feeling of satisfaction and buoyancy in view of the outlook for the trade of the fall months.

LUMBERMAN AND MANUFACTURER, MINNEAPOLIS, Minn., Sept. 30, 1880.

The lumber business done in the West during the last week in September, 1880, is far in excess of the amount done in the corresponding week of any previous year at all the markets. The trade is now only limited by the transportations. The lack of cars is the complaint everywhere from Chicago west. Every one is worrying for fear some calamity may prevent their selling out their stock. Prices are firm, with a decided upward tendency everywhere, some few heavy holders at the principal points preferring to hold rather than sell at present figures. The stocks of Central Wisconsin are being depleted by heavy buyers from the Southwest, who are picking up all desirable lots even before it is in a condition to ship. Lumber from the upper division of the Wisconsin Central Railroad is being shipped by train loads to Kansas. In the Northwest concessions are not asked and are seldom offered to buyers. All the mills are being pushed to their utmost capacity, wherever the stock of logs will justify it, but many of the largest mills have only stock enough to last a short time. As a whole, the cut for October will be much less than September. A slight rise in the Chippewa has given some relief to the want of logs. The scarcity of logs along the river is remarkable, considering the outlook four months ago.

All the preparations indicate an extraordinary cut of logs during the coming winter in Wisconsin and Minnesota, the prospects being that the business will be largely overdone, the prospective supply being more than sawing capacity, still there is a limit set by a wise Providence to the quantity of logs which can be run out of the streams, and if too much timber is slaughtered, it will probably be hung up for want of water.

This fact may save the loggers from a demoralized log market during 1881. This is the only chance.

On Hardwoods, the *Northwestern Lumberman*, as follows:

The general tone of the market remains the same, and it is not liable to materially change for some time to come. The demand at some points has increased, and a few of the dealers report freer receipts of walnut, though it is by no means general.

The week has been marked by the arrival of several cargoes of cherry, which was an innovation, and which the envious eyes of the yard men saw go direct to the furniture makers. The receipts of ash, oak and maple have been light, and the want of the last named wood is seriously felt by some of the furniture men. Their contracts called for a sufficient amount to satisfy their wants, but made, as they must be with mill men, many of whom are small producers, and to a certain extent irresponsible, the boom in prices last fall excited the less conscientious ones to market their products in other directions, and some of them were unable to make good their bargains, owing to the small amount of logs that reached the mills last season. These contracts, generally, were at an advance of from 30 to 40 per cent. over those of the past few years, but the additional amount did not prove a saving grace. As a consequence, these manufacturers must look in other directions to fill the gap, and some of them are picking up their stock from hand to mouth. But few yards can show a decent stock of whitewood, and, owing to an unusual activity among box makers, the poorer grades are sought after.

THE EAST.

The *Boston Commercial Bulletin* reports:

In Western lumber the commission men complain somewhat of a dull week, but this is due in many cases to a lack of stock. The dealers, however, are busy and there is no weakness in prices. There is a continued upward tendency in Eastern lumber. Spruce is selling at higher figures than last week, and we are also forced to advance our quotations on shipping and refuse pine. The water in the Down East streams remains low and the lumbermen are in strong position.

At the lumber dealers' meeting at Wellesey on Saturday last, the prevailing opinion seemed to be that in view of the manufacturers' advance, the dealers should raise their prices on spruce to \$19 for

easy frames and \$20 for wider dimensions, but no definite action was taken. There is an increased demand for Southern hard pine and prices are stiffer, consequent upon the advancing market for spruce.

FOREIGN.

The *Timber Trades Journal* of September 25, 1880, furnishes the following items:

LONDON.

The demand is very quiet, and the deliveries have fallen off at the docks, which forms about as good a test as we can well have of the state of the consumption. If things in this respect, however, are quiet, the imports, though fairly well kept up in comparison with other seasons, are nothing like so heavy as they were a month ago, and no pressure is needed now to keep the quays tolerably clear at the docks.

LIVERPOOL.

The arrival of timber laden vessels in the Mersey during the past week have been fairly numerous, but few of them are upon the open market, nearly all being either cargoes bought to arrive some time ago, or under contract made in spring and early summer; consequently there is not that pressure to sell which might have been the case had they come forward upon shipper's account.

The market continues to batten steadily, and goods cannot now be had at the prices at which sales were made a week ago, and bidders are evidently less inclined to press sales than they have been. The approaching close of the season for the Canadian and Baltic ports, with the short stocks on hand in these quarters, continue to make prices advance for nearly all kinds of timber and deals, and in some cases the advance during the past week has been very marked, and in others there are now no longer sellers unless at a substantial increase over the prices at which sales were made even so recently as last week.

There is, however, some danger, that, carried away by the success which has attended the recent advances in value abroad, shippers may overdo the business, and force up prices to a point which will place them beyond the reach of consumers; or they may scrape up anything in the shape of common and inferior timber or deals, and, tempted by the moderate rates of freight now current, flood the markets of this country with unsuitable articles, which will, in all probability, have to be sold at prices little above freight and charges, as there is really no outlet for wood of this description.

White Pine.—Owing to recent receipts from New York, by steamer Clara M. Goodrich, Philadelphia, amounting to about 300,000 feet, all on contract, the market is well stocked, and the demand has subsided.

Pitch Pine.—The demand continues fairly active, at from \$38@40 per mille feet, as to class.

Cooperage Stock.—Box Shooks.—Large stock and no demand.

Bhd. do.—One parcel of 1,309 for sugar, Florida, Baltimore was sold, at 17 rs and short credit; those for molasses although less abundant, continue neglected.

Empty Casks.—Duties.—Sales comprise this week 100 bhd., Emma, Boston, and 121 do, Florella, Baltimore, at \$3.50 cash; besides 37 tierces, per latter vessel, at 15 rs. gold.

Hoops.—Stock continues exceedingly heavy, and entirely neglected at nominal quotations.

The consumption from this port continues steady, and it would seem to point towards the establishment of more confidence in the minds of country buyers that the increased prices which have been so surely and gradually growing up, are the outcome not only of a short supply from abroad, together with its higher cost, but also of a sounder and healthier state of trade, and that there exists no longer any room to doubt that the better feeling experienced during this year, especially in the timber trade, is the result of sound and legitimate business.

At the auction sales of Messrs. E. Chaloner & Co., and Messrs. Duncan, Ewing & Co., on Thursday last, the following prices were realized:

Malogany.—365 logs and 4 curls Honduras, 4½d. to 11½d., average 5 15-16d. per ft. super.; and 144 logs Mexican, 4d. to 6d., average 4½d., small size and crooks; 200 curls St. Domingo, 1s. 8d. and 2s., average 1s. 9 13-32d.; 161 logs Cuba, 4½d. to 9½d., average 6 1-32d.; 304 logs do., 4d. to 1s. 9d., average 5 13-16d.

Cedar.—167 logs and 3 curls Honduras, 4d. to 7½d., average 5 7-32d.; 42 logs Havana, 4½d. and 5d., average 4 27-32d.; 2 logs do., 5d.

Walnut.—58 planks Italian, 3½d. to 4½d., average 3½d.; 13 planks do., 4½d. and 5d.; 48 logs American, 4s. 9d. to 5½d., average 5s. 1d. per cubic ft.; 14 logs do., 4s. 7d. to 5s., average 4s. 10d.

11 billets American wainscot, 4s. per ft. calliper; 2 logs American ash, 4s. 2d. per cub. ft. string; 2 logs American whitewood, 3s. and 3s. 6d. do.; 1,059 lancewood spars, 5s. to 15s. 6d. each.

METALS.—COPPER.—Ingot has been in somewhat better demand and with the general supply small and well under control. Prices were strong. We quote at 18½@19 for Lake. Manufactured Copper in good average request and the market firm. We quote as follows: Brazil's Copper ordinary size over 16 oz per square foot, 28c. per lb; do do do, 16 oz and over 12 oz per square foot, 30c per lb; do do, 10 and 12 oz. per sq foot, 32c per lb; do do, lighter than 10 oz per sq foot, 34c per lb; circles less than 84 inches in diameter, 31c per lb; do 84 inches in diameter and over, 34c per lb; segment and pattern sheets, 31c per lb; locomotive fire box sheets, 28c per lb; Sbeathing Copper, over 12 oz per sq foot, 26c per lb and Bolt Copper, 28c per lb. Iron—Scotch Pig, has again

found an unsettled market, but, as a rule, the turn was in buyers' favor. Supplies were freely offered especially from parcels afloat. We quote at \$20@23 per ton according to brand, delivery and quantity. American Pig has found only a slow, uncertain movement, and with supplies in most cases offered liberally, values had no support, and went off again along pretty much the entire line. At the close, however, there seems to be less pressure, and rather greater incentive to steadiness. We quote at \$25@26 per ton for No. 1; \$22@23 do for No. 2; and 20@21 for forge. Rails have remained quite steady on Steel of which the sales were liberal and covering deliveries for pretty much every month next year, but for Iron there was little demand and prices lost tone. We quote at \$45@48 for iron and \$60@65 for steel, according to delivery. Old Rails \$25@27.00 per ton; scrap \$26@27.00. Manufactured Iron has met with a steady sort of demand and on the standard size and shapes prices were maintained very well. There is considerable inferior stock offering which has no sale. We quote Common Merchant Bar, ordinary sizes at 23@24c. from store, and Refined at 25@26c.; wrought beams at 2½c. Fish plates quoted at 2¼@2½c.; track bolt and nuts, 3¼@3½c. railway spikes, 3¼c., tank, 2@3.1c.; angle, 3c.; best flange, 6c.; and domestic sheet on the basis of 3½c. for common Nos. 10@16. Other descriptions at corresponding prices, with 1-10c. less on large lots from cars. LEAD.—Domestic Pig has not sold with much freedom, the supply offering was full and well assorted and prices had a downward turn. We quote 4¼@4½c. The manufactures of lead are steady and quoted: Bar, 6c; Pipe, 6½c., and Sheet, 7c., less the usual discount to the trade; and Tin lined pipe 15c. Block Tin pipe, 40c. on same terms. TIN.—Pig has had a somewhat firmer market on the more encouraging accounts from abroad, and the supplies in hand are offered with care and moderation. There is not much of a speculative element extant at the moment. We quote 19¼@19½c. for Australian, 19¾@19¾c. for Straits, 19½@19½c. for English Refined, 19¼@19¾c. for do. Common. Tin Plates sold slowly and in a very uncertain manner, with prices tending downward, but the reduction in cost commences to attract some demand, and the feeling of late has become steadier again. We quote I. C. Charcoal, third cross assortment, \$6.00@6.12½c. for Allaway grade, and \$6.25 for Melyn grade; I. C. Coke \$5.00@5.12½c. for B. V. grade; \$5.12½@5.25 for Yspitty grade; Charcoal terne \$5.37½@5.62½ for Allaway grade, 11x20: \$11@11.12½ for do., 20x25; Coke terne, \$1.87½@1.95 for Glais grade, 14x20, and \$10.50@10.62½ for do., 20x28—all in round lots. Spelter has not changed much in value, but demand very light and the market dull, quoted at 5@5¼c. Sheet zinc selling steadily on regular trade orders at about former rates, and quoted 7¼@7½ according to quantity.

NAILS.—The reports in most cases continue of a cheerful character and dealers generally appear well satisfied with the market. Demand is not uniform but runs up to a pretty full aggregate and rarely permits any surplus accumulation of supplies. Prices are held firmly in most cases and the list rates seldom departed from.

We quote 10d to 60d common fence and sheathing, per keg, \$3.15@3.25; 8d and 9d, common do, per keg, \$3.40@3.50; 6d and 7d, common, do per keg, \$3.65@3.75; 4d and 5d, common, do per keg, \$3.90@1.00; 3d and 4d, light, per keg, \$4.65@4.75; 3d, fine, per keg, \$5.40@5.50; 2d, per keg, \$5.40@5.50. Cut spikes, all sizes, \$3.40@3.50. Floor casing and box, \$3.90@4.65. Finishing, \$4.15@4.90.

CLINCH NAILS.

1½ inch, \$5.65@5.80; 1¾ inch, \$5.40@5.50; 2 inch \$5.15@5.30; 2½ inch, \$4.90@5.00; 3 inch and longer \$1.65@1.75.

PAINTS AND OILS.—The demand for paints has been very good, and somewhat on the increase, if anything, customers and orders from new sections coming to hand every day. The assortment called for is in about the usual form, buyers confining themselves pretty closely to staple goods, and of these the supplies are ample as yet. Prices fluctuate slightly, though, as a rule, the tendency is toward steadiness on all the principal descriptions of stock. Linseed oil has been in very good demand, and has strengthened somewhat again in value. Holders, however, believe in keeping stock in motion, and do not crowd the market too hard. We quote at 57@58c. per gallon from crushers hands.

PITCH.—About the ordinary demand prevailing, with the tone of market steady and sellers careful not to offer any surplus stock. We quote at \$1.85@2.00 per bbl. for city delivered.

SPIRITS TURPENTINE.—The call from consumers has been about up to the average and at steady rates. First hand parcels moved slowly and irregular, with values, however, very well maintained and supplies offered moderately. Accounts from primary points have, as a rule, been firm. As this report is closed, the quotations stand at about 39½@41c. per gallon, according to the quantity of stock handled.

TAR.—A somewhat irregular feeling prevailed, but the jobbing movement keeping well up to average, and at pretty much former cost. On first hand lots the tendency mainly in favor of sellers on the stimulus of short supply. We quote \$3.00@3.25 for Newberne and Washington, and \$3.00@3.37½ for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for *Quit Claim deed* i.e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranty.

2d—C. a. G. means a deed containing *Covenant against Grantor only*, in which the covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

ALPHABETICAL INDEX.

NOTE.—Names in SMALL CAPITALS convey proper from husband to wife.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date

REAL ESTATE.

H. E. SEWALL & CO.—THE GENERAL CO.—
partnership heretofore existin between the
undersigned, under the firm name of H. E. SEWALL
& CO., is this day dissolved by mutual consent.
Dated, New York, September 30th, 1880.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

H. E. SEWALL & CO.—THIS IS TO CERTIFY
that the undersigned have formed a limited
Partnership, pursuant to the provisions of the revised
Statutes of the State of New York.

1. That the name or firm under which said partner-
ship is to be conducted is H. E. SEWALL & CO.

2. That the general nature of the business to be
transacted is the purchase and sale of coal.

3. That the names of all the general and special
partners and the residences of each are as follows:
Henry E. Sewall, who resides in the City of New
York, in the State of New York; Rufus R. Sewall,
who resides in Keyport, in the State of New Jersey;
are the general partners, and Anthony V. Winans,
who resides in the City of New York, in the State of
New York, is the special partner.

4. That the said Anthony V. Winans, the said
special partner has contributed the sum of eighteen
hundred (1,800) dollars in cash, as capital to the com-
mon stock.

5. That the said partnership is to commence on
the first day of October, one thousand eight hun-
dred and eighty, and is to terminate on the thirtieth
day of September, one thousand eight hundred
and eighty-five, unless sooner dissolved by mutual
consent, in accordance with the provisions of the
aforesaid statutes.

Dated this 29th day of September, one thousand
eight hundred and eighty.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

ONE YEAR, in advance....\$10.00.

Communications should be addressed to

C. W. SWEET.

No. 137 BROADWAY

We do not wish to be understood as endorsing the views of Mr. D. G. Croly, an interview with whom, on the political situation, will be found elsewhere. The REAL ESTATE RECORD has no political ends to serve, but as politics and parties in their larger aspects affect the business relations of the country, we make no excuse for occasionally commenting upon public affairs, or for giving the views of writers who have made the politics of the country a study. The pending Presidential election has interfered with the business interests of the nation, but after matters are settled in November we expect to see a wholesome activity in all branches of trade, and the commencement of a decidedly upward movement in real estate which is not likely to culminate, we judge, for several years to come.

CHEAP MONEY AND ITS CONSEQUENCES.

The most extraordinary phenomenon of the market is the fact that, right in the heart of the business season, with the trade of the country enlarged beyond precedent, with new and tempting enterprises calling for new capital, that money should be quoted at $2\frac{1}{2}$ per cent. We have cheap money usually in mid-summer and mid-winter, when trade is stagnant, there are no crops to move and no new enterprises which call for the employment of capital. But it puzzles the wisest head to account for the present ease in the money market. It cannot be the influx of gold from Europe—that we had last year, in even greater quantities. But, then, money was very dear. It was not because of the non-employment of capital; for commercial operations are very active. It is, however, true there is very little speculation; and the transactions on the Stock Exchange for the past month have been exceptionally light.

But, how is this to affect prices, finally?

It will create inordinate speculation, in the near future. Unnaturally cheap money, in good times, is certain to result in the blowing up of speculative bubbles. It is sure to go into stocks; but, after they become inflated, the redundant money is used over again, in novel enterprises of all kinds; but, finally, it affects real estate. With the political problem solved, the future can be readily fore-

told—first, a buoyant stock market, then a general rise in prices and, finally, what is vulgarly called a “boom” in real estate. There is no realty which goes begging in or near New York, to-day. It is strongly held; and when speculative investors come along, well located, vacant property will jump fifteen, thirty, even fifty per cent.

There is no cloud in the sky, so far as the volume of our currency is concerned. The amount of our greenback currency is fixed by law. A rise in the rate of interest will take away from national banks all temptation to throw up their currency. While, so long as specie payments are maintained, we have coin, or available for coinage, \$550,000,000 of gold and silver bullion. In 1877, there was not more than \$15 per capita of money in circulation. At present, there is probably \$25 per capita; and, so long as we draw from Europe, while retaining our own bullion, the amount of available money is constantly increasing.

RAPID TRANSIT IN BROOKLYN.

According to all appearances property owners in Brooklyn, especially those along Fulton street and Myrtle avenue, are about to adopt as their own the policy that controlled the Sixth avenue property holders of this city when the Elevated Road was projected but not yet built. Whether they will be more successful in their opposition to the projected Fulton street Elevated Road than the Sixth avenue property owners have been, depends a great deal upon the manner in which they organize that opposition, and in this respect, as well as in others, they have the advantage of being able to avoid the errors that miscarried the plans of the New York owners. Not that the latter, as a mass, have to-day any valid reasons for underrating the value of their property as compared with the figures of the period when rapid transit was still a thing of the future, but their main object was originally to keep that avenue free and clear of all obstructions. In this they failed, signally failed, simply owing to the lack of proper organization. The horse car company relied upon the property owners for attending to the aggressive opposition work, and the owners in turn relied upon the influence and work of the horse car company. What was everybody's business, as usual, became nobody's business, and even when after the first legislative and judicial defeats of the surface company, the property owners saw the necessity for more active co-operation, only two or three of them put their hands in their pockets to defray the necessary legal expenses, not enough even to make a show in the courts. Whatever success has been

obtained subsequently as to progress made in regard to prospective damages, is due simply to the dogged determination of one or two Fifty-third street owners. This New York lesson should be taken to heart by our Brooklyn friends, if they mean to keep Fulton street and Myrtle avenue at all clear of an elevated road. Capital can fight capital if properly organized, but the burden should not all be placed upon the shoulders of one or two men. Not that we advise this opposition at all, for, after having a thorough exchange of views on the subject, it may be considered advantageous to owners to have an elevated road even in a tortuous thoroughfare like Fulton street. Only whatever be the decision arrived at, let all property owners share in the preliminary discussion, and also share in the responsibility of whatever action may be taken subsequently. At the same time it is well for property owners to understand fully the points set forth by the projectors of the road. They claim that from Adams street Fulton street is generally 80 feet wide between the building lines, with a roadway 42 feet wide, sidewalks about 19 feet wide, double track horse railroads in the roadway occupying 17 feet 2 inches, leaving 12 feet 4 inches between the tracks of the horse railroads and the curb lines. Myrtle avenue is generally 75 feet wide between building lines, with a roadway from 34 to 39 feet wide, double track horse railroad in the roadway occupying 17 feet 2 inches, leaving 10 feet 9 inches to 9 feet 4 inches between the rails and the curb lines. If the road should be constructed on Fulton street and Myrtle avenue according to the plans of the Commissioners, the cars would run entirely over the roadways, the southerly track would be a little southerly from the centre of the roadways, from 23 to 26 feet from the building line and from 3 to 6 feet from the southerly curb lines. This plan was recommended by the engineer and was found to be less objectionable than any other plan submitted or known to the Commissioners for like streets, and if built will be open to less objection than any superstructure that can well be erected for the purpose in Fulton street and Myrtle avenue.

It must be admitted at the same time by the owners of property throughout Brooklyn that the introduction of rapid transit will give life and activity to the real estate market in that section of Long Island. New York's experience ought to prove this, and Brooklyn lots, that heretofore were unmarketable, will soon rise in the estimation of investors, no matter whether the particular owners of Fulton street property object to the unsightly structure in the street or not. It is the increased accommodation that creates more travel, and more travel will

bring to the foreground property that cannot now be reached except by slow transit.

WORKINGMEN'S COLONIES NEAR NEW YORK.

The connection of our elevated railway system with new roads, already built or about to be built, north of the Harlem River, ought to suggest to real estate operators the wisdom of taking advantage of the better times to provide cheap homes for workingmen. Philadelphia, previous to the panic, did an immense business in workingmen's homes. That city was favorably situated for enterprises of that character, as it could grow in every direction, and the outlying lands could be bought cheap and were easily communicated with by street cars. The rivers on each side of New York and the distances to the north, before cheap land was reached, made it impossible to satisfy the demand of the working classes for cheap dwellings, as was done in Philadelphia, previous to 1873. We regret to learn that, owing to a faulty system, a great many of the cheap homes of the working people in Philadelphia have gone back to the persons who originally owned the land and whose interest was secured by mortgage.

In view of the ferry, about to be run across the Harlem, at Second avenue and the bridge, which must soon be built, a colony of workingmen is proposed, near Pelham, not far from Huguenot Park. The proposition is to cut up a piece of property into half acre lots, build thereon a house (the plot and the house to cost not more than \$2,000), the co-operating workingmen drawing each a house, as it is built, by lot, and agreeing to pay so much, weekly, until all are provided with homes. This scheme will, undoubtedly, be repeated upon the new road, which will connect with the Metropolitan Elevated, on the West Side. It is hardly to be expected that the Vanderbilt roads will give any encouragement to this kind of enterprise. The Hudson River property is for the rich, but it is surprising that the Vanderbilt interest did not see the wisdom of allowing working people a chance to reach all spots on the Harlem roads, which are available for cheap building purposes. It is to be hoped that large land owners, like Mr. James Gordon Bennett, will put their property into the market at such rates that it will be possible for the working people to secure homes upon the line of the new roads, about to be built, in the Twenty-third and Twenty-fourth Wards and in Westchester County, beyond. It is understood that the Land company, which was formed when the New York, Montreal & Boston Road was projected, have in their possession some six hundred acres, near Hall's Corners, back of Irvington, and that, as soon as the railroad is opened, connecting with Brewster's Station, the property (known as Elmsford Park) will be put into the market, not only for villa sites, but in small lots, to suit poorer heads of families, who wish to live in the country, yet do their work in the city. It may be remembered that Mount Vernon was settled by a colony of workingmen. The Purdy and Valentine farms were bought for \$230

an acre, and a thousand working people each took a lot. The land was divided, equitably, and to-day streets of houses for middle class and laboring people have replaced the old farms. It is difficult to find an unoccupied residence in or near Mt. Vernon, to-day. It has long been foreseen that the well-to-do of the working classes would some day find it to their advantage to settle on the vacant ground north of the Harlem River, and the new roads will enable them to do so.

THE GOLD AND SILVER MARKET.

The following table shows the condition of the leading banks of the Western World:

	Gold reserve.	Silver on hand
Bank of France....	\$140,800,000	\$250,693,554
United States.....	13,244,834	78,012,360
Bank of England....	128,312,650
Austro-Hungarian Bank	83,135,000
New York Banks.....	66,992,200
Netherlands Bank.....	62,520,000
Bank of Germany..	47,000,000	85,000,000

Most American readers will note with surprise the large amount of silver in the Bank of France, compared with the reserves of the same metal in the United States. The \$78,000,000 of our silver reserves include minor coins, as well as bullion; for, at last accounts, there was less than 50,000,000 silver dollars in the Treasury. The large quantity of silver on hand in the Bank of France does not drive out the gold; for that institution holds more of the yellow metal than does the Bank of England. Another surprising fact is, that counting the reserve in the New York banks, we have a larger specie reserve than the Bank of England by \$151,936,744. Gold and silver continue to leave New York City for the interior. On this point the *Public* says:

The total disappearance in ten weeks, ending October 9th, has been, of specie, \$49,481,118, against \$29,899,518 last year; and of legal tenders, \$9,854,960, against \$39,775,086 last year, so that the total drain upon this city for the season thus far has been \$59,336,078 of both kinds of money, against \$69,674,634 for the same ten weeks last year. The money still goes out, and in remarkable amounts, but has ceased to go out as rapidly or largely as it did in 1879. A part of the difference is accounted for, however, by the largely increased issue of silver and silver certificates.

The anti-silver people should bear this last fact in mind; for the use of the white metal helps to swell our stores of the yellow metal. There is in the country, in round numbers, in coin and bullion, \$593,500,000—of which only \$155,500,000 is silver. There is no danger of a silver glut, in view of these figures.

In view of the fact that the government reserves of gold and silver amount to \$213,257,194, while our greenback debt is something over \$340,000,000, would it not be wise for Secretary Sherman, instead of "bulling" our government bond market by constant purchases, to gradually increase our specie reserve, so that there will be a dollar of gold and silver in the treasury for every greenback dollar afloat? The one weakness in our financial system is the excess of greenbacks over coin reserves; for a drain of the latter, which is sure to come, some day or other, may lead to a suspension of specie payments by the government. We are never safe while there is a greenback prom-

ise to pay afloat, without the means to pay it in coin.

NATIONAL BANK ISSUES.

It is a noticeable circumstance that for some time past there has been no increase in the sum total of the National Bank issues; on the contrary, there has been a disposition to surrender circulation because of its unprofitableness. The week before last the Merchant's Bank gave up \$160,000 of its circulation, and the Park Bank \$335,000; so in these banks there was a contraction of nearly half a million of dollars. For the month of September, 1880, the National Bank issues decreased \$236,939. Circulation is not profitable in view of the high price of Government bonds and the continued low price of money. It has long been realized by intelligent bankers that the persistent buying of bonds by the Government, before they were due, had abnormally advanced their value. The enforced monthly purchase of silver bullion by the Government has enhanced the value of the white metal the world over; and it is very clear that, were Secretary Sherman to stop his weekly purchase, of bonds, Governments would rule probably three points below the present market. If, furthermore, bullion was allowed to accumulate in the Treasury until there was a dollar of gold or silver behind every greenback dollar afloat, it would add immensely to the credit of the Government, and secure us beyond all peradventure from any danger of a sudden demand for gold with which to redeem greenbacks. This, indeed, is the one cloud in the future affecting the permanency of specie resumption. We are never entirely safe with a large greenback debt and an inadequate specie reserve with which to redeem it. It is very evident that if money remains at less than 3 per cent. on call, and Governments continue to sell at their present figures, that there is every probability of the National Banks surrendering some of their currency in view of its unprofitableness.

This consideration must be kept in mind in reasoning about the future course of the money market.

DANGEROUS JUDGE-MADE LAWS.

The Court of Appeals is fast becoming a nuisance. Its recent decision, re-instating an engineer who had been removed by Commissioner Campbell, for cause, is a very dangerous matter, indeed; following, as it does, the decision in the case of the police commissioners, which divested the mayor of authority over any appointed municipal officer. All good government involves responsibility and accountability. The organization of an army is one, which, after all, is best fitted for any human work. A military body must have a head, with subordinates responsible each to the grade of officers above him, but, if corps commanders were made independent of the commander-in-chief, if the colonels did what they pleased, irrespective of the commands of the general, it is very evident that the army would become a mob. The law was clearly designed to give the mayor

authority, in the way of removal, if not of the appointment of all his subordinates, but the courts interfere and strip him of this power, under some technical rulings, and, in effect, make it impossible to remove any city officer, without the formality of a court and of a possible appeal to the law, in every case. The commissioner's discharge of his engineer was declared to be legal by the law officer of the city, by the judge of the court before whom the matter came, by the unanimous decision of all the judges of that same court, and to this, three members of the Court of Appeals subscribed. But four members of that court declared that the dismissal of the engineer was illegal. Property holders must understand that it is a very dangerous kind of government which keeps subordinates in power in defiance of the wishes of the chiefs of the departments. There can be no efficient government when such is the case. It is a pity, after all, that the judges of our Court of Appeals are not more amenable to public opinion. They are elected for terms which, practically, amount to a life tenure, and hence are becoming indifferent, not only to the wishes but to the welfare of the community.

FLATS AND TENEMENTS.

Our readers must have noticed how large a proportion of projected new buildings are for handsome tenement houses and first-class Paris flats. The latter is, after all, but an aristocratic, somewhat costly, tenement house. They have somehow become popular in the metropolis, due, no doubt, to the costliness of living and to the desire of the heads of families to economize domestic labor. Where four servants are required in a private house two are considered ample on a flat, and where meals are served, even one girl will do the necessary work of a small family, the washing being given out. No doubt the popularity of the Paris flats is, in some measure, also due to the ambition of people who have been comparatively poor, to live in a large palatial residence. Families who were forced to dwell in small houses or occupy apartments in modest dwellings, on becoming better off, or, having a stroke of good luck in business, would naturally feel like dwelling for a time, at least, in an immense building, equal in magnificence and embellishment to the palace of a king.

One of the consequences of this kind of living is the economizing of space, and hence the slower movement in the speculation in vacant lots. All of the present population of New York, if it was under the roof of apartment houses, could be amply accommodated on this Island in a line drawn from East to the North River below Forty-second street. It is the demand for single houses, occupied by one family, which consumes so much of our valuable ground. If, by any accident, the tenement houses and flats should become uninhabitable, and the family hotels should be no longer used, all the vacant lots below One Hundred and Tenth street would not supply the demand for houses to accommodate the former

occupants of these large establishments. Flats, therefore, mean such economizing of the available ground of New York as will decrease the demand for residence property. It is not to be disguised that old house agents are of the opinion that the mania for these great establishments is only temporary; that after a time the heads of families will want their own houses; that after trying living in suites of rooms for a couple of years, they will long for the privacy of their own homes. They will tire of the exactions of the janitors; they fear that their coal in the open bins will be stolen; they do not like their children to be so intimate with the children of people living on the same floor. Then it does not seem so pleasant for ladies to receive their friends in a few rooms in the upper part of a great flat rather than in their own parlors in their own house. Still there will always be a sufficient number of floating people, of families who wish to reduce expenses or economize labor, to fill the houses already constructed. The experience of Paris settles that question, and New York is yet to become a second Paris.

At any rate these new dwellings have become a feature in our city architecture. They are palatial, imposing, and give scope for boldness and variety of design. If some of them should become unpopular, the more elegant and magnificent will always command their price. There is probably no way in which capital can be invested which is sure of a large and certain return than it is in the erecting of family hotels or Paris flats, say in the neighborhood of our Parks in the Twelfth Ward of this city.

ALL RIGHT, OF COURSE.

John K. Porter is a member of the law firm which represents the Metropolitan Elevated Railway Company in all legal contests. During the legislative investigation into railway corporations the fact came to light that that company had paid enormous sums of money to Messrs. Porter, Lowrie, and their legal associates. The controlling stockholder in the Metropolitan Elevated is understood to be Jose F. Navarro. During the regime of the Tweed Ring, Mr. Navarro secured a contract from Wm. M. Tweed and Alexander Frear to supply the city with water meters, and, singularly enough, this seems to be the only contract ever made by Tweed in which he claimed no divvy. Upon the breaking up of the ring, Navarro's claim for the water meters was not allowed on the ground that there was a corrupt understanding with Tweed and Frear. The claim was lately transferred to one Baird, also a Metropolitan Railroad official, who made application to the courts to represent Navarro before John K. Porter, who has been the referee as far back as 1874. At the end of nearly six years, referee Porter reports the claim a just one, and that the city, in equity and law, is bound to pay it.

The city will further contest this award on the ground that the charge for the meters was excessive; and will show that Tweed was not in the habit of giving valuable con-

tracts without a handsome consideration for himself.

We have repeatedly said in these columns that, on the return of better times, we would see the old Tweed Ring practices revived. The same conditions which gave us municipal misrule in the past, continues in full force to-day. We have a vast voting population who have no stake in the property of the city, a business class which takes no interest in local politics, and swarms of politicians of both parties who propose to live at the expense of the public. It is a notable circumstance that there has been no reduction of the city's expenses since the overthrow of the ring. We pay the same extravagant salaries which obtained before the panic, and every effort to reduce the local burdens and cut off sinecures has been defeated in the legislature. The one measure which did get through, and which would have saved us \$2,000,000 a year, was vetoed by the late Gov. Robinson on technical grounds.

Nor do we see any hope in the immediate future. Citizen associations, reform organizations and tax-payers' parties have all been tried and have failed. We have probably entered upon a new era of "rings;" other Tweeds are in store for us, while it will be found in time that the Barnards and Cordozas still have their representatives in our courts.

THE TRUTH ABOUT LEADVILLE.

In the early part of April, while the "boom" in mining stocks was still under way, the editor of THE RECORD thought he would warn investors against certain delusions which seemed to possess them at that time. Two supplements were issued, trying to put the New York public on its guard, but at that time it was not the truth which was looked for, but pleasant falsehoods, and so our warnings fell unheeded. When Amie was selling at \$4, Little Chief at \$10, Climax at \$3 and Chrysolite at over \$30, we published in a supplement the following article:

People who have money to invest would do well to be on their guard against any of the companies organized on Leadville property. Not but that the district is rich, very rich, but it should be remembered that the ore in that camp is a deposit and is not likely to last. Old Californians shake their heads and look dubious when examining the Leadville mines. These are rich in silver carbonates; are easily worked because near the surface, and hence the first output is very large, and the mine apparently very profitable. But, as has been demonstrated by Little Pittsburg, and other Leadville mines, the deposit does not last long. Uninitiated investors may not know that the most permanent mines are those which bear ore in fissures; that is, openings in the rock in which is quartz bearing metal. But instead of running down into the earth as is the case with true fissure veins, these Leadville deposits are horizontal, or as one well-known miner says, "in Leadville the fissures are on their backs." Hence, instead of having the centre of the earth to go for, the Leadville mines have at best less than a hundred feet of depth. Old, experienced miners say "beware of specimen mines." That is, distrust any rock which shows gold or silver to the naked eye. Nature is never or very rarely lavish. Wherever gold or silver is found in an almost pure state, one may be sure that there is not much of it. The most profitable mines, so far, have been those in which the silver has been mixed largely with lead, or, as in the Black Hills, where the gold is a very low grade but covering a large amount of rock. Silver Cliff has been well styled the Silver Black Hills, for there the ore is in immense quarries. This one is of low grade, requiring expensive machinery to

work. But that region, like the Black Hills, exemplifies the experience of all miners, that the most profitable districts to work is where the grade of the ore is low, while there is plenty of it. The Plumas County region, in California, has this peculiarity; thence the first popularity of mines like the Green Mountain, Empire, and Grass Valley, where dividends have been paid almost for a generation. But Leadville has literally put its best foot foremost. The ore was near the surface, of very high grade, easily mined, and the first output was so astonishing that it led to the organization of companies and their capitalization at most monstrous figures. It was very easy to compute that if a mine could pay two hundred thousand dollars in dividends in a month that it must be worth many millions of dollars. The manipulators, however, very well understood that this could not last, but the ignorant public bought upon that basis. This is why so many mine speculators are anxious to have a new Mining Board, to get rid of the stocks now paying large dividends, but which, in all human probability, will run out and run down, as has the Little Pittsburg. The figures at which the leading Leadville properties are placed on this market are simply monstrous. They are a fraud upon the public. True, they seem to be justified by the dividends paid, but the public must bear in mind that nature does not scatter her riches in any such way. The people who finally make the money are those who get the properties for a few thousand dollars and then put them on the market for many millions. Beware of high-priced Leadville stocks.

Had investors taken the trouble to even read THE RECORD at that time, how much money they might have saved. All the Leadville stocks promise to go out of sight. New properties in that region will come to the front and pay large dividends, but they will not last. The story of Little Pittsburg, Little Chief, Amie and Climax will be theirs. The only possible exception is Chrysolite. That has much unexplored territory, and new ore bodies may be uncovered, and the mine may last as a dividend paying property, provided its management is honest. We know nothing against the present board. We do know that the old board were controlled by mining sharps and swindlers.

The number of petitions filed with the Assessment Commission is as yet quite limited. Perhaps property owners have not been made aware of their rights under the Statute. Would it not be desirable for the Commissioners to notify every person affected by the act that petitions must be filed prior to November 1st? Individual notices might be prepared and distributed as in the case of assessments. The object of the act creating the Commission is to secure substantial justice between the city and owners of property affected by assessments deemed unfair and extortionate. The adjustment of such disputes will bring into the city treasury a large amount of money.

It is gratifying to note that the rate of taxation has been reduced to 2.55. Vast as were the stealings of the Tweed Ring, they, after all, did not so involve the city but that we could pay the debt they contracted, while the growth of the metropolis has been so phenomenal that we can meet all our obligations, and reduce taxes. Our expenses are far more than they should be. We ought to save from three to four million from our yearly local charges. We despair of doing this because of the steady front the leaders of the two parties oppose to anything like a serious reduction of our city expenditures. But we can prevent undue waste and more stealing. We are constantly adding to the area of our taxable property, and if our fixed charges

do not very vastly increase the rate of taxation must, from this time forth, steadily decrease.

THE ELECTION AND ITS RESULTS.

INTERVIEW WITH AN OLD EDITOR—WHAT MR. D. G. CROLY THINKS OF THE FUTURE POLITICS OF THE COUNTRY.

REPORTER—"Mr. Croly, you are upon record as having made from time to time predictions about future events, political and financial, many of which, if not all, have proved correct. Did you look for the Republican gains in Ohio and Indiana, and do you believe that Garfield will be the next President?"

MR. CROLY—"I confess I was in doubt up to within a few days of the election, but I then told my friends that the results in the Central States would be in favor of the Republicans, and that in all human probability James A. Garfield would be the next President of the United States. I thought from the first that the true issue was the prosperity of the country, and hence, I supposed, that John Sherman would be the nominee, as his candidacy would emphasize the success of resumption and the magnificent results which have followed the addition of gold and silver to our paper currency."

REPORTER—"How do you account for the result in Maine?"

MR. C.—"The election in that State was very significant and is a warning to the Democratic party. The result in Vermont, Indiana, Ohio, Iowa and West Virginia, shows that as between the two parties the majority, in the Northern States at least, is with the Republicans. But the Fusion victory in Maine also shows that when new and vital issues are brought up, it is possible to defeat the Republican party. It should be remembered that the Greenback issue is now ignored by the so-called Greenback Labor party. Their platform now advocates the employment of gold and silver, as well as paper, and then they represent the growing distrust of the old party leaders, and the feeling that something should be done to curb the great corporations. Under the no-government theories of the old Democratic party, the wealthy corporations have had everything their own way. They have controlled the legislation of States and of the nation. The first effective revolt against their rule was in California. The Anti-Monopoly party in that State had to break down the organization of both political parties before it could effect its object, which was accomplished by the adoption of the new Constitution. The reformers had the united press against them, as well as the entire wealthy class, but nevertheless they succeeded. When this anti-corporation movement reached the East, it unfortunately allied itself with the Greenback Inflation party, and this eventually discredited it when resumption proved successful. But with the suppression of the Greenback element, we see them again successful in Maine, where the Democratic party has been swallowed up in the so-called National Labor party."

R.—You argue then that the present Democratic party has no future, and that it must present new issues to achieve victory?

MR. C.—Precisely. The Democratic party has had no cry. Their platform differs in but few respects from the Republican platform. All they could ask for was a change. But the answer was obvious. If the country is prosperous, if our national debt is being paid off and emigration is large, if the whole world is becoming tributary to us for food and cotton, why any change? The Democrats had the "fraud" cry, but they gave that up in declining to nominate Tilden.

R.—What will be the most obvious consequences of the election of Garfield?

MR. C.—It will make Roscoe Conkling the leading figure in American politics. He will be the power behind the throne, greater than the throne itself. Ulysses S. Grant is simply his retainer and satellite. The latter has permitted himself, at the behest of Conkling, to become like unto an ordinary politician. His animadversions upon General Hancock, who is an honorable, high-minded gentleman and soldier, form one unfortunate page in the history of the ex-President. Conkling's ablest rival, Blaine, is stripped of prestige because of the result in the State he represents. All the other Republican leaders are dwarfed by the marked individuality of the great New York Senator.

R.—And what is your judgment of Garfield himself?

MR. C.—He is an exceptionally able man. Large brained, liberal in his views, a dexterous politician, but weak morally. There is no explaining away that Credit Mobilier business. There has been no pecuniary scandal connected with the administration of Rutherford B. Hayes. His appointments have generally been wise, and he will pass into history as one of the most upright Presidents the Republic has ever had. I very much fear that Garfield's administration will not be over clean. He got his training in public life, when waste, extravagance and corruption were rife in every department in Washington. There will be an abundance of scandals during his rule, not because he is a bad man, or will profit himself, but because of the influences which will surround him, and because he will probably not have the moral courage to resist, them. But he will give us an able, politic, harmonious Government; one which will have more influence on the two Houses of Congress than that of either Grant or Hayes, for Congress has paid little or no attention to the recommendations of the last three Presidents. Garfield is at heart a civil service reformer, but he will peddle out all the appointments to members of the Senate and the House in order to carry through his measures. He is a free-trader heart and soul, but the vast pecuniary interests at stake will induce him to uphold the present, to me exceedingly burdensome, tariff. But during Garfield's administration the South will be conciliated. There will be no danger of foreign war, and the business interests of the country will be fostered and encouraged.

R.—Members of the Republican party will hardly adopt your view of their favorite candidate?

MR. C.—Party feeling is running high just now, and the successful man, whether he deserves it or not, generally stands well with his contemporaries, and, were I to wait for three years before venturing upon this judgment, I would receive more credit for it than I shall to day.

R.—"What will happen to the Democratic party?"

MR. C.—It will have to go into opposition and endeavor to profit by the mistakes of the party in power. It will find an abundant field for usefulness in criticising the Garfield administration. Before the next Presidential election it must profit by the lesson of California and Maine, and consent to adopt new and popular issues. It must better present the aspirations and prejudices of the laboring classes. This is so large a subject that I do not care to go into it just now, but in a general way I would say that if the Democracy hope for success in the future it must favor the using of all the powers of the government for the benefit of the common people. In other words, it must get rid at once and forever of all the old Jeffersonian theories about government and its limitations, and accept with modifications the programme of the social Democrats of Europe, and

which will be found incorporated in the anti-monopoly platforms of the California Reformers and of the Maine National Labor Party.

R.—How about the November election?

MR. C.—The Republicans will, I think, carry New York, Connecticut and perhaps New Jersey. The Republicans will have a good working majority in the House and the Senate will be theirs in two years time. It is a significant fact that Conkling has never failed to carry New York State when it was his wish to do so. When his will was over-ruled or his counsel disregarded it resulted in the State being carried by the Democrats. He will have the naming of the next Senator from New York in place of Kernan. He is destined to wield a greater influence on the nation than any Senator since the time of Henry Clay.

GOSSIP OF THE STREET.

"The fact is," said an active broker to the writer, "there is a great deal of money seeking investment, and not many very good securities, or, at least, not many known to be such. I had to lend money to-day at $2\frac{1}{2}$ per cent. on call. It follows that stocks can be carried at a handsome profit if they only pay 6 per cent. It is absurd to talk about any set back to the market so long as money continues as cheap as at present."

"How do you account for the ease in the money market?"

"To the absence of speculation. The disasters of last spring, and the losses in all departments of trade, by those who held stocks of goods speculatively, have crippled the most adventurous, hopeful of the speculators proper. A new crop will be developed bye and-bye, perhaps before spring. But in the metals, in grain, cotton, general merchandise, while there is an active business, it is all legitimate. Then you see there have been such large additions to our currency. According to the Director of the Mint, Mr. Burchard, since June 30th, 1879, \$83,390,305 of gold coin and \$37,743,350 of silver coin has been added to the active circulation of the country. These sums represent the actual coinage, and the import of American coin for the year. The same authority states that on October 1st there was in the country, of coin, \$369,881,000 in gold, and \$149,799,335 in silver. In addition to these large aggregates, the Treasury holds \$68,040,540 in gold bullion, and \$5,550,759 in silver bullion, which the mints are turning into coin as fast as possible. Hence, there is continued inflation; and while this continues stocks have got to go up; and after stocks general merchandise, and then real estate."

"What shall I buy?" asked an investor of a well-known literary broker.

"Erie has advanced less than other stocks. It is earning largely, and can pay a dividend on the preferred. Central, Ohio, & Chesapeake is also good."

"What do you think of Lake Shore?" asked the writer of an old operator.

"As a property, I think very well of it; but I have recently traveled over the road to make certain inquiries, and there are things about it I do not like. It may be true that the road is earning 12 or 13 per cent. per annum, but there is scarcely any hope that the stockholders will profit thereby. All our best roads are handicapped by the system which obtains of the directors owning interests in the sleeping car and transportation lines which run over the roads. Of all the many freight lines on the Central and Lake Shore roads, Vanderbilt and his friends are large owners. As a matter of fact, the property of the stockholders is used for the benefit of the managers. Even in the stock yards to which cattle are consigned, the directors own most of the

stock, and the large drovers are forced to use the yards owned in this way."

"Did not the Legislative Committee bring out these facts, and are they not published in its report?"

"Yes, some of the facts were brought out, and I am surprised they attracted so little attention. I have reason to believe that the lawyers and others who represented the State, somehow were induced not to press the matter too closely. It is a suspicious circumstance that certain persons who represented the opposition to Vanderbilt, have been large purchasers of property since the investigation. So you see Lake Shore, Central, Northwest, may make large profits, and yet what is left for the stockholders may not be more than a moderate percentage."

ABOUT MINES.

A GIGANTIC PROJECT.

The report comes from Virginia City that the Bonanza firm talk of getting possession of the Lady Bryan property and sinking a shaft to the depth of 6,000 feet. There is already a shaft on the Lady Byran nearly 800 feet deep. This shaft is situated about one mile east of the Union Consolidated shaft. The theory is that the Comstock ledge keeps dipping to the east. In the present shaft of the Union Consolidated they have almost reached 2,600 foot lead; but the farther they go down now the more distant are they from the ledge, and the cross-cutting, consequently, more difficult and expensive. This is a gigantic undertaking and if seriously attempted will involve enormous sums of money and perhaps six years of time. So far the expectations respecting the north end mines have proved disappointing. The bonanzas have not been found and San Francisco is in mourning in consequence. The present outlook on the famous lode is very blue.

THE BODIE MINES.

We warned our readers some time back to beware of Bodie properties. They will come to the front again some day. The current price of the stocks compared with what they were a year ago shows that the insiders see nothing in the immediate future of the Bodie properties. There was a break in Standard in this market during the past week; but all the private advices from the mine are good. All mining shares are necessarily sensitive, in view of the unpleasant experiences of the past year. It looks as if there was some movement on foot in Bechtel.

THE TIP TOP.

This mine is situated in Central Arizona, near Prescott, and has a history. It was floated on the San Francisco market four years ago at from \$5 to \$6 per share. It was manipulated by a syndicate composed of Lent, Haggin and others. The sellers of the mine had entire faith in it, and advised their friends to buy the stock at its highest, but no dividend has yet been declared, while two assessments have been levied. The price got down as low as 75 cents a share, but last spring it sold up to \$7 per share. It is now selling at \$3 a share. One of the sellers of the mine tells us the rock is very hard and the vein very narrow. There may be other veins which would be discovered if there was a crosscut run from the present workings; but the rock is so hard that no attempt has been made to penetrate on either side of the level on which they are drifting. Had the Tip Top been owned by a private company, a partnership or a single individual, it would have paid handsomely. But being worked by mine manipulators and stock jobbers it may never pay dividends. We give these facts, as the stock is largely held here in the East.

CHRYSOLITE.

This mine may prove an exception to the other Leadville properties. There seems to be no hope

for Little Chief, Amie, Climax, or Leadville. There is a faint hope that Little Pittsburg may again be of little value; but Chrysolite has so much unexplored territory, that its stock may again become valuable. The management is now controlled by such men as W. S. Gurnee, Rossiter Raymond, T. C. Platt, Abram Hewitt and others of like character. The present manager is an honest man, and everything around the mine is in marked contrast to the condition of affairs which existed previous to the change of management. If there was any justice possible in mining stock operations, the former managers ought to be sent to Sing Sing—we mean, of course, the real controlling powers, and not the nominal directors.

HUKILL.

This is a good property, well located, and ought to be worth all it is selling for on the market; but the California crowd who are manipulating this stock on this market are not to be trusted. They have ruined everything they have touched so far; and all who deal with them lose their money.

GENERAL MINING NEWS.

There is a better feeling in the mining circles. While investors have generally lost money, promoters, dealers, manipulators; bears have made handsome profits. A strike on the Comstock, new developments in Colorado, a declaration of dividends by two or three good properties, or a resumption of dividends by Chrysolite or Little Pittsburg, would give new life to the market.

The opening of the Boston Mining Board has added largely to the dealings in mining shares. The Eastern investing public have had a larger experience in mining, especially in copper mines, than the New Yorkers have had. Taking advantage of our mistakes, the Boston operators can make a better showing than we have done, at the end of their first year.

It is now settled that the two Mining Boards are to be consolidated. The regular Stock Board has been consulted, and it is not improbable that the Mining Trust Company will be in a position to lend liberally on all active stocks. The insurance in the new Board will be increased to \$4,000; and it is not improbable that sometime during the year 1881 the seats in the Mining Board will be worth from \$4,000 to \$5,000.

THE BEAUTIES OF NEW YORK.

Editor of THE REAL ESTATE RECORD:

SIR:—I would like to call the attention of your readers to certain portions of Manhattan Island which, I am sure, are not known even to old residents. Up to within a recent period even Washington Heights was a *terra incognita*. The Ridge Road has afforded some few people a chance to see this beautiful section of the city, and the new drive nearer the river from One Hundred and Seventy-sixth street to the upper end of the Island will be a surprise to New Yorkers, when they come to know of the beauty of the scenery on the route. The opening of the Elevated Road to One Hundred and Fifty-fifth street has made available another region of which I find very little is really known except by a poor class of people. Let the traveller, as I did last Sunday, take the Elevated Road to this point, and then walk across the flat towards High Bridge. After a time they will come into High Bridge Park, and I confess to being astonished at the rural beauty which surrounded me on every side. The walk is shaded throughout, the trees are noble, the path winding—now descending into dells, then rising up into declivities, again meandering around romantic rocks, and most of the time within view of the Harlem River, which presents a very animated scene because of the boats of the practising oarsmen, the canoes, etc. This season of the year is especially beautiful. The fine trees are clad in their autumnal foliage, and every person one meets is laden with the spoils of the forest. The path continues through this, as yet virgin park, to High Bridge, and then the walk on the avenue until you reach the bridge itself, is well worth doing. A steamer plies on the river, so that a person who wishes to reach the east side can be taken from High

Bridge to the New York Elevated Road terminus on the Harlem River. People who drive can have no idea of the beauty of this walk. Most of our well-to-do citizens think it beneath their dignity to be seen above the park except on horseback or in a carriage, and hence this exceedingly beautiful region is given over to mechanics, and the grounds, or at least a portion of them, are made use of by peddlers, lager beer sellers and rifle-shooters, when it should be kept clear of all nuisances of that kind. It is in this part of our Island that our Richmond Hills will yet be situated. Fifty acres of land near the High Bridge has already been designed for a public park. Why should not the Commissioners do something towards getting it into shape for the thousands of people who are now disposed to visit the natural beauties on that part of our Island? FLANEUR.

TRIAL OF ELEVATORS AT COOPER INSTITUTE.

There was an interesting trial of Galland's Elevators at the Cooper Institute, on Friday morning, 8th inst., resulting highly satisfactory to those present and interested. Among these were Peter Cooper, Professor Zachos, Mr. James McCreery, E. H. Miller, the builder, D. Jardine, architect, Engineer Murray, of the Bank Note Company, and, of course, Mr. Galland. After the hoisting ropes had been cut, the car, with eighteen hundred pounds weight, was lifted up to the second floor. The rope having subsequently been suddenly cut with a hatchet, the fall of the car was only 1 1/4 inch. At the second trial, the heavy weight was removed from the car, leaving only three hundred pounds, and the fall was only 1 1/2 inch after the rope had been cut. The experiment proved, to the satisfaction of all present, that the more weight there is in the car the less danger there is of falling. The elevator, which is of the "Monitor" hydraulic pattern, is manufactured by Galland & Co., whose offices are in the Evening Post Building.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv and v of advertisements.

In the presence of more numerous offerings, by various auctioneers, there was, of course, a much larger attendance at the Exchange Salesroom, during the week, and among the parcels sold were several vacant lots, as well as improved property in the lower part of the city. There was spirited bidding, especially on Thursday, when the Eighty-fourth street lots and also the southeast corner of St. Nicholas avenue and One Hundred and Forty-fifth street were offered. The latter was, however, knocked down to the plaintiff, by Mr. Raymond, for \$30,000. One of the Sternberger Brothers, bankers, secured the six lots on Eighty-fourth and Eighty-fifth street, 175 feet east of the Ninth avenue, for \$27,000. They were sold by Mr. Henriques. A deep lot, on Broome street, near Crosby, offered by Scott & Myers, was sold at \$18,050, the sum of \$35,000 having been refused for it at an attempted sale under private contract. A small house, on East Thirtieth street, excellently located, but requiring the expenditure of considerable money, was sold by Mr. Bleeker for \$6,900, and Mr. Harnett, on the same day, sold 204 Front street, corner of Gouverneur street, for \$4,550.

During the coming week, Mr. Harnett will sell, at auction, on Wednesday next, valuable improved property on Twenty-third and Twenty-second streets, west of Fifth avenue, and several brick dwellings on Fourth avenue, and business property on Church street. The day following, he will sell vacant lots, in Harlem, between Fifth and Sixth avenues, for which see detailed announcement in advertising columns.

An important executor's sale, by E. H. Ludlow & Co., to take place on the 26th inst., is announced elsewhere in THE RECORD to-day. The property belongs to the estate of the late Owen Keenan, and comprises houses on East Seventy-ninth street, Lexington and Second avenues, also vacant lots in the immediate vicinity of the above. Fuller details of this sale will be given in our next issue, but in the meantime we direct the attention of investors to the advertisement in another column.

There were some important auction sales of vacant lots in Brooklyn yesterday, but they occurred at too late an hour to enable us to give the details in this week's issue.

GOSSIP OF THE WEEK.

The buoyancy of other markets made itself felt in the shape of a firm undertone in the Real Estate Market during the past week, and many brokers, on behalf of investors, made offers for property that could not be secured at the offering prices. The feeling is general that the end of the year will see the real estate business fully abreast of other lines of trade, and that this market will share the activity of other markets.

The very fact that the demand for improved property is constantly increasing is regarded as the very first evidence of an increased population in our midst, showing itself not only in the purchase of houses by merchants, doctors, lawyers and other professional men, but in the decreased accommodation now available for those seeking apartments or good boarding houses. Any number of houses of the latter description have been re-rented at an advance by the actual tenants since the close of the summer months, and, in every instance that has come under our observation, the new occupants find no difficulty in securing a pro rata higher rent for apartments in good localities.

Toward the close of the week it was reported, in the street, that L. J. and I. Phillips had sold, at private contract, a large quantity of improved property. Upon applying, yesterday to the senior member of the firm for information, he admitted that the sales thus made by him, during the week, amounted in the aggregate to \$100,000, but regretted that he was enjoined both by sellers and buyers from giving the details for publication until the deeds are placed on record, which will be in a very few days. Mr. Phillips stated, however, that the property thus disposed of was located south of Fourteenth street. The same firm sold, in the early part of the week, for Mr. Cotting, to John D. Crimmins, sixty feet on the south side of Sixty-ninth street, between Fifth and Madison avenues, for \$60,000. Mr. Crimmins has since resold the same at an advance.

Scott & Myers have sold, at private contract, for Mr. John A. Monsell, three lots on Sixty-third street and the Boulevard, 58.5x33.4x71.7x75x100.5, for \$32,000 cash, to Mr. W. H. Scott.

Mr. W. J. Barnes has sold twelve lots on the northeast corner of First avenue and One Hundred and Sixth street for \$27,000, four lots on the northeast corner of the same avenue and One Hundred and Fourth street for \$7,000, two lots on One Hundred and Eighteenth street, east of First avenue, for \$1,800, also, for Jefferson M. Levy, two lots on the north side of One Hundred and Ninth street, 167 feet west of Fourth avenue, 41.9x100, for \$1,800.

Mr. J. H. Coleman purchased, at a foreclosure sale, about ten days ago, four lots on Two Hundred and Fifteenth street, 700 feet east of Tenth avenue, for \$100. During the past week he resold these lots to Mr. Gantz for \$1,020.

In Brooklyn, Chas. A. Seymour & Co. have sold the northeast corner of State and Hoyt streets, five vacant lots, for \$22,000. These lots are to be at once improved with first class dwellings.

In this city the sale of residences up town continues without interruption. Mr. Vernon K. Stevenson, Jr., has sold, for Mr. Luyster, the builder, No. 11 East Sixty-sixth street, a four-story brown stone house, 25x60, and two-story dining room extension, by half the block, for \$62,000 cash. The purchaser is Doctor Reynolds, a son-in-law of the late Oliver Charlick. The same broker has sold No. 123 East Thirty-sixth street, a four story English basement house, 15x6. x 100, for \$15,500, to Drs. Scott and Douglass.

Mr. De Forest has sold No. 42 East Sixty-seventh street, 20x60x100, to Mr. J. D. Finges for \$31,500.

Comptroller Kelly has bought one of Mr. Mowbray's houses on Sixty-ninth street, near Madison avenue, a four-story twenty foot house, for \$34,500.

Mr. Hutchinson, a Wall street banker, has just begun to build a thirty-four foot house on Fifty-eighth street, near Fifth avenue, costing \$120,000, and Mr. John H. Sherwood is improving the northeast corner of Sixth avenue and One Hundred and Fifteenth street, with a three-story dwelling and stable, at a cost of \$50,000.

It will also be seen, in our list of projected buildings, that Mr. William Noble has filed plans for the construction of fourteen four-story flats on Sixty-ninth street, west of First avenue, to cost \$14,000 each, and that W. B. & O. Bartou are about to build

six houses, 16.8x45, costing \$9,000 each, on One Hundred and Thirty-third street, west of Sixth avenue.

New buildings are also going up rapidly in Brooklyn: three stores and dwellings on Fifth avenue near Seventeenth street, two more on Carroll street near Clinton, and two brick stores on Broadway near Division avenue.

The application for \$10,678 for surveying, maintenance, etc., of the annexed district during 1881, made by the Park Commissioners, is not considered sufficient by owners for all the work that should be done next year north of the Harlem.

The following are the sales at the Exchange Salesroom for the week ending Oct. 15:

* Indicates that the property described has been bid in for plaintiff's account:

Broome st, No. 423, s. s. 50 e Crosby st, 25x122 x25x121, vacant, with use of 12 foot alley which crosses rear. W. O. Curtis. (Amt due, abt \$11,311)	\$18,000
Front st, No. 301, s w cor Gouverneur st, 25x 63 2, three-story brick dwell'g. Michael H. Cashman.	4,550
*Halsey st, s w s o Morris pl, runs south-west 195 to William st, x southeast 100.6 x northeast 181 x southeast 193 8 to Courtlandt av, x northeast 115 to Halsey st, x northwest 295. Morrisania Sav. Bank. (Amount due, abt \$8,023)	8,675
10th st, No. 119, n s, east of 3d av, 26.6x24. Kingsland Smith. (Executor's sale) ..	16,000
24th st, No. 331, n s, 225 w 1st av, 25x98.9, four-story brick tenement. Mary E. Haviland. (Partition sale)	5,700
24th st, No. 316, s s, 231 3 e 2d av, 1.9x98.9, four-story brick dwell'g. Mary E. Haviland. (Partition sale)	6,900
30th st, No. 134, s s, 71 e Lexington av, runs south 218 x east 20 x south 14 x east 9 x north 28.9 x west 29, three-story brick dwell'g. Morris Taylor. (Partition sale) ..	8,500
*82d st, s s, 300 w 3d av, 16.8x87. Mary McIntosh. (Amount due, abt \$8,700)	8,500
84th st, n s, 175 e 9th av, 75x112.2	27,000
85th st, s s, 175 e 9th av, 75x102.2	
Mayer Sternberger	31,000
*Av St Nicholas, s e cor 145th st, runs east 202.10 to a proposed new av, x south 150 x west 200 to Av St. Nicholas, x north 183 9, vacant. J. C. & R. M. Vanden Havel ..	
6th av, No. 783, w s, 75.4 n 41th st, 25x100, four-story brick store and dwell'g. Richard S. Clarke. (Amount due, abt \$3,550)	29,930
Total	\$160,875

BROOKLYN, N. Y.

In the City of Brooklyn, Messrs. T. A. Kerrigan and J. Cole have made the following sales for the week ending Oct. 13:

*Boorum st, n s, 175 w Leonard st, 25x100. Frederick Schnitzer, et al. (Morts. \$2,500) ..	\$3,500
Decatur st, s e cor Hopkinson av, 53x120. Richard Powell	500
Duffield st, w s, 208.4 s Willoughby st, 21.8x 100.3. Henry S. Vander	4,775
Floyd st, n s, 175 w Throop av, 25x100. R. A. Andrews	3,200
Huron st, n s, 250 e Manhattan av, 25x100. Chas. E. McKay. (Exrs. sale)	80
*North Elliott pl, o s, 83 s Aulurn pl, 25x100. Thomas Edwards. (Mort. \$4,50)	5,000
*Sackett st, s s, 103 4 w Court st, 23.4x100. J. W. Jones, et al., admsrs.	1,300
*Van Buren st, n s, 181 w Throop av, 20x100. John Dumas, et al.	2,900
*14 acres 2 roads, adj lands of Stillwell, et al } 6 acres 3 roads, on road leading from Yellow } Hook to Fort Hamilton	1,450
J. S. Carpenter	
Total	\$22,705

BUILDING MATERIAL MARKET.

BRICKS.—Common Hard Brick have again found a good general market, and the reports from dealers are almost without exception of an encouraging character. The demand is, in part for stock, against winter necessities, and in part for consumption, with the latter keeping up to much fuller proportions than expected, considering the season of the year. The product of the "Up River" yards retains the lead in the sales, and has crowded close up to the price of Haverstraw, the latter not being quotable above \$5.50, while the former sell quite readily at \$5.12 1/2, and some of the best lots have commanded \$5.25 per M. There has been at no time an actual scarcity of stock, yet the supply appears to have met with such management as to prevent any surplus and permit sellers to steadily maintain their advantage. Advice from the primary sources would seem to indicate that the shutting down has been less general than anticipated, and we understand, that, at several points along the river, production is in progress to an extent unusual for the season. It cannot, however, last long. Pale Brick, between the "running in" of a stock on work in the city, and the open demand from other sources, finds a good sale, and, with supplie

daily exhausted, prices are maintained on the full former range. Flouts are not very active, but rule firmly on about the previous line of quotations, all around.

HARDWARD.—The movement of supplies on home account is full and general buyers making up comparatively liberal invoices and embracing pretty a'l standard goods with not a few willing to anticipate their wants of the winter and spring to a considerable extent. Export orders are also fair and about up to expectations. On the line of values the old uniform tone is well preserved, and for pretty much all standard goods holders are firm and confident on parcels from first hands, though rumors prevail of an occasional quiet cutting on outside offerings.

LATH.—There has not been much change in the situation during the week. Receivers continue to express confidence in the strength of the market for the balance of the season, and few are willing to negotiate for future delivery, except at higher prices; with offerings, on spot and afloat, small. There is, however, we think, an inclination to hold in check further buoyancy for the present as already some few small offerings have been made from outside sources and more attractive rates would, no doubt, increase this amount materially. Up to the present writing there does not appear to have been any sales by cargo for city delivery above \$2 per M. but some lots went to dependent points at 10¢@15¢ higher. The yard distribution is increasing somewhat.

LIME.—The market has a firm tone at full former rates, and the demand continues to exhaust the supply about as fast as it is ready for sale. Some complaints come from primary sources over the high cost of packages, but more especially from this State.

LUMBER.—Both from the interior and seaboard the advices are very strong with an inclination to buoyancy in many cases, but our market still appears to be a little behind in the development or any undue excitement. Operators in fact fail to "enthus" to an extent calculated to give business a quick snappish tone and a portion of the Trade incline to complain over this fact. We find, however, that the majority, including some of the most prominent dealers, consider the situation as not only in a healthy condition now but promising to hold its own well, and probably make a further gain as the season progresses more rapidly toward a close. The amounts already known to be required to meet the necessities of contractors for building purposes, the scant assortment in many of the yards, and supplies be accumulated against shipping orders, domestic and foreign, all indicate a good demand, which, while it may move slowly, is not now likely to lose much volume. Some hopes of better terms are known to be entertained, and this no doubt tends to protract negotiations on one or two descriptions of stock, but, as a rule, when buyers make up their minds as to the amount they intend handling, they are ready to go ahead at the line of cost for some time current, and devote their exertions toward making up a little better assortment than usual, if possible. We notice, through items in the columns of our exchanges, that from preparations already under way, and other indications, the onslaught upon the forests during the coming winter is likely to be unusually heavy.

Price continues to be the best sustained article on the list, and, in a general way, buyers remain more or less at the mercy of sellers. As before noted, the extreme cost has either killed a portion of the demand or diverted it toward such substitutes as consumers may consider cheaper, but, even with this shrinkage, the number of orders tendered continues larger than can be accommodated, and receivers say it must be a pretty bad random cargo not to receive prompt bids at previous rates. Quoted at the close at \$18.00@20.00 for random, and \$19.50@22.00 for specials.

White Pine is doing well, both on home account and for shipment to near-by dependent points, with a fair call for export, and prices generally hold their own. Some complaints are made over the condition of the market, but they do not come from operators who have concluded purchases in the interior, and may be accepted with some grains of allowance. The accumulation here is increasing. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do; \$15.50@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine is tending toward a steadier and more hopeful position. Specials have a continued fair demand, both to come here for consumption and to fill orders for export direct from the South, and the random offering meets with greater attention. Supplies can be reached without much difficulty, and the limit valuation is full. Arrivals somewhat larger. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$16@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwoods are in generally good demand either for home use or shipment, and the market rules quite firm on all leading styles. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$37@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. cills \$18@20 do. cherry, \$15@17 do.; white wood, 1/2 and 3/4 inch, \$25@27.50, and do. inch, \$33@35 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

Shingles not finding quite so much demand on home account, but fair amounts go out for export and values well sustained. We quote Cypress at about \$6 for saps,

and \$8.50@9 for hearts; pine shipping stocks, \$4 for 18-inch, and Eastern saw grades at \$2.50@4.50 for 16 inch as to quality and to quantity. Machine dressed cedar shingles quoted as follows: For 30-inch, \$16@22.25 for A and \$28.75@33.25 for No. 1; for 21-inch, \$6.50@16 for A and \$16.75@23 for No. 1; for 20-inch \$5@10.50 for A and \$11.25@11.75 for No. 1.

The yard business is good, and at full rates, with dealers well satisfied and apparently confident, they can hold the advantage for some time to come.

From among the lumber charters recently reported we select the following:

An Am ship, 1,557 tons, from St. John, N. B., to Liverpool, deals, 5 1/2 d., c d; a Br schr, 231 tons, from St. John, N. B., to Marseilles, deals, 7 1/2 d.; a Ger barque, 599 tons, from Brunswick to Vigo, rosewood lumber, \$15; a brig, 400 tons, hence to Savannah, private terms, thence to Laguayra and Porto Cabello, yellow pine lumber, \$11 and foreign port charges; a Br brig, 186 tons, from Pascagoula to Las Palmas, lumber, \$16; a sch 200 M lumber, from Jacksonville to St. Croix, \$11.50; a Br schr, 97 tons, hence to Morcton, N. B., oak timber, \$1; a schr, 253 tons, from Brunswick to Providence, lumber, \$7; a schr, 225 M lumber, from Cedar Keys to New York, \$9.70; a schr, 175 M lumber, from King's Ferry to New York, \$8; a brig, 300 M lumber, from Pensacola to New York, \$9; a schr, 200 M lumber, from Charleston to New York, \$6.50; a schr, 200 M lumber, from Jacksonville to New York, \$8.75; a schr, 210 M lumber, from Jacksonville to New York, \$8.75; a schr, 450 M lumber, from Brunswick to Baltimore, \$6; two schrs, from Portland to New York, lumber, \$1.75; a schr, 116 tons, hence to St. Augustine, general cargo, current rates, and back with cedar, 9 1/2 c. per cubic foot; two schrs, 185 and 200 M lumber, from Jacksonville to New York, \$9; a schr, 185 tons, from Norfolk to New York, white oak timber, \$3 per ton.

Exports of lumber from the port of New York:

	This Week, feet.	Since Jan. 1, feet.

Total.....	1,222,972	54,113,293

GENERAL LUMBER NOTES. STATE.

The Albany lumber market, for the week ending October 12, is reported by the *Argus* as follows:

The receipts of Lumber by canal, and almost all Pine, keep on increasing, giving to the trade an excellent and well-assorted stock. Had the coarse Lumber trade received its usual supply, the aggregate receipts, largely as they are in excess of those of 1879, would have been still larger; as it they are 31 per cent, in excess of those of 1879. The Chicago receipts are 11 per cent over those of 1879.

We have a good business to report during the week throughout the district; the sales of common Lumber especially have been very large. Good Lumber readily sells itself. No change is reported in prices, and the trade does not anticipate any decline. The advance in up lake and canal freights, which was pretty generally known throughout the district today, will have a tendency to strengthen our market.

From coarse Lumber districts the report is that the rain of ten days ago was but a spurt, and the mills are all shut down. Prices are firmly held and show no material change.

The Michigan markets are as buoyant as ever, with a very free business.

From Canada nothing new is reported.

The receipts of lumber by lake at Buffalo for the week are 11,400,000 feet. At Oswego, 6,189,000 feet.

The receipts at Albany by canal from the opening of navigation to October 8th were:

Bds & Setg. ft.	Shingles, M.	Timber, c. f.	Staves, D
1879..	239,207,500	9,196	
1880..	300,766,300	4,268	5,400 638,200

Freights from Bay City to Buffalo and Tonawanda, \$3.10 @ M. feet; from Saginaw, \$3.25. From Buffalo to Albany \$2.70; from Tonawanda to Albany, \$2.60 @ M. feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 @ M. feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$1.90@1.95. From Ottawa to Albany \$3.50 @ M. feet.

Liver freights are without change.

THE WEST.

[Special correspondence of REAL ESTATE RECORD].

CHICAGO, Oct. 13, 1880.

The two weeks which have elapsed since the last report of THE RECORD was made, have worked a change in the condition of our market, which is anything but happy. The possibility referred to then, that a large fleet might reach our docks, bringing a supply that the buyers would find excessive, has unfortunately been realized, and it is necessary, in consequence, to report a weak and unsettled market. The decline began early last week the proximate cause being the arrival of a fleet of some fifty or sixty vessels at the cargo dock. The dealers were not in shape to take such a large supply, their docks being pretty well filled already, and

so a considerable part of the offerings were carried over. This surplus, augmented by further arrivals from the other side, made out to last pretty nearly all the week, and led to frequent concessions, which of course, changed the quotations and lowered the current prices, as fast as they became known. The same performance has been going on this week, the receipts of Sunday and Monday comprising enough stuff for sale afloat to give the commissionmen a large fleet to begin the week with. The attendance of buyers from the country has been better this week than last, but even this, and the comparatively low prices ruling, has not enabled sellers to dispose of the accumulation. Ordinarily, by this time in the week the supply is reduced to a dozen or fifteen loads per day; but this morning there were some thirty cargoes on the market, and at noon there are not less than fifteen still unsold. The dullness is generally, and perhaps correctly, attributed in part to the fact that the buyers of lumber have their docks so full that they cannot unload the stuff, if they buy it, and that many of them are, therefore, practically out of the market, on that account. The dealers know, too, that if they can force the vessels to remain in the market a day or so, they will lose a trip, and in that way the receipts a few days hence will be somewhat reduced. This consideration amounts to very little, however, as the condition of the market for vessel freights goes to show that if manufacturers want carrying capacity they will not have much difficulty in getting it. The weakness which is developing at the yards is probably responsible to some extent for the condition of the demand and prices at this market. If they are to get less for their lumber than they have been, instead of more, as they have been hoping, the dealers will endeavor to buy at correspondingly lower prices, and will, therefore, not be anxious to create such an activity in lumber afloat as will lead to its advance. But it is difficult to gauge exactly the effect which the yard market has upon the cargo sales, or vice versa; they are so closely connected that any change in either is likely to be followed by a similar movement in the other so quickly, that it is impossible to tell sometimes which one is the first affected. It does not seem likely that the uncertainty which has appeared in the outlook for the dealers, has had something to do with the weakness in cargo lumber, but at the same time it cannot be definitely asserted that, in absence of an excessive supply the quotations of a couple of weeks ago would not have been maintained.

This morning's business at the docks has resulted in developing no features that are different from those of the opening days of the week. Most all of the buyers have been around, and with them some interior operators, but few of them bought, as is proved by the stock left over. The sales made have been at the prices current on Monday and Tuesday, or, if any concessions have been made from them, they have been private between the parties to the transaction. The outside quotation for good dimension lumber is \$9, but there is little doubt that anything offered could be bought for \$8.50. Inferior qualities are held nominally at the same figure, but no transactions confirming that as the actual price have lately been reported. The probabilities are that it could be shaded one and possibly two shillings without difficulty. Inch lumber shows a decline of about 50 cents from the figures given in the report of two weeks ago, the present prices being \$9.50@10.50 for common, and \$11@13 for good. Choice lumber is rather weaker, though, in the absence of any actual transactions, it would perhaps not be fair to quote the best at less than the old figure. Shingles, which have heretofore been very firm and in good demand, show a slight falling off in price, and are said to sell with a trifle less readiness. Lath are also duller and lower, \$1.70 being the ordinary figure at which sales are made. Following are the figures as obtained from the reported sales of to-day:

Green joist and scantling.....	\$8 50@ 9 00
Green boards and strips, common.....	9 50@10 50
Green boards and strips, medium.....	11 50@13 50
Green boards and strips, good to choice.	14 00@18 00
Standard shingles.....	2 40@ 2 50
Extra shingles.....	2 50@ 2 65
Lath.....	1 70@ 1 75

The outlook for the future resembles the result in Indiana, in that it is at best very uncertain. Whether the present decline is to prove a permanent or temporary one, is a question which no one dares to answer. The indications are that it will depend largely on the mill men. If they continue to send such fleets as have been coming lately, it is difficult to see how the market can recover its tone; but if they appreciate the situation and cut down their shipments, as they should, in a few days, probably, prices will be put back again to the old range.

The fact of weakness at the yards has already been alluded to in this letter. It exists, and operators are beginning to find it out, albeit some of them think it is unnecessary, and are unwilling to believe that there is as much of it as is claimed.

It is unquestionably true, however, that lists are out, and have been sent into the country, in large numbers, quoting a decline of 50 cents, at least in many staple qualities. The writer has seen within the past twenty-four hours no less than three different lists, in which dry dimension stuff, 12 to 18 feet, is offered at \$11, the regular price being \$11.50. This is regarded as the standard article in the list, and measures the decline; but the weakness also extends to other items, and on some of the upper grades reaches as large a figure as \$2 per thousand. It is generally conceded now that these cuts have been made privately for several weeks back, and that the issuing of lists containing them is but the open expression of a weakness that is not by any means new. Many operators, however, express surprise and disappointment that the lists have been sent out, as it will now be almost impossible to make an effective stand against the figures they contain. It would not be exactly the fact to say that the cut prices are the only ones realized, but a man could hardly be called a close buyer if he should pay list prices for any considerable bill. The weakness at the wholesale market has undoubtedly had something to do with this defection, and has helped to bring it to light; but the most reasonable theory does not make this the sole cause. Complaints have been frequent of a falling off in trade during the past ten days, and there can be but little doubt that the cut lists are sent out mainly with the idea of getting more orders. It is not thought that this scheme has been very successful. One operator told your correspondent that his list had been in the hands of country dealers a week, and none of them had offered to accept his very favorable terms and order a bill of lumber. It is not certain what this straw indicates. It may mean that the country dealers are getting supplied and do not want more stock just now, or it may be that they are waiting, as they are apt to when a decline sets in, for the market to go lower. Whichever may be the correct assumption, it is not to be denied that the weakness greatly unsettles the market and makes its future a matter of greatest uncertainty.

The last showing of the Lumberman's Exchange on the question of supply was an encouraging one, upon the whole, and it was hoped that it would have a good effect upon the operators. The excess over the stock of last year is no greater than it was a month ago, proving that the sales for September had exceeded those for September of last year by the excess in receipts, which was 40,000,000 feet, in round numbers.

There are various opinions about the volume of trade, as may be inferred from what has been said regarding prices. Some think it is as good as ever, while others are ready to declare that they have personal knowledge that it isn't. The shipments hold up, but it may be that the filling of old orders makes them show the condition of the demand better than it is.

The evidence of a material falling off in the receipts of orders comes from so many and such respectable sources that it must be admitted to have no little weight, and your correspondent is therefore compelled to record it as his opinion that the complaints of dullness are not without some foundation.

SAGINAW VALLEY.

Lumberman's Gazette, Office,

BAY CITY, Oct. 11, 1880.

The past week has been a good one for mill and vessel men. The rise in lumber freights has given those interested a great deal of encouragement and there is every reason to believe that higher rates will increase the shipments from the river to a great degree. Large numbers of vessels are expected in, which will make the lumber sales lively. Lumber inspectors state that the demand is good for all qualities of lumber, at rates that have been quoted for some time past. One sale of 700,000 feet of lumber is reported at \$7, \$14 and \$30, and altogether the condition of the market is better than at any time during the past season.

Sage & Co. have discontinued lumber shipments to Tonawanda on account of the amount already collected there, but shipments are continued to Ohio ports and will be continued until the close of navigation.

The shipments last week were rather light, owing in part to the discontent among vessel men at the continuation of low rates, but as soon as the rise was announced the vessels began to arrive and the shipments will next week probably foot up as large as any week of the season.

The freights on lumber are quotable as follows: Bay City to Buffalo and Tonawanda, \$2.50; to Ohio ports, \$1.75; Saginaw to Buffalo and Tonawanda, \$3.00; to Ohio ports, \$2.75.

From the monthly report of Secretary Hitchcock, of the Chicago Lumbermen's Exchange, the stock of lumber in the yards of the city on the dates named as follows:

	Oct. 1, 1880.	Sept. 1, 1880.
Lumber, ft.....	5,930,599	467,963,545
Shingles, No.....	178,985,000	173,753,000
Lath, pcs.....	52,459,483	48,765,681
Pickets, ft.....	1,828,194	2,193,317
Cedar posts, pcs.....	85,904	67,006

These figures show an increase of 41,338,054 feet of lumber and timber, 5,232,000 shingles, 3,738,022 lath, and 18,998 cedar posts, and a decrease of 365,123 pickets.

The stock of lumber and shingles on hand Oct. 1, in the years named, is shown in the following statement:

	Lumber and timber.	Shingles.
1874.....	358,432,582	49,248,000
1875.....	367,604,642	81,794,000
1876.....	393,591,102	114,550,700
1877.....	538,772,204	84,588,500
1878.....	387,261,196	157,206,500
1879.....	414,575,158	152,274,000
1880.....	5,930,599	173,985,000

From the weekly review of the Chicago Northwestern Lumberman we extract the following:

The tenor of the latest advices from the general markets of the country would indicate that the storms which have prevailed during the past fortnight, combined with the excitement and interest attendant upon state and county agricultural exhibitions, which have been general throughout the country and as well the political interest which has aroused all sections, and especially those states which hold their elections next week, have had their influence upon the lumber market, and would seem to have led to somewhat of a disposition to treat building operations and the movements of lumber more indifferently than for some months, in many sections.

Our Saginaw advices show a slight falling off in the demand during the past week. This is, perhaps, owing somewhat to the fact that but little high grade stock is to be obtained in that market, and the yards of the country are pretty well filled already with coarser grades, which, with the bad weather which has prevailed for a fortnight past, has not been in as good demand in the markets looking to Saginaw for supplies as it had previously been. Turning west to the Mississippi district, we find in all directions an active market somewhat curtailed just now for want of cars, the scarcity of which is becoming quite noticeable at all points. Prices, however, are well sustained, and in many of the leading markets an indisposition is manifest to sell at present quotations. The extent of business is reported as much ahead of this season last year in the demand and shipment. Southern trade is active at fairly remunerative prices. Shipments are free to Europe and South America, with a good demand from northern ports. Much complaint reaches us of the impossibility of responding to a demand from Chicago, in consequence of the high rail tariffs. It is doubtless true that a wiser policy on the part of the railroad companies would result in building up at this place a very large trade in Southern pine.

The woods are beginning to resound to the heavy strokes of the axe, and from all portions of the logging districts we have reports of preparation for an amount of work never before realized. If this season prove a favorable one, it will be necessary to stretch the capacity of the streams; if it be a poor one for the loggers, the streams will, nevertheless, be full. The figures of pine land transactions, reported elsewhere in our columns, are indications that the cost of stumpage is to be very much higher than ever before, which added to the increased expense of labor and provisions, is an assurance that if cheap lumber is had next season, it will be to the loss of some party.

A recent sale of pine lands may be figured to cost in lumber about as follows: Stumpage, \$3; lumbering, \$3.50; running, \$1; sawing, \$3.25; a total, without extras, of \$10.75. This stock will run from 10 to 15 per cent. to uppers. The mill owners of Muskegon are reported to have established the price of sawing at that point for next season at \$3.25 for logs averaging seven to the thousand feet, with \$3.50 for a smaller average, and \$3.10 for a larger.

The Northwestern Lumberman's report on Hardwoods at Chicago, is as follows:

At several yards the volume of trade is somewhat lighter than a week ago, although all are having plenty to do, and express themselves better satisfied than when they were so crowded that some of the business could not be properly attended to. Other yards, and among them the largest, report no decrease. The condition of stocks remain about the same, and receipts, as usual for the past few months, have not been up to the demand. An extensive operator in Indiana, whose mills turn out car stuff, informs us that he is far behind in filling his orders, and has to refuse new ones. Another Indiana dealer during the week has sold heavy bills to Milwaukee parties, delivered here. Georgia pine flooring is much wanted, and the demand would absorb any possible receipts, providing they be made up of the higher grades. Many of the Southern mills seem to know very little about grading, and their ignorance of the wants of our builders has caused our dealers considerable trouble and some loss. Shipments have been received composed of mill run, and after sorting out the salable grades, the culls were not wanted in our market at any price. Considering the high freights from southern districts it does not pay to carry much ballast in the way of unmerchantable luggage. Ash flooring is being gradually superceded by maple, for which there is a good demand. The tendency is strongly toward hardwoods for inside finishing, oak, ash, and butternut at present meeting with rather more favor than walnut. The doorways of some of the finest residences, recently erected, are finished in oak; and one gentleman of æsthetic tastes is tearing out his marble mantles and replacing them with wooden ones. These mantles, ebonyized and inlaid with whitewood in Japanese designs, are decidedly rich in appearance, and cause an ordinary marble mantle to hang in his head. There is little doubt but that the drift in this direction will constantly increase,

for the more cultured, of course, know that nature can grain woods more beautifully than the most expert workman, and it only wants fashion to make its use more common.

LUMBERMAN AND MANUFACTURER, MINNEAPOLIS, MINN.,

The lumber fraternity of the West have reached the maximum amount of business which they can do until the railroads of the country provide more cars to transport it. There are no lines of road touching the principal markets which have cars enough to do the business. At Minneapolis the great yards of all the companies are blocked up with lumber waiting cars. Under such circumstances it is not to be wondered at that the tendency is upward in prices. Only here and there are found odd lots and commission deals which can be bought in large lots, at slightly shaded prices for cash. Better prices are being seriously discussed in the Northw. st. A meeting of the lumbermen of Minneapolis will be held this evening (Thursday) to discuss the situation, and it is probable that some changes will be made, but too late for noting in this issue, as we go to press Thursday night. The reports from the river towns, Chicago and Saginaw, are of the most favorable character. Dubuque fell a few cars behind, probably for want of cars. All other points keeping up full to recent sales.

Shingles are scarce, and in good demand. While lath is almost out of the market, and will probably be advanced everywhere.

Tugging operations are being commenced on a scale which promises an unprecedented stock of logs for 1881. The old stock of logs are well high sold out, and will be nearly sawed up, except on the Chippewa, where there are large lots stranded by the floods, which will not be gotten out in time for sawing.

Water lumber at the river markets below runs at about \$11 for dimension, and \$14 for boards and strips of good quality.

THE EAST.

The Boston Commercial Bulletin as follows:

There has been an exceptionally good week in Western pine and the sales aggregate a very considerable amount. The dealers are meeting the views of the commission men, and the anticipations of the latter seem at last to be realized. The tendency is upward and although we do not advance our quotations, we note the fact that our outside figures are more readily obtained. Hardwoods are meeting with an improved demand and prices are stiff. Walnut is especially scarce and is in strong position.

All kinds of Eastern lumber maintain their firmness. The state of trade was well expressed by one of our receivers a few days since, who said, "There is a first-rate demand for what we can't get." There is an upward tendency in hemlock boards and there are indications that spruce clapboards will be higher. There is a good supply of lower grade shingles, but a short stock of extras, and these latter command strong prices. We note continued firmness in Southern hard pine.

At a meeting of the Lumber Dealers' Association on Wednesday it was voted to offer a reward not exceeding \$1,000 in amount for the conviction of any person who has or shall set fire to any lumber yard in Boston or vicinity within a year preceeding or succeeding the date of the meeting. The committee appointed for the purpose of carrying this resolution into effect consisted of N. M. Jewett, J. Otis Wetherbee and A. T. Stearns.

THE PROVINCES.

The Toronto Monetary Times has the following:

Recent advices indicate that prices of deals and other descriptions of wood are receding in the British market, and that the hopeful tone is giving way. This appears to be occasioned by the quantities of timber and deals thrown on the English market from Russia, Sweden and Norway, the imports of which are enormously in excess of recent years. This is well shown in the Board of Trade returns, which give the wood imports into Great Britain for the eight months ended 31st August, 1880, compared with the corresponding period of 1879, as under:

EIGHT MONTHS ENDED 31ST AUGUST.

	Quantity.	
	1879.	1880.
Timber (hewn).	Loads.	Loads.
Russia.....	80,980	229,980
Sweden and Norway.....	288,033	461,539
Germany.....	123,133	207,750
British North America.....	102,134	182,028
Other Countries	262,712	369,642
Total.....	856,997	1,453,943
Timber (sawn or split, planed or dressed).		
Russia.....	318,378	564,164
Sweden and Norway.....	803,336	991,744
British North America.....	564,799	550,376
Other Countries.....	160,194	220,120
Total.....	1,846,707	2,226,404
Staves (all sizes).....	56,534	65,093
Mahogany (tons).....	23,362	21,370

It appears from these statistics that the total quantity of hewn timber received by Great Britain from other countries in those eight months exceeds the receipts of last year (same time) by 70 per cent., while the receipts from Canada, which are over one-eighth of the whole, are 78 per cent. greater than last year. Of sawn lumber the total import is increased by 26 per cent., and Canada, which sends something over a quarter of the whole, has apparently sent less than last year. Although, therefore, Canadian deals have been forwarded in very moderate relative

quantity. prices have not advanced in so great a degree as reviving industries in Britain seemed to promise

The Board of Trade returns give the following values of British receipts of timber and lumber:

	1879.	1880.
Total of hewn timber	£1,832,504	£3,339,290
" sawn or split, &c.....	4,045,774	5,909,582

The Montreal Journal of Commerce says:

Almost all the lumber now at the mills is bought up by American dealers, who are holding it for advanced prices, which is a great relief to the manufacturers, as it is generally settled for at a certain date from purchase. Every available barge is now busy removing lumber from the mills, and shipments by rail will continue all winter as through rates are made almost as cheap as by boat.

NAILS.—Dealers and manufactures continue to report a good general business and the market appears to be in favorable condition. Production is evidently managed so as to keep the supplies under very good control and this acts as a support to values. It is, however, reported that outside parcels are seeking sale and in some cases a slight shading on cost is intimated.

We quote 10d to 60d common fence and sheathing, per keg \$3.15@3.25; 8d and 9d, common do, per keg, \$3.40@3.50; 6d and 7d, common, do per keg, \$3.55@3.75; 4d and 5d, common, do per keg, \$3.90@4.00; 3d and 4d, light, per keg, \$4.65@4.75; 3d, fine, per keg, \$5.40@5.50; 2d, per keg, \$5.40@5.50.

Cut spikes, all sizes, \$3.40@3.50. Floor casing and box, \$3.90@4.65. Finishing, \$4.15@4.90.

CLINCH NAILS.

1½ inch, \$5.65@5.90; 1¾ inch, \$5.40@5.50; 2 inch, \$5.15@5.30; 2½ inch, \$4.90@5.00; 3 inch and longer, \$1.65@1.75.

PAINTS AND OILS.—Business in pretty much all kinds of paints and colors keeps well up to the average for the season, and the market as a whole may be considered as quite fairly active and encouraging. Some interior paints have failed to call for quite the quantity expected, but others have exceeded calculations, and thus the balance is well preserved. On leads and zincs the combination rates are quite generally adhered to, but it is thought some large parcels would be parted with at a shading. Whiting and Terra Alba are higher, and Vermillion tends towards greater strength. On other kinds of stock there is no great change in value, but tone is held pretty steadily. Linseed Oil meets with a fair jobbing demand, with stock enough available for a few wants and former rates ruling. We quote at 57¢@61c. per gallon from crushers' hands.

PITCH.—Demand somewhat irregular, but still appears to move about the ordinary amount of stock, and the general market is steady. We quote at \$1.90 @2 per bbl. for city, delivered.

SPIRITS TURPENTINE.—Consumption is somewhat checked by the extreme rates asked, but still a very fair jobbing distribution takes place, and the advantage remains largely with the selling interest. On the stock in first hands there has been a firm grip retained by owners, and a higher cost exacted in most cases on the stimulus of the buoyant condition of the Southern markets. As this report is closed, the quotations stand at about 44¢@45c. per gallon, according to the quantity of stock handled.

TAR.—Business is not very uniform, the movement at times showing animation, and again dropping off into a dull tone. On jobbing parcels prices about steady, but in a wholesale way some irregularity shown. Supplies are moderate. We quote \$3.25 for Newberne and Washington, and \$3.35 for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for Quit Claim deed i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranty.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date

MISCELLANEOUS.

SPECIAL NOTICES.

Practical experience seems to demonstrate that the heating apparatus best adapted to general use is a properly constructed hot air furnace, and the thousands now in operation in all parts of the country

afford conclusive evidence of popular appreciation. Amid the multiplicity of patterns in the market, one might be puzzled to make selection, however, and it is with the desire of assisting our readers in reaching a decision that we call attention to the hot air furnace, which has been for years manufactured by C. R. Harvey, of this city, and whose warerooms are at 1257 Broadway. This furnace, solely through its indisputable merits, has won an enviable reputation among builders and householders.

The large quantity of blue stone now required, not only for public works but also for private dwellings, should induce builders and architects to confer with Messrs. E. Sweeney & Sons, whose office is at 229 Broadway. This firm, whose card appears in another column, have an extensive depot in Ulster county, this State, and are wholesale dealers in all descriptions of North River Blue Stone. They make a specialty of rubbed, planed and sawed stone.

H. E. SEWALL & CO.—THE GENERAL CO.—
partnership heretofore existing between the
undersigned, under the firm name of H. E. SEWALL
& CO., is this day dissolved by mutual consent.

Dated, New York, September 3rd, 1880.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

H. E. SEWALL & CO.—THIS IS TO CERTIFY
that the undersigned have formed a limited
Partnership, pursuant to the provisions of the revised
Statutes of the State of New York.

1. That the name or firm under which said partner-
ship is to be conducted is H. E. SEWALL & CO.

2. That the general nature of the business to be
transacted is the purchase and sale of coal

3. That the names of all the general and special
partners and the residences of each are as follows:
Henry E. Sewall, who resides in the City of New
York, in the State of New York; Rufus R. Sewall,
who reside in Keyport, in the State of New Jersey,
are the general partners, and Anthony V. Winans,
who resides in the City of New York, in the State of
New York, is the special partner.

4. That the said Anthony V. Winans, the said
special partner has contributed the sum of eighteen
hundred (1,800) dollars in cash, as capital to the com-
mon stock.

5. That the said partnership is to commence on
the first day of October, one thousand eight hun-
dred and eighty, and is to terminate on the thirtieth
day of September, one thousand eight hundred
and eighty-five, unless sooner dissolved by mutual
consent, in accordance with the provisions of the
aforesaid statutes.

Dated this 29th day of September, one thousand
eight hundred and eighty.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

V. K. Stevenson, Jr., Real Estate
Broker and Auctioneer, 25 Pine Street, between Nassau and William streets. Branch Office, 661 Fifth Avenue. Loans Negotiated. Mortgages Cashied. Sales of Stocks, Bonds and Furniture by Auction.

FOR SALE,--26 LOTS IN HARLEM
located bet 7th and 8th avs., below 130th st. A cash purchaser will get a great bargain. Also, 4 lots on 72d st., near Park av.; \$50,000.

F. CRAWFORD, 956 Third av.

GUERINEAU & DRAKE,
REAL ESTATE BROKERS,
11 BIBLE HOUSE, NEW YORK

HIRAM MERRITT,
Real Estate,

Office 53 Third Ave., N. Y.

Description of any property which you may have to

SALE or to RENT solicited.

Entire Charge taken of Property.

Robert Auld,
REAL ESTATE AND INSURANCE,
940 EIGHTH AVENUE, near 55th street.
Renting and Collecting a Specialty.

Description of any Property which you may have for Sale or to Rent is solicited.

Leonard J. Carpenter
REAL ESTATE,

56 & 58 East 23d St., Y. M. C. A. Building
Entire charge taken of property.

James H. Donaldson,
Real Estate,

1242 THIRD AVENUE,

Near 72d street.

Entire charge taken of Estates. Rents collected

BENNER & ZELLER,

---REAL ESTATE,---

79 and 81 Cedar Street.

For investment THREE elegant Flats, handsomest part of Yorkville, \$14,000 each. Rent \$5,216.

C. CARREAU,
REAL ESTATE,
419½ GRAND, NEAR CLINTON STREET.
Special Attention paid to the Renting and Sale of Property, as well as the entire charge of Estates.

TIMPSON & PEET,
Real Estate.

No. 1505 BROADWAY,

Southwest cor. 44th St.

Special attention given to Management of Estates

DUNN & OATMAN, Real Estate Brokers.
Real Estate bought, sold and exchanged. Estates taken charge of and rents collected. Real Estate given as security for the faithful accounting of rents and other receipts. 206 BROADWAY.

L. Froehlich,

No. 163 East 54th St.

New houses, choice locations, near Madison av. from \$14,000 to \$45,000; other locations from \$6,500 upwards. Desirable lots everywhere; very cheap.

GEO. H. SCOTT. SINCLAIR MYERS

SCOTT & MYERS, Real Estate

Brokers and Auctioneers

NO. 8 PINE STREET.

O. G. BENNET, REAL ESTATE,
Office, 150 Broadway, Cor. of Liberty Street.
Appraiser of Real Estate. Insurance effected in Standard Companies only. Loans on City Improved property at 5 per cent. interest.

REAL ESTATE.

Samuel Kilpatrick,**Real Estate Broker,**

5TH NATIONAL BANK BUILDING,

Corner 23d street and 3d avenue.

Improved and unimproved property for sale and exchange.

NOTICE.**THE CO-PARTNERSHIP**

heretofore existing between

JULIUS BROWN

AND

CHARLES A. SEYMOUR

is this day dissolved by mutual consent. The business heretofore conducted by them as real estate brokers and successors to the late S. HONDLOW, will be continued at the same place.

203 MONTAGUE STREET.

By

Charles A. Seymour & Co.**DOUGLASS & TRAPHAGEN,****Real Estate & Mortgages**

271 Broadway.

Money to loan on First-class New York and Brooklyn property at 5 and 6 per cent. Choice building lots for sale in desirable localities.

COLES & HEISER,**Real Estate.**

Also dealers in Miscellaneous Securities.

E. O. Coles.

C. Heiser.

22 Pine Street.

RIKER & CO.

998 6TH AVENUE.

Offer on Madison avenue, below 75th street, two Lots with a loan.

FRANCIS CRAWFORD, REAL ES-
tate and House Agent, 95 THIRD AVENUE,
near 57th Street, New York. Rents Collected, Money Loaned on Bond and Mortgage.

7 BUILDING LOTS, SOUTH SIDE 116TH
St. (Boulevard), 5th and Madison av., 4 do on 86th st. north side 150 feet from 5th av., 5 lots north side 99th st., 175 feet East of 5th av., 10 building lots on 71st st., south side near 8th av. **R. C. FERGUSON, 151 Broadway, Room 21.**

GEO. C. GOELLER,

Real Estate Agent; Notary Public. Third avenue, cor. 131th st. Mott Haven, N. Y. City. Houses and lots for sale, to let or exchange. Special attention given to renting, collecting of rents and management of estates. Loans negotiated. Satisfactory references.

FOR SALE.

On Willow Street, Brooklyn Heights. A full size 3 story brick house, having all modern improvements and in thorough repair. Terms easy. price low. Keys, &c., with J. N. Kalley, 211 Montague Street.

MONEY IN ANY AMOUNT, FOR FIRST
class mortgages, Private Residences, Stores, Flats, Tenements and Lots in New York, Philadelphia and other Cities. Also Farms, Country Seats, Country Stores, Hotels, Mills, Timber and Mineral Lands, &c, in great variety, for sale and exchange by

ROGERS & SON, 181 Broadway, New York.

Brooklyn "Uptown" Headquarters.

PAUL C. GRENING,**Real Estate and Mortgage Loans,**

OFFICES 420 GATES AVE.,

ONE YEAR, in advance....\$10.00.

Communications should be addressed to

C. W. SWEET,
No. 137 BROADWAY

The time has come when the REAL ESTATE RECORD may congratulate owners of and dealers in realty on the healthy condition of the market. Never having been identified with the small, though reckless, crowd of speculators who see a "coming boom" in the sale of every vacant lot, we cannot be charged with taking, at all times, a too sanguine view of the situation. On the contrary, if any fault has been found with us, it has always been on the part of those who claimed that we erred when, in years past, we did not endorse their rose-colored views.

Now, however, with the evidence before us of renewed activity, not observable, always, to the uninitiated, we can point to the observations made in these columns for a year past, as to the progress this market was making toward a position where all the energy and activity of those interested would be called into play. Not that there is any occasion for boasting, as to greatly enhanced prices. Such a condition would be fatal to a permanent healthy state of the real estate market.

On the contrary, with the exception of some notable Broadway and Fifth avenue property, there has been no extraordinary increase in values. And yet, activity, at reasonable prices, has at last set in, and there is a market, not only for improved and unimproved city property, but, also, for suburban acres.

The various items of news, given in our market review, this week, embrace important transactions in almost every part of this city, Westchester county and New Jersey, and these, added to the successful public auction sales, give indication of as lively and sound a market as we have seen since the close of the panic.

NOTES, POINTS AND FORECASTS.

That New York Central will double its stock and declare thereupon five per cent. dividends, the law not permitting the payment of more than eight per cent. on the present capital stock.

That Erie will either declare no dividend on the Preferred stock or else a disappointing one. The road has earned six per cent. on the Preferred and two and a half on the Common, but there are so many improvements needed that the surplus will be used

up in making them, for Erie cannot come into the market for a new loan.

That Missouri, Kansas & Texas is an excellent purchase for a long term, in view of the enormous growth of Texas, the business of which, in a railroad way, is monopolized by the Iron Mountain and the Missouri, Kansas & Texas.

That an effort will be made when Congress meets to open up the Indian Territory. The agitation will add to the market value of St. Louis and San Francisco, and Missouri, Kansas and Texas pending the discussion.

That there may be a partial break in stocks next week, due to a doubt as to who may carry the election November 2d, but a buoyant market is expected just immediately before and immediately after the election.

That stocks will be dull toward the end of November and through December, with perhaps a serious break in prices, to be followed in January by the highest prices known in the history of the "street."

That mining shares will continue to drop, unless there is a "strike" on the Comstock.

That there can be no revival of the speculation in mining shares without the help of the Comstock, unless some of the new mines come to the front as dividend payers. The most hopeful properties are the Horn Silver, the Bassick, the Bull Domingo, the Silver Cliff, the Plata Verde and the Chrysolite. The Hukill also ought to be a dividend paying property soon.

That there may be something in Erie after all; for now a strange rumor is circulated to the effect that the Lackawanna extension to Buffalo has really been undertaken to capture Erie stock at low figures. The extension will cost \$10,000,000; but vastly more than that sum will be saved in the price of Erie, for those who intend to purchase it and make it a part of the Wabash system. In other words, the Erie and Lackawanna combined will enter the field in opposition to the New York Central and with as many tracks, and the advantage of a water line to Buffalo.

That the great ambition of Jay Gould's life is to once more become possessed of Erie. He was expelled from its management in disgrace; and it will be a fitting sequel to his financial career were he to capture it and make it a part of a great trans-continental line.

That the rise in St. Paul has caught Russel Sage and Jay Gould short of that stock in the eighties. The street has lots of paper bearing Russel Sage's signature, in which he gives calls on St. Paul for ninety.

That the weakness in the Gould stocks is because that great operator is really crippled by having made mistakes as to the future price of the Grangers and Lake Shore. He

was short of Lake Shore last spring, and is short of St. Paul and Northwest to-day.

That Huntington and the California railway operators are preparing for a grand *coup* shortly after the completion of the new line to the Pacific Ocean. When the Atchison & Santa Fe reaches Florida City, about January 1st, it will be found that a combination has been made between the Central Pacific, the Atchison & Santa Fe, the Louisville & Nashville and the Chesapeake & Ohio for through traffic between Norfolk and San Francisco.

WHOLESALE BROADWAY.

In hurrying to and from their places of business, New Yorkers are apt to overlook the changes that have been wrought of late in that section of our great thoroughfare, which ought, henceforth, to be known as "wholesale Broadway." We have, heretofore, alluded to the extraordinary improvements, projected and underway, as well as the great demand for offices from the Battery up to Murray street. To-day, we desire to call attention to the improvements and changes along that great thoroughfare above Murray street, and the shifting of various lines of trade. We then find, with, of course, here and there minor exceptions, the wholesale business lines defined as follows:

Murray to Duane street—shoes and hardware.

Duane to Canal street—drygoods, commission and wholesale.

Canal to Great Jones street—wholesale clothing, hats, millinery and notions.

This section includes, of course, the cross streets, of which Broadway is the centre line of demarcation. Property that has been lying dormant along Broadway, in the vicinity of Prince and Bleecker streets, now shows considerable signs of activity, as the clothing and millinery trade is demanding constantly more and more room; and this increased activity, continuing up to and even beyond the Grand Central Hotel, shows itself by the renting of stores and lofts at figures which would have been considered high, two or three years ago. The increase, also, in that section has not been made at the sacrifice of property located further down town. It does not at all, for instance, affect the rental of stores in and around Worth, Thomas, White and other streets. On the contrary, several drygoods firms, that were above Canal street, have recently moved again below that street, so as to be in the midst of the wholesale drygoods market, which now stretches from Duane to Canal street.

Rents, all along Broadway, went up last year twenty per cent., and present indications are that another increase, from ten to

twenty per cent., will be demanded and given, shortly after the New Year sets in.

It is very singular to notice, in this connection, how the small jobbing trade, in all lines of business, has been driven entirely out of this market. Wherever the jobbing trade is at all prominent, it has been concentrated in the hands of a few, but very extensive and wealthy firms. Manufacturers, agents and commission houses now occupy the warehouses of the small jobbers of the past, and while the representatives of American manufacturers occupy most of them on the line of Broadway, the importers of foreign goods adhere, generally speaking, to the side streets.

Another very peculiar feature, ever showing the constant fitness of things, must strike the observer who remembers how, only a few years ago, that section of Broadway used to be the promenade on fine afternoons. It has ceased to be such, since the introduction of rapid transit in our midst—now that we are being whirled up-town, in a luxurious and comfortable manner. The metamorphosis of Broadway, from a retail to a wholesale street, occurs about the same time that most of the retail shopping has turned into the various avenues, and while the street is filled from morning to night with wholesale buyers, from all parts of the Union, the New York promenade of the past now seeks the upper regions of our city, away from the cumbersome drygoods boxes, business wagons and carts.

NEW YORK'S MAYOR.

The discussions in the newspapers about the various candidates for Mayor are hardly worth the paper they are written upon. It really makes very little difference who is elected to that office. The effort of legislation for the last thirty years has been in the direction of so controlling the action of our city's chief magistrate that he can do no harm. It follows that the Mayor of New York is simply a clerk, who has to spend some six hours a day in signing warrants for the expenditure of monies, over which he has no control, and for objects about which he has scarcely any acquaintance. This legislative jealousy of our mayors has not been justified by the character or career of our chief magistrates. They have generally been reputable gentlemen, who really intended to do the city good service. Of course we have had two or three mayors whose characters were not unimpeachable. But, on the whole, the men selected by the voters have very fairly represented the average intelligence and honesty of the business class of the metropolis. Our present Mayor is a very fair sample of the great majority of his predecessors. He is an amiable, honest, cultivated and well meaning gentleman; but his administration has proved a failure, because of the limitation to his authority, both by legislative and judge-made law. But what little power the law, legislative and judicial, leaves the Mayor, is taken from him by the politicians. With one or two exceptions, no Mayor has been elected for the last twenty years who did not, before he was nominated,

agree to make certain nominations or consent to a division of the offices among the party leaders who supported him. This has been Mayor Cooper's bane. He was elected by a combination of Republicans and Anti-Tammany Democrats. And he has been forced to make appointments which he knew were not for the best interests of the city. It is quite safe to say that both of the candidates for Mayor who are to contest the election on the Second of November will be under bonds to make such nominations as have been agreed upon by the party leaders on both sides. What New York wants is a new charter, embracing the following points:

1. A Mayor with ample authority to remove and appoint the heads of all the departments.
2. A Common Council chosen from the city at large, with minority representation, so as to give the voters of both parties proportionate influence in the local legislature.
3. Civil service reform; all the minor officers to serve for life or good behavior; the chiefs of each department to have authority to fix compensation for their subordinates within a certain minimum and maximum rate.

This would give us a Mayor with authority. It would put a stop to the spoils system, by making the minor officials' position permanent; and would rapidly reduce expenditures; for each head of department would be responsible for the salaries paid by him to his subordinates. It is estimated that \$4,000,000 could be saved annually in the cost of our city government if the necessary clerical and other work was paid for at ordinary business rates.

But we despair of anything of the kind being done. The politicians in both parties are opposed to any reform; and the history of similar attempts shows that no voluntary organization of citizens is competent to deal with the problem.

THE SILVER QUESTION AGAIN.

The case before the United States courts respecting the exact status of the American silver dollar of 412½ grains may have important consequences if carried to the Supreme Court and Judge Shipman's decision be reversed. It is an attempt upon the part of our importers to nullify the law passed in April, 1878, partially remonetizing silver in this country. The United States has always been a bi-metallic nation, with the exception of the interval between 1873 and 1878, the five most disastrous commercial years in our history. The importers wish to force the government to accept less than the face value of the silver dollar. They are backed by able counsel, led by General H. E. Tremain, while the government is represented by the two Assistant District Attorneys, who are not men of any mark nor competent by training to deal with so large a subject as the money metals of the world. The best legal talent of the country should be engaged on each side of this case. According to the constitution of the United States, silver and gold are equally recognized as lawful money.

Should there be an adverse judgment against silver by the highest court of the country it will have very important consequences all over the civilized world. It was the action of the American Congress which passed the Bland bill over the President's veto, which has raised the price of bar silver from 46 to 52 3-8 pence per ounce, English standard. Were silver to be fully remonetized by the United States, and every owner of bullion permitted to convert it into the standard dollar, there is no doubt but that silver would increase in value until it reached the 56 or the par of sixteen to one, as compared with gold. This country produces silver as well as gold. The Continent to the west of us—Asia—uses silver exclusively. Seven-ninths of the world uses the white, to the exclusion of the yellow metal, but then the leading commercial nations, such as England, Germany and Portugal, use gold as the exclusive unit of value. But the nations which use gold exclusively number only two hundred million, while the nations which use silver exclusively number over nine hundred million.

In discussing this subject the *Mining Record* of the 16th says, regarding the demonetizing of silver in this country:

The inevitable logical effect of such a practical depreciation of silver by the chief producer of the metal—as is the United States—would be that France, Holland, Germany, Belgium and the rest of Europe would be forced to subject their hard money to the like shrinkage, in which event France alone would undergo a loss of \$78,000,000, of which \$32,500,000 would fall upon the Bank of France. Add to this loss that of the rest of Europe (\$52,000,000) and there would be a total outright loss in that quarter of \$130,000,000. Europe, having been thus forced to cut down the valuation of one of the money metals \$130,000,000, the British and Dutch Indies, China and Japan, of course, would have to make a like reduction, and to the extent of, at least, \$172,500,000. Thus the immediate aggregate loss to the commercial world would exceed \$300,000,000, supposing merely that, driven by our example, Europe and her Asiatic possessions should cut her present silver valuation down to the standard, with respect to gold, of 450 grains per dollar of one hundred cents, in the same manner that these New York bankers insist we shall do.

That loss, large as it would be, would prove, however, but a trivial incident compared with that earth wide unsettlement of all values which must inevitably ensue; an unsettlement incalculably greater and more destructive than that which took place during 1873 and 1876 notoriously consequent upon the attempt of Germany to demonetize \$300,000,000 in silver, at a loss of say \$25,000,000. Silver having been reduced by this country in value from 412½ to 450 grains, and by Europe and Asia from about 400 to 450 grains as the money equivalent of one hundred cents in gold, such would be the general monetary disturbance wrought in all lands that the commodity value would not remain stationary at its present rate, that is to say of 450 grains equivalent to a dollar in gold. Such a radical monetary change would be but the beginning of the end of silver money—and as a consequence, the commodity value would speedily fall so far below the newly-fixed legal tender value that the work of adjusting the ratio of value of gold and silver would have to be done over again almost immediately; and so often thereafter would this have to be done, that silver in a short time would cease to be a money or a precious metal in any practical sense of either word!

The chief interest this matter has for owners of realty, as well as all who have stocks of any kind of goods on hand, is that it would cause an enormous shrinkage in values. Any contraction of the currency, whether of gold, silver or paper, means lower prices, and the lower as the shrinkage is greater. Our present prosperity is due to the addition of the gold and silver available in the country to the paper money which was in circulation previous to 1879. We have

added all the paper we had then and some \$593,000,000 of gold and silver bullion besides. If now we should take the back track and stop the coinage of the silver dollar, or if the courts should declare that the United States cannot make a silver dollar of 412½ grains the par of a gold dollar, then must we expect to see silver set aside as one of the money metals and a shrinkage to the amount of the silver available for coinage—about \$130,000,000 in all. We do not believe that the highest court will endorse the view of the anti-silver people, but will sustain the decision of Judge Shipman.

COLLISIONS IN THE AIR.

The recent collision on one of the elevated roads, by which one of the engineers lost his life, having been attributed to foggy weather, all sorts of methods have been suggested how to prevent such accidents. The most ludicrous, of course, has originated in the cranium of a city father. He suggests that train men, standing on the platform of the rear cars, shall blow horns or other instruments so as to warn the train approaching from behind.

We suggest, on the contrary, that the rules which were in vogue before the lease of the roads to the Manhattan Company be adopted by the present administration. These rules were drawn by practical men while yet the Metropolitan Company ran its own business, and the Manhattan Company ought to adopt at least the following most important rule of all:

When a train is delayed on the road in foggy weather, the whistle will be used to notify trains coming behind. On the up-track four short, sharp sounds of the whistle will be given, and these will be repeated at short intervals until trains move on; and all trains going on the up-track, on hearing these signals before them, will stop immediately, and begin to give those signals to warn trains coming up behind them. After the train which has stopped is able to move on it will then give a long, steady blast of the whistle, which will be a notice to all trains behind that the track is now clear, and all the trains immediately behind the train so giving this signal, will take and repeat this signal as a notice to trains behind it to move on. On the down-track the same signal will be employed, except that the signal shall be six short, sharp sounds of the whistle, which shall be the signal on the down-track. This will be repeated by trains coming on behind, and when all is clear the engine which caused the delay will give two long, steady blasts of the whistle, being a notice that all is clear, and will then move on, and this notice will be repeated by the train immediately behind, and all trains will move on at the giving of this signal.

THE ADVANCE IN HIGH-PRICED SECURITIES.

IN THE REAL ESTATE RECORD of October 2d, in an article "About Investments," we ventured to predict that when the inevitable rise in the price of securities came, it would be felt at first and mainly in the high-priced stocks. We argued that a five per cent. investment ought to be worth par. We enforced this view at some length; and if our readers are curious as to the figures, they will notice that since the appearance of the arti-

cle, Lake Shore, New York Central, Michigan Central, Burlington & Quincy, Northwest, St. Paul, Morris & Essex, have advanced from six to thirteen points. Nor do we believe the highest figures have been reached. We have time and again said that this year would see the highest prices ever known to the stock market.

Of course there is money also in the low-priced stocks; and in some of them located in the extreme West, a great deal of money. But it requires special knowledge of local conditions to deal wisely in those new securities. But there can be no mistake as to the value of the great trunk lines of the country. Our population is increasing rapidly, the trade between the States is steadily growing, and every branch road or extension North, West or South, only adds to the volume of traffic on the transportation lines which find their way to the cities on the seaboard. We look for a steadily advancing market, with occasional set backs, of course.

MR. RUFUS HATCH.

The interviews which this gentleman writes with himself, and publishes as advertisements in the daily papers, are generally very interesting reading. They, doubtless, advertise Mr. Hatch, as a broker, but they do not do him any credit as a judge of the value of securities or as a prophet of the market. For the past year, or more, Mr. Hatch, on paper, has been a pronounced "bear." If the public, or operators generally, had taken his advice they would have lost their money. If Mr. Hatch, himself, had operated as he talked, he must have lost several very large fortunes. His special aversion seems to be the Vanderbilt stocks, especially New York Central. He extolled the wisdom of W. H. Vanderbilt, in selling eight per cent. Centrals and purchasing four per cent. Governments. He declares Lake Shore and Northwest certificates to be chromos, "for which the public are paying a ridiculously high figure." Only a few weeks since, before St. Paul reached the eighties, he published a document, in which he proved that corporation to be substantially bankrupt. But the perverse purchasing public have kept on buying St. Paul, from \$68 up to \$103; has added nearly twenty points to Lake Shore and twelve to New York Central. The stocks upon which Mr. Rufus Hatch vents his sarcasm and wrath are those which lead the market and go up, while others stand still or go down. Queer, isn't it, Mr. Hatch?

Property owners should bear in mind that on the First of November next ten per cent. additional will be added to all unpaid Croton water rates.

TALK OF THE STREET.

"I hear," said the writer, "that Erie is about to pay a dividend upon its preferred stock, while a statement is shortly to be made showing that the common stock has earned at least two per cent."

"That may be true," remarked a broker supposed to be acquainted with the doings of the Erie directors, "but I do not think that Erie will

declare any dividend on its preferred stock. The money will be needed for important improvements. A new track from Paterson to Ridgewood is to be laid. The cut across the country, so as to save thirty miles of steep grade this side of Port Jervis, will consume a good deal of capital. There are other improvements which Erie is forced to make to meet its rapidly extending business."

"But," said the writer, "according to the *Pall Mall Gazette*, Erie was reorganized upon the English plan, and the shareholders of English roads object to the money being expended in anything but dividends. It is claimed that if money is needed for construction account, it should be raised by the selling of new bonds."

"All that may be," said the broker, "yet I tell you that Erie cannot afford to go into the market with a new issue of bonds. It has debt enough already, and as the improvements must be made, the surplus will be taken to make them. Then, again, under the reorganization, it is provided that the road will remain under its present management until three consecutive dividends are paid on the preferred stock. Now, it is not likely that the present owners will care to surrender their authority by the premature payment of dividends."

"What do you hear about Central?"

"The rumors in that case," was the reply, "is that the stock is to be doubled and perhaps increased. Instead of ninety million of stock there will be two hundred million, on which will be paid four or five per cent., and perhaps an extra dividend."

Said the writer, "Chauncey M. Depew told me last summer that there would be no more scrip dividends, because of the hostility it would excite in the Legislature and in the community."

"Yes," was the reply, "but is this a scrip dividend? The stock is now so high that people do not like to handle it. It does not go up to its full figure, because 137 and 138 looks very high now. But, suppose, instead of ninety million shares there was two hundred million. The stock might easily sell for 70, and perhaps 80, and could be readily dealt in."

Here, a gentleman in the habit of dealing in securities interposed.

"My notion is that Central will declare no extra dividend, certainly no scrip dividend. But what is to prevent that road using up its large surplus in the taking up of the various mortgages as they fall due? This, in time, would give to the stockholders the monies which now rate as mortgages. In other words, the debts upon which interest are paid would become funds invested in the name of the stockholders. If this policy were adopted, you would see Central go to 25) for, although the road may not pay more than eight per cent., the property will be worth vastly more in view of its debts becoming liquidated, and the principal being divided eventually among the stockholders."

Said the writer, "talking of Centrals, how about Central Pacific?"

Said a well-known capitalist, "that stock was floated upon the New York market last year at \$85 a share. It was clumsily managed, though the statement accompanying the report was very good. The stock has been inactive since then, the prime movers waiting for more propitious times to start another 'boom.' Central Pacific pays six per cent. It has been selling from \$72 to \$75. At that rate it pays more than eight per cent per annum. It would be a cheap stock if one could be sure of the future of the road, but Central Pacific has taken on a great many obligations. It has leased lines to Oregon, branches on the Pacific coast, and it has built a Southern Pacific from San Francisco through Arizona and out through New Mexico to meet the Atchinson and Santa Fe, at a place called Florida City. All

these enterprises take money and cannot be immediately productive. Then the mining business has not been profitable lately, though the wheat business of the Central Pacific road must just now be enormous. There may be a 'boom' in Central Pacific stock, or there may be a 'break.'"

"What is the matter with Metropolitan and Manhattan?" asked the writer of a gentleman who professed to know about these properties.

"Oh," said he, "the future of the elevated roads is assured. The business of New York is steadily increasing. Its population is growing, and in time these roads will carry parcels, freight and have through trains by night and day. They are destined to pay enormous dividends in time. Then it is very certain that the Manhattan lease will not be broken."

"But," urged the writer, "if there is an annual deficit of four hundred and seventy odd thousand dollars, as there was last year, what is the Manhattan Company to do?"

"There won't be any such deficit," was the answer. "At the rate the business of the road is increasing, Manhattan will not be behind in the interest until next January, and then it will be for only a small amount. There is some talk of Cyrus W. Field being cornered in Manhattan stock, but that is probably all the merest gossip. Manhattan is potentially a valuable stock, and before the World's Fair opens will be selling for par."

"Yes; but," urged the writer, "what will it do when it finds that there is not money enough to pay the ten per cent. guaranteed dividends?"

"Oh, there are several ways out. A scrip dividend may be declared or money may be advanced by the friends of Manhattan stock, or if the worst comes to the worst, what is to prevent the Metropolitan directors from returning the amounts due them, under some arrangements, back to the Manhattan Company? You see it is to the Metropolitan corporation that the dividends are pledged, not to the individual stockholders. It is feasible, therefore, for Messrs. Navarro, Porter and Garrison to pass the dividend to their stockholders, and allow the Manhattan to retain it to meet other obligations. I reason, of course, that the New York elevated will have its 'pound of flesh' and will not compromise with the Metropolitans."

"What do you think of the future of the market?" was asked of another well-known capitalist.

"A hesitation," was the answer, "just before the election, and perhaps a fall in prices, due to the apprehension that perhaps Hancock might be elected. A buoyant feeling will take place in the hurrah after the election, but bear in mind that November is never a 'bull' month. The panic of '73 culminated in November, the great break in stocks took place last year on the 21st of November. People fail to keep in mind the fact that during the latter part of November and early part of December all the local taxes of the countries are paid. The land and personal taxes, city, county and state have all got to be paid within about a month, as I have said, towards the last part of November and the middle of December. There is, therefore, a call for money in every direction. It is so universal that it has rarely been noticed. Of course, the money is disbursed again and forms the basis for the rise which so often occurs in January. Therefore, I do not look for any decided 'bull' movement during November. But sometime after New Year's—it may not be until February—we will see the greatest rise that has occurred since the fall of '79."

"What stocks will be most benefited?"

"Those west of the Missouri and Northwest. Those places where emigration is the greatest and where land has risen most in value. Take the

situation in the Southwest. The State of Texas is growing with enormous rapidity. It is becoming very populous. Its land is getting dearer; its productions are on a very large scale. The opening of the road between Houston and New Orleans will divert a great deal of traffic in the direction of the Gulf, but it will also help swell the revenues of the two railroads which now penetrate Texas—the Iron Mountain and the Missouri, Kansas and Texas. The extension of the Pacific road west is already adding largely to the business of these two roads. Then it is not unlikely that the matter may be agitated in Congress of throwing open the Indian Territory to white settlement. Should it be done, look out for a scramble in the stock of Missouri, Kansas and Texas. That road now runs through two hundred miles of an artificial desert. The land is as fine as any the sun ever shone upon, but it is kept desolate by a lot of wandering savages, who will neither till the soil themselves nor permit white men to do so. The stock of the Kansas road could easily go to par were the Territory to be thrown open, on account of the large business it will do immediately, as well as the profits which will accrue from the sale of the lands on each side of the road guaranteed to them in the charter which they secured from Congress."

"How about the extension of the Missouri, Kansas and Texas to Mexico?"

"It will undoubtedly be undertaken, but a movement will probably be made in the stock so as to get the best possible price for the bonds and the new stock to be issued. Whatever monies are spent in Texas to extend the road towards the State of Mexico will add just as much to the traffic over the road. The stock may be kept depressed for a time, but it is sure ultimately to command very high figures."

ABOUT MINES.

MINING STOCKS WHICH HAVE PAID.

All the mining stocks have not proved a snare and a delusion. Ontario, which was put on the market in May, 1877, at \$20, has declared over \$30 in dividends, and is selling for about \$30. The Standard has declared \$21 in dividends, \$12 of which have been paid within eighteen months. It was put on this market in the summer of 1878 at \$21, while it is now selling at about \$28 a share.

The Green Mountain was put on the market at \$1.50 something over a year ago, and is selling to-day for \$3.55. It has regularly paid five cents per month a share, and has besides declared some extra dividends. Its new sixty stamp mill, will soon to go into operation, when the dividends will be increased to ten cents per month per share. The same persons who have floated, and who have maintained the price of Green Mountain during all the depression, also put the Rising Sun on the market, which has risen some twenty points in value and pays regular dividends. In a few weeks will be listed the Gold Stripe mine, which has the same backers as the Green Mountain and Rising Sun, and of which Prof. W. C. Blake speaks in the highest terms. The Cherokee, owned by the same parties, will, it is supposed, be listed towards the end of the year and will pay dividends in the early Spring. This mine is really a continuation of the Green Mountain, which is literally a mountain of low grade gold ore. The Homestake was floated two years ago at \$21 a share, and is now worth \$33, although it has paid but about \$6.90 in dividends. It is beginning, however, to pay extra dividends. But it must be confessed that these mines and a few others are the exceptions. The great bulk of them have been marketed at high figures; have paid but very few dividends and are selling at low figures compared with their cost.

BOSTON CONSOLIDATED.

This is a Bodie mine which contains good rock,

but the people who are in it were the same who made the deal in Consolidated Pacific. Whoever touches this property does it at their peril. The operators in the stock are skillful and unscrupulous.

CALAVERAS.

There has been a reorganization in this company by which a combination has been made with the Union Water Company and the Boston Hydraulic Gold Mining Company. It is claimed that the reorganized company will pay dividends from the start, as the Calaveras will now have all the water it can use. This has proved a very treacherous stock to those who dealt in it. It started at 500,000 shares, and was floated at first from 35c. to 50c. per share. It was run up by manipulation to \$2.10 per share, and the brokers did a large business in the buying and selling of the stock. But it was found that while the Calaveras Company had a mill and thousands of acres of gold bearing gravel it had no water, whereupon the stock fell until it lately was quoted at 26c. The whole course of the stock has shown questionable manipulation, and any one who deals in it does so at their own peril. If people who purchase securities are dealt with unfairly by the sellers, for that the latter are to blame, but if the buyer deals a second time with the person who has injured him, then he is to blame.

CAN THIS BE SO?

It will be remembered that a short time since the work in the Sutro tunnel, leading into the North end mines, was 'stopped at the request of the Bonanza firm. Indeed the President of the Sutro Tunnel Company, Mr. Brush, gave as a reason for the stoppage of the work, that Mr. John Mackey asked them to suspend operations, as he did not wish at present to levy mere assessments. Now the story comes, that the real reason for not continuing the work is because there is a bonanza in the Mexican mine, which the Bonanza firm do not care to open up just yet. There are mining men in this city who believe that there is a bonanza in Mexican, Union and Nevada, but that it is not the policy of the Comstock operators to show them up at present. A correspondent of the San Francisco Post alleges that the ore body in the Union lies north of the cross-cut No. 1. and that another ore body is south, near the Mexican line. He says there is no ore on a corresponding point with the cross-cuts now being run on the 2,400 foot level. We give this theory for what it is worth; for we believe, all reports to the contrary, that Mackey, Fair and Flood are as anxious as anybody to develop another bonanza. Their mills are idle, their workmen unemployed, and all their properties depreciated because of the absence of pay ore on the Comstock. That John Mackey has some doubts of soon finding an ore body, is shown by the fact that he is about to leave the Comstock to pay a visit to his family in Paris.

THE HORN SILVER.

The managers of this great mine seem to profit by experience. They have given up their absurdly located smelting works in Chicago, and erected others near Salt Lake City. It is reported that one of their furnaces has been rendered useless, because they allowed some experimentalist to smelt ores without the preparatory roasting. A new furnace must be erected. This property has been wretchedly managed so far. The gentlemen in charge are entirely honest, but their business training was in other pursuits, and they have, so far, made sad work in trying to run a great mine. The proper market for their lead is San Francisco, not New York. We speak thus frankly about this property, because so much was naturally expected from it, in view of its eminently respectable board of directors.

EXPLANATION NEEDED.

Ought not the gentlemen who gave their names

to mining companies as officers to make some excuses, at least to the public, who bought shares of doubtful securities on their recommendation or endorsement? Take the Chrysolite—Mr. Daniel S. Appleton belongs to a very eminent business firm. How was it he became associated with—well, we do not care to mention names—it might be libellous. But he must now know that the management of that company was scandalous, and that the new officers found a most unfortunate condition of affairs when they assumed control. The business public ought to hold gentlemen to a stern accountability when they permit their names to be used without proper inquiry into the antecedents of their associates. Then there is the Spring Valley Hydraulic Company. The stock was peddled out to the public at \$10 per share. The buyers were guaranteed a regular dividend; and a number of most respectable and honest bank officers were prominent members of the organization which floated the stock of this company. From \$10, the original subscription price, the stock has reached a figure which is hardly quotable. It would be a real public service for some journal to give a list of the capitalists and bankers who have given the weight of their names to questionable mining enterprises.

A WORD ABOUT THE BULLION CLUB.

In November, 1878, a number of gentlemen, foreseeing the interest in mining which the Eastern people were beginning to feel, and believing that there was danger of undue excitement, and that, perhaps, fraudulent schemes would be foisted upon the public, met at an office in Broad street and organized the Bullion Club. Among the original members were John McGinnis, Jr., Brayton Ives, Platt K. Dickinson, Spencer Trask, Gen. Horace Porter, D. G. Croly, W. T. Hatch, Charles E. Quincy, James M. Francis, Wm. D. Snow, and other equally well known capitalists, bankers and brokers. It was the intention of the club to bring together people interested in mining, so as to make the business legitimate. Unhappily, the scheme of the club was not fully carried out. It took rooms up-town, which was a mistake; and, while its members profited by an interchange of views, the business, instead of being confined to legitimate dealers, got into the hands of unscrupulous Californians and Coloradians. Persons without any reputation on the Pacific coast, or with worse than no reputation, found bank presidents, leading capitalists, and well known merchants to give their names to most preposterous and deceptive schemes. The members of the Bullion Club saved themselves and their friends, but not the community, from the disastrous speculations in Leadville and other deceptive properties. The members met weekly, and heard lectures, not only from eminent scientists and experts, but they entertained mining men from all our mineral districts. The club is now about to take a new departure. It proposes to extend its sphere of operations and enlarge its membership. The circular it has issued to leading capitalists will be found below. This document, however, omits one important value of the club to its members, viz: the personal knowledge that the club obtains about mine promoters, experts, superintendents, and operators in mines generally. It is a remarkable circumstance that nearly every person who figured conspicuously in connection with the Leadville mines had reputations so bad, which, were they known to the public, would have stopped dealing in their principal securities. This is a kind of knowledge which cannot be printed, for it is libellous. It can be made known in a club. Annexed is the circular:

BULLION CLUB ROOMS,

Down Town Office, 137 Broadway, Room 234.
New York, Oct. 1880.

SIR:
The Bullion Club has now been in existence

nearly two years. It has proved of value to its members in spreading information on mining matters; in discrediting many fraudulent schemes, and in bringing together capitalists and many persons who had valuable mining properties to dispose of.

There are still many abuses in the capitalization and management of mines, as the excitement which attends all speculative movements cannot be entirely controlled. With the coming season, the Bullion Club proposes to extend the sphere of its usefulness.

Among the objects its members have in view are the following:

First.—The gathering of news from all the mining camps of the country, through the medium of its own extensive list of corresponding members, from newspaper publications, official reports and expert testimony; this news to be kept exclusively for the benefit of its members.

Already its index of mining companies, showing officers' names, capitalization, etc., affords information of nearly a thousand organizations.

Its scrap books of extracts from the leading papers from the mining regions contains near two thousand columns.

United States explorations, geological surveys on the 40th parallel, maps, etc., etc. Hayden's reports, with other accumulations of valuable matter, constitute the beginning of what is intended to be made a valuable collection.

It has also on file many special reports of mining organizations, and these are solicited from all mining organizations to whom this circular may be sent.

Second.—The Club proposes, to the extent of its ability, a reform in our mining laws, State and National, with a view to fostering mining as an industry, and correcting, in every possible way, the abuses connected with the organization and management of companies. The statutes of this State require amendment, as the manufacturing law under which companies are now required to organize, is not altogether suited to the business of mining.

Third.—The bullion interests of the company require some special organ to represent them to the Government. While Great Britain, France and Germany use gold and silver exclusively in their retail traffic, in the United States all the channels of trade are choked up with small bills, which do not permit our money metals to circulate among the people. Europe, which does not produce the money metals, help to keep up their value, by using them in the retail traffic of the people, as well as in the arts, while the United States, which produces half the bullion of the world, does all it can to discredit its own productions by circulating small notes in lieu of the precious metals. Under this state of things, when exchanges turn against us, gold and silver will rapidly leave our shores; as under present laws they are not diffused among the people, but sequestered in the vaults of those managing the exchanges.

Fourth.—It should be the mission of the Bullion Club, also, to help bring about a universal coinage, and to throw light upon the controversy between mono-metalism and bi-metalism. The unification of the precious metal coinage of the world requires the intelligent assistance of just such an organization as the Bullion Club.

Fifth.—Another value of this organization is that it affords a headquarters for capitalists, bankers, brokers, mine owners, civil and mining engineers, experts and others interested in productive mining industries, to meet and form business and other engagements of a practical nature.

Instead of the mining headquarters being in the halls of the hotels, it should be in our club rooms, where business could be conducted in a quiet and more satisfactory way.

The mining business has come to New York, and notwithstanding the errors and misfortunes of those who first invested, with but little investigation into the merits of the schemes proposed, it is now certain that immense sums of money are available in the metropolis for mines and mining all over the country.

Sixth.—The Bullion Club, regarding the mineral resources of the country as an unsurpassed heritage, which has been largely perverted to the purposes of speculation, when they should have been developed as national supports and industries, loses no opportunity, through weekly lectures, at its parlors, by men of eminent attainments, both practical and professional, to educate and inform its members upon all branches and subjects connected with mining and metallurgy.

Gentlemen wishing to join the Bullion Club will please address the Secretary, at No. 137 Broadway, Room 234. Initiation fee, \$50. Yearly dues, \$25.

JOHN MCGINNIS, JR. D. G. CROLY,
Chairman Board Directors. Secretary.

CORRESPONDENCE.

THE PROPOSED HYGIEARIUM.

To the Editor of THE REAL ESTATE RECORD:

It may interest your readers to know that there has been an unexpectedly favorable response to the proposition first made public through your journal for a sanitarium to utilize the buildings and grounds of the great World's Fair, which it is proposed to hold near this city in the year 1883. Dr. Wm. A. Hammond, in a private note, writes me: "Your plan is a good one, and it is perfectly feasible, even to giving the ozone of certain localities." He offers to help the enterprise in every possible way. Dr. Ghisani Durant, another well-known eminent local physician, writes me: "Not only the scheme is feasible, but is already a *fait accompli*. Horne, in 1782, Clinical Experiments. Percival, 1774, Experiments and Observations on different kinds of Air. Watt, in this century, on the use of fictitious airs, in medicine; and since a great number of medical writers, especially French, have advocated and made use of artificial atmosphere." I might quote others, but this will suffice. Dr. Hubbard, of Brooklyn, warmly endorses the enterprise. It would give a reputation for all time to the capitalist who would identify his name with an enterprise which promises to be of such benefit to sick and suffering human beings.

Oct. 21st.

D. G. CROLY

MADISON AVENUE BRIDGE.

To the Editor of THE REAL ESTATE RECORD:

This most important improvement, which has so long been delayed, it is said, is about to be pushed forward to completion. A glaring mistake is, however, to be made in its construction, namely, in making a drawbridge of it. I ask what traffic is so important on the Harlem River that so great a thoroughfare as this bridge will be, should be interrupted by a draw. Above the Third Avenue Bridge and the Railroad Bridge there are located several lumber yards, a large iron manufactory, a stone yard and some minor interests that more or less have to do with water transportation; but all these interests should become subservient to the greater interest of the large and growing population which reside on the north side. As a truth the Railroad Bridge and the Third Avenue Bridge should forever be closed against this petty traffic by water that now reaches above them. Above the site of the Madison Avenue Bridge there are no interests save those of the projectors of summer excursions to High Bridge, which demand any respect; and these can all be served by making the center arch of the bridge sufficiently high to permit the smoke stack of excursion boats to pass, and then all these boats should be made to take their passengers from just above the Railroad Bridge. Your correspondent saw at Third Avenue Bridge a few days since over one hundred wagons and carriages, several street cars and over a thousand persons detained by the opening of the draw to let one small tug boat pass. The conflict of this petty interest as against the other large interest was ridiculous. The Harlem River is a tidal stream, and as such is open to all navigation under certain United States laws, but this right may be withdrawn by act of Congress, and in this case the large amount of traffic that goes over the river should demand this relief. The Madison Avenue Bridge should be a broad, solid stone floored bridge, like the Chestnut Street Bridge, in Philadelphia. When this Philadelphia bridge was built the river traffic was compelled to bow to the greater interest, which the bridge was built to serve. The real estate owners on the north side should wake up to the importance of the Madison Avenue Bridge being made a fixed structure and not a draw.

WILLIS A. BARNES.

A TIMELY COMPLIMENT.

To the Editor of THE REAL ESTATE RECORD:

SIR,—I could wish that your weekly editorials could be "read, marked and digested" by every voter in our big city. The article to-day on "All Right, of Course" is very timely and significant. In conclusion, will you permit me to "steal the thunder" of our greatest American, and say "Push Things." Truly Yours,
NEW YORK, Oct. 16th, 1880. NO HARM.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv and v of advertisements.

There was a very good attendance at the Exchange Salesroom, throughout the week, not a day being neglected by dealers and brokers, who gathered there not only from Pine street, but also from the upper and outlying parts of the city. All present appeared to be infused with the idea that the worst days of the Real Estate Market had seen had passed, and that the time was now ripe for energetic dealings. True, it was admitted that as yet the minds of buyers were somewhat clouded by political probabilities, dependent of the coming election, but as real estate is a slow moving article, even those who continually look at the market through political spectacles, were disposed to help along activity, wherever there was a chance to display itself. Hence the properties offered at public sale by various auctioneers found plenty of bidders, not any of whom were rampant or aggressive, but slow and determined. The Twenty-third street property, running through to Twenty-second street just west of Fifth avenue, found many admirers. It came finally into the possession of Mr. James F. Sutton, who is said to have secured it for Mr. Ambrose C. Kingsland. He paid \$97,500 for the whole and Mr. Eno, who is an expert as to that locality, bid within a thousand dollars of this amount. On the same day a store in Church street, only fifty feet deep, was sold for \$32,000. The sale of lots along the West End or Eleventh avenue, Eighty-fourth street and the Boulevard, by Siegmund T. Meyer & Sons, also attracted considerable attention. As will be seen by the detailed list at foot, the prices were not high, but the lots were disposed of to various buyers, who paid enough for the property, as far as sold to cover the encumbrances. When these had been secured, the referee, in accordance with law, suspended the sale and though there were any number of bidders on hand, anxious to purchase the remaining Boulevard lots, they were not offered; the amount obtained for the other property being considered sufficient to cover all encumbrances, including expenditures. Mr. Chester Lyons' sale of lots on West One Hundred and Thirtieth street, also attracted numerous bidders, and though the property was finally knocked down to the plaintiffs, some well known investors bid within a very small margin of the prices actually realized. Other public sales of minor importance took place during the week, particulars of which will be found elsewhere.

In Brooklyn, during the past week, there were several auction sales, notably one of property on the corner of Columbia street and State, which was disposed of for \$40,000; also an executor's sale of Atlantic avenue property corner of Oxford street, for \$5,800; and on the north side of Greene avenue, 200 feet west of Patchen avenue, 125x100, for \$11,000.

In the suburbs, Messrs. A. J. Bleecker & Son sold during the week, two parcels at auction. At the Court House, in Elizabeth, N. J., they sold by order of Mr. Runyon, the Master in Chancery, the Netherwood Hotel, one mile from Plainfield, to Messrs. Wm. L. Pomeroy and John Y. Plummer, for \$40,000. They also held a partition sale at Harrison, Westchester County, of the Estate of Wm. H. Taylor, deceased, and sold nine acres, within a mile and a half of the depot, to Morris H. Taylor, for \$3,000.

During the coming week, Messrs. E. H. Ludlow will sell (on Tuesday) by order of the executors of Owen Keenan, deceased, several houses recently repaired and well rented, on East Seventy-ninth street and Second avenue; also vacant lots on the same street and Lexington avenue. The sale will be peremptory. Mr. Charles Strauss, of Broadway, who acts in behalf of the executors, states that 60 per cent. can remain on bond and mortgage.

Mr. John T. Boyd will sell during the week, by order of Mr. Best, receiver for the German Savings Bank of Morrisania, several parcels in the annexed district, particulars of which, as well as of the sale of the Keenan Estate, will be found in our advertising columns.

GOSSIP OF THE WEEK.

Those connected with the Real Estate market do not show the least disposition to await the result of the elections, now only a dozen days off. Investors, builders and brokers have been actively at work,

bringing long pending negotiations to a proper issue, and while, of course, numerous transactions are still pending, others have sufficiently far progressed to permit their insertion in this column.

The southwest corner of White street and Broadway, fronting over forty-five feet on Broadway, has been sold for about \$310,000, to a prominent Boston dry-goods firm.

Messrs. Siegmund T. Meyer & Son have also sold, at private contract, considerable improved property in and around Broadway, namely: six buildings, fronting 150 feet on Bleecker street, between Broadway and the Bowery, aggregating \$78,000. This purchase has been made by a publishing firm, which line of business is concentrating steadily along Bleecker, Bond and Great Jones streets. This firm has also sold a building on the east side of Broadway, between Spring and Prince streets, 40x100, at private terms, also No. 550 Pearl street, to Mr. E. Knight, for \$25,000.

A transaction of considerable importance, amounting to no less than \$180,000, has been the talk of Pine street during the past few days. Though money has been paid down on the contract alleged to have been made, we are unable to give the definite locality, except to say that the property comprises lots in the nineties, between Eighth and Ninth avenues.

Messrs. L. J. & I. Phillips have also sold during the week a Broadway parcel, between Bleecker and Canal streets, the details of which have not reached us at the hour of writing this.

Just as we go to press, we hear that Mr. Isaac Honig has sold several parcels of unimproved property on Park avenue, Eighth avenue and on Eighty-first street, west of Central Park, but the information reaches us at too late an hour to publish the particulars in this issue.

Mr. Joseph Blant reports having sold three lots, on the east side of Fifth avenue, fifty feet north of Eighty-sixth street, on private terms. The New York Life Insurance Company owns lots in the immediate vicinity, and they hold their lots at from \$37,000 to \$40,000 each.

Mr. John D. Crimmins has purchased from the estate of E. H. Scherhorn the lots on the south side of Sixty-eighth street, between Second and Third avenues, fronting four hundred feet on the street, with the intention of improving them, without delay. Mr. L. J. Carpenter has been the broker in this transaction. Mr. Crimmins intends to build there six houses of 16 8 front, eleven houses of 18 2 front, and probably 20-foot houses on the remainder of the plot. He thinks of starting work there at once, building houses on the Philadelphia plan, which can be disposed of at an average of \$10,000 each, but no more than six of them will look alike, and no monotony will spoil the aspect of this new row of houses when erected.

The Sixty-ninth street lots, between Madison and Fifth avenues, alluded to in this column last week as having been sold by Mr. Crimmins, were disposed of by him to Mr. Heber R. Bishop and David Dows.

It was also reported, yesterday, that Mr. A. J. Kerwin had purchased the entire block between Fifty-ninth and Sixtieth streets, Avenue A and the East River, thirty-three lots, for \$33,000.

Two lots on the north side of Eighty-ninth street, between Fourth and Lexington avenues, have been sold at private contract, by Mr. J. B. Smith, for \$1,250 each.

Benner & Zeller have sold three lots, containing a cottage and stable, on Prospect avenue, near One Hundred and Seventy-eighth street (Twenty-fourth Ward), to K. Bender, for \$3,500.

Riker & Co. have sold, at private contract, two lots on the south side of Sixty-sixth street, 130 feet east of Park avenue, for \$10,000 each. The same firm has also sold, for John Davidson, No. 159 East Seventy-First street, a three-story brown stone house, 20 feet front, for \$23,250.

We desire to call the attention of investors and builders to the advertisement, in another column, of Mr. Fowler, one of the most enterprising real estate brokers on the extreme West Side. Now that the attention of buyers is being turned to that section, we advise them to consult this gentleman, who can direct them in regard to some good investments.

The attention of builders is directed to the excellent Eighth Avenue corner offered by Mr. Houig in another column. He also offers other property with builders' loan.

Among the enterprises which seem to be attracting considerable attention on the part of investors, who are seeking a safe channel into which to put their surplus funds, we find that of The New York and New Jersey Riparian Land and Dock Improvement Company, whose advertisement will be found in our columns. This Company has in its board of directors some of the most reliable and trustworthy business men of New York and New Jersey, and the enterprise itself is of so practical a nature as to inspire the utmost confidence in the minds of moneyed men. The mere announcement of the enterprise has caused real estate in Bayonne City to be enhanced in value.

Considerable activity is manifested in Brooklyn Prospect Park lots. Wyckoff Brothers have sold the southwest corner of Seventh avenue and Lincoln place, 10x110, for \$7,000; the buyer will improve same with a handsome modern style residence. The same firm also sold a lot, 20x100, on Lincoln place, south side, west of Sixth avenue, for \$1,800, for investment.

From Westchester County also news reaches us of increased activity. Mr. Geo. W. Carrington has sold to Mr. Fred H. Cossitt a tract of vacant land, containing forty five acres, for about \$1,000 an acre, on North Broadway, Yonkers. This identical property was sold before the panic of 1873 for \$1,000 an acre.

Jay Gould has purchased the Woodward property, sixty-two acres lying back of Irvington-on-the-Hudson, and within five minutes of Hall's Corner, a station on the New York and Northern road, for \$10,000. The Germania Bank is the seller.

Hon. Samuel J. Tilden has just purchased a forty-acre tract of land adjoining Greystone for a deer park. It is said the price paid was \$100,000. Mr. Tilden has recently been offered \$500,000 for his beautiful country home, but he does not wish to sell it.

Building operations continue without abatement, especially in the central and eastern sections of the city. Mr. Robert L. Stuart is about to erect on the northeast corner of Fifth avenue and Sixty-eighth street a magnificent mansion, fronting sixty feet on the avenue and one hundred and thirty feet on the street. The excavation for the foundation is already underway. Mr. Jacob Ruppert's house, on the corner of Ninety-third street and Fifth avenue, is to be a model of architecture with its ornamental towers and exquisite elevation, of which further details will be given hereafter.

In our list of projected buildings, published this morning, there is an avalanche of new structures; the most important of which are two buildings on Fifty-seventh street, near Lexington avenue, owned by Mr. Navarro; twelve four story apartment houses, on the southeast corner of Fourth avenue and One Hundred and Ninth street; four four-story dwellings, by Abraham Downey, on the northwest corner of Fourth avenue and Seventy-fifth street; four four-story stores and tenements, on the south side of One Hundred and Twenty-fifth street, west of Seventh avenue by W. H. Russell, and five four-story dwellings, on the southeast corner of Madison avenue and One Hundred and Twenty-third street, by Mr. T. F. Treacy.

Mr. Wm. O'Gorman, a well-known builder in the annexed district, is now erecting six two story brown stone dwellings, on the north side of One Hundred and Thirty-eighth street, east of Willis avenue, also eight two-story brick dwellings on One Hundred and Thirty-ninth street, east of Willis avenue. Mr. O'Gorman now has no less than twenty-five buildings under way.

At 234 and 235 Broadway, Mr. Thomas Maddock will erect a new, brown stone front office building—old building now being demolished—Mr. Maddock took title in April last by foreclosing a mortgage, the consideration then was \$122,000.

Thanks to the energetic efforts of Mr. N. J. Newwitter, late consul to Japan, and now a property owner, there is a prospect of Fifth avenue, between Ninetieth and One Hundred and Tenth streets, being soon Macadamized, the same as it is now from Fifty-ninth street upward. A resolution to that effect has been introduced in the Board of Aldermen, referred by them to the appropriate committee, and Alderman Perley intends to report it favorably for final action, at the next meeting of the Board.

Speaking of the Board of Aldermen, reminds us of the fact that our attention has been called by builders and lumber dealers to the compliment paid incidentally to the lumber trade, by the nomination of Mr.

Wm. R. Grace to the Mayoralty, he being the President of the Lumber Export Company, the largest concern of the kind in this vicinity.

It may interest those who watch the progress of our good sister city across the river, that building operations in Brooklyn are just as active there as they are on Manhattan Island. Leaving out of consideration now the minor structures, we simply desire to call attention to the fact that eight three-story tenements are being constructed on Seventh avenue, north of Sixteenth street; eight three-story dwellings on Hancock street, east of Bedford avenue forming part of the Brevoort Estate, and four four-story dwellings on Gates avenue corner of Wave-y avenue.

The well-known firm of Brown & Seymour, of Montague street, Brooklyn, having dissolved co-partnership, the business will henceforth be conducted under the style of Chas. A. Seymour & Co. Though the name has been altered, there will be no change in the management of the transactions entrusted to this firm, who know all about Brooklyn property that is worth knowing.

The following are the sales at the Exchange Sales-room for the week ending Oct. 22:

* Indicates that the property described has been bid in for plaintiff's account:

Bank st., No. 94, s. s., abt 32.9 e Greenwich st., 18.6x61x53.6. Patrick Lilly. Executor's sale.	\$6,800
Boulevard, w. s., 102 2 s 84th st., 46.11x85.11x38 x 86.5 J. M. Emanuel.	8,000
Church st., No. 203, e. s., abt 42.5 s Walker st., 21.2x51, five-story marble front warehouse. Owen Jones. Public auction sale.	32,000
231 st., No. 30, s. s., 337.6 w 5th av., 25x114 3, four-story brick dwell'g and portion of two-story brick stable in rear.	
22d st., No. 21, n. s., 336 2 w 5th av., 25x83.3, three-story brick dwell'g and portion of stable in rear.	
James F. Sutton. Partition sale.	97,500
*37th st., s. s., 175 w 1st av., 17x73 5. A. W. Lowerre, exr. (3d mort., abt \$4,150; 1st and 2d mort., \$4,000).	7,525
*61st st., s. w. cor 1st av., 175x100.5, vacant. Elizabeth R. B. King. (Amount due, abt \$66,000).	30,000
84th st., s. s., 103 e West End av., 50x102.2. J. Harney.	6,600
81th st., s. s., 150 e West End av., 35x102.2. W. C. Lester.	4,000
3 lots, 1 1/2 2 s 84th st., and 103 e West End av., 75x33x75.4x30.5. E. P. Gage.	1,250
104th st., n. s., 255 w 4th av., 25x201.10 to 105th st. Dennis McGrath. Trustee's sale.	5,800
117th st., n. s., 335 w 5th av., 75x100.11. Henry James. Trustee's sale.	9,000
*130th st., s. s., 32 e 12th av., runs east 25 x south 182.9 to Manhattan st., x northwest 53.9 x north 57.19 x east 25 x north 99.11 to beginning.	
130th st., s. s., 425 e 12th av., 50x199.10. Arthur Gillender and ano., exrs. (Amount due, abt \$11,500).	16,825
*Jerome av., w. s., 300 n e James st., 100x125. William H. Morris. (Amount due, abt \$2,000).	2,000
West End (late 11th) av., s. e. cor 84th st., 27.2x 100. F. P. Foster.	4,300
West End av., e. s., 27.2 s 84th st., 25x100. F. P. Foster.	2,750
West End av., e. s., 52.2 s 84th st., 25x100. Wheeler.	2,800
West End av., e. s., 77.2 s 84th st., 25x100. Wheeler.	2,550
West End av., s. s., 102.2 s 84th st., 20.4x100.6x 30.5x100. Wheeler.	2,250
4th av., Nos 353, 355 and 357, e. s., 39.6 s 26th st., 59.3x80, three three-story brick stores and dwell'gs. John B. Simpson. Partition sale.	47,750
7th av., Nos. 348 and 350, w. s., 58 9 n 29th st., 38x 61, two four-story brick stores and tenements. John Herdtfelder and Frank Billman. (3d mort. \$1,550; 1st mort. \$15,000).	22,100
*Plot known by the letter L on map of property, estate of Lucius Chittenden on Washington Heights—about 13 city lots. Thomas and Thomas H. Messenger, trustees. (Amount due, abt \$13,000).	7,000
Total.....	\$318,800

BROOKLYN, N. Y.

In the City of Brooklyn, Messrs. J. Cole and T. A. Kerrigan have made the following sales for the week ending Oct. 20:

*Bayard st., s. w. cor Graham av., 76.7. Mutual Life Ins. Co.	\$3,000
Columbia st., n. e. cor State st.	
Columbia st., n. w. cor State st.	
Columbia st., s. w. cor State st.	
Margaret Smith.	40,000
Herkimer st., n. s., 100 w Hopkinson av., 50x100. R. O. Frost. (Partition sale).	335
Herkimer st., n. s., 150 w Hopkinson av., 50x100. J. J. Drake. (Partition sale).	310

McKibben st (No. 37), bet Leonard and Lorimer sts., 25x100, three-story frame dwell'g. George J. Kupfel.	3,350
*Penn st., n. w. s., 336.11 s w Bedford av., 20x100. Robert Fletcher.	5,000
*Raymond st., e. s., 270.2 n Fulton st., 19x75. David F. Kimberly.	5,200
*Walton st., s. s., 175 e Harrison av., 25x100. Henry Funk.	100
*Atlantic av., n. e. cor Oxford st., 19x56x44 8x 69 5. John O. Whitehouse, exr.	5,800
Graham av., No. 282, three-story brick store and tenement. John Price.	1,350
Greene av., s. w. cor Throop av., 100x100. Robert Dent. (Exr's. sale).	4,500
Greene av., s. e. cor Throop av., 100x100. Robert Dent. (Exr's. sale).	4,250
Greene av., n. w. cor Throop av., 100x100. J. B. Brady. (Exr's. sale).	4,950
Greene av., n. s., 200 w Patchen av., 125x100. Alexander M. Earle.	11,000
*Lafayette av., n. s., 100 w Stuyvesant av., 20x 100. Mutual Life Ins. Co.	2,000
Lexington av., n. s., 160 e Throop av., 100x100. Wm. Kennedy. (Exr's. sale).	2,000
Lexington av., n. s., 260 e Throop av., 100x100. Robert Dent. (Exr's. sale).	2,000
Withers st., No. 204, near Humboldt st., 25x100, two-story frame dwell'g. John Orr.	1,950
Total.....	\$97,095

BUILDING MATERIAL MARKET.

BRICKS.—There does not appear to be many new developments on the market for Common Hard Brick. We find receivers reporting a good, steady trade, with the distribution of a general character, and about exhausting the supply as it comes to hand, with former rates obtained and a strong tone preserved all around. "Up Rivers" and Haverstraws remain well together in price, and may be covered by the range of say \$5@5.50 per M, with a few extras of the latter grade occasionally selling a fraction higher. The advices from primary points are to the effect that production has now commenced to fall off very rapidly, and must, in all probability, soon cease entirely, but will leave a large accumulation on hand. Indeed, a large percentage of the yards are said to have piled up about all the stock they can by any possible means find room for, and would, even without the influence of the weather, have been compelled to stop for want of storage capacity. Shipments are expected to continue so long as navigation remains open, but a heavy rush of supplies is not likely, as there is no surplus of transportation facilities. Pale Brick are quoted about as before on price, but it is difficult to perfect many sales above \$3, as city consumption is quite small, the inquiry from the upper end of the Island proving slow and careful. Fronts are in fair average demand, but the supply equal to the call, and no important change in value to be noted.

HARDWARE.—The market does not show much change. Nearly all dealers report a good full demand from regular sources and covering an ordinary assortment of supplies, with the indications favorable for a continuation of the movement, and the feeling generally quite cheerful. The stock offering is ample, but not excessive, and few sellers are inclined to press business. Values appear to be steady, and no immediate break looked for on any line of goods. The combination of manufacturers of Tubing has been perfected, and prices are up to discount 20 and 25 per cent. as to quantity. The makers of Planes have advanced their prices to discount 25 and 7 1/2 per cent. for first quality, and 30 and 7 1/2 per cent. for seconds, instead of 25 and 10, and 30 and 10 per cent., as formerly.

LATH.—A slight change has come over the character of the market, and the turn is in favor of the buyer. Following our last report, quite a number of sales were made at \$2 per M, but the stock thus handled appeared to meet the wants of the most anxious buyers, and the demand subsequently shaded off materially. In the meantime, offerings were keeping comparatively full, and holders desirous of realizing, found it necessary to give way in order to secure customers, with the final result bringing a decline, and sales reported at \$1.85, followed by rumors of a still lower figure accepted, but this is not confirmed. It may be added, however, that some receivers have not been anxious to sell or reduce their limit of valuation, and, rather than do so, have commenced piling out cargoes, with the hope of a better market as the season progresses.

LIME.—Matters remain just about the same on this market as for several weeks past. All the receivers report a good steady demand, with the supply finding sale about as rapidly as placed upon the market, and former rates obtained without difficulty. It, however, does not appear to be considered judicious, as yet, to advance the value, and no signs of immediate buoyancy are shown. Accounts from the points of supply are, in all cases, quite strong, and liberal shipments are not thought to be likely again this season.

LUMBER.—Business shows some irregularity, but in the aggregate proves very good, and to the majority of dealers, both wholesale and jobbing, the situa-

tion appears satisfactory. Local consumption is taking a good proportion of stock, and the shipping orders on home account afford an outlet for quite large amounts. The small dealers at near by points, finding purchases on this market the most advantageous, especially when a special selection is required, and which would be almost impossible to secure in the shape desired, at primary points. Export orders are somewhat variable, but it is thought will keep quite up to the average this fall. Supplies commence to show a fair accumulation in White Pine and Yellow Pine, but Hemlock and Spruce is not plenty or well assorted, and hardwoods of desirable character are very scarce. Advices from the primary points are, as a rule, strong, and the offerings are made only at extreme rates, while the cost of transportation tends upward in most means of communication either by water or rail.

Spruce shows some irregularity, and the selling interest does not retain quite so powerful a control on the market for the offerings they are making. The supply of logs at the mills continues scarce, and it is claimed that if every stick "hung up" could now be run, it would not greatly alter the chances of a light stock of lumber during the balance of the season, simply because the saw could not cut it before the close of navigation, which event at once shuts off most of the manufacturers. Notwithstanding this, however, a great deal of the present offering is somewhat difficult to place and draws only reduced and cautious bids. The trouble seems to be that when mill owners became convinced of the scarcity before them they nearly all devoted themselves to the getting out of choice stuff, and as this, for a time, was quite saleable, while prices gradually worked upward. The addition to cost, however, finally had the effect to induce much greater caution, and divert the attention of buyers toward cheaper substitutes, and now the demand has not only fallen away, but appears to be in such shape that a concession will be necessary to recover the attention of buyers. In the meantime, narrow and short stuff has really become quite scarce, and as dealers want considerable to fill out their assortments, it is not uncommon to hear bids and sales at relatively higher rates than on the better grades. The substitute used for spruce is mainly Virginia Pine, which can be reached at a saving to the buyer of \$1@2@3 per M., and the margin is wider still on poor lots. A large proportion of this class of goods, however, is taken only for immediate use, as unless handled with the greatest care it is likely to become sap-stained and otherwise undesirable. Sellers' views on Spruce remain at about \$18 00@20.00 for random, and \$19.00@22.00 for Special, according to cut.

White Pine commences to show a pretty full accumulation and additions are constant, but there is no loss of tone on the market. Indeed, on the contrary, as dealers see their stock nearing completion, they talk with corresponding increase of strength and place calculations at full limits. They are aided fairly by a very good general consumptive demand on local account; some call from out of town sources, and more or less call all the time from exporters, though some of the latter are quite uncertain in their movements. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do; \$15.50@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine retained a strong market for desirable supplies, and the demand, covering about all regular sources, is very good. Considerable stock is available here, but it is not of a character to attract attention, and the bulk of the business is on orders. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$16@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwoods of attractive character continue scarce here with light and uncertain offerings from primary sources, and prices rule very strong all around, but especially for Walnut, Oak, Cherry and Ash. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. culls, \$18@20 do. cherry, \$45@47 do.; white wood, 1/2 and 3/4 inch, \$25@27.50, and do. inch, \$33@35 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

At the yards there is signs of a good fair degree of animation with all classes of stock in favor, and the market retaining a generally firm tone. We note, however, some irregularity in the quotations of dealers, owing in part to the deliveries, etc.

From among the lumber charters recently reported we select the following:

An Am brig, 335 tons, from Wilmington to Rio Janeiro, deals, \$20; an Am schr, 296 tons, from Wilmington, N. C., to Pernambuco, deals, \$20; an Am schr, 472 tons, hence to Montevideo, general cargo 16c @ foot, and \$16 for lumber and primage; a Br barque, 560 tons, from Brunswick to Montevideo or Buenos Ayres, lumber, \$19 net, up-river ports \$3 extra; an Am schr, 377 tons, from Pascagoula to Trinidad, lumber, \$10; a Br barque, 448 tons, from Bridge-water, N. S., to the North Side of Cuba, lumber, \$7; an Am schr, 132 tons, from Annapolis, N. S., to New York, lumber, \$3 50; an Am schr, 165 tons, from Jacksonville to Bermuda, lumber, \$9; a schr, 122 tons, from Pascagoula to Corpus Christi (six trips), lumber, private terms; an Am schr, 250 tons, hence to Demerara and Trinidad, \$16, and back from Brunswick, lumber, \$7; a schr, from Portland to New York, lumber \$1 75; a schr, 284 tons, from St. Mary's to Boston, flooring boards, private terms; a schr, 273 tons, from Waterboro to Savannah, hay, \$5 per ton, and back to New York, hard pine, private terms; a schr, 350 M lumber, from Pensacola to Boston, \$9.25; a schr, 250 M

lumber, from Brunswick to Boston, \$7.50; a schr, 160 M lumber, from Brunswick to Boston, \$7.50; a schr, 220 M lumber, from Darien to Boston or Portland, \$7.50; a schr, 140 M lumber, from Jacksonville to Philadelphia, \$8.50, option of Elizabethport or Perth Amboy, \$8.75, free of wharfage; a schr, 325 M lumber, from Mobile to North of Hatteras, \$9; a schr, 200 M lumber, from Fernandina to Philadelphia, \$7.50; a schr, 300 M lumber, same voyage, \$7; a brig, 370 M and a schr, 380 M lumber, from Brunswick to Philadelphia, private terms.

Exports of lumber from the port of New York :

	This Week, feet.	Since Jan. 1, feet.
West Indies.....	323,482	23,892,682

Total.....	774,748	54,888,041

GENERAL LUMBER NOTES. STATE.

The Albany lumber market, for the week ending October 19, is reported by the *Argus* as follows:

We have not any change to report in quotations for Pine Lumber. The receipts continue slightly in excess of what was coming forward a year ago. The shipments from the District, river side and slips, have been large and promise to continue to the close of the season. The trade during the week has been very good, embracing all kinds of Lumber, but largely of common box. The majority of buyers and orders have been from the East.

Coarse Lumber is firm and unchanged in price. We have some few receipts from the water power, as well as from the steam saw mills. The unexecuted orders are still very large.

In Canada no falling off in prices is reported; the shipments are very free.

The shipments from Saginaw Valley from the week ending October 11th were 15,327,000 feet; the markets had been fairly active; shipments checked by low freights.

The receipts of lumber by lake at Buffalo for the week were 2,532,000 feet and 115 car loads with lower canal freights. At Oswego, 6,783,000 feet.

The receipts at Albany by canal from the opening of navigation to October 15th were :

Bds. & Setg. ft.	Shingles, M.	Timber, c. f.	Staves, D.
1879..	248,066,900	9,751	
1880..	311,684,500	4,784	5,400 698,200

Freights from Bay City to Buffalo and Tonawanda, \$2.50 per M. feet; from Saginaw, \$2.75. From Buffalo to Albany \$2.50; from Tonawanda to Albany, \$2.25 per M. feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 per M. feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$1.90. From Ottawa to Albany \$3.50 per M. feet.

River freights are without change.

THE WEST.

SAGINAW VALLEY.

Lumberman's Gazette, Office,

BAY CITY, Oct. 18, 1880.

The market is overrun with coarse grades of lumber and the demand is inactive. Good lumber is scarce and in demand, a number of sales having been reported at quotations. Among these are sales of 500,000 feet of lumber at \$7, \$14 and \$35 and another of 1,000,000 feet to eastern parties at \$7.50, \$15 and \$34. The rise in freights which occurred a little more than a week ago, has not been without its good results. A large fleet came in soon after the rise, and more were following, but the bad weather of last week detained them at Sand Beach and Port Huron. It will be observed that the shipments from this port, the past week, have been quite heavy, and much larger than the average for some time. If we can have a few weeks of favorable weather, the market will present a very active appearance.

From the weekly summary of the *Chicago Northwestern Lumberman*, we make the following extracts:

Canadian shipments have about ceased, the bulk of what is in shipping order have been forwarded. An Ottawa paper asserts that 47,000,000 feet sold to American parties will be wintered over at Chaudiere Falls.

At Quebec a fine lumber market is reported so far as regards price, but no sales are noted. A heavy local consumption is named with considerable demand. Pipe and spruce are wanted, especially the latter, which is scarce since the logs have, to a great extent, been stuck in the low stage of water of the small streams.

From Boston we have reports of undiminished firmness in prices, with a consumptive demand absorbing the arrivals. The prospect is favorable for a seasonable demand throughout the fall and winter. No speculative element is noticeable, and no accumulation of stock. The demand for Eastern stock is active, with considerable strength in spruce, which can be obtained only in limited quantities. Southern pine is firm, with a good feeling, and prospects of an advance in the not distant future.

Bangor, Maine, has a demand beyond her ability to supply until another season's stock comes in. Spruce is now bringing from \$3 to \$5 more than a year ago. The lack of water to bring down logs and to keep the mills running has been a serious drawback to the prosperity of the manufacturers of this State.

Philadelphia advices report hardly so active a demand, but prices remain unchanged.

Oswego has had an unusually good trade, and is for the third time this season lacking in the usual supply of desirable assortments. The receipts to Oct. 11, are 6,000,000 feet in excess of those to the same date last season. Prices are firm.

Toledo loses a little in the volume of demand as might well be expected from the intense heat of the political campaign in the so-called fall election.

Saginaw feels a lighter demand as the season advances, and while desirable stocks are quickly picked up at firm figures, common and coarse stocks are held at a little lower price. The sales of the past week have been light as compared with previous reports.

Cadillac, Mich., reports more orders than cars, leaving the shippers behind on their orders. The prospect of a large demand for bill and car-sill lots will cause the mills to run into, if not all, the coming winter.

Upon the Mississippi trade is good. We have reports from a number of the markets, all of which are buoyant.

St. Paul and Minneapolis are firm in prices, and short of cars. Winona has a demand at full list rates beyond the facilities for shipping. Duquene is loading all the cars that can be got, and manufacturers are refusing hills of special sizes and long lengths. Prices are firm and orders are accumulating. Clinton reports a large demand, firm prices and an acreage of one month in filling orders.

Burlington says "trade is good," and reports a receipt of stock as fast as it can be handled. Quotations are firm.

Looking at the market from all points, we discover no material change other than is naturally to be looked for in the midst of the excitement of a political campaign, except at Chicago, and her condition is as usual, an abnormal one, although we begin to think that the circumstances which hedge the trade of the greatest lumber market of the world are normal only when they are in a condition of disquiet.

The Hardwood report of the *Northwestern Lumberman* is as follows :

Trade has been more active than for the week which ended at the writing of our last report, and in some kinds prices have advanced. Box, in white-wood, is worth \$3 per thousand more; clear counter tops in black walnut are higher, and the better grades in hickory elm are quoted at an advance of \$5. The demand has swallowed up the receipts, and the same old story of inability to fill orders is heard in every direction. Our furniture factories are using an enormous amount of lumber just now; the box factories and cooper shops are busy, and the prediction that the general market will stiffen up still more is oftener heard than otherwise.

We learn from a visit to the furniture factories and stores that the demand for furniture of better material than walnut has not set in actively yet, but the indications are full of promise that Western tastes will in time follow those of the East. In New York, mahogany is all the rage. Mills are busy sawing it, and people who can afford mahogany furniture think it is the proper thing to have. In Grand Rapids, Mich., and Cincinnati; it is being manufactured for the trade, but we do not know of but one manufacturer here who is making it, and that for his retail trade only. In the East the furniture men were partly driven to its use owing to the difficulty in obtaining walnut. It had to be transported long distances, and heavy rates of freight followed it. They became convinced that they could not compete with the West in walnut wares, consequently they endeavored to create a demand for mahogany work—and succeeded. Somewhat similar conditions governed here. While walnut was abundant, mahogany was dearer than in New York. In the Western markets this state of things is gradually changing. Mahogany can now be laid down here for \$110, and as soon as more direct communications shall be established with Mexico, the price will be reduced from \$79 to \$90. At that rate it will not be long before the West will be able to obtain that wood at fair prices, and have the walnut into the bargain. Doubtless the time is not far away before the warehouses of the town "out West," as a New York trade journal recently termed Chicago, will show as liberal a display of furniture of foreign woods as New York, and at the same time have the upper stories filled with walnut goods which the Eastern market cannot so readily or cheaply obtain.

In Cleveland, the lots of hardwood offered are readily taken at current quotations. The market generally could not be firmer. A number of contracts that have been taken by Cleveland manufacturers will necessitate a considerable consumption of walnut, oak, elm, ash, birch and maple.

LUMBERMAN AND MANUFACTURER, MINNEAPOLIS, Minn., }

The hurry and bustle of the last month of the lumber manufacturing season is visible on every hand. The mills are all trying to make up for lost time and patch up broken or short stocks. The preparations for the woods add to the general confusion while the demand for lumber is such that every one is kept busy delivering. Taken altogether we have never seen such a rush and push as is going on now among the fraternity. There is very little dry lumber in the whole West, nearly all the shipments are only half seasoned and many sorts is sent fresh from the saws.

Stocks along the Mississippi are rather diminishing than increasing, and are not so large as they were a year ago, and will be wholly inadequate to maintain any such trade as we have had for the last three months until next June even with all the sawing which can be done by the railroad mills during the winter. The demand for lumber from the Southwest is growing. We note one shipment of 500,000 feet of

uppers from Ashland (away up on Lake Superior), to Kansas direct by car, a thing which would have been regarded as impossible one year ago.

At Chicago there has been considerable lumber received, but such has been the demand that the prices on all durable stock, especially uppers, has been fully maintained, and piece stuff, common grades only, has been shaded 12½ cents. The figures of stocks on hand at Chicago, printed elsewhere, however, will afford all a chance for study, but ought not to occasion any uneasiness among outsiders as yet, for should the trade hold up all the surplus there will be needed.

St. Louis is selling over a million feet per day, but cannot get cars enough to fill orders.

Minneapolis can do no more business than she is doing in lumber, until she can get more cars.

The Lumberman's Board of Trade met at Secretary Sturtevant's office last evening, and discussed the proposed rise in lumber. Nothing definite was done, but it is expected common lumber and flooring will be increased in price \$1 per 1,000 feet within two weeks.

THE EAST.

The *Boston Commercial Bulletin* as follows:

There has been a continued good feeling in Western lumber, and the commission men report a satisfactory business. Prices are gradually stiffening, and figures that would buy a few weeks ago are refused to day. For an extended review of the market for Western lumber we refer our readers to an article in another column, which treats especially of the strength of Hardwoods. The market for Eastern lumber remains firm, the dry weather continuing to exert a hush influence. As long as the streams are low, lumber will be scarce. There is a noticeable lack of lumber vessels at our wharves, compared with the same time last year. The demand is now more equalized, as the dealers are laying in their winter stocks.

THE PROVINCES.

The *Montreal Journal of Commerce* says :

There being the same duty (\$2 per M feet) going to the States, on Culls worth \$5 to \$8 M feet, as on choice lumber worth \$26 to 35 per M feet, being nearly 40 per cent. on cull lumber and only 5 to 10 per cent. on upper qualities, operates as a great drawback to our manufacturers. Probably half of the stock is sold at or under cost, and the balance proportionately dearer to compensate. Local trade not very large owing to the very small amount of new buildings being erected this season. Coming toward the close of navigation, there is a great stir moving lumber, principally deals, for the Quebec market. Barges are in great request. Freight to Quebec from Ottawa advanced to \$2.50 per M feet; freight to Montreal, \$1.15. Cull pine lumber is plentiful enough, but clear and upper qualities are very scarce and high. In American market, Michigan, upper quality, is worth \$15 to \$17 per M more than it sold for last year. Cull lumber seems to be accumulating here. The demand from Europe for manufactured lumber in the shape of sash, doors, blinds, &c., is on the increase, and has already reached unprecedented proportions.

The *Montreal Herald* has the following on lumbering in New Brunswick.

The lumber business on the St. Croix River is suffering greatly for the want of water, and if they don't have rain soon the mills will be stopped, which will be a serious matter, as most, if not all, the concerns on the river have orders for all the lumber they can manufacture from now till the 1st of December. On the upper St. John waters, operations in cutting lumber will be largely increased this winter. The demand for lumber is much improved, and operators feel encouraged to proceed. Where last year one individual cut 20,000,000 feet of logs, this year five or six operators will cut from 5,000,000 to 10,000,000 feet each. They will pay \$5 more per month for labor than they did last year.

The *Montreal Gazette* as follows:

QUEBEC, October 15.

The sale of timber limits by the Government of Quebec to-day, at the new Parliament buildings, was a great success. All the lots offered, except a few in the Lower St. Lawrence, were sold at an advance on the upset price, and there was a brisk competition for the herths on the Upper Ottawa Block A.

The *Toronto Monetary Times*, as follows:

It is a matter of decided interest that the sawn lumber trade of Canada continues to show so much activity. An improved tone is noticeable this season over the whole market; mills have been working night and day, and the demand from the States has been, and still is, brisk. Exports of the article are greatly in excess of the last four years, as the following figures, giving the money value of the shipments of sawn lumber from Ottawa, for five months of three successive years, show:

	1878.	1879.	1880.
May.....	\$128,820	\$121,333	\$283,721
June.....	120,471	149,733	276,022
July.....	158,661	164,571	251,841
August.....	167,114	180,488	258,735
September.....	115,605	197,086	216,927
Total.....	\$686,671	\$813,211	\$1,317,247

The increase of shipping visiting Montreal this season, up to 1st inst., is equal to 22.4 per cent. in the number of vessels, steam and sail, and 34.8 per cent. in total tonnage over last year, same period. The figures indicate, besides, that vessels are of a larger size this year than last. The number and tonnage of sea-going vessels that arrived in Montreal harbor,

from the opening of navigation to the 1st October in the following years:

	No. of Vessels.	Total Tonnage.
1877.....	365	268,367
1878.....	402	312,021
1879.....	465	384,649
1880.....	569	518,564

METALS.—COPPER.—Ingot moves slowly and only in small lots, as wanted by the home trade, and while the general stock remains under very good control, sellers are compelled to shade somewhat, in order to realize. We quote at 18 $\frac{3}{4}$ @18 $\frac{7}{8}$ c. for Lake. Manufactured Copper not quite so active, but the movement, on the whole, fair, and values steadily maintained. We quote as follows: Brazier's Copper ordinary size over 16 oz per square foot, 28c. per lb; do do do, 16 oz and over 12 oz per square foot, 30c per lb; do do, 10 and 12 oz, per sq foot, 32c per lb; do do, lighter than 10 oz per sq foot, 34c per lb; circles less than 84 inches in diameter, 31c per lb; do 84 inches in diameter and over, 34c per lb; segment and pattern sheets, 31c per lb; locomotive fire box sheets, 28c per lb; Sheathing Copper, over 12 oz per sq foot, 26c per lb and Bolt Copper, 28c per lb. **IRON**—Scotch Pig has not sold much lower since our last report, and, with the pressure of supplies somewhat reduced, the general market appears to have a trifle better tone. Holders, however, are as a rule, willing to listen to all really full bids. We quote at \$20.50@23.50 per ton, according to brand, delivery and quantity. For American Pig the market has been dull. Occasionally, a fairish sort of trade takes place, but there is no animation whatever to the general movement, and even a further shading on cost fails to attract buyers into handling more stock than required for immediate consumption. The production has not abated to any extent, and supplies are accumulating at primary points. We quote at \$24@25 per ton for No. 1; \$20@22 do for No. 2; and 18@20 for forge. Rails show about the same features. Steel have a good demand, and rule quite firm in price, but Iron slow of sale, and, with competition from foreign made, have favored buyers. We quote at \$40@43 for iron and \$58@63 for steel, according to delivery. Old Rails \$26@27.00 per ton; scrap \$25@26. Manufactured Iron without much inquiry beyond the ordinary trade wants, and the tone of the market slack, though holders are asking pretty much former prices on the leading grades of stock. We quote Common Merchant Bar, ordinary sizes at 23@24c. from store, and Refined at 25@26c.; wrought beams at 3 $\frac{1}{2}$ c. Fish plates quoted at 24@24 $\frac{1}{2}$ c.; track bolt and nuts, 3 $\frac{1}{2}$ @3 $\frac{3}{4}$ c.; railway spikes, 3 $\frac{1}{4}$ c.; tank, 3@3.1c.; angle, 3c.; best flange, 6c.; and domestic sheet on the basis of 3 $\frac{1}{2}$ c. for common Nos. 10@16. Other descriptions at corresponding prices, with 1-10c. less on large lots from cars. **LEAD**—Domestic Pig has continued to sell only in small lots, as required by consumers for early necessity, and did not show much strength on prices, though on the general range about former figures are retained. We quote 4 $\frac{1}{4}$ @4 $\frac{1}{2}$ c. The manufactures of lead are steady and quoted: Bar, 6c; Pipe, 6 $\frac{1}{2}$ c., and Sheet, 7c., less the usual discount to the trade; and Tin lined pipe 15c. Block Tin pipe, 40c., on same terms. **TIN**—Pig has been held with confidence and offered carefully, on the stimulus of the favorable accounts from abroad, but the demand did not take very full proportions, and was based principally upon immediate wants of buyers. We quote 19 $\frac{1}{4}$ @19 $\frac{1}{2}$ c. for Australian. 19 $\frac{3}{4}$ @20c. for Straits, 19 $\frac{1}{2}$ @19 $\frac{3}{4}$ c. for English Refined, 19 $\frac{1}{4}$ @19 $\frac{3}{4}$ c. for do. Common. Tin Plates have had an irregular market, but on the whole, the undertone was weak in the absence of demand outside of jobbing calls. We quote I. C. Charcoal, third cross assortment, \$6.00@6.12 $\frac{1}{2}$ for Allaway grade, and \$6.25 for Melyn grade; I. C. Coke \$4.87 $\frac{1}{2}$ @5.00 for B. V. grade; \$5.12 $\frac{1}{2}$ @5.25 for Yspitty grade; Charcoal terne \$5.25@5.50 for Allaway grade, 11x20; \$11@11.12 $\frac{1}{2}$ for do., 20x28; Coke terne, \$1.80@4.87 $\frac{1}{2}$ for Glais grade, 14x20, and \$10@10.12 $\frac{1}{2}$ for do., 20x28—all in round lots. Spelter met with a light demand from regular sources, and ruled about steady at 5@5 $\frac{1}{4}$ c. Sheet Zinc finds an average trade demand, and remains steady at about 7 $\frac{1}{4}$ @7 $\frac{1}{2}$, according to quantity.

NAILS.—The general control of the supply in first hands continues very good, and owners are offering with moderation, while their limit of valuation is preserved well up to former limits, the list rate remaining unchanged. The "cutting" on prices through outside lots, however, is greater than for sometime and as low as \$2.90@3 per keg is mentioned for some sales.

We quote nominally 10d to 60d common fence and sheathing, per keg, \$3.15@3.25; 8d and 9d, common do, per keg, \$3.40@3.50; 6d and 7d, common, do per keg, \$3.65@3.75; 4d and 5d, common, do per keg, \$3.90@4.00; 3d and 4d, light, per keg, \$4.65@4.75; 3d, fine, per keg, \$5.40@5.50; 2d, per keg, \$5.4@5.50.

Cut spikes, all sizes, \$3.40@3.50. Floor casing and box, \$3.90@4.65. Finishing, \$4.15@4.90.

CLINCH NAILS.

1 $\frac{1}{2}$ inch, \$5.65@5.80; 1 $\frac{3}{4}$ inch, \$5.40@5.50; 2 inch, \$5.15@5.30; 2 $\frac{1}{2}$ @2 $\frac{3}{4}$ inch, \$4.90@5.00; 3 inch and longer, \$4.65@4.75.

PAINTS AND OILS.—There is a seasonable movement in Paints, but no very liberal business doing, or much of an unusual character to advise on the general market. Supplies and assortments are quite equal to the requirements of the situation in pretty much all cases, without reaching an uncomfortable surplus, and on prices a steady tone appears to be

preserved on most styles. Leads have shown some irregularity in sympathy with the fluctuations on the value of their base, but the lists rates have not been changed. Linseed Oil has been in very good, general trade demand, and, while showing no decided buoyancy, the tone appears to be firmer, and crushers will not contract for future delivery, except at an advance. We quote at 57@61 per gallon from crusher's hands.

PITCH.—Business shows about the usual volume and form, and there is nothing of unusual interest on the market. Supplies fair, and holders willing to accept about former rates. We quote at \$1.90@2.00 per bbl., for City delivered.

SPIRITS TURPENTINE.—The jobbing movement has been small, the extreme cost tending to induce great caution among consumers. In a wholesale way, there has been more doing partly for export, and higher prices reached, but finally the figures went so high as to check demand and draw out supplies, causing a reaction, and an unsettled feeling. As this report is closed, the quotations stand at about 45@46c. per gallon, according to the quantity of stock handled.

TAR.—A fair trade has been done in jobbing parcels, and at comparatively full rates, the call coming in the main from regular sources. The wholesale market somewhat unsettled, but a limited supply keeps the control of the situation mostly in the hands of sellers. We quote \$3@3.25 for Newberne and Washington, and \$3@3.37 $\frac{1}{2}$ for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for Quit Claim deed i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranty.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

MORTGAGES.

NOTE.—The arrangement of this list is as follows:
The first name is that of the mortgagor, the next that of
the mortgagee. The description of the property then
follows, then the date of the mortgage, the time for
which it was given, and the amount. The general dates
used as headings are the dates when the mortgage was
handed into the Register's office to be recorded.

Wherever the letters "P. M." occur, preceded by the
name of a street in these lists of mortgages, they mean
that it is a Purchase Money Mortgage, and for fuller
particulars see the list of transfers under the corres-
ponding date

REAL ESTATE.

NEW YORK CITY.

DIRECTORY OF

RELIABLE REAL ESTATE AGENTS.

We have carefully investigated the responsibility of all Real Estate Agents named in this Directory, and find them to be in every way competent and responsible. We therefore recommend them to capitalists and real estate operators generally as being the best agents to be secured in their respective section, as shown by letters from prominent business firms, which may be seen at the office of the REAL ESTATE RECORD.

FIRE-PLACE HEATERS.

We invite the careful consideration of Owners, Architects and Builders to our new apparatus for warming and ventilating dwellings with

AN OPEN FIRE.

Burns equally well, hard or soft coal or wood. Heats also upper rooms, and is unequalled in especial adaptation to FLATS or suites on one floor.

OPEN STOVE VENTILATING CO.,
78 Beekman St., New York.

John F. Carr,
MAHOGANY, HARD WOOD, PINE

California Red Wood Lumber.

543 to 557 West 23d Street,
Bet. 10th and 11th Aves. NEW YORK

IMPROVED

DUMB WAITER,

CANNON'S PATENT.

Remains Stationary at any point, empty or loaded, without being fastened.

ADAPTED FOR

Flats, Tenement Houses, Restaurants, Private Houses, Light Work in Factories, and for Invalid Waiters.

Illustrated Catalogue, with full particulars, upon application to

BUTLER & HUNTING,

SOLE AGENTS,

53 Dey Street, New York.

REAL ESTATE RECORD

AND BUILDERS' GUIDE.

VOL. XXVI.

NEW YORK, SATURDAY, OCTOBER 30, 1880.

No. 659

Published Weekly by

The Real Estate Record Association.

TERMS.

ONE YEAR, in advance....\$10.00.

Communications should be addressed to

C. W. SWEET.

No. 137 BROADWAY

TO OUR BANK PRESIDENTS.

You are, almost every hour of the day, visited by capitalists anxious to obtain your views as to good investments. In every instance your advice is to purchase railroad securities and other commodities, which abound in and around Wall street. In nine cases out of ten your advice is followed, but in how many cases are your ideas cursed with all the expletives that the Anglo-Saxon language patronizes?

If you will be good enough to place a copy of THE REAL ESTATE RECORD, subscription price ten dollars, payable in advance (even by bank presidents), on your desks and study its contents from week to week, you will not only be better citizens of this enterprising metropolis, but you will guide men of inferior intelligence into the proper channels of investment.

There is nothing in this entire market so cheap at present prices as real estate. Why don't you tell your customers to buy it? Show them the pages of THE REAL ESTATE RECORD open on your desk, and you can tell them where and what to purchase. Whatever you now offer them in the shape of securities has gone up at a terrific rate during the past twelve-month, while real estate has not.

You now tell your customers that you do not know anything about real estate, that you do not even own the building in which you transact your business; that you cannot loan on real estate—but are these valid reasons why you should not inform your customers, that, for purposes of investment, real estate in New York City and suburbs is the very cheapest of all commodities, that it has not risen with the tide of prosperity as yet, and that the time is now very near at hand when a judicious investment in real property, instead of fancy property, will give pecuniary returns far more satisfactory and productive of less worry, more sleep and better digestion than any of the Wall street articles you now offer them.

Show them THE REAL ESTATE RECORD, and your own consciences as well as your customers' pockets will be highly benefited.

It really takes one's breath away to read the statistics as they reach us from time to time from the Census Bureau. Here is our

good sister City of Brooklyn, which only a few years ago used to be called New York's bedroom, with a population of 566,689, and the entire State of Rhode Island with only 276,530 inhabitants.

Further comment is unnecessary. Great is Brooklyn, but how much greater the Empire State of New York, of which it after all only forms an integral part. Who, after all, can predict at this rate of growth, the future grandeur of our own unparalleled State, with its financial power, its increasing trade, its unrivalled commerce and its indomitable enterprise?

It strikes us that even the veriest Hoosier of the great West feels his heart swell with pride when contemplating the picture presented by this State of States.

THE SELECTION OF THE SITE.

To-day, or on Monday, the Committee on Sites, appointed by the temporary Board of Officers of the World's Fair, will discuss, in the presence of several interested parties, the merits of the various sites visited by them during the past few weeks. We purposely make this public announcement, as the Committee themselves have as yet failed to do so.

It is important, even at these initiatory proceedings, that not only owners of real estate, but also the railroad magnates and leading hotel-keepers should be consulted. No World's Fair can be a financial success unless a combination of interest presents itself to the minds of those who will profit by the increased amount of travel and the large influx of strangers in our midst.

The representatives of the various trunk lines, as well as the managers of the city and suburban rapid transit and surface roads, and the proprietors of the leading hotels and places of amusements, should all be consulted, as the views of such men, in regard to the practicability of moving and accommodating large bodies of visitors, are worth listening to before the subscription books are opened on Nov. 10.

As to the real estate interest, we should like to see invitations extended to the Astors, the Rhinelanders, the Lorillards, Hamilton Fish and the like, all representing vast estates that have no particular axes to grind, or special localities to favor, and yet whose ideas, in regard to the general advantages derived from the selection of any special site, will be of infinite value and guidance to the Committee.

Of course, it is well understood that any decision arrived at for the present must be ratified by the permanent Commission when organized after the closing of the subscription books; nevertheless, all precedents in such matters teach us that the action of

those who have been temporarily engaged in the preliminary work is generally approved by those who come in at the last moment, when time, which moves quickly, does not permit any further delays.

POINTS ABOUT THE STOCK MARKET.

Knowing ones say that Jay Gould has fixed things with the Indian tribes in the Indian Territory. The Creeks, Cherokees and other semi-civilized tribes have, it is hinted, agreed to withdraw all opposition to the opening of the Territory. The large allotments of land now held by the tribes would, in that event, become marketable; and the Indians would become enriched. It should be remembered that these partly civilized Indians are controlled mainly by the half-breeds; and these latter appreciate the advantages of wealth. The railroad companies have, it is said, come to an understanding with the Indian leaders, and the Territory will soon be thrown open. Hence there is a great deal of quiet buying of M., K. & T. and St. Louis & San Francisco.

A deal is on foot in Central Pacific. These were marketed a year ago at 85, and are now selling under 75. They pay six per cent., that is, eight per cent. on the present price.

Central Iowa is on the cards for a big advance. So is C., C. & I. C., as the decision of the Supreme Court will soon be rendered, in which will be affirmed the liability of the Pennsylvania road for these bonds.

Green Mountain mining stock, to which we have often referred as a good property, has made a large advance during the past week, and may go much higher.

Ontario & Western, it is claimed, is about to have that long promised deal. People are afraid of this stock, because of deceptive points given out from time to time, but Woerishoffer, Traske & Francis, Sam. Tilden and several other large concerns are said to be large holders of this stock, at pretty high figures.

While it is gratifying to note the avidity with which investors took up our city bonds, it should be remembered that half the money came from Europe. As the bonds are exempt from local taxation, they are a good security to have in the house. But governments are better, as they are exempt from all taxation. The local taxation makes a difference of nearly one per cent. on the face value of the bonds.

The rise in Chicago & Alton was not unexpected. The road runs through a profitable country, and its local business is unaffected by railway wars. The present stock, it is supposed, will some time be worth 200.

The cheapness of money, it is now settled, is due to large transfers of European capital to New York City. Judging from the im-

ports and exports, we ought to be exporting gold, but the fact that we are importing it shows that money is coming here for investment, not only in our securities, but in new railway enterprises.

All far seeing capitalists agree that real estate must soon have its turn, and that soon the people who make money in stocks will want something solid in which to put their profits, and will pitch into real estate in a lively way.

Something is up in Chesapeake & Ohio. It is now settled that the road is to be extended from Richmond to Newport News, while the continuation west to Louisville will soon be completed. The operators who control this property have extensive connections; and the Chesapeake & Ohio may be the Atlantic terminus of a great trans-continental line extending to the Pacific. A connection could be made between the two oceans, and for the whole distance cars could be run the year round without any danger of snow storms. The stock will bear watching.

The movement in Ohio Central is due to the near completion of the road into Toledo. It will be a fine local and coal road, and people who know think the income bonds are a good purchase, as the first mortgage bonds amount to only \$600,000.

Look out for New Jersey Central. The decision of Judge McKennan recognizing the right of the Baltimore & Ohio road to use the track of the Philadelphia & Wilmington and the Pennsylvania Central, in going through Philadelphia, means that the Baltimore & Ohio system of roads is to have a New York terminus, and that that connection is to be with New Jersey Central. As in the olden time all roads led to Rome, so, to-day, all the trunk lines of the country are eager to pay tribute to the American metropolis.

A movement is on foot in Pittsburg, Titusville and Buffalo. The road is to be extended to Brocton, forty-nine miles from Buffalo. In some way it is to connect finally with the Ontario & Western, and then the whole line is to be consolidated with the Baltimore & Ohio. Connections are also to be built to form an opposition from Buffalo to Chicago. This will finally give the Baltimore & Ohio two roads to New York; one from Buffalo East, using the Ontario & Western; the other, through Philadelphia, using the New Jersey Central.

FACTS ABOUT OUR WHEAT EXPORTS.

The *Commercial Bulletin* publishes the following comparison between the imports of wheat and flour into the United Kingdom—from Russia and the United States respectively—for the last twelve years:

	From Russia. Cwts.	From U. States. Cwts.
1868.....	10,050,000	6,750,000
1869.....	9,180,000	15,320,000
1870.....	10,320,000	15,050,000
1871.....	15,630,000	15,620,000
1872.....	17,940,000	9,630,000
1873.....	9,190,000	21,770,000
1874.....	6,850,000	27,200,000
1875.....	10,150,000	26,370,000
1876.....	8,910,000	22,220,000
1877.....	11,000,000	23,590,000
1878.....	9,150,000	33,590,000
1879.....	7,970,000	44,540,000

These figures tell their own story of the inability of Russia to compete against the United States. True, it has held its own. The importation into Great Britain shows but little falling off, but it will be seen that while the Russian imports have stood still, the United States has increased in the twelve years 21,450,000 cwts. or 174 per cent. Western Europe requires more grain every year. It is the United States, and not Russia or any other country, which is to be relied on to furnish the increased supply.

In the same paper is an estimate of the amount of wheat which will be required this year in Europe. It is as follows:

	Bushels.	Bushels.
Unit Kingdom.....	104,000,000	Holland..... 6,000,000
France.....	25,000,000	Switzerland... 3,000,000
Germany.....	12,000,000	Portugal..... 3,000,000
Belgium.....	13,000,000	
To all.....	166,000,000	

To meet this demand the United States will have on hand a large surplus after feeding its own population. Our crop this year will be over five hundred million bushels. Making allowance for the wants of our population, for seed and for fifteen million of bushels, which may be required for the West Indies and Brazil, it will leave for Europe 192,300,000 bushels.

Now, then, as to the countries exporting wheat. On that the following table is given:

	Bushels.
United States.....	192,300,000
Canada.....	8,000,000
Turkey and Black Sea.....	16,000,000
Russia.....	15,000,000
Austria and Hungary.....	10,000,000
Egypt and Syria, etc.....	10,000,000
Algeria.....	1,000,000
Spain.....	2,500,000
Chili.....	3,000,000
River Plate.....	1,000,000
Italy.....	5,000,000
India.....	4,000,000
Australia.....	10,000,000

Total for export.....	277,800,000
Deduct above wants.....	166,000,000
World's surplus over export wants.....	111,800,000

If these figures are anywhere near correct, it will leave the world with a large surplus of wheat at the end of the food year, and reasoning from that fact, breadstuffs must be cheap until the next crop matures. Our farmers will get fair prices, but they must expect to sell for lower rates than were obtained last year. It is true a foreign war may spring up, which would lead to considerable activity in breadstuffs, but still the surplus of food is so large that the production during the coming year will certainly be at low rates, for cheap food is the basis of cheap manufacturing the world over.

Property owners who have claims to go before the new Assessment Committee should remember that their claims must be filed with the Comptroller, and duplicates with the Corporation Counsel on or before Monday next, November 1st.

It should be borne in mind that where one-half of the entire amount of assessment has already been paid in, thus showing a willingness of the majority of owners assessed to pay the amount levied, the case will not be reopened by the commission, they acting upon the principle that such case has virtually "lapsed."

Where, however, one-half of any particular assessment has not been paid by the majority of owners, and the claimant belongs to a minority who have paid, then there exists a chance to get the erroneous payments returned, by petitioning the commission as above indicated.

THE DECLINE OF OUR SHIPPING INTERESTS.

Surely the journals of New York are not doing their patrons justice in not dwelling more frequently on the disgraceful fact that our shipping interest is declining, while our exports and imports are steadily increasing. In other words, while we are constantly adding to our shipments of cotton, grain, provisions, petroleum, and at the same time are consuming unprecedentedly large invoices of foreign goods, it is the foreign and not the American who makes the profit out of the commerce in our exports and imports. This is the way the *Financial Chronicle* states the matter:

Between 1864 and 1879, American tonnage entered at our seaports from foreign countries increased 28 per cent.; foreign tonnage increased 200 per cent.; of steam vessels from foreign ports, 153,200 tons were American in 1864, 836,400 in 1870, and 1,118,400 in 1879; foreign steam tonnage thus arriving was 729,700 in 1864, 1,680,700 in 1870, and 5,363,000 in 1879. Of about five millions aggregate tonnage entering from foreign countries in 1860, two-thirds was American; in 1863, the aggregate itself having materially diminished, 42 per cent. was American; in 1870, of 6,270,000 tonnage, 39 per cent. was American; in 1875, of 9,143,000, less than 32 per cent. was American; and in 1879, of 13,768,000, the aggregate having nearly tripled since 1860, the American was 22 per cent. The descent has been 66, 42, 39, 32, 22. The aggregate tonnage entering in the foreign trade has increased 160 per cent. since 1860, but the absolute American tonnage so entering has actually declined. In 1830, American vessels carried 90 per cent. of our combined imports and exports; now they carry about 25. They now carry little more value in imports than they carried in 1850, and a smaller value in exports than they did in 1860. The entrances and clearances for 1878 and 1879 in the foreign trade of this country compare as follows:

ENTRANCES.					
	American No. Tonnage.	Total No. Tonnage.		P. Ct	Amer
1878..	10,208 3,611,853	31,553 15,808,196		32.40	23.05
1879..	9,093 3,350,553	33,394 17,300,000		27.30	19.37
CLEARANCES.					
1878..	10,267 3,701,913	31,532 15,795,772		32.58	23.58
1879..	8,909 3,354,439	32,812 17,093,707		27.16	19.62

It would be impossible to add force and vividness to this comparison. Although, as everybody knows, our foreign commerce is greatly increasing and is now at a heavier rate than was ever known before, our carrying trade gets no growth out of it. The changes, in the ratios, to be sure, might show only that the foreign share grows more rapidly than the American. This is true; but while the foreign share grows upward the American grows downward, for the American carrying business dwindles not only relatively but in absolute amount.

Yet, strange to say, the press of this city and State energetically oppose any attempt to revive our commercial supremacy. At the Boston Shipping Convention it was decided that Congress was to blame for the decadence of our commerce. In the resolutions passed, three forms of relief were proposed:

1st. The removal of sundry statutory hindrances which now cripple our commerce.

2d. The remission of certain forms of taxation, which now prevent the building and sailing of American vessels under our flag.

3d. Bounties and subsidies in the form of mail contracts. There are no lines of ocean steamships which are not thus assisted by

their several governments. Our shippers do not even ask of Congress the right to buy where vessels can be built cheapest. All they demand is, that our government shall do as other governments do, so as to give American shippers and merchants an even chance with their foreign rivals. It is deplorable to bear in mind the fact that during the present heated Presidential canvass this supreme question of the growth and prosperity of our commerce has scarcely been alluded to. We are without ships—our navy is a myth; and yet we feed and clothe the world with our productions.

HOW TO MAKE MONEY IN STOCKS.

Joaquin Miller has contributed a graphic and amusing sketch to the *Overland Monthly* touching his experiences in Wall street. We give some extracts from this article elsewhere. It will be seen that Mr. Miller expresses the same opinion of Jay Gould that THE REAL ESTATE RECORD did a few weeks since. We happen to know that Mr. Miller's recital of his personal experiences is not all romance. He did sell St. Paul "short" at 69, and he did go "long" of Pacific Mail at 45. He was well known in certain leading brokers' offices, and he showed intelligence in his judgment of the market, yet he acknowledges that he was "cleaned out." Everybody really tried to help him. He got the best information at the command of experts on the Stock Exchange—men like Gould, Sage, Keene and the other leaders were his advisers, yet he lost his money. Nor do we believe that any of his counsellors intentionally deceived him. The truth is that any outsider who expects to make a living by standing over the tape is pretty sure to have his labor for his pains, and finally to lose his money. There are certain times when an outsider can venture to take a "flyer" in the stock market. Whenever a panic rages, whoever has ready money and pluck can go to Wall street, buy good dividend paying securities at less than their real value, and he can then hold them until the inevitable reaction takes place. But these panics occur only once or twice a year, and what troubles the outsider is, to know when hard-pan is reached. That, no "fellow can find out." The operator is not safe unless he can buy stocks outright and put them away in his safe. The people who jumped in early in the fall of 1879 all made money. It was one of those exceptional periods which do not occur more than once in a century. Of course, the danger always is in holding on too long. Although 1879 was the "boom" year, yet the 21st of November cleaned out many a shrewd, but overbold operator. There are quite a number of old fashioned capitalists who never speculate except when a break occurs. Then they always buy. They never hold when prices are high, but sell out before the highest figures are reached. They keep themselves informed of the value and business of the securities they hold, and when the stock sells for a figure which will not bring in more than six per cent. they sell; if it falls to a figure which would net them eight or nine

per cent. they buy. There is probably no speculative business on earth safer than in dealing in securities in this conservative way. But every one who ventures on margins, no matter how well protected, will find that once or twice in a year their brokers will not carry them through. They must sacrifice.

Mr. Joaquin Miller somewhat overstates the number of brokers in the street, but he does not overstate the danger of dabbling in stocks. It is no business for a literary man. Quite a number of such have found their way into the street, and although they are acute, clear headed people, whose theories are plausible, if not sound, yet their literary education makes them excitable and apprehensive, and they are apt to see too many sides of a given question. The result is indecision and a lack of nerve, which results in their selling when they should hold on, and buying when stocks are too high. The people who make money in Wall street are those who are inside of the great corporations and those who loan money. The class which can make money tight or easy is the one which can best forecast the market. In the one case stocks generally go down; in the other they generally go up. The great dealers act on special information, and yet, in the long run, how few of them succeed in retaining their wealth? It is the holders and owners of the roads, like Vanderbilt and Gould, who pocket the profits finally. The mere speculator is sure to come to grief, sooner or later.

ABOUT MINES.

NEWS FROM THE BODIE DISTRICT.

All the news from the Bodie, except from the famous Standard mine, is discouraging. Stocks are selling for a song. Money is difficult to procure, and many of the mines will be closed down during the winter. It is reported that only four mines have got their supplies in for the winter—the Standard, Bodie-Mono, Bechtel, Noonday, and perhaps Tioga. A better day is coming for Bodie, however. A new road is to be built from Bodie to the Sierras. The money has just been subscribed in this city—\$500,000—and the necessary contracts given out to build a narrow gauge road of forty miles. The object is to supply the Bodie camp with wood and timber. Wood now costs \$14 a cord. When the railroad is built there will be an abundant supply at \$10 a cord. Lumber now costs, in freight alone, \$25 a thousand. The new road will charge only \$11 a thousand. This road will run south and west from Bodie, on the north side of Mono lake, and will finally strike the Sierras not far from Mammoth. This camp is at the entrance of a pass which leads to the famous Yosemite Valley, through which, some time or other, a railway must be constructed to San Francisco. But Bodie is in luck in another direction. It now has to haul its freight one hundred and twenty miles from Carson City. Every pound brought to the camp averages 3 cents for freight alone. But the Carson City and Candalaria road will bring Bodie within forty miles of a railroad instead of one hundred and twenty, as now. A road is now being constructed from Bodie to the head of Walker lake, and by next summer freights to Bodie ought to be reduced one half. The camp already has an abundant supply of water. By next fall the narrow gauge road will have been built, and timber and freight will be so far reduced in price that much of the low grade ore of Bodie can be utilized. Up to the pres-

ent time nothing less than \$20 a ton rock would pay to work. The camp is full of ore running from \$8 to \$18, and by this time next year there will not be half enough mills in Bodie to run this medium grade rock. People who know which stocks to buy, and can afford to wait a year, will make a good deal of money in Bodie mines. Leo A. Snowden, Wm. Irwin and the Cook Brothers are interested in the new railroad from Bodie.

THE BULL DOMINGO.

Insiders give good reports about this now famous mine. It will be remembered it was spoken well of by Mr. White, of the *Tribune*, and it is held by very strong parties. A number of people connected with the New York Central Railroad are among the stockholders, and the President is Ex-Senator Barnum, who is a shrewd and capable business man, and who believes in the property. The claim is made that the mine is now earning \$60,000 per month, net, and it is further asserted that when certain new smelters at Silver Cliff are secured, that the product can be increased to \$80,000 per month, net. There is a promise, also, that 25 cents a month dividends will begin to be paid next January. The recent developments in the mine are said to increase its value largely. The character of the deposit is somewhat like the famous base metal mines at Eureka. Still, the stock, when it is sold, shows signs of weakness. Some went recently as low as \$5. There are 200,000 shares, and it was marketed at \$7.50 and \$10 a share. The critics of the mine say, that while there is a great deal of ore, it is of low grade, and that the actual working of the jigs has made it manifest that there must be an increase in the capacity of their concentrating works before dividends are paid at all.

BECHTEL.

The Bodie Tunnel has reached the shaft of the Bechtel, some 460 feet below the surface. It is claimed that this mine has a great deal of good ore, running from \$25 to \$40. It has formed a connection with the Tioga, and through the Tioga with the Syndicate. In these three mines there is a very large quantity of medium and low grade ores, and whenever it will pay to work these the stocks will go up, and bullion will flow from out of the Bodie camp. It is on the tapis to erect a new mill at the mouth of the Bodie Tunnel, for the joint use of the Bechtel and the Tunnel people, as well as for the other mines which will work through the tunnel. From the way the Tunnel stock has been worked on this market, we have regarded it as a "cat" of the worst description. It has been sold at ridiculous figures here East. It does not stand high in the Bodie camp.

NEW MINING REGIONS.

With the completion of the road to Candalaria, from Carson City, a very important mineral region will be opened up to the world. The country is full of silver mines. Metals abound, and there are also immense deposits of salt and sulphur. It will not be long before the mining region in the neighborhood of the Northern Belle mine will be famous throughout the country. Another prosperous region, that is, prospectively, is New Mexico. Placer mines, fissure mines and mines of gems are to be found in this region. In fact, Northern Mexico, Southern Arizona and New Mexico will eventually be regarded as the greatest mineral region on earth. We have not yet scratched the surface, and the time is not far distant when dozens of districts, as prosperous and profitable as was Comstock in its palmy days, will be opened up not far from the line of the new Pacific road.

THE COMSTOCK.

All the news from this famous lode is discouraging. The 2,500-foot level in the Union has so far proved a failure. The ore, which was in

abundance at the bottom of the 2,400-foot level, seems to have "pettered" out before it reached the 2,500-foot level. There will soon be explorations on the 2,600-foot level by means of a wing. There is some hopes that further north, in the Sierra Nevada, that an ore body will be discovered. It is also hoped that the Ophir and Mexican may reveal another bonanza. Cross-cutting will soon commence in the Mexican, about which there are great expectations. The Belcher also is an interesting mine just now. The 3,000-foot level is now being prospected, and it is hoped something will come of it. The local papers talk learnedly about barren and fruitful zones on the Comstock, and they now admit that the second barren zone is more extensive than the first barren zone. There was very rich rock on top of the Comstock, then came a barren zone of a thousand feet to the pay rock below. The Consolidated Virginia and Crown Point was still richer than the mines found near the surface. It is now claimed that, as the second barren zone was more extensive than the first, the fruitful portion of the mines, when they are reached, will be richer in gold and silver than anything before. But all this seems like whistling to keep up the courage of the operators. All we really know is, that so far the Comstock is a failure, and does not repay the money spent upon it.

ATLANTIC SLOPE MINES

We cannot advise anybody to put money in enterprises calling for outlays to produce bullion on the Atlantic slope. Gold and silver has been found all along the Alleghanies and its spurs. It has, at times, paid sufficiently to those who worked it as a business. The gold mines of Georgia, or, rather, the placer mines of that State, paid a fair profit to those who worked them, but it is upon record that no mine worked by a company has ever yet paid expenses in any of the Atlantic States. We hear a great deal about the mines in Maine, but it will be quite time enough to invest in them whenever a company has paid dividends for two years on a stretch. We judge that so far a hundred dollars has been invested to every one that has been taken out in the mines of the Eastern States.

INTERVIEW WITH A MILLIONAIRE.

"Judge, I understand, you have done very well in Wall street during the last two years. It is known you were a bull last fall, a bear last spring and that you made money on both sides of the market, though you were caught short, so the report went, on Lake Shore."

"Well, I have been pretty lucky, and I had the advantage of having had correct theories as to the course of the market."

"What of the future, Judge?"

"Oh, there is nothing to prevent a continuous rise. The fact is the money of Europe is coming here for investment. While in Europe last summer I studied this matter closely and I found there was no legitimate and profitable employment for the capital of the Old World. English investors were blamed for lending money to the Turkish and Egyptian governments and the South American Republics, but you see there is no way of making more than 3 or 4 per cent. in more legitimate enterprises; and hence the capitalists are willing to take risks for the sake of large profits. As I have said, this money is coming to New York. More than half of the bids for the city bonds represented foreign capital seeking investment here. When in London I found the bankers studying Poor's Manual. Do you know that the speculative business on the London Stock Exchange to-day is in the American securities. It is Erie, Reading, Illinois Central and other American stocks which are dealt in for heavy profits. English securities proper are dealt in

ten shares at a time, and for eighths and quarters up or down."

"You expect then to see our leading stocks go to much higher figures?"

"I do—and without any very severe set backs; for the reason that the demand for the present is from investors who are taking stocks out of the street; and the brokers are not doing a large margin business. The price of money would advance if they were. New York Central, Lake Shore, Chicago & Alton, Burlington & Quincy and Illinois Central will have to 'double up' as Rock Island did; and then I expect to see the half shares go to par. With 4 per cent. governments selling for 109, a sure 6 per cent. stock is worth 110; while an 8 per cent. stock ought to sell for 135. There is a large margin for a rise over the present high figures which will culminate before February 1st. But I shall get out of stocks in the spring and stay out till the crop problem be settled for the year. I do not expect to see much lower prices before April."

"What is Jay Gould's position?"

"I understand that he has lost money through his faith in William Henry Hurlbert of the *World*. The latter really convinced him that the Democrats would carry Indiana—so he got out of stocks temporarily; for he believes in higher prices like the rest of us. But he expected to buy on the lower market, after the October elections. He was disappointed, however, while Keene, his great rival, bought boldly up to the date of the election; and has kept on buying. I am convinced that Jay Gould is now a heavy purchaser of stocks, I believe he is getting long of his Wabash and M., K. & T. This last stock I look to see at very high figures before March. That Indian Territory matter will be settled. Iron Mountain is so heavily in debt that I don't care to purchase the stock; but M., K. & T. is a big buy."

"Do you know how Vanderbilt feels?"

"Oh! he is bullish, of course. People affect to discredit the judgment of W. H. Vanderbilt; but I tell you he has a very level head. As far ago as 1875 he predicted that when resumption came Central bonds would reach a certain figure. I had some at the time and I know; for I recently sold them above that figure. Do you know there are several young fellows in Wall street who are making a great deal of money. The old operators who were trained during the hard times cannot understand this market; and they are being distanced by youngsters who understand this epoch better. The old bankers and brokers show their lack of financial knowledge by their absurd opposition to the re-monetization of silver. It is the abundance of money which is giving us prosperous times; were silver to be demonetized, or gold outlawed, or paper money withdrawn, either of those events would precipitate a panic. To have a full prosperous trade all the channels of commerce must be kept charged to the brim with the tides of gold, silver and paper."

HOW HE LOST HIS MONEY.

Joaquin Miller, in the *Overland Monthly*:

Wall street? How did I come out? Oh! Well, I was short of St. Paul and long of Pacific Mail. I expected Pacific Mail to go up and St. Paul to go down. They did, and I had twenty-one thousand dollars. But that was not enough to build a city with. I held on.

One day it was rumored that the rust was not so bad in St. Paul after all. It began to start up! Pacific Mail began to shoot down. It was said the Chinese had established an opposition line. I tell you it takes a big man to sit on two benches at a time. Ten to one he will spill himself between the two just as sure as he attempts it.

I sold some St. Paul and bought more Pacific Mail; but all to no purpose. They kept right on. Then I got out of Pacific Mail at the lowest figures it touched, and bought Wabash. I began to flounder, and got frightened. I sold and bought and

bought, and bought and sold. I frequently saw in the papers that I was getting rich in Wall street, and kept on working like a beaver. The end was only a question of time.

One day my broker took me by the sleeve and led me like a lamb, as I was, aside. My fun was over. And Utopia was indeed Utopia.

No one with so little money ever entered Wall street under better advantages. All men were kind and good. I think no man there ever attempted to mislead me. But it is simply impossible to mislead me. But it is simply impossible to make money there, and keep it. Let me mention here that during my six month there I paid my brokers in commissions eleven thousand four hundred and twenty-five dollars! These commissions alone will devour any possible profits.

Of course, it is not a pleasant thing to admit oneself beaten. But if this brief history of my venture in this dangerous land will diminish at all that tired and anxious army of tape-holders, who waste their shekels, their days, and their strength in vain watching—why, I willingly bear the reproach.

And, after all, I lost but little, having but little to lose. I learned so much, having so much to learn.

AFTER THE WORLD'S FAIR, WHAT?

(New York Correspondence of the *Baltimore American*.)

A gentleman of this city has made a proposition or suggestion to the executive commission in regard to the World's Fair, which deserves its serious and respectful consideration. It is this: That, instead of choosing a temporary site and erecting temporary buildings, at great cost, which must afterwards be sacrificed, they should select a spot where a series of permanent buildings principally glass and iron, could be erected, which could afterwards be turned into a permanent national sanitarium or "hygiearium." He points out the new modes of curing disease, which modern science has discovered, by atmospheric change, and influence by inhalation and absorption and urges that advantage be taken of this opportunity to raise money and realize a project that would, in time have its counterpart in every great city of the world; and that, being embodied in the fair buildings, would increase their attractiveness and render them objects of interest and study to intelligent and scientific men everywhere. He shows how it is possible to reproduce the climatic conditions of Minnesota, Florida and Colorado within an hour's ride of the City Hall; and the enormous saving to business and private interests by furnishing the remedial agents found in warmth, oxygenated air, air from which the moisture has been extracted, air penetrated with moisture or charged with restorative and curative elements without the patient's being obliged to leave his home, his family or even his business; for it could be subjected to his final supervision and control. Lastly, he shows how such buildings and spaces could be utilized for public pleasure grounds, as well as for sanitary purposes; for games, such as lawn tennis and croquet, which people who live in cities cannot play, except, perhaps, a small number, a few months in the year.

The whole argument is one of broad and deep significance—too broad, it is to be feared, for adoption; for it is the cheap and temporary measures that always win the suffrages of the majority. But it is something that the idea has been broached; it is a prophecy of the realization in the future.

AMERICAN WALL-PAPER.

We take pleasure in directing the attention of owners, builders and architects to the advertisement in another column of Frederick Beck & Co., manufacturers of artistic wall papers, 206 West 29th street. The demand for higher grades of wall paper has advanced of late to such an unprecedented degree that these goods will meet a want beginning to be felt by a large portion of the trade. This firm has secured a large stock of mica, which will enable them to fill all orders for that class of paper-hangings of which they are the sole manufacturers.

In selecting papers, the buyer should, of course, be governed by the character of the room to be decorated. It may not be unnecessary to say to some of our readers that it is not desirable to match their furniture in choosing their papers. Contrast is as much to be considered as similarity of tint. We make this remark here because we know that many persons suppose that they exhibit great taste when

they succeed in getting everything in an apartment of the same hue. This is all wrong. Wall-papers, by all means, should oppose in color the upholstery and hangings, not repeat them. But it is only by a due appreciation of the necessity of both contrast and similarity in color in the decoration of a room that real artistic effect is attained. In choosing a wall paper it is of great importance to consider whether it is to form a decoration in itself or whether it is to become a mere background for pictures. If the former much latitude is permissible: it may be gay or even striking. If the latter, it should be subdued in both color and design. It should also be borne in mind that the effect of a wall paper depends a great deal on the light of the room, particularly as to whether the latter receives the sun's rays direct or does not. This consideration is even more important in the matter of ceiling-decoration. For a dark-room, naturally, one would not choose a ceiling-paper which would absorb much light; while in the case of a too sunny room a disagreeable glare might be avoided by the exercise of the opposite rule of selection.

CENTRAL PARK APARTMENT HOUSES.

Mr. Heerlein, one of the oldest builders in New York, has just completed, on Fifty-ninth street, 114 feet west of Eighth avenue, and within a stonethrow of Central Park, four imposing apartment houses, fronting 100 feet on Fifty-ninth street, and 88 feet deep. Two of these apartment houses have a frontage of 30 feet each, and two are 20 feet wide each.

Their appearance add to the ornamental finish of this beautiful section of our city, and, located as they are in the immediate vicinity of the Park, the stations of the elevated road and the terminus of various car lines, they will prove to be not only a first class investment to the owners and builders, but also eligible places of residence to those who are now skirting the edges of our great pleasure ground.

The various buildings are all five stories high, with ornamental fronts of brown stone, amply and judiciously carved and cheerful looking iron guards protecting numerous windows. The extensions in the rear have been utilized for the construction of servants' rooms, kitchens and private stairs.

The work connected with the construction of these houses has been completed under the immediate supervision of the owner.

The 30-feet apartment houses are divided into two sets of suites, each flanking one side. The various suites are all provided with private halls, and each suite contains seven rooms, namely, a parlor, dining and sitting room, three bedrooms and bathrooms. Everywhere there are any number of closets and refrigerators built in the walls, as well as lifts and dumbwaiters are on hand, both in the rear as well as the front of these buildings. Large tanks of water are provided on the top of each building, a Ryder steam pump forcing the water to the upper stories.

Hardwood trimmings abound not only in the main halls, but also in the parlors and both the vestibules, as well as the halls, are all laid with marble tiling. The most modern and scientific principles have been observed in the introduction of steam-heating in the halls as well as in the suites proper, and marble mantles of unique and artistic design have been supplied for the various rooms.

Ample provision has also been made for the delivery of furniture and provisions in the rear of these houses, and every convenience, requisite for the keeping of a first-class apartment residence, has been supplied. Even now, before the mechanics have concluded their labors, several respectable tenants have already secured suites in these houses, and not many days will elapse before they will all be taken. Mr. Heerlein, himself, is constantly on the premises, and as the locality is one of the most eligible in our midst, and in a neighborhood that cannot easily be duplicated, we advise those who desire to secure a first-class home of this description to visit and examine thoroughly these latest additions to Central Park apartment houses.

The various establishments, that have furnished materials for these houses are, among others, the extensive firm of Bossert Bros., Johnson avenue, Williamsburg. They have supplied the doors, sashes and blinds. The marble mantles are from Christian See, Twenty-seventh street, between Ninth and Tenth avenues, the ranges from the well known house of Jordan L. Mott & Co., and the furnaces from the

Burstiro Stove Works, which Mr. Heerlein considers the very best in the market. The speaking tubes and bells are from Newman's, Broadway and Twenty-eighth street. The roofing has been completed under the superintendence of Mr. J. Foster, whose cornice works, at Fifth street and the East river, are well known. The dumbwaiters are from Patick Hagen's establishment in South Fifth avenue. Mr. Hagen, though yet young in this line of business, is considered, by builders, a first-class workman. The ornamental iron railing and window guards, which show off the building to such advantage, have been furnished by Mr. Schramm of Third avenue, near Seventy-fifth street. Last, but not least, the blue stone sidewalk lintels, sills, &c., have been supplied by the veteran Mr. Golding favorably known in this line of business.

MARKET REVIEW.

REAL ESTATE MARKET.

 For list of lots and houses for sale see pages iv and v of advertisements.

The various auctioneers who had property to offer during the past week, found no lack of bidders. Indeed, the attendance at the Exchange Salesroom grows larger day after day, and the public offerings at least are not as yet fully up to the views of those anxious "to make a turn" in real estate. The sale of Owen Keenan's estate, by E. H. Ludlow & Co., attracted a very large audience, and the various parcels, all situated on the East Side, brought very fair prices, though, of course, as is frequently the case in partition sales, some of the bids assisted in the bidding. The particulars of this sale, including location and prices obtained, will be found in the list at foot. Messrs. A. H. Muller & Son sold at auction during the week 155 East Forty-sixth st, a 16.8-foot house, for \$15,750, also a three-story brick house on the corner of West Fourth and West Tenth streets, for \$14,200. No. 26 East Seventy-eighth street, between Madison and Fifth avenues, was disposed of by Peter F. Meyer, for \$20,800. The receiver's sale, held by J. T. Boyd, of vacant lots in the annexed district, also passed off satisfactorily to those in interest. Business property down-town, as well as on the East Side, was sold on Wednesday and Thursday by Richard V. Harnett—Nos. 87 and 89 William street being sold for \$15,000, and four small tenements in Cannon street, for \$21,000. In our report of the auction sale of Twenty-third street property, near Fifth avenue, printed in this column last week, we neglected to state that Mr. Harnett was the auctioneer who had charge of the sale, which passed off so satisfactorily.

In Brooklyn, Mr. Kerrigan has sold at auction during the week the corner of Fulton and Navy streets, 42.4x59.11x73.5, for \$15,000 to Richard Doyle.

GOSSIP OF THE WEEK.

The number of transactions at private contract were not so numerous during the past few days as during the previous week. The eve of election creates a halt in the closing of contracts, which would have been signed but for the approach of election day. One Pine street broker has orders to close on Wednesday next a contract for \$160,000 along the line of Madison avenue, should it then appear, to the satisfaction of all doubters, that the particular candidate favored by the buyer has been elected to the Presidency. Another purchase, amounting to \$120,000 of improved property in Harlem, East Side, is also depending upon the result of the election.

During the past week Mr. H. W. Coates, has sold, at private contract, twelve vacant lots on One Hundred and Second and One Hundred and Third streets between Ninth and New avenues, for \$40,000 cash.

It is reported that the eight lots on the northwest corner of Ninth avenue and Seventy-second street, belonging to Mr. Charlier, have been sold for \$80,000.

Messrs. B. S. Levy and W. J. Cole, who have opened a down town office at 5½ Pine street, have during the past few days sold at private contract three lots on the southwest corner of One Hundred and Eighth street and Third avenue, to Meyer & Wallgrove, for \$22,000. The latter intend to build flats there without delay; the same firm has also sold two lots on the north side of One Hundred and Twenty-seventh street near Sixth avenue, for \$3,500 each, also No. 338 West Fortieth street, for \$8,000.

Judge Sedgwick is reported to have bought No. 23 West Forty-eighth street, for \$25,000.

Mr. Luyster has sold another of his houses (No. 26 East Sixty-seventh street), to Mr. William Toel, for \$52,000. Mr. A. C. Lamson was the broker.

Mr. Hugh Blesson, the builder, has bought from Edward Oppenheimer and Isaac Metzger, the southwest corner of Seventy-fifth street and Fourth avenue, 100x100.2, for \$51,000. He will at once erect there six first class four-story brown stone houses, with dining room extension.

Jere Johnson, Jr., has sold, during the last week, two lots on the south side of One Hundred and Thirtieth street, 115 feet east of Fourth avenue, for \$6,000.

Jefferson M. Levy has sold a lot, 20x100, on the north side of One Hundred and Thirty-third street, 206 feet west of Seventh avenue, for \$2,100, to H. C. Raynor.

Mr. Willett Bronson has sold, to Mr. Charles A. Troup, two of his new houses, Nos. 71 and 73 East Sixty-sixth street, for \$42,000. This sale was effected by Siegmund T. Meyer & Sons.

The last mentioned firm has sold during the past week two lots on the northwest corner of One Hundred and Third street and Lexington avenue, 50x80, for \$7,000.

Riker & Co. have sold No. 132 West Fifty-seventh street, a four-story brown stone house, to a Wall street banker, for \$23,500.

The six-story brick tenement, No. 123 East Houston street, 27x75, has also been sold at private contract, during the week, for \$19,900, to John Geis.

Great activity prevails in Brooklyn property, particularly in the Twenty-third Ward. This ward is now the centre of building operations in the city of Brooklyn. Upwards of two hundred first-class houses are now in process of erection. Jere Johnson, Jr., has sold on the Brevort Farm (Twenty-third Ward), during the past three months for John A. Monsell, William H. Scott, and other large purchasers, 560 lots, for \$345,000. His sales during the past week embrace: 17 lots on Putnam avenue, 100 feet east of Marcy avenue, for \$17,100; 17 lots on Jefferson street, 100 feet east of Marcy avenue, for \$13,600; 41 lots on Hancock street, between Nostrand and Marcy avenues, for \$35,400; 22 lots on Jefferson street, near Marcy avenue, for \$15,400; 1 lot on southwest corner of Nostrand avenue and Hancock street, for \$1,650; 20 lots on Putnam avenue near Throop, for \$12,000; also 33 lot on Voorhies Farm, Coney Island, for \$3,300.

Two parcels, about eighty lots, on the south side of Prospect Park, have been sold during the past few days, by Chas. A. Seymour & Co., for \$65,000. This is one of the largest sales made in Brooklyn since last spring. The lots sold by the Messrs. Seymour belong to the Clarkson estate on Ocean avenue, Flatbush.

We hear from authentic sources, that the purchase of additional acres in Yonkers, by Mr. Tilden, is not as large as reported last week, he only having secured four more acres. It is Mr. Tilden's intention to lay out a park there, but he cannot secure the property he requires for such a purpose at his own figures, neither are his neighbors anxious to sell, as they are all men of wealth.

We notice that the Mutual Life Insurance Company sold to Mr. Hugh N. Camp over fifty acres of land, in Pelham and Mamaroneck, for \$30,000.

Permission to rebuild and maintain the telegraphic route through certain streets of the fire department, and to use the same for their own wires in consideration therefor, has been granted by the Mayor and Commonalty of New York to the Mutual Union Telegraph Company.

Our list of projected buildings this week shows a steady continuance of building operations in the upper section of the island. Ten new buildings are being constructed on the east side of Third avenue, between Sixty-ninth and Seventieth streets, of which six will be single flats 20 feet wide, and four double flats, 30 feet each. Mr. Jos. Emrich is the owner, and Mr. Hugo Kafka the architect. Up to last week the Board of Health never permitted any one to cover more than 79 per cent. of the lot. In this instance, however, owing to the excellent arrangements made for ventilation, the architect is permitted to cover 81 per cent. of the lot. Five four-story tenements are being erected on One Hundred and Eighteenth street, near Fourth avenue, and several dwellings along One Hundred and Twenty-third and One Hundred and Twenty-ninth streets. On the West Side, also, new tenements are being built, four of them on the northeast corner of Eleventh avenue and Fifty-third street. Two new iron front stores costing respec

tively \$18,000 and \$21,000, are being erected at 102 and 104 Greene street.

In Brooklyn, also, any number of new buildings are projected along Putnam avenue, Henry street, Jay street and Degraw street.

The following are the sales at the Exchange Sales room for the week ending Oct. 29:

* Indicates that the property described has been bid in for plaintiff's account:

Cannon st. e s, 100 s Rivington st, 100x100, four two-story brick tenem'ts and two and three-story brick factory in rear. Richard Harrison. (Amount due, abt \$11,250)	\$21,000
Monroe st. No. 307, n s, 150 w Corlears st, 25x95, four-story brick tenem't and four-story brick tenem't in rear. Daniel Buhler. (Amount due, abt \$4,000)	5,530
New st. n e cor Forest av, 75x145.2, two-story frame dwell'g and one-story frame shop. Frank A. Beck. Receiver's sale	3,250
New st. s s, bet Uncas and Forest avs, 50x118.1, N. D. Lawton. Receiver's sale	465
William st. Nos. 87 and 89, w s, 40 n Maiden lane, 38.2x21.4x38.2x20.8, four-story brick store. J. G. Wendel. (Amount due, abt \$13,900)	15,000
West 4th st. No. 230, s w cor West 10th st, 26.6x101, three-story brick dwell'g. H. Van Ciek. Executor's sale	14,200
*12th st. No. 417, n s, 100 e 1st av, 24.4x—to Stuyvesant st, four-story brick store and dwell'g. B. H. Blydenburgh, guard. (Amount due, abt \$9,750)	8,000
*18th st. n s, 140 e Av A, 50x92. Leasehold. Win. Eagle. (Amount due, abt \$9,750)	1,000
46th st. No. 155, n s, bet 3d and Lexington avs, 16.8x100.5, four-story stone front dwell'g. C. P. Choate. Public auction sale	15,750
78th st. No. 26, s s, 104.8 w Madison av, 15.4x102.2, four-story stone front dwell'g. E. B. Schaffer. (Amount due, abt \$9,150)	20,800
79th st. No. 154, s s, 50 e Lexington av, 20.6x68, three-story stone front dwell'g. Joseph McNesbit. Executor's sale	13,600
79th st. n s, 70 e 2d av, 30x75, vacant. Max Danziger. Executor's sale	5,650
79th st. n s, 100 e 2d av, 25x100, vacant. Max Danziger	5,000
*80th st. s s, 250 e 3d av, 50x102.2. (Taxes, &c., \$1,000)	5,625
109th st. n s, 80 e 4th av, 75x100.11, vacant. S. T. Meyer. (Amount due, abt \$9,500)	7,000
*120th st. s s, 90 e 4th av, 50x100.10, Edward Schell, trustee. (Amount due, abt \$5,350)	6,000
Lexington av. s e cor 79th st, 16.8x68, frame house. Joseph McNesbit. Executor's sale	5,500
Robbins av. e s, 50 n 150th st, 25x105, two story frame store and dwell'g. Adam Schwartz. Receiver's sale	1,505
1st av. n w cor 59th st, 25x100, four-story brick and two-story frame dwell'gs. Terence McCabe. Executor's sale	18,100
2d avs. Nos. 1522, 1524 and 1526, n e cor 79th st, 76.6x70, three four-story brick dwell'gs. Rose Higgins. Executor's sale	37,800
6th av. No. 662, e s, 65.9 n 33d st, 22x8, five-story brick store and dwell'g. Nicholas Henry, for party in interest. (Amount due, abt \$2,350)	2,500
Total	\$228,675

BROOKLYN. N. Y.

In the City of Brooklyn, Messrs. T. A. Kerrigan and J. Cole have made the following sales for the week ending Oct. 27:

Clymer st. s s, 314 w Wythe av, 19 10x80...	
Clymer st. s s, 205 3 e Kent av, 19.10x80...	
Magdalena R. Holler	\$6,000
Fulton st. cor Navy st, 2 1/2x59.11x73.5, Richard Doyle	15,000
South 4th st. n s, 86 e 5th st, 22x95, William Johnson	2,700
*14th st. s s, 358 10 w 5th av, 18x100, William E. Dodge, Jr.	2,300
18th st. s s, 333 4 e 5th av, 16 8x100, two-story frame dwell'g. Mary A. Skidmore. Executor's sale	1,575
*Clinton av. w s, 294 n Park av, 20 4x100, Alice Powell	1,500
5th av. n w s, 40 s w 12th st, 20x80, Edward Kieser	5,825
Total	\$34,900

BUILDING MATERIAL MARKET.

BRICKS.—Common Hards are in continued good demand, and the selling interest have little cause for complaint over the condition of the market. The supply for the week has been quite as large as for some weeks past, but found buyers about as soon as offered, and at times it would have been possible to place an additional cargo or two, while a few sales have been made before arrival. The great bulk of the stock has been taken for actual consumption at local and near by points, but some of the dealers coming in possession of an extra fine cargo, and having no use for it at once, have preferred plunk it away, and thus there is a small accumulation going on at the yards. As matters stand, prices naturally have good sup-

port, and the tone is very firm all around, with a slight addition made to values in some cases. "Up Rivers" are quoted at \$5.25@5.37 1/2 and Haverstraws at \$5.50@5.75, with some extra choice cargoes selling higher. The two kinds of stock, it will be noted, remain close together in price, and this may still be attributed to the superior quality of the first named. The production may now be considered as about done for the season, and future supplies will be drawn in the main from accumulations held by manufacturers. For Pales the demand has been fair, considering the somewhat restricted outlet, and the cost well sustained, at \$3@3.25 per M. Fronts in good average demand and ruling steady on price.

DOORS, SASH, ETC.—The following we find in the London Timber Trades Journal:

On Wednesday, Messrs. Foy, Morgan & Co. held their sale of deals, &c., at the Baltic, and had a rather more voluminous catalogue than usual, comprising 416 lots, amongst which some Canadian made doors figured, samples of which were exhibited in the room during the sale. The first lot put up was sold, and realized 9s., but for the remainder not a single bid that we could hear was forthcoming. As these goods were not sold, it would be perhaps invidious if we further criticised them at this juncture. As far as we can judge they seemed to be on the model of those supplied from the United States; one of the samples of a third quality door shown in the salesroom appeared to be slightly sap stained, which, if it did not serve as a recommendation of the article itself, was at least a proof that the samples were taken indiscriminately. This is a branch of the trade that we desire to give every encouragement to, and no doubt when it is further developed all the excellence of those now imported from the United States will be copied in the manufacture of those from Canada. Our reference to the pine doors supplied by our Yankee cousins, and with which those of Canadian manufacture will come into direct competition, must not be taken as any disparagement of the Swedish doors that occasionally figure in these sales. These have certain recommendations of their own in the way of cheapness and durability which are now well known to the trade here, neither are we making any comparison of the special features of these or other sorts. Probably on some future occasion we may enter more fully into the subject, but at present it is sufficient to remark that any article of the kind that combines careful manufacture with a thorough seasoning and well selected wood, which can be offered at less than what it would cost to make them here, may count with some degree of certainty on a ready sale.

HARDWARE.—The movement of supplies continues comparatively full and general, with the market showing a cheerful tone, and dealers much encouraged in the belief that they will lose no ground for several weeks. The call is from some that nearer points than a short time ago, but loses no volume in consequence, and covers a full average assortment of goods. Values cannot be called more than steady, but as a rule are held without much decline. Buyers gain a little on Wood Screws, the recent revision of discounts standing as follows: Flat Head Iron 45 per cent discount, Round do. 45 do.; Flat Head Brass, 45 do., and Round do., 30 do., with all special discounts withdrawn.

LATH.—About the time of the issue of our last report, the market was in a pretty bad way. Stock had accumulated afloat to an unexpectedly large extent, buyers saw their advantage and were offish, and for a time a heavy feeling prevailed. No sale were made public for less than \$1.85, but it is very certain this was shaded in many cases. Still by judicious management, receivers finally succeeded in placing the bulk of the supply, and the subsequent developments indicating no further important arrivals, prices once more steadied up on the above figures, and at the close are well maintained. Demand, however, shows moderation in view of the amounts buyers have in hand against early consumption.

LUMBER.—Buyers evidently do not intend to be stimulated into the display of any great anxiety this fall if they can help it, and are still moving with some caution. No opportunity to negotiate on desirable stock, however, is allowed to pass by, and in a quiet sort of a way there is a great deal of stuff being taken care of. The lateness of the season admonishes the dealer who has not completed his assortments that he must be up and doing, and there is little doubt that the volume of demand can be preserved full until winter sets in with enough force to close navigation. The outlook for winter and early spring trade is good, and a revival of consumption is looked for as soon as the din and excitement of the political canvass shall have passed away. Exporters claim somewhat discouraging advices at the moment. Spruce still more or less irregular under the causes before noted, but not giving indications of radical change. The demand, in fact, is showing pretty good volume, and, with many buyers who cannot get what they want, taking what they can get. Supplies of any merit at all receives attention. Agents, however, are a little cautious about talking of an advance, and when a really desirable customer bids fairly to market rates, he receives due attention. On a general range \$18@20 is quoted, but specials are, in a few cases, valued higher, and it is intimated that some randoms have sold lower.

White Pine is filling up in accumulation, both as to quantity and assortment, and the winter will, in all probability, open with a good supply in the hands of dealers. There appears to be a great deal of faith in

the outlook, however, and between the home and foreign orders it is expected that everything desirable will be wanted, at full rates. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do.; \$15.5@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine is doing very well between the call for export orders and to fill special schedules on coastwise deliveries, and sellers sustain a full line of values without much difficulty. Held stock and random cargoes, however, are not in favor, and have very uncertain value, though the tendency is to favor the buyer. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$16@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwoods are quiet, but mainly through absence of desirable supplies, and an attractive offering would at once secure ready sale at full prices. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$31@35; chestnut, 1st and 2d, \$30@35; do. do. \$18@20 do. cherry, \$45@47 do.; white wood, 1/2 and 3/4 inch, \$25@27.50, and do. inch, \$43@45 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

Shingles steadily held on all grades, but not much demand outside the ordinary run of shipping orders. We quote Cypress at about \$6 for saps, and \$8.50@9 for beards; pine shipping stocks, \$4 for 18-inch, and Eastern saw grades at \$2.50@4.50 for 16 inch as to quality and to quantity. Machine dressed cedar shingles quoted as follows: For 30-inch, \$16@22.25 for A and \$23.75@33.25 for No 1; for 24-inch, \$6.50@16 for A and \$16.75@23 for No 1; for 20-inch \$5@10.50 for A and \$11.25@11.75 for No 1.

The yard business is progressing quiet, as well as expected with all kinds of stock selling free, and some dealers seeking rather higher prices on desirable goods.

From among the lumber charters recently reported we select the following:

An Am. Barque, 666 tons, from Pensacola, to Rio Janeiro, Lumber, \$22 net; a Br. Barque, 352 tons, from Pensacola to Montevideo, Lumber, \$19.50, option of Buenos Ayres, \$20 net; an Am. Schr., 265 tons, from Pascagoula to Vera Cruz, Lumber, \$13; an Am. Schr., 230 tons, hence to Demerara, Shooks, 25c, and back from Brunswick, Lumber, \$7; an Am. Schr., 186 tons, from Jacksonville to Berbice, Lumber, \$13; a Schr., 212 tons, from Fernandina to Laguayra, Lumber, \$10 and port charges; two Schrs., 147 and 113 tons, from Jacksonville to Antigua, Lumber, \$12; a Schr., 350 M Lumber, from Apalachicola to New York or New Haven, \$3.50; a new Schr., 400 M Lumber, from Pensacola to New York or New Haven, \$8.50; a Schr., 110 M Lumber, from Jacksonville to New York, \$9; a Schr., 431 tons, from Savannah to New York, Lumber, \$6.50; a Schr., 190 tons, from Norfolk to Newark, Lumber, \$3.75; a Schr., 153 tons, from Cedar Keys to New York, Cedar, 9 1/2c, per cubic ft.; a Schr., 161 tons, from Albany to Petersburg, Sycamore Lumber, \$3; a Schr., 191 tons, from Albany to Richmond, Sycamore Lumber, \$3; a Schr., 100 M Lumber, from Bangor to New York \$2.25; a Brig., 400 M Lumber, from Savannah to Philadelphia, \$6; a Schr., 200 M Lumber, from Savannah to Boston, \$7.50; a Schr., 380 M Lumber, from Brunswick to Boston \$7.12 1/2; a Schr., 218 tons, from Mattassony to Philadelphia, Pine Wood, \$3.25 per cord.

Exports of lumber from the port of New York:

THE SOUTHERN PINE TRADE.

NEW RULES TO GOVERN THE RECEIPTS AND DISCHARGE OF LUMBER.

At the Maritime Exchange, Thursday, a meeting of members interested as receivers and carriers of yellow pine, unanimously adopted the following rules to regulate the delivery and receipt of Southern pine cargoes among members of the Maritime Association of the Port of New York:

RULE 1.—The Board of Directors, at their first meeting after the adoption of these rules (or as soon as practicable thereafter), shall elect, in the manner prescribed in Section 25 of the By-Laws of the Maritime Association, an Arbitration Committee on Southern pine lumber, consisting of five members of the Maritime Association, of whom two shall be receivers of Southern pine, two shall be carriers of Southern pine, and the fifth member shall represent both interests. This Committee shall hold their office until the election of their successors, unless the Board of Directors shall otherwise direct. This Committee shall have the same power, authority and emoluments as the Arbitration Committee of the Maritime Association, and shall organize and conduct their proceedings, and be availed of in the manner prescribed in Sections 26, 27, 28 and 29 of the By-Laws of the Maritime Association.

RULE 2.—The port of New York for the delivery of Southern pine shall be all points included within the following: boundaries, where vessels may safely go, viz.: All of New York Island; all of Long Island shore from Fort Hamilton to Long Island City, both included; all of Westchester County shore facing Harlem river and Spuyten Duyvil Creek; all of the New Jersey shore from Weehawken to Point Constable, both included; all the Staten Island shore fronting the inner harbor of New York from the Narrows to a point opposite Point Constable. Consignees shall have the right to order vessels to the following places to discharge (provided vessels may safely go), by paying towage and compulsory pilotage to places and return to New York, viz.: Perth Amboy, South Amboy, City Island, Elizabethport, Port Johnson, Sandy Hook, and all points on Staten Island fronting on Raritan Bay and Kill von Kull. From April 1st to November 1st of each year, consignees shall also have the right to order vessels to discharge at Newark, N. J., and at any places on the Hudson river not included in the said limits of the Port of New York, and not above Rondout, N. Y., (where vessels may safely go), by paying vessels, towage from New York to said place and return to New York light, and providing vessel with discharging berth free of wharfage; but in such cases consignees are to have only twenty-four hours after the arrival and reporting of the vessel in which to give vessel's orders.

RULE 3.—Where there is more than one consignee of a cargo, vessels shall not be obliged to move for less than 50 M. ft., B. M. (50,000 ft.); the consignees for all lots of less than 50 M. ft., B. M., shall receive same where vessels discharge. Where entire cargoes are consigned to one consignee, the said consignee shall have the right to have cargo discharged in two places if less than 200 M. ft., B. M., and in three places if from 200 to 300 M. ft., B. M., inclusive, and in four places if above 300 M. ft., B. M., provided he pays for all towages incurred from the time vessel is placed in first discharging berth until vessel is discharged; time actually used in moving vessel to count in the lay days.

RULE 4.—Consignees shall have three days (Sundays excepted) after vessel arrives and captain or vessel's agent reports, in which to furnish vessel a discharging berth, except in cases where cargo is consigned to more than one consignee; in which cases the captain or vessel's agent shall notify all consignees on vessel's arrival, and the consignee, whose cargo is to be discharged first, shall have three days in which to provide a discharging berth for vessel if his lot is 50 M. ft., B. M., or over, or to commence taking his cargo by lighter if his lot is less than 50 M. ft. B. M.; and all consignees after the first one shall be notified by captain or vessel's agent twenty-four hours before vessel is ready to discharge their respective lots, and said consignees must give vessel a discharging berth, at the expiration of said twenty-four hours. All notices by captains or vessel's agents of vessels arriving, and by consignees providing discharging berths, must be served before three P. M., to count for that day, otherwise they will count from the following morning (Sundays excepted). In case consignees do not use all the three days allowed them to provide vessel with a discharging berth, such part of same as they do not use shall be allowed to them and added to the lay days herein-after provided for.

RULE 5.—Lay days for discharging shall be at the average rate of 20 M. per running days (Sundays and legal holidays excepted) for all lumber 1½ inch and under in thickness, and 25 M. per running day (Sundays and legal holidays excepted) for all other timber and lumber, commencing when vessel is in berth and ready to discharge her cargo; but in case of failure of vessel to discharge the above quantity per running day (Sundays and legal holidays excepted), consignees shall not be liable for demurrage, provided they have furnished berths or lighters, as provided in Rules 3 and 4, to receive their cargo.

RULE 6.—Consignees shall have the right to receive any part of their cargo from vessels in lighters or boats alongside, vessel to discharge same on lighter or boats. In discharging mixed cargoes, all lumber 2 inches thick and under must be piled on dock separate from balance of cargo. The extra expense of such separation to be paid by the consignees, except where it is given for small stowage.

RULE 7.—The charge for demurrage for vessels shall be at the rate of fifteen cents (15c) per day per foot, B. M., of cargo delivered. All fractions of a day over one-half shall be paid for as a full day, and one-half a day or less shall be paid for as one-half a day.

RULE 8.—The stevedore selected by the captain shall be approved by the consignee.

RULE 9.—When not expressed to the contrary in the charter party or bill of lading, freight shall be paid on the freight measurement delivered.

The foregoing rules shall take effect from and after December 1st, 1880.

GENERAL LUMBER NOTES. STATE.

The Albany lumber market, for the week ending October 26, is reported by the *Argus* as follows:

Shipments from the river and from the slips south and east since our last report have been very free, and as receipts by canal are decreasing the stocks in the District will steadily fall off. We have not any material change to report in prices, though sales of low grades of Michigan box are said to have been made below our inside quotations. The general trade throughout the District have been good; some houses report a very busy week. Buyers are fairly represented in the District to-day, personally or by orders; from the East there has been a fair sprinkling of buyers in the market; among the sales made to an Eastern house, worthy of note, as being something unusual, was one lot 200,000 shingles, clear sawed pine, at about quotation, and further sales thereof in that direction will probably be made before the season closes. For the East, also, one lot of 600,000 feet Michigan Lumber was taken at full prices, besides other round lots. Trade has been more active than is customary during the week preceding the election.

In Coarse Lumber there is not any change in the tone or condition of the market; the mills are still in want of water and receipts very light.

The receipts of Lumber at Chicago from January 1st to October 16th are reported at 1,296,000,900 feet against 1,202,000,000 feet to a corresponding date last year; shipments, 549,054,000 feet against 583,210,000 feet.

The shipments from Saginaw Valley for the week ending October 18th were 30,723,000 feet. Sales, 500,000 feet, at \$7, \$14 and \$35; 1,000,000 feet at \$7.50, \$15, \$34; good Lumber is scarce; the market is overrun with coarse stock.

The receipts of lumber by lake at Buffalo for the week were 7,642,000 feet and 135 car loads with firmer canal freights. At Oswego, 6,915,000 feet.

The receipts at Albany by canal from the opening of navigation to October 23d were:

Bds. & Sctg. ft.	Shingles, M.	Timber, c.f.	Staves, D
1879..	263,357,500	9,751
1880..	319,147,500	5,640	5,400 636,000

The receipts so far this season are up to what was received in 1879.

Freights from Bay City to Buffalo and Tonawanda, \$3.00 M. feet; from Saginaw, \$3.50. From Buffalo to Albany \$2.50; from Tonawanda to Albany, \$2.25 M. feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 M. feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$1.95. From Ottawa to Albany \$3.50 M. feet.

River freights are without change.

THE WEST.

[Special correspondence of REAL ESTATE RECORD].
CHICAGO, Oct. 27, 1880.

The market for cargoes in this city is in rather better condition than it was a couple of weeks ago, though it is but fair to say that the improvement has all occurred within the past week. Just after the last letter to THE RECORD was written, the market fell off under the combined influence of large receipts and a slow and uncertain demand, and prices declined from 25 to 50 cents from the figures last quoted. The gale of last Saturday week, though it resulted in considerable loss to the owners of the lumber in transit, had a strengthening effect upon the market, as it kept back the fleet and reduced the receipts for several days, besides putting up the rates of vessel freights, making a corresponding advance in prices imperatively necessary. The demand at this writing is better than it has been for some time, and as there is very little stuff available to supply it, prices are tolerably strong at quotations. The arrivals this week have been light, as compared with the receipts of a month or two past, but reference to the records of 1879 show that they equal those for the corresponding time a year ago. It is hoped that the rise in freights and the loss of a number of vessels from the lumber-carrying fleet, will tend to make the receipts from this time forward smaller than they have been, and some operators are even sanguine enough to expect that the excess over last year in the total arrivals will be materially reduced before the close of navigation. Upon this hypothesis a further advance in prices is predicted.

The prices current to-day at the cargo market are about the same as were given in the last report, the advance noted above having been only equivalent to the decline which occurred previously. Manistee dimension lumber is in pretty good request to-day at \$9, while inferior qualities, such as White Lake or Muskegon, are held at \$8.50. These prices are to a certain extent nominal, as there are hardly offerings enough at the docks to make a market. The other items named are firm at the list prices, and would undoubtedly sell with tolerable freedom upon that basis. Shingles are rather weaker, in proportion, than lumber, and are quoted to-day at a slight decline from the prices last given. Lath are firm and in

pretty good request. Following is the table of quotations:

Green joist and scantling.....	\$3 50@ 9 00
Green boards and strips, common.....	9 50@10 50
Green boards and strips, medium....	11 50@13 50
Green boards and strips, good to choice.	14 00@18 00
Standard shingles.....	2 30@ 2 35
Extra shingles.....	2 40@ 2 60
Lath.....	1 70@ 1

It is still impossible to foreshadow the future condition of this market. The indications are that it will become firmer as the season draws to a close, but whether the advance in prices will be more than sufficient to cover the rise in freights is an open question. The vessel market is now pretty firm, and will probably be still higher. The advance since the recent gale is full 39½ cents per thousand in the rates from all Lake Michigan ports to this city.

The situation at the yards is still very much unsettled. The demand is not what it ought to be, and dealers are nervous and uncertain, regarding the result of the balance of the season. The cut lists which were sent into the country, instead of improving trade have made it worse than it was before. Orders are coming in, but not so plentifully or so steadily as they have been. The trade now seems to be very unevenly distributed, some yards reporting a fair demand, while others claim to be getting scarcely any new business. It is worthy of note that among the latter are included the yards from which the reduced price lists have been sent out. There has been some effort made to disguise the actual condition of things, and as a result the low figures have not been generally quoted in the newspaper reports of this market; but, as was stated in the last letter, close buyers can easily secure material concessions from the regular printed list. The trade, however, is becoming aroused to the necessity of checking this weakness, if it is possible to do so, and to-day a call for a price list meeting, to be held next Saturday, signed by a large number of the principal dealers, was presented to the Exchange; whether this meeting will prove harmonious or not is uncertain, but judging the expressions of the dealers regarding it, there will be a strong effort made to agree upon a list that can be maintained. It is not generally thought the advance, if there is any, upon the last list will be very large, but it will serve to give the operators more confidence in each other, and impart a feeling of firmness to the trade that it very much needs. It is to be hoped, at all events, that the purpose of the meeting will be effected.

From the weekly summary of the *Northwestern Lumberman*, we take the following:

Boston reports an exceptionally good trade in Western pine, aggregating a large amount. In quotations the tendency is upward and the feeling firm, without any actual advance. The distribution of supplies is fair; no reaction is looked for or considered imminent, and there are no indications of a less healthy business during the fall. Prices are remunerative and satisfactory. The short supply of water in Maine still curtails the supply from that section and it is now too late to hope for any great addition to the stock from that quarter; spruce is firmly held in consequence.

In Canada a less buoyant feeling is reported, from the fact that recent English advices indicate less firmness in deals and other descriptions of lumber in that market, causing some apprehension as to the outcome of the coming winter's operations. English advices show the importation of hewn timber to September 1 to have aggregated 1,453,943 loads, of which British North America contributed 182,028 loads. In sawed, planed or dressed goods the receipts were 2,326,404 loads, of which British America contributed 550,376 loads, or nearly one quarter of the entire amount. A load is 50 cubic, equal to 600 superficial feet. Montreal advices are to the effect that nearly all the lumber now at the mills has been bought up by American dealers who are holding it in anticipation of advancing values. Every available craft is engaged in running it to the Eastern markets, and it is thought that shipments will continue by rail through the winter in consequence of the low through rates which the railroad companies have established.

Philadelphia and Baltimore markets are not as fully supplied as would be desirable, and prices are firm; a good demand is reported and an excellent feeling as to the future of business.

Westward, we learn that Buffalo dealers are busy getting in their supplies for winter trade, and receipts are rather in excess of yard room. Prices are firm, and the demand is reported good both at Buffalo and Tonawanda. At Cleveland the dealers are feeling a high degree of satisfaction at the volume of trade, but are more concerned just now to lay in winter stocks. The demand for some time has equalled the receipts, and dealers are coming to the conclusion that it will be necessary for them to carry larger stocks upon their yards in the future. There is a good amount of stock on hand and prices are well maintained, and an increased strength is looked for. Substantially the same condition is manifested at Toledo and at Detroit.

At Saginaw the election interest is just now paramount, local issues leading to a greater degree of excitement than falls to the lot of many other sections. Good grades of lumber are firm and enquired for at old quotations, but coarser stock seems to be neglect-

ed, and prices are hardly as firm. The week, however, has developed a larger aggregate of shipments than usual. The movement toward the pine woods seems somewhat restricted for want of men, and an unheard of thing is found in the advertising by lumbermen for help. The years' cut of the mills of the river will be the largest on record. The Tittabawassee river has thus far rafted out over 500,000,000, and it is expected that work will continue until November 20. If our correspondent is correct, next season's crop of logs from this stream will be considerably reduced in quantity, although it is now too early to speculate upon this phase of the business. From all points on the Mississippi, the most encouraging reports reach us. Stocks are diminishing and are not in the volume of last year. There is but little dry lumber to be had at any point, and the shipments include a large proportion fresh from the saw. Trade is represented as exceeding the most sanguine expectations of the dealers and stocks from present appearances will be wholly inadequate to supply the winter demand, if it at all approximates that of the summer. We may be excused for wondering under this state of facts why it should be thought necessary to antagonize the Chicago market by a persistent under selling. Such, however, seems to be the case, and is the principal cause of disquietude among the dealers here. The lower river reports an excellent demand, with firm prices at Quincy, Hannibal and St. Louis, and the entire of the river points northward. On the whole line interested in the production or extensive sale of lumber from east to west, we find no locality except Chicago which labors under disquieting influences.

The Northwestern Lumberman reports on Hard woods, as follows:

The general state of the market remains unchanged. Green stuff has been received by some of the yard men in increased quantities, and to illustrate the demand for even unseasoned lumber, we may note the shipping to Kansas of a car load of cherry direct from the saw. Ordinarily, this way of doing would be considered out of the question, but consumers seem to be willing to pay the increased freight rates if they can only obtain the lumber. There is considerable complaint about a lack of cars, and no doubt adequate railway facilities would materially benefit the yards. There is little doing in oak timber, the demand having slackened. It is looked upon, however, as temporary, and charged to political excitement, for the winter's stock is not laid in, and there is every evidence that the consumption will be unusually large.

We hear of several recently drawn contracts for early spring delivery at about present rates, but later on the dealers are asking for a reduction in price.

LUMBERMAN AND MANUFACTURER, } MINNEAPOLIS, Minn., }

The event of the week in the lumber business is the weakening of prices at Chicago to the extent of a dollar or more in cargo and yard prices on all kinds of lumber. The printed causes of this movement are the overloading of that market by the manufacturers of Michigan and the failure of Chicago to command the trade of the country west of the Mississippi. We are not advised yet that this drop will effect prices at the competing markets on the river, but if it interferes with their business we predict that there will be such a reduction in prices as will enable these cities to control the trade no matter what that reduction may amount to. Neither party to this contest can afford to drop on prices, because the stocks have been laid in at the heavy prices of this summer, and only a very reasonable margin is being realized by the wholesale dealers. The business has reached a maximum everywhere, that is to say orders are far in excess of car facilities for shipping. The railroads are using their cars for hauling grain, and the lumbermen have to do the waiting, as lumber is a less profitable commodity to carry than grain and flour, and is handled for much shorter distances. Chicago has the advantage of cattle cars to Kansas, but this is partly offset by the New Lumber Line, which this year will take nearly eight thousand cars of lumber from Wisconsin and Minnesota to the Missouri valley.

The heavy storm of last week seriously interfered with the shipping of lumber (as will be noticed in the Minneapolis report), and the heavy snows and cold weather in the northwest will cut off the bulk of the trade from there and turn the attention of Minnesota and Wisconsin dealers to the southwest.

Shipments from St. Louis reach nearly a million feet per day. The dealers of Minneapolis, on Tuesday, held a meeting, and revised their list, adding \$1 to the price of common lumber and \$2 on flooring, and several special articles on the list were advanced 50 cents to \$1, and 25 cents on shingles and lath. This hardly brings the list up to the river markets or Chicago.

THE PROVINCES.

The Montreal Journal of Commerce has the following on the lumber trade.

One of the most successful seasons in the lumber trade of the country is drawing to a close. The exports to Europe have been unusually large; the imports into the United Kingdom alone from British North America for the first seven months of 1880 amount to:

	1880.	1879.
Sawn timber.....	\$327,961	\$223,369
Other timber.....	930,687	821,169

and the exports of the products of our forests for the months of July and August not included in the receipts at the British ports were, for July, \$4,072,172,

and August, \$3,872,628, a considerable increase in the shipments during the preceding years. The exportations to the United States have also increased, owing to the more important demand for Canadian lumber for the Boston and New York markets, which used to be glutted by the excess of western production that now finds a ready sale in the rapidly growing West. The bulk of Canadian exports has already gone forth to the United States, and an Ottawa paper says that 47,000,000 feet sold to American parties will be wintered over at Chaudiere Falls. The following statement of the exports of sawn lumber from Ottawa, for the months of May, June, July, August and September of the last three years, and for only four months of 1880, affords some idea of the large increase for the present year:

Exports during five months	1877.	1878.	1879.	1880.
Exports during five months	59,616	686,671	814,211	1,100,320

The returns for September, 1880, not having yet been made up.

A comparative statement of wood products measured and culled at Quebec to 1st of September, for the last two years, equally shows that the improvement has been general:

	1879.	1880.
Waney white pine.....	1,060,844	1,380,102
White pine.....	2,105,593	2,954,470
Red pine.....	530,555	696,197
Oak.....	610,769	1,104,979
Elm.....	274,650	786,368
Tamarack.....	6,654	20,871
Birch and maple.....	124,003	555,534

It will be noted that the increase in white pine, oak and elm is quite important, and this revival of the square timber business at remunerative prices will go far toward restoring to the port of Quebec the activity so much wanting for some few years past. New Brunswick also partakes of the improvement in the lumber trade, and considerable shipments of Canadian pine are on the way from New Brunswick and Nova Scotia to Boston, where an advance from 40 to 50 per cent. has been obtained over last year's prices for spruce and hemlock.

FOREIGN.

The Lumber Trade Journal, London, Oct. 9th, as follows:

When we said, two months ago, that our supplies from British America, with what was then on its way here, would be sufficient to prevent any dearth of timber in this country for the rest of the season, if no more were shipped from that quarter to add to our heavy European importation, we were not very wide of the mark, as up to the end of August we had already imported a good deal more than a million of loads over and above the quantity which had come forward at that time last year, and there has been no perceptible abatement in the influx of timber-laden vessels from the Baltic and elsewhere since then. If Norway is missing from the weekly list, Sweden steps in to supply its place, and when Sweden stops for breath Finland hastens forward with double strides, by steam, to preoccupy the ground, and when Finland pauses it is shouldered away in its turn by a fleet of heavy ships from across the Atlantic, till our docks and wharves groan under the never-ceasing accumulation.

The nearest comparison with the present year in the supply of timber was 1874, when the importation up to the end of August reached the previously unknown figures of 3,854,883 loads, and this year came very closely to it with 3,780,347 loads; but the total supply of that year reached 6,252,614 loads; so that considerably more than a third of the whole year's supply came in after the month of August, and then steamships in the timber-carrying trade were almost unknown whereas now they continue running at the rate of twenty or thirty in a week, a month after sailing ships have given out, and gone into winter quarters.

LIVERPOOL.

The quieter tone of the market which was noticed last week as having shown itself has become more pronounced, and, so far as regards market operations, there is apparently an indisposition to enter into them, at any rate, for the present, and this especially in spruce deals. As will be seen from the stock list below, the import of these goods has been large viz., 17,300 standards for the past month, against 4,800 standards in the corresponding month of last year, and as this is widely different from what the information from New Brunswick and Nova Scotia would lead us to expect, dealers are inclined to hold off buying for some time to come, when they may perhaps be better able to judge of the accuracy of the reports which have been so widely circulated of a probable short supply, owing to the want of water to bring the saw logs down to the mills. So far as is known to cargo of these goods has been sold during the past week, the difference between buyers' and sellers' ideas of value being too far apart to lead to business.

All kinds of Canadian timber still maintain their late values, the stock especially of prime waney board being very moderate, but of yellow pine deals poor specifications are somewhat easier in price, though ordinary specifications easily hold their position.

GLASGOW.

There has been a moderate import of American deals to Clyde ports during the past week, and no log timber.

The stock of birch on hand here is sufficient meantime, and pine deals, of which there is a ways a large consumption, are beginning to assume a plentiful appearance in Yorkhill Yard. But of spruce deals

we have a very moderate stock for this time of the year and of log timber, various descriptions, chiefly good pine, there does not at present appear to be an over-supply, seeing such large requirements are in prospect for shipbuilding and other general building purposes.

This week's mail from Havana reports:

White Pine—Market continues well supplied and the demand is moderate at nominal prices.

Pitch Pine—One cargo ex Theresa G. Shieldsborough, has been sold at a price that did not transpire.

Cooperage Stock—box shooks—Large stock and no demand.

Hhd do.—A parcel of 1,000 for sugar ex Sagadahoc, from Baltimore, remains unsold as yet. Prices rule entirely nominal.

Empty casks—Per same vessel 103 hhd's, have been received and under a moderate demand, we quote \$3 50 for hhd's and \$2 for tierces.

Hoops—stock continues exceedingly heavy and entirely neglected at nominal quotations.

NAILS.—The market shows quite an unsettled tone with the general tendency, however, in buyers favor.

From all sources the demand has proven light and unsatisfactory, and gauged closely to immediate wants with a great deal more stock available than can easily be disposed of even under pressure, and a reduced line of cost. The "Association" or list rates remain as before but outside lots are cutting these down very decidedly with \$3 said to be quite a common price and a still lower figure accepted on large lots. Western makers are reported to be offering quietly as low as \$2.75 per keg.

We quote nominally 10d to 60d common fence and sheathing, per keg, \$3 15@3 25; 8d and 9d, common do, per keg, \$3 40@3 50; 6d and 7d, common do, per keg, \$3 15@3 75; 4d and 5d, common do, per keg \$1.90@1.00; 3d and 4d, light, per keg, \$1.65@4.75; 3d, fine, per keg, \$5.40@5.50; 2d, per keg, \$5.40@5.50.

Out spikes, all sizes, \$3.40@3.50. Floor casing and box, \$3.90@4.65. Finishing, \$4.15@4.90.

CLINCH NAILS.

1½ inch, \$5.65@5.90; 1¾ inch, \$5.40@5.50; 2 inch, \$5.15@5.30; 2½ inch, \$4.90@5.00; 3 inch and longer, \$4.65@4.75.

PAINTS AND OILS.—The general market is without much animation and presents few features of a very interesting character. In a wholesale way some irregularity takes place, with, however, not many radical changes on cost made, while for jobbing parcels dealers preserve a fairly steady tone on most of the leading descriptions of stock. Leads seem to find the most unsettled market, and dry white is reported as selling considerably below the combination figures. Oxide Zinc also gives token of weakness on price, and could probably be reached at a concession, especially in large lines. Linseed Oil has found about the usual jobbing demand, but no great amount of activity. The stock, however, remains under fair control, and holders are firm at 57@61c per gallon, from crushers' hands.

PITCH.—A moderately active demand has prevailed from regular sources, and in ordinary form, with supplies about equal thereto and prices ruling steady. We quote at \$1 90@2 per bbl for City, delivered.

SPIRITS TURPENTINE.—A little more has been done in a jobbing way, but not enough to create unusual animation. Stock has gone from first hands with some freedom, but mainly under pressure, as some holders become tired of carrying and were anxious to unload. Prices under the circumstances have shaded somewhat. As this report is closed, the quotations stand at about 43@44c. per gallon, according to the quantity of stock handled.

TAR.—The ordinary run of jobbing orders reported, and prices in about all cases well maintained on the business accomplished. From first hands the distribution has been light, as the very small stock is offered with the greatest indifference. We quote \$3 @3 25 for Newberne and Washington, and \$3@3 37½ for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for Quit Claim deed i.e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranty.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

ALPHABETICAL INDEX.

NOTE.—Names in SMALL CAPITALS convey property from husband to wife.

GRANTORS.

Smith, Joshua—Wm. Smith, s w s Webster av, 392 s e from Walnut st, 25x101 300

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date

DIRECTORY OF

RELIABLE REAL ESTATE AGENTS.

We have carefully investigated the responsibility of all Real Estate Agents named in this Directory, and find them to be in every way competent and responsible. We therefore recommend them to capitalists and real estate operators generally as being the best agents to be secured in their respective section, as shown by letters from

prominent business firms, which may be seen at the office of the REAL ESTATE RECORD.

REAL ESTATE RECORD

AND BUILDERS' GUIDE.

VOL. XXVI.

NEW YORK, SATURDAY, NOVEMBER 6, 1880.

No. 660

Published Weekly by

The Real Estate Record Association.

TERMS.

ONE YEAR, in advance....\$10.00.

Communications should be addressed to

C. W. SWEET,

No. 137 BROADWAY

NEW YORK'S INFLUX.

It is, indeed, refreshing to those whose leisure time is devoted to studying the progress of our country and the effect of this progress upon the metropolis of America, to notice the antics of those who are astounded when plain matter of fact figures show them the changes in the political preferences of a voting population, such as is being crowded to-day on Manhattan Island.

Here we have been talking from week to week in the columns of THE REAL ESTATE RECORD not only of the enormous increase of our population, but of the distinguishing features of that increase. We have said for more than a year now, in these very columns, that—

First—Many capitalists who had made money in California, Texas, or other Pacific, Southern and Northern States, were quietly dropping their "specs" there, and, having realized their cash profits, had moved to this city of New York.

Second—Those who had under their control the manufacture of articles requiring an accessible shipping point had settled down with their machinery, their foremen, their workmen in and around New York, not only from New Jersey, but from Connecticut and other New England States. We have frequently pointed to the increase of manufacturing establishments, small and large; for instance, in the Eighth and Ninth Wards of this city, in the annexed districts across the Harlem, and in Brooklyn. These facts, continually repeated in these columns, have since been confirmed by the official statement of the special supervisor charged with gathering statistics in regard to manufacturing, and he predicted, under his own signature, that the facts when published would prove New York City to be not only the largest commercial, but also the largest manufacturing city in the United States.

And yet we hear of people being astounded at the change, which the total vote of New York represented as cast on Tuesday last. To us it appeared in quite a different light. We are, indeed, astounded that the increased vote for "no change," originating mainly among the workers in these factories at one side, and the increased number of resident capitalists on the other side, has not been larger.

And here we now give the test upon which we based that belief.

We know from sources entitled to credit, and worthy of belief, that no less than fifteen thousand new families have settled down in some fashion or other in this good city of New York since the summer months set in, and especially since the close of the summer months.

There is to-day a demand for unfurnished and furnished houses in this city that cannot be supplied. It is even currently reported that the Astors, with all of their improved property, had not a single house to let on the morning of November 3d.

There is also just now a very large demand for the purchase of houses, and if no more are sold than recorded in these columns, it is simply due to the enhanced views of sellers, and the as yet moderate views of buyers.

Aside of this influx of strangers, however, let us remind our readers that our population is expanding just now to a greater extent than they have been giving full credit. While during the panic times, following closely upon 1873, people were loth to marry, better times have changed all this. Smart real estate operators and brokers can see the difference plainly before their eyes. During the prevalence of hard times, people "doubled up," so to speak, in boarding and lodging houses. Those who boarded below Fourteenth street then, have since gone up into "the brown stone" districts above Thirty-fourth street. Those who occupied these eligible boarding quarters have since gone into the suites of various apartment houses, found so exquisitely and nicely arranged in the very best parts of the island. And last, but not least, those who have lived in flats before, are now seeking either to rent houses or to buy them.

The real estate market, carefully studied in all its various tendencies, is the very best index to those novices who, in a country like this, where universal suffrage lies at the bottom of all political changes, desire to find the cause for this change.

No one who has carefully read the columns of this journal during the past twelve-month, has any reason to be surprised at the change. Capital and labor work hand in hand in this American metropolis, and honest capital as well as honest labor combined, both looking towards the same result, have, indeed, brought about the change which is just now worrying the heads of the wily politicians and the good for nothing theorists.

PORTICOES AND DOOR FRONTS.

In view of the tropical climate of New York in summer time, why do not our builders vary the fronts of their more at-

tractive houses by designing porticoes or what would replace the ordinary awning over their door steps? When receptions or wedding parties are given, an awning has to be hired to save the dresses of the ladies, should it rain or shine, in walking from the carriage to the door. It would serve a use, therefore, if our finer houses were provided with a covering over their front steps. Not only would it be useful, but it would be novel and ornamental. Such coverings or porches should be artistic. In Thirty-seventh street, near Fifth avenue, will be seen a device of this kind, and it certainly has differenced the house to which it is attached from any in the neighborhood. Ladies on opening a door do not care to face the wind or sun directly. They wish to adjust their dress before descending the steps. They would like, also, to have a chance to open their umbrella or sun-shade. This can be better done under a porch than in the open air of the day.

As we have said, ours is an exceptionally warm climate in summer time, and porches, porticoes, awnings if you please, give a sense of coolness to a house which it cannot have otherwise. It helps, also, to create a draft when the hall doors are opened.

We make this suggestion to builders as they all know a little fanciful device or ornament adds greatly to the value of a well built house. We are constructing a great many dwellings in New York to-day, and next spring will be erecting a largely increased number of new residences. The builders who furnish the most attractive residences to customers will secure the largest trade, and then it is in the interest of art and our domestic architecture that there should be a wide diversity in the residences of the rich. Nothing can be more elegant than an ordinary brown stone house, but there is rather too much of this kind of architecture now. Houses built of fine brick and ornamented with varying colored stones, have proved to be very attractive to pupils of taste and wealth, and there is all the difference between a living and a fortune to the builder who caters to the taste as well as to the comfort of his customers.

POINTS, HINTS AND FORECASTS.

The action of the Secretary of the Treasury in stopping the weekly purchase of bonds gave a sudden check to the rise in prices, and the market was quite weak on Thursday. The wisest heads in the street looked for lower prices towards the latter part of November and early in December. But it is argued that this check to a booming market may keep prices steady. No one apprehends any such disastrous break as we had

the 21st of last November. Money will not be so cheap, but it will be sufficiently abundant to prevent any severe pinch in the market.

A gentleman of national fame just arrived from Kentucky informs us that the Chesapeake & Ohio is likely soon to figure as one of the great transportation lines of the country. Two thousand men are at work extending the line to Louisville, where a connection will be made not only with the railroad lines leading to the Pacific, but with the great cotton and tobacco regions South and West. Deep water navigation has been secured at Newport News, on the James river, and within a year cotton and grain will be shipped in large quantities to Europe from Norfolk, while the local trade all the way to the Pacific will swell the receipts of the Chesapeake & Ohio Railway.

Nor is this all. The same gentleman tells us that Huntington and his California associates have far reaching schemes in view, for though Jay Gould may control the trans-continental traffic from Ogden to New York, that the Central Pacific people will be his masters, so far as the Pacific trade is concerned. They have absolute control between Ogden and San Francisco, and in case of any disagreement with the Union Pacific managers, the Central can ship by way of the Southern Pacific Road.

The Construction Company, of which Mr. Navarro is the leading spirit, has thrown up its contract with the Ontario & Western Railway Company. This road has nine million dollars to spend in improving its track and in making the necessary connections which will link it with the Western Railway system, which want a railway entrance at New York.

The showing of the Wabash system of railroads look very well on paper. It now operates 2,404 miles of road. Its total interest charges, including rentals, amount to \$3,754,022.95. This would make the fixed charges equivalent to seven per cent., at \$22,300 per mile. The capital stock on common and preferred is at the rate of \$18,000 per mile. The net earnings for the year at the present business is \$5,915,000, or \$2,462 per mile on 2,404 miles operated. This is expected to be added to largely when the line to Chicago is fully opened. There are those who believe that Wabash preferred will sell for \$110 before next July. It is claimed that a 7 per cent. dividend is being earned on both preferred and common. The president, Solon Humphries, tells his friends that a semi-annual dividend of 3½ per cent. will be declared in December, payable early in January.

The Standard Mining Company of Bodie continues to pay 75 cents a share monthly. These dividends may be paid for three years, as all of the insiders aver that there is four year's dividends in sight. Having a large surplus in December an extra dividend of \$1 will be declared on each share. This will be in addition to the regular 75 cents. Another dividend of the same amount may be paid before the winter is over.

The Chrysolite has elected an excellent

Board of Managers. Among them are Walter S. Gurnee, T. C. Platt, Rossiter Raymond, D. S. Appleton, Joseph H. Banker, and there are others equally as good. We will now see what good business management will do in the conduct of this famous mine. Keys, Roberts, Daly, and their California friends show how sadly a good mine can be mismanaged.

The market looks bearish and is likely to continue so for a time. For this there are many causes; the stoppage of the bond purchases by government, the hardening rates for money, the natural reaction from a continuous rise and the distrust which always accompanies the reassembling of Congress. Then it is understood that President Hayes and Secretary Sherman will earnestly recommend the repeal of the silver law, which, if the recommendations are adopted, would be contraction to the amount of \$155,000,000, or whatever the exact total is of the silver bullion of the country. It was the adoption of the Bland silver law over the President's veto which checked the decline in prices in April, 1878, and which made resumption possible in January, 1879. The repeal of the silver law would be disastrous. It will not be repealed, however, but the agitation of the subject will help depress prices.

WHY NOT?

At the Boston Shipping Convention a resolution was passed by the merchants calling upon Congress to have a new cabinet officer, one who would represent commerce. It is also notable that in the various labor organizations it has been proposed that another cabinet minister be appointed to look after the interests of the laboring population. In several of the railway conventions the project was mooted of a cabinet secretary to represent the railroad interest or rather a department of transportation, to include canals and river courses.

And why not?

When governments are first instituted the king or chief embraces all the powers of the government in his own person, but as nations develop a process of differentiation takes place. The king finds that he cannot look after the finances, and so he appoints a Secretary of the Treasury. Then, in his intercourse with foreign governments, with other kings, he finds it convenient to have a Secretary of State. Then his struggles with other nations involve an army and a Secretary of War and of the Navy. Later on, as civilization progresses, he wants a Minister of Justice and a Minister of Education. The older, more civilized and more complex a nation is the more do we see this process of development go on. England has her Board of Trade; America her Agricultural Bureaus, Home Departments, Secretary of the Interior, and so on. Our relations become more complex the older we grow, and it may be that our descendants will find it wise not only to have a Minister of Commerce, but one of Education, of Justice, one representing manufactures, another mining, still another transportation, while, perhaps, it may be found wise to turn the war and navy departments into a department of public de-

fense, with two bureaus, one for the army and one for the navy. The tendency of all governments is towards centralization and the development of new functions and powers. Our great interests after all are those of labor, transportation, manufacturing, mining and commerce. It is absurd to have a lawyer as a Cabinet Minister. This nation will rarely engage in wars, and hence it is an anachorism for the army and navy to monopolize two seats in the highest council of the nation. We live in an industrial age, and all matters affecting the vital welfare and the business of the country should receive the attention of our executive government.

TO THOSE ABOUT TO BUILD.

We hear a great deal of lot owners, especially on the West Side and in the northern part of the island, preparing to build during the early spring of 1881 on their vacant property. Other owners, also, in the central and eastern part of the city, continue to inform us as to what they propose to do at such or such a time. All this may be true or it may not be. A great mistake is, however, constantly made by owners in selecting an architect and obtaining his plans and specifications at the very moment that they make up their mind to start building operations.

Property owners, as a rule, are gentlemen of intelligence, and they should know the difference between a wholesale dealer in plans and the conscientious, zealous and devoted architect. The former is always ready to furnish plans and specifications at short notice, but the efficient architect requires time to prepare special drawings, and he is always ready to criticize his own work and add improvements.

To show the fallacy of selecting an architect at the eleventh hour, we merely need to recall to our mind the many instances that have come under our observation where drawings were required very rapidly. We have often heard of foundation plans being in the hands of the builders, and where the foundations were actually built before the working plans for the upper stories or the elevations were completed. The result of such a practice is that any changes or improvements on the plans of the upper floors become impracticable, the foundations not being in accordance with the improvements suggested after ample contemplation of the whole. Again, if these subsequently suggested improvements are insisted upon, they will necessitate alterations of the work already done, which will involve pecuniary sacrifices.

The more time an architect has for preparing his plans, drawings and specifications, the more money can be saved by the owner in the construction of his building. The reason for this is obvious. Any particular building requires special study as to arrangement of details and construction. The quality of the soil, for instance, varies in different localities. The spans of floors and their openings, and the intended use of a building, determine the dimensions of posts, beams and girders. If an architect has time to compute the exact dimensions required, there

will be no waste of material and at the same time there will be absolute safety. If hurried, however, he will be compelled to resort to guess work, a proceeding too often followed by waste and accident.

Again, if the architect has ample time to consider the special features and requirements of the building, he can prepare a carefully written and exhaustive statement of specifications covering all points, and elaborate upon the detailed drawings on a scale which clearly shows every little detail of construction or ornamentation. The builder who is called upon to hand in his estimate will then know exactly the quality and quantity of work he is called upon to supply. His estimate will be a close one, leaving little room for "Extras" when the bills are to be settled. No door will then be left open for excuses on the part of the builder, as he knew at the very start, from the elaborate drawings and carefully prepared specifications what was actually wanted.

At the same time, owners who intend to build in the not remote future should remember that if drawings and specifications have not been timely prepared by the architect, contractors will have to wait for the necessary drawings and details to work from, when busy building times set in, thus causing delay, annoyance and pecuniary loss to both owner and contractor. It is just in this latter instance that time is valuable, while ample time can be obtained by going to a first-class architect the very moment the idea to build is first conceived by the lot owner.

THE STOCK EXCHANGE TRADES' UNION.

New York is destined, in time, to be the centre of the exchanges of the world. The New York Stock Exchange will, in the course of years, be the headquarters for dealings faster than those which takes place to-day on the Paris Bourse or the London Exchange. It is time that those who have the interests of the metropolis and its financial pre-eminence at heart, should see to it that the necessary machinery is provided for transacting the great business in store for us.

Our Stock Exchange is not organized in the best interests of the finances of the country. It is, however, an admirable institution for its members. The insurance fund, the charge for commissions, the monopoly it can control of the dealings in securities makes it a desirable thing to belong to it. But our Exchange partakes too much of a character of a mere trades' union for the benefit of the brokers themselves, and to the detriment of their customers all over the country. The Gold and Stock Telegraph machine, known as the "ticker," now extends to every part of the country. The price of securities here is telegraphed simultaneously to all parts of the country. Stock operating, which a few years since was local to the neighborhood of New York, has now become universal in all parts of the United States and Canada. It follows that the transactions have increased and will increase still more. The time is coming when a million

shares a day will be considered a small business on the New York Stock Exchange. But the brokers charge too much. There ought to be some way also of dealing in fewer shares than 100. True, you can now buy ten or twenty, or twenty-five shares, but you have got to submit to a shave in doing so. You cannot buy as cheaply as if you dealt more largely. Then the charge of \$12.50 for every hundred shares bought and every hundred shares sold is excessive, and limits the business of the Exchange. The rule also which empowers brokers, nay, compels them, to charge the legal rate of interest for carrying stocks is monstrously unfair in times like the present. Money, for the last six months, has gone begging at two and a half per cent. per annum, yet any broker who charges less than six per cent. to his customers is liable to expulsion and the loss of his seat. Of course, this rule does not prevent the large operators from getting this money at much lower figures, but this is done by their becoming partners to well-known stock houses; so that the money they pay out in commissions comes back to them in the form of dividends in their partnership. The two Morgans, Travers, Cammack, Jay Gould, Dillon Osgood, Osborn, all operate in tens of thousands of shares, and are either members of the Board or partners with active members. They, therefore, partly save their commissions and almost entirely save the shave of three and a half per cent. for the carrying of stocks, which is now exacted of the less-favored customers of the Board of Brokers. Last fall, when speculation was active, the same customers who were charged seven per cent. during the summer, when money was only three per cent., found charged against their accounts the excess over seven per cent. which obtained during the speculative fever. Some days most monstrous figures were charged for short loans, and yet all the active small brokers had the assurance to add this impost against their customers, who had been paying them three and four per cent. more for the use of the money in carrying stocks than it cost the brokers at the banks. There is too much of the "heads, I win; tails, you lose," in this business for it to last much longer in its present shape. If the brokers do not themselves see the necessity of reform other organizations will be started and will compete successfully with the Stock Exchange. A monopoly of this kind is odious and cannot last, if injustice is done to the trading public.

The American Mining Board is in possession of a charter which was passed for the benefit of the Stock Exchange. It confers extraordinary privileges upon its holders, for it was passed during the Tweed times, and for money-making purposes. Under the charter of that organization a new Board could be organized which could be very formidable in the event of the Stock Exchange maintaining its present rules, both as to commissions and charges for the carrying of stocks. In the London and European money markets this abuse is provided against. In London they have what is called "settling days," in which the average rate of interest is charged up against the customers of the

brokers. There is no legal rate of interest in England, and the market rate, whatever it is, is all that an English broker expects of his customer, if he is carrying stocks on margin. This is one reason why people cannot make money in Wall street. It has been tried over and over again, but the man who stands over the tape expecting to buy and sell is sure to come out at the little end of the horn in the course of time. It has been demonstrated that the amount paid in commissions on Erie stock alone would amount in the aggregate to the entire capital stock of that company, and to all its bonded and floating indebtedness. It is said that in the game of faro, when honestly conducted, that there is only a sixteenth per cent. in favor of the bank, yet, that sixteenth per cent., in the course of time, eats up the means of all who play against it. So it is with our Stock Exchange. No matter how wise or shrewd a dealer in stocks may be, the commission and the interest will finally deprive him of all his means.

Then our Stock Exchange, like that of London, should represent something besides railway securities. There should be more departments—for gas stocks, manufacturing stocks, water and land stocks; and then the mining interest ought to be better represented than it is now, by a room set apart for those who deal in those securities solely. But the Exchange should properly represent the whole investing and stock interests of the country. Let us hope that when the additions to the Stock Exchange building are completed, that this matter will be taken in hand by the Governing Committee, and that we will commence a new year with some reform in the methods of the Exchange which, as present conducted, is a narrow grasping, monopolizing trades' union.

OUR PROVISION EXPORTS.

It is a notable circumstance that the commerce of this port is not only steadily increasing from the export of vegetable, but also from animal products. Prices of bacon and lard are nearly thirty-five per cent. higher than they were at this time last year; and yet the shipments are very much greater. From November 1st, 1879, to October 9th, 1880, we exported nearly 750,000,000 pounds of bacon and hams, an increase of 21,000,000 over the previous year; while of lard we sold, notwithstanding its increased price, 50,000,000 more pounds. The total value of those three items was \$54,636,000; an increase of fourteen per cent. compared with the previous year. The exports of pork and beef also show a large increase, yet pork is double the price it was last year. In truth, Europe is beginning to depend upon us for all kinds of provisions. We can and ship immense quantities of meats; and the trade is steadily growing. We refer to this matter because of a habit which is growing up in Chicago and Cincinnati of sending products forward to Liverpool on through bills of lading, thus depriving New York of her legitimate profits. What a pity it is that we are without a merchant marine of our own to secure some of the profits now made by foreign steamship lines in trans-

ferring the products we ship and consume, from one side of the Atlantic to the other.

WILL MINING REVIVE?

This is a problem much discussed now-a-days by the brokers and dealers in mining shares. We fear that they will wait for some time before they see the activity which prevailed last Spring, Winter and the previous Fall. So many people have been bitten by investments in mining stocks that the monied public are very shy of the shares now offered to them. Unlike the stock market, which goes up as well as down, the mining share market fluctuates only in one direction. The tide of prices is a receding one and is likely to continue so for some time to come. A bonanza on the Comstock would change the whole situation, but the Comstock gives no signs of life. A revival of Little Pittsburg and the other Leadville properties would create some interest, but, apart from Chrysolite, there seems to be very little hope, in fact, none at all, that any of the old favorites will ever again command high figures. The Black Hill mines, such as the Homestake and Deadwood, hold their own and pay regular dividends. So does the Ontario, of Utah, and the Standard, of Bodie. The Green Mountain group of mines hold their own, but nine out of every ten stocks dealt in shows lower figures than when they were first marketed, with every prospect of going lower still. But speculation in mining shares must not be confounded with mining itself. That is a great and growing industry. Prospectors are busy over all our mineral belts developing mines. Capitalists are purchasing mills and boilers to work new mining properties. We have in this country the greatest mineral lodes on earth, the most keen-witted and active population, and mining here is carried on with a vim and boldness unknown in any other part of the world. There are great prizes for some, great disappointments for others. The United States for years to come will be pouring out its gold and silver streams. We now produce half the gold and silver of the world. In fifteen years from now there is a promise that we will produce two-thirds of the bullion of the world. The late mining excitement entrapped thousands of capitalists to investments in mining regions. Most of the investors would be very glad to get out of their speculations if they could, but they are into it and must see the end of it. Some of them will reap unexpected fortunes, others will lose all their money, but the time is coming when everybody will hear of the successes and will not hear of the failures. Hence we look for a renewal of the excitement in mining, but not just yet. It is not impossible that some time during next year there will be a number of dividend paying mines on this market from other districts than Leadville; mines, too, which are likely to prove permanent dividend payers. There are several such in Southeastern Arizona, and we may hear of productive mines anywhere in the Western country, from the northern boundary of Mexico, to the Lake Superior region.

THE BULLION MINING WORLD.

[Interview with a great California mine owner.]

"So you have sold your Comstock shares?"

"Yes, my brother and I have lost \$400,000, principally in the north end mines. I have faith in the Comstock, and I still own shares in Yellow Jacket and in Alta."

"In Alta? Why, that is way to the south end, near the Devil's Gate."

"Yes, and I and my brother and friends own largely in Alta, and if the Diamond Drill amounts to anything we have a bonanza there. The stock is selling very low, but I predict that you will hear a great deal about Alta before the year is over."

"Anything in Belcher?"

"I doubt. There may be, but I think the development is a poor one there."

"What faith have you in Yellow Jacket?"

"Merely theoretical. There is nothing to warrant the holding of a share. It is simply hope."

"Well, then, you have given up all hope in the Comstock?"

"Oh dear, no. I believe the Comstock is good for a great many bonanzas, but I belong to California; I am on the inside, and I expect to get in when any development is made. I am quite willing that other people should pay the assessments in the meantime."

"Have you any faith in other districts?"

"Do you know that there is an immense development of quartz mining all over California? The product of gold is greater than ever before. In Plumas, Butte and in Amador counties, as well as in other regions, there is very great activity. Then we have excellent news from Arizona, especially the Tombstone region. The Contention and Western mines contain fabulously large bodies of ore, running very high in the assays. There are some eleven mines in the Tombstone District either dividend paying or on the point of becoming such. The potential wealth of that region is something extraordinary."

"Do you know anything about Bodie?"

"The Bodie region? Yes. I and my relatives have been largely interested in the Standard. We think that the greatest gold mine in the world. All the productive ore veins on Bodie's Bluff run across the Standard ground, and I think the time is coming when they will converge below, forming one of the greatest bonanzas ever known. I think this mother lode will be in the Standard ground. Standard itself has two years and a half's dividends at the present price of the stock—that is 75 cents a share for two years and a half. The Superintendent, Mr. William Irwin, puts it down for four years, but I want to be on the safe side and not deceive my friends. Hence I say two years and a half."

"On what level is this very rich ore in the Standard?"

"On the five hundred foot and from that up. The rest of the ore is relatively low grade. There is a great deal of phenomenally good ore upon that particular level. It runs up to \$500, \$600, and \$700 to the ton. Only a few men are taking out this ore, which is being mixed with the low grade 'rock.'"

"Why do not you do better by the stockholders and pay them larger dividends?"

"Oh, we could pay \$5 a month, but then we would soon exhaust the ore body in sight and the mine might come to grief."

"But then you expect to get good ore further down?"

"We have reached the thousand foot level, are cutting out a station, and will begin to cross-cut towards the ore body. I am sorry to say that this is likely to be a long job. We are probably 600 feet away from the ore body. You see, in sinking shafts we have to be guided by our experience, and at first the ore body seemed to tend to the west, but, as on the Comstock and in other great lodes, at a certain point below it dips to the east.

Hence, on the 700 foot level we had to cross-cut 300 feet before we struck the ore body and then it was not very rich."

"Then I suppose you may sink another shaft?"

"There is some talk of our using the new Bodie shaft. You know the Bodie and Mono are sinking a joint shaft on the ground of the Double Standard. They expect to go down a thousand feet. By putting in another compartment when they reach a certain depth a drift can be run north as soon as the ore body is found, and there connect with the Standard ground. The ore body could then be worked through the Bodie-Mono shaft, but it will not be profitable to cut 600 feet east before reaching the ore body."

"Are there any other properties in Bodie that amount to much?"

"Oh, it is a very young district and some great developments will undoubtedly be made there. On the hill opposite the one on which the Standard and Bodie are situated lies the Noondays, which I think very well of. Haggin, Stewart, Carr and some very competent and wealthy men have control of the Noondays, and I think they will consolidate with the Oro, Concordia and the other properties to the east, making in time a gigantic series of mines which will pay very large dividends. If any body wants to make money they had better look sharp at the price of Bodie stocks. Bodie itself ought to be a purchase at the present price for a long time. I own a thousand Tioga which cost me \$8 a share. Bechtel also looks well. Mono is a purchase, but he who buys it must expect a number of assessments. There may be even an assessment on Bodie, but \$5,000 judiciously invested in the Bodie region ought to yield \$20,000 at the close of the year 1881. As I have said, an extra dividend—a Christmas gift—will be paid on Standard. The usual monthly dividend will be declared of 75 cents a share, but an extra one of \$1 per share will be declared probably for December. It is not improbable that another dollar dividend will be given towards the end of the winter."

ABOUT MINES.

THE SILVER CLIFF REGION AGAIN.

The Silver Cliff mill, that is, the old one, is about to shut down; so that it may be repaired and fitted to do better work. It is hoped that both the old and the new mills will be in operation by next February or March at the furthest. Silver Cliff stock has been weak and very naturally; but it is confidently expected that there will be a rise sometime before the two mills start up. The silver ore is of low grade, and difficult to work at this camp. Mr. White, of the *Tribune*, was not justified in saying that the ore would average \$30 a ton. It certainly does not turn that amount of bullion out, nor anything like it when run through a mill; and it must be that it is refractory. The District is a large one and a great deal of money has been spent upon it; but the return so far has been small.

THE DEADWOOD TERRA.

This is the name of the new organization which will include the Golden Terra and Deadwood. It is organized under the laws of the State of New York, and commences with one hundred and sixty stamps. The consolidation saves \$15,000 a month. The owners of these combined mines do not claim that the property is as good as the Homestake, but they say it is good for 25 cents a month dividends for a generation at least. The Homestake will pay an extra dividend every month. The managers prefer to do this rather than to increase the dividends, for some accident may occur which might temporarily stop production; and one interruption of a dividend would create a panic in the stock. Homestake has a large surplus and can easily pay the ordinary dividend no matter what occurs. But those Black Hills group of mines are good for long terms and can be depended on.

THE ONTARIO.

This mine looks better than ever. The shaft is down over 800 feet, but there has been no cross-cutting below the 600 foot level, where the ore was found to be of great value. This great mine ought to produce good ore for twenty years to come, for it has a great deal of ground and the ore body is rich and evenly distributed. There is but one drawback to the Ontario. It lies in a valley, between hills, and it may become a cistern, instead of a mine, as it drains the country. The largest pump in the world is now being made for this mine. That will make it possible to work the Ontario to great depths.

There are good accounts of the Empire and the Jones Bonanza, both of which are on the same silver ledge as the Ontario.

ARIZONA MINES.

The mines of this territory are looming up very largely. The Tombstone District, in the Southeast, has some eleven mines, which are on the point of becoming productive. When the Southern Pacific road is finished, which will be by the 1st of January, Arizona will be within five days journey of New York. It is not improbable that the Contention or some of the other great mines of that region may be capitalized and dealt in on the New York market.

WHY NOT ASSESSMENTS?

The Leadville *Circular*, owned and edited by "John Bonner, says, with regard to assessments: In this camp alone there are at least twenty good properties, of which any sound expert would speak well, but which are utterly wrecked, because the owners have exhausted their working capital, and have no means of raising more. Gentlemen in Philadelphia and New York talk of raising money on bonds on unproductive mines. They might just as well try to float a mortgage on a snow drift."

All this is true, and it ought to lead to some amendment to our state laws, permitting mine owners to assess, under certain restrictions. There must be at least some two hundred mining companies which are at a stand-still, because of the legal restriction respecting assessments. There ought to be some organization among mine promoters to have our mining laws put in better shape during the next session of the legislature.

A NEW CITY CHARTER PROPOSED.

A SPLENDID PROGRAMME FOR AN IMPERIAL CITY—THE NEW YORK OF THE FUTURE.

As the future government of New York is a matter which interests all who own or deal in realty, the writer called on Mr. D. G. Croly for an expression of his views as to the kind of charter which should be given to this city by the next legislature. The following is the substance of the conversation which ensued:

Writer—"Mr. Croly, you are an old editor, and are credited with holding certain novel views touching the best form of government for the metropolis; would you have any objection to stating them for the benefit of the readers of THE RECORD?"

Mr. Croly—"I have given a good deal of attention to that matter, being forced to do so during my long connection with the New York press. I have never cared to commit any paper with which I was associated to an advocacy of my personal theories; for the changes I would suggest are of a very radical character. I could not touch upon more than two or three points in an interview intended for publication."

W.—"Please state a few, then, of the novelties you would like to see introduced into our city government."

Mr. C.—"Well, in the first place, I want to see New York and Brooklyn consolidated. I think that the line of New York northward should be extended so as to include Yonkers and New Rochelle. These annexations would give us an

imperial city in size and population; not less than two millions of people could then call New York their home. The very size of the metropolis would insure better local government, for it would appeal to the ambition of able men, whose life and public services were of sufficient importance to make them known outside of the particular locality they lived in."

W.—"Then how would you re-organize the government of the great city?"

Mr. C.—"I would copy the organization of an army. Man has been on this planet many thousands of years—scientists say tens of thousands. The one work which has called forth the very highest intelligence of the race has been fighting. Every nation and race which have achieved emineace, and whose history is worth reading, have become great and memorable mainly through war. Now, it so happens that, while human institutions change in every other respect, the army of to-day is modeled upon the same organization as that which obtained in Egypt, Ninevebo, Greece and Rome. An army involves a general in-chief, subordinate generals, colonels, captains, sergeants; every grade of officer supreme in his own command, but responsible to a grade above him. Human governments are best which assimilate to the organization of the army. There must be authority and responsibility in every part of the vast machine. Now, then, with this ideal in view, I would have a mayor, who would have the appointing of all the heads of departments. His authority, also, should give him the power of immediate removal as well. Each chief of department should have the same authority over, and responsibility for, his subordinates. The house of the late A. T. Stewart ought to be purchased for the mayor of the metropolis. His salary should be \$100,000 per annum. He should be to New York what the De Medecis were to Florence. He should be the host for all the city's guests. He should do for New York what Rallston did for San Francisco; his social function being to entertain the stranger within our gates. The Lotos Club performs a useful public function in entertaining distinguished writers and artists who visit the city; but this should really be done by the chief magistrate on behalf of the metropolis.

W.—"I am afraid, Mr. Croly, that you would never get the voters of this city to tolerate a \$100,000 mayor."

Mr. C.—"You are quite right; the prevailing meanness of all governments where universal suffrage obtains is the wretchedly low salaries which are paid to government officers; the populace, that is the poor voter, will allow himself to be robbed by tariffs and riags, but he is jealous of large salaries. The large sums voted by Parliament to state officers during the aristocratic regime are certain to be cut down, as Great Britain becomes more and more Democratic. No minister is bold enough to propose to pay the debts of the Prince of Wales; and when a prince is born or married, the ministers now dread to come before Parliament for an appropriation. It is sure to provoke an agitation among the working classes. Were it not for the Tweed riag, our judges would never have had decent salaries."

W.—"But, Mr. Croly, would not your scheme of city government offer as a prize at every election all the city's spoils? If the mayor would have so much power, would not personal interest and party fury combine to make our elections actually dangerous to the public peace?"

Mr. C.—"Let me explain. I would apply civil service reform to all departments of the city government. In other words, the clerks and minor officers should be appointed for life or good behavior. See how efficient our fire department is, where this rule obtains. So with

our policemen and public school teachers. One of the dangers of our national elections is the carrying out of the theory that to the victors belong the spoils. Were a proper civil service to be established, it would put a stop to the contests between the ins and outs, which assume such serious proportions at every general election. Were we to have civil service, the office-holders would be no longer politicians; and there would be no object in the corrupt use of money on election day."

W.—"How about the number of officers and incomes?"

Mr. C.—"Each head of department should have authority to pay a minimum or a maximum salary; that is to say, he could adjust the payment to the service or to the number of years the official is employed. He would be under bonds to run his department economically."

W.—"But how would you appoint these minor officials?"

Mr. C.—"I would require all appointees to be graduates of our public schools, and they should be appointed after competitive examination, as to their general ability."

W.—"How about your local legislature?"

Mr. C.—"The old Tweed riag was very wise. It realized that it was impossible to elect a common council in New York that was not hopelessly corrupt. I speak with knowledge when I say that no common council has been chosen for the last thirty years of which the majority of the members were not purchasable. The Tweed charter wisely stripped the common council of power and vested a board of estimates and control with authority over the expenditure of monies. This fixed responsibility, and the ring were destroyed by a weapon of their own creation. Tweed, Sweeney, Connelly and Hall became personally responsible for the misgovernment of the city and the robbery of its treasury and were banished from power by an indignant public. This provision of the Tweed charter was so useful that it was retained in the amended charter, now in force."

W.—"But, you do not think much of the present charter?"

Mr. C.—"I consider it pre-eminently disgraceful to the legal fraternity and to the judiciary. It is lawyers who frame our laws; they form three-fourths of the legislative bodies which enact our laws; our executives are generally lawyers and our judges expound the laws. What is the result? Our laws are ill-digested, conflicting; every department is in confusion, and the mayor of the city has neither responsibility nor authority. Look at the action of the judges in stripping the mayor of his power to remove an inefficient or dishonest head of department. The charter clearly meant to give him that authority; but the judges have done all they could to reduce our city government to anarchy. If we had a public-spirited press, one not under the domination of lawyers, they would make the lives of the judges who render these decisions very unhappy."

W.—"Your common council, then, would not amount to much, I judge?"

Mr. C.—"All our legislative bodies are rapidly getting into disfavor with the public, none more so than our local governments; they seem to have broken down all over the country. Don't you see that every new state constitution prohibits localities, that is, towns, cities, counties, from getting in debt beyond a certain percentage of taxable property? These provisions have been necessitated by the wasteful and wicked squandering of money by the local authorities. The municipal indebtedness of the country is something appalling. Our Democratic friends are opposed to centralization—but it is the break-

down of local governments which is leading to personal and paternal government. A common council, representing all New York and Brooklyn, however, would, if chosen by the whole community, command the services of far abler men, as well as men of character, than does our present common council. Our aldermen are third-rate lawyers, saloon keepers or small politicians. Such men would find it difficult to secure a place in a convention which met to nominate candidates for the aldermen of a city of 2,000,000 inhabitants."

W.—"Have you any novelty to propose?"

Mr. C.—"Yes, one very important one; I would demand of the taxpayers that they perform one useful public function. They should become the auditors of all the bills to be paid by the comptroller of this city. I would enroll all the property holders and force them to appoint experts who should inquire into every expenditure of the government, from salaries to contracts. I would not give them any authority beyond the right to investigate and report to the heads of departments. It seems eminently fitting that the people who pay the bills should have the right to inquire into their necessity or correctness. This might seem to be a small matter, in itself, but it would have very important consequences. I tried to get some of the members of the Committee of Seventy to consider the matter, but I was too busy then to press it."

W.—"I judge you do not think much of commissions?"

Mr. C.—"Keeping in view the army idea, certainly not. I would abolish all commissions and put responsible heads to every department, then give them authority and let the press and public criticize them; and their superior officer, the mayor, could promote or remove them, as their conduct might warrant."

W.—"You hardly expect any of these reforms to be carried out?"

Mr. C.—"There will certainly be some changes in our city government when the legislature meets. The public should hold the Republican party to a stern accountability. They have the governor and both branches of the legislature. Citizens, without respect to party, ought to organize, agree upon the main points of a new charter, and, if their wishes are not heeded, then agree to upset the Republican machine in this state. Hence the discussion of the reforms needed is now in order."

W.—"Would you enlarge the powers of the local government?"

Mr. C.—"Yes; I would have the ferries run and the gas supplied by the city government. The city ought also to purchase and run the cars of the elevated roads. The aim should be to stop rich corporations from making enormous profits out of the necessities of the people, who live in New York."

W.—"Would this not lead to great abuse? Could you trust any set of officials to sell ferry tickets or elevated railway coupons, or to control gas works and steam heating organizations? See our markets, for example."

Mr. C.—"I have thought of all that. With a responsible government, with mayor and heads of departments having the authority and responsibility which I think necessary; then with all the minor officials appointed after competitive examination for life or good behavior, we would see that the city was able to transact business more honestly and economically than a private corporation. Look at our Croton Aqueduct department; then see the police and fire departments, in spite of commissions they have generally been well managed, especially the fire department. Look at our public schools and see what an efficient corps of teachers, and how excellently the public business is done. On a wider scale see our

post office departments, even without a civil service—note its economy and efficiency. The army and navy is an example of marvellous efficiency and extraordinary honesty on the part of the officers; much superior to that which obtains in commercial life. Give us responsible government and civil service reform, and the city can do business as well as a private firm; and our people need not be taxed to make fortunes for rich speculators and stock gamblers.

AN EXCELLENT ATLAS.

We have received from Mr. E. Robinson, 82 Nassau street, a Conveyancing and Real Estate Atlas of the Twelfth Ward, city of New York, compiled from official records and actual surveys. It is, without exaggeration, the very best that has yet come under our observation.

The blocks and lots are shown at a scale of 100 feet to an inch, with the official block and lot dimensions in feet and inches, block and assessment numbers. The fronts of buildings are shown in colors to designate the material of construction, also the house numbers. Open and closed streets are separately distinguished, and paved streets are shown in different colors to designate the kind of pavement, elevations above high tide are shown in feet at street intersections, sewers and the water mains with their sizes, hydrants, original farm lines with original owners names, old roads and lanes, also original water courses. The price of the work in paper, strong and handsomely bound, is \$15; backed with muslin and extra bound, \$25; the work can be obtained by addressing this office or calling on the publisher.

We desire to call the attention of our readers to the card of Mr. F. L. Tapscott, a well-known member of the New York Mining Stock Exchange. Our readers, who at all deal in the securities which he offers, will do well to call at his office, No. 1 New street, and see for themselves, in how cautious a manner the various investments in stocks, etc., are offered to them.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages IV, V and VI of advertisements.

Very few public sales were announced for the past week, auctioneers as well as referees premitting the excitement attendant upon election day to cool off before making offerings to any extent. Nevertheless the attendance at the salesroom toward the close of the week was quite fair and a few parcels were disposed of. Lespinasse & Friedman sold three lots on Seventy-ninth street, east of Fourth avenue, for \$15,000. A two-story brick store on White street, near Elm, was sold by Hugh N. Camp, for \$12,750.

In our advertising columns it will be seen that some important announcements are made by several auctioneers for the 16th and 17th of this month.

The important sale, to be held by Mr. Draper, comprises excellent business property in various downtown streets, also on the extreme East Side. This is a partition sale, of more than ordinary interest, of which we will speak more at length in our next issue and in the meantime refer investors to the details as given elsewhere.

On the same day another partition sale is to be held by E. H. Ludlow & Co., for which we bespeak the attention of our readers. It will be seen that the property here offered comprises lots on the line of Broadway and Sixty-second street, a locality just budding into improvement, and where, as will be seen below, an important sale has just been made at private contract. Other lots, along Tenth and Twelfth avenues, are to be offered by the same auctioneers.

On the 16th inst., Mr. Harnett will sell valuable store property on Franklin street, also other improved property on Greenwich and other streets.

GOSSIP OF THE WEEK.

The result of the elections was hailed with satisfaction by frequenters of Pine street, regardless of their political preferences. It was acknowledged on all sides that there would be no further delay to the

activity about to set in, and the week closed upon numerous private transactions for vacant lots about being closed. Indeed, several contracts would have been closed yesterday but for the interference of lawyers, with whom delay in time is always considered an advantage.

The purchase of No. 32 Park row, a six-story office building, running through to Theatre alley, by Mr. Jay Gould, for \$101,000 must not be regarded as an intention on the part of this capitalist to invest largely in real estate. It is only recently, when urged by one of his friends to purchase more real estate that he pleaded want of time to enable him to watch extensive operations in that commodity. He said, in fact, that he was always a large borrower of money owing to his railroad enterprises. The construction of additional lines in the West and Southwest required constantly, more and more capital, and all the attention he could bestow upon it. The price paid by Mr. Gould for the Park Row building being considered high by some parties and yet comparatively not so high as the Brooklyn Bridge trustees had to pay for property not so eligibly located, an effort was made, yesterday, to obtain an insight into the purchaser's intentions with said building. Mr. Gould, however, when called upon, replied that he preferred, for the present, not to give any further information than appeared upon the list of transfers, and considered it a private transaction. In Pine street it was asserted that property along Park row could only command such high prices, owing to its eligibility for newspaper offices, and that the purchase was no doubt made to accommodate either an established newspaper compelled to change its quarters, or a new paper of large dimensions about to be started in opposition to the Associated Press concerns, the American Union Telegraph Company to furnish the reports now supplied by the Western Union. It must also be borne in mind that in whatever newspaper enterprises Mr. Gould has yet embarked, he always secures for himself the real estate part as well as the good will of the newspaper.

Per contra we desire to direct the attention of real estate dealers to the policy which guides another gentleman, also well known in Wall street, who finds plenty of leisure to invest his Wall street savings in the real estate of New York. Mr. Josiah Belden, of the late firm of Fisk & Belden, now of Belden, Bennett & Co., purchased, last year, the northeast corner of Fifth avenue and Eighty-sixth street for \$88,000. Recently he has purchased property in Greene street amounting to \$160,000, and has also made loans since on Greene street property amounting fully to \$50,000. On Thursday last he took title to 113, 115 and 117 Spring street, which property was secured for him by Messrs. L. J. & I. Phillips for \$170,000, not \$110,000 as erroneously printed in the daily papers of yesterday. The Messrs. Phillips have also sold, during the past week, a valuable plot of vacant property, north of the Park, amounting to about \$100,000, details of which have not as yet reached us.

An important West Side real estate operation has been concluded by John McClave. He has sold a plot of land on the corner of the Boulevard and Sixty-second street. The frontage on the Boulevard is 116 feet, and that on Sixty-second street, 81.7. The price is \$120,000, and a condition of the sale is that the purchaser—Mr. John Thompson—shall immediately proceed to erect on the plot a magnificent flat-house, to cost at least \$200,000, according to plans and specifications by J. C. Markham. The building is to be seven stories high, the two first stories of stone, the upper stories of brick; the front entrances to have granite columns, with splendid porches, bronze lamp-posts and balconies. The interior is to contain all the modern conveniences and luxuries, elevators, hardwood finish, steam heat, tile floors, etc. Mr. McClave is now negotiating the sale of another plot in this same neighborhood, designed to promote still more colossal improvements.

Four lots on the north side of Sixty-seventh street, between Fifth and Madison avenues, have been sold at private contract during the week for \$30,000 each. These lots were sold six months ago for \$25,000.

Mr. John D. Crimmins has sold, through Henry Zittel, three lots on the north side of Seventy-third street, 125 feet east of Fifth avenue, for about \$21,000 each. Mr. Ruddel, the builder, is the purchaser.

Fox, Bros. have sold to Mr. Edward Clark the southwest corner of Eighty-fifth street and Eighth avenue, 27.2x100, for \$18,000.

Scott & Myers have sold four lots on south side Seventy-first street, 125 feet west of Eighth avenue, for \$8,000 each, also one lot on the south side of Sixty-eighth street, 175 east of Fifth avenue for \$27,500. Other transactions, the details of which they as yet refuse to communicate, have been closed by this firm.

Messrs. Mordecai & Bellamy, have sold at private contract, two lots on the north side of Sixty-fourth street, 375 feet west of Eighth avenue, for \$8,000 each.

Mr. Luyster has again sold another of his houses, 22 East Sixty-seventh street, for \$50,000 cash. Mr. C. C. Faher is the purchaser.

In our list of projected buildings it will be seen that the plans for McCreery's new dry-goods palace on Fourteenth street, heretofore alluded to in these columns, have been filed by Messrs. Jardino, the architects. The southwest corner of Park avenue and Fifty-seventh street is to be improved by two handsome houses, to cost \$60,000 and \$40,000. Other plans for more buildings in Harlem have also been filed.

In Brooklyn, building activity continues without interruption. Fourteen new dwellings on Reid avenue, three more on Hancock street, and five on Fifteenth street, form only part of the long list of new structures, the plans of which have just been completed.

In Kings County, an action has been commenced by the Knickerbocker Life Insurance Company of New York, to foreclose a mortgage on some forty lots, situated on McDonough, Decatur and Macon streets, and Yates and Lewis avenues. The same concern are about foreclosing a mortgage on property in East New York, in Atlantic, Cypress and Liberty avenues. Ivy and Grove streets.

The following are the sales at the Exchange Sales-room for the week ending Nov. 5:

* Indicates that the property described has been bid in for plaintiff's account:

*Kingsbridge road, w s, plot I on map of Washington Heights, 13 city lots. Homoeopathic Mutual Life Ins Co. (Amount due, about \$12,350).....	11,500
White st, No. 85, s s, 106.8 w Elm st, 25x100, two-story brick store. T. C. Sloan. (Am't due, about \$12,075).....	12,750
William st, No. 188, e s, four-story brick building with lease of lot, 16x15.4x16x17.4. William Brickelmaier. (Ground rent \$600 per annum.) (Executor's sale).....	5,200
2d st, No. 193, s s, 152.6 w Av B, 19 4x105.5, three and two story brick store and dwelling Anna G. Lurch. (Amount due, aht. \$5,700).....	9,500
3d st, No. 322, s s, 73 w Av D, 20x70.3, three-story brick dwell'g. J. G. Wendel. (Am't due, about \$3,650).....	6,400
79th st, s s, 100 e 4th av, 75x102.2, vacant. E. D. Crosby. (Am't due, about \$12,600).....	15,080
*116th st, n s, 264.3 w 3d av, 18 9x100.11. Leila S. Scrymser. (Am't due, about \$12,527).....	10,000
*155th st, s e cor 10th av, runs east 150 x south 99.11 x west 25 x south 49.11 x west 25 x north 20 x west 100 to 10th av, x north 124.10 to beginning. John Castree. (Am't due, aht \$35,550).....	18,150
*Av B, w s, 40 s 15th st, 20x60. John Finkelner. (Amount due, about \$2,100).....	6,821
*Alexander av, w s, extdg. from 138th to 139th st. 200x150. Herman Stursberg. (Am't due, about \$14,200).....	35,650
*Washington av, w s, 62.5 n Quarry road, 50x150. Elizabeth A. Tanton. (Amount due, aht \$3,300).....	2,500
Total.....	\$133,471

BROOKLYN, N. Y.

In the City of Brooklyn, Messrs. T. A. Kerrigan and J. Cole have made the following sales for the week ending Nov. 3:

*Butler st, n s, 425.5 w 6th av, 20x100. The Mechanics Fire Ins. Co.....	\$5,000
*Kosciusko pl, n w s, aht 350 n e Broadway, 50 x 99. Amos C. Treadway.....	1,000
*Pacific st, s s, 90 e Clinton st, 25x100. Thomas J. Wayne.....	5,500
*Park pl, No 105, n s, 417.4 e 6th av, 20x100. J. O. Whitehouse, exr.....	7,800
Schenck st, w s, 144 n Lafayette av, 16.3x100. Chas. D. Smith.....	4,500
*Atlantic av, n s, 185.1 w Nostrand av, 16.8x50.....	
Herkimer pl, s s, 185.1 w Nostrand av, 50x49.1.....	
Gilbert P. Williams.....	2,000
*Putnam av, s s, 83.4 e Ormond pl, 14x100. George O. Ditmas.....	2,000
*Willoughby av, s s, 310 w Lewis av, 20x100. Joseph Lee.....	4,000
Total.....	\$31,800

BUILDING MATERIAL MARKET.

BRICKS.—On the market for Common Hards there has been a further gain on values, and the market presents quite a firm tone, with receivers in a very confident mood. The stoppage of production at about every point along the river has left manufacturers without a constantly increasing surplus to force them into full shipments, and the result is that the amounts now sent forward cover what may be considered as only an ordinary movement. Against this is to be found a demand from consumers about equal to the average for some time current, and cargoes, therefore, secure sale quite as rapidly as offered, with not a few engaged before arrival, and enough competition to lead to a gradual increase of bids and buyers prompt in closing when anything to suit them becomes available. "Haver-traws" are now generally quoted at \$3.75@6, and some of the favorite brands held higher, with the "Up Rivers" valued at \$5.50@5.75 per M. Pretty much all the stock taken will, as above intimated, find immediate use, and it is very rare that dealers find an opportunity to pile away anything against winter wants. Pale Brick have not been anxiously sought after, but still appear to find a demand quite equal to the supply and have sympathized with the better grades in making an advance, with quotations now named at \$3.25@3.50 for good stock. Fronts are in fair average request still, and generally reported as showing a firm tone all around.

HARDWARE.—A pretty good business is doing on seasonable and regular outlets, but the market cannot be called positively active, and the movement is evidently settling off somewhat. Some expressions of disappointment may be heard, but dealers are to a fair extent satisfied with the fall trade, and expect an increased run of orders from nearby interior points at an early day. Values in most cases continue to be well maintained. A new list has been issued by the Greenfield Tool Company as follows: Planes—A 1 first grade Bench and Molding Planes to No. 739 (except Planes with English irons), 25 per cent. discount; Bench, second grade, stamped "New York" (same list as No. 23 to 30), 30 do; Bench Planes with English Irons (Moulson Bros.) 20 do; Bench Planes without irons, 20 do; Plane and Saw Hardies, 30 do; Plane Irons, "Diamond" stamp, 30 do; Plane Irons, "Mason Bros.," 40 do; Plow bits, Moulding Irons, &c., 10 do. Bolt Cutters and Bevels—Reece Bros., Patent Screw Plates and Hand Bolt Cutters, Taps and Dies, &c. 20 per cent. discount; Stratton's Patent Levels, 25 do.

LATH.—The supply of lath during October was quite full, over 14, 00,000 coming to hand from the Provinces alone, and the majority during the last fortnight of the month. As recorded in our last, the accumulation at one time became pretty heavy, and broke the market down some 15 per M from the highest point; but at this, sellers gained a new foothold, and have since maintained their position very well. Indeed, as we write, the feeling seems to be firmer, if anything, with \$1.90 asked, though we hear of no sales in excess of \$1.85. Receivers claim that rush of supplies has past, and that there is no probability of any further heavy accumulations. In first hards, taking place during the balance of the season. It is also further asserted that a large proportion of the recent purchases will go into early consumption, and that the wants of dealers securing winter stocks must exhaust future offerings as they come to hand.

LIME.—There has been quite a full offering of stock from the Eastward since our last, the accumulation at one time reaching several thousand barrels. There was, however, demand enough to exhaust the supply without much difficulty, and preserve a uniform tone on values. Receivers, in fact, talk quite steadily, and while scarcely venturing upon a prediction for much of an advance, evidently feel confident of holding the market where it is for some time to come. There is also a good full trade doing in State stock, and a firm market ruling. Most of the demand at present is for consumption, though a portion of the stock taken is piled away for winter use.

LUMBER.—Business progresses without much showing of excitement, and it is not uncommon to hear reports complaining over the condition of the market. Even the most dissatisfied will admit, however, that about all the desirable stuff they have to offer, and some of the undesirable has been placed as soon as available, and it is not uncommon to have buyers awaiting a fresh supply. Indeed there is a full average supply of lumber selling and wanted, and the conservative portion of the trade evidently consider the position as healthy and prosperous. The accumulations in yard commences to show pretty fair proportions, and in a few cases dealers can offer opportunity for any ordinary selection, but in a large number of stocks the assortment is as yet only second rate, and can be added to with good advantage. Local consumption and near-by shipping orders are promising, and the export trade will undoubtedly eventually take a full average amount, though some of the buyers for this outlet continue to stand off for the present.

Spruce has a pretty good demand, but it is not yet fully settled in tone. On the average run of what may be termed good, serviceable random cargoes, the bids are prompt, the sales quick and more could in all probability be placed if available, but common quality is difficult to place and the choice grades without much in the way of direct demand. Not many specifications are now being offered for estimate as manufacturers are unwilling to figure upon them at this

time of the year. The range of quotations given still stands at about \$18.00@20.00 per foot, both a fraction lower and higher are mentioned, according to quality.

White Pine continues to receive additions to the accumulation, and probably will do so until interior navigation closes, but this is about all discounted and has no great influence upon the position. The demand is good from local and near by out of town sources, and there is also known to exist considerable wants on export account, but shippers do not move freely as yet, having quite a number of back purchasers to get out of the way. We quote \$17@19 per M, for West India shipping boards; \$23@24 for South American do; \$15.50@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine continues under call for cargoes to be exported direct from primary points, and agents here are hooking a fair number of orders. There is also an occasional specification handed in for estimate from local and near-by consumers, mainly for distant delivery. The stocks in hand are neglected and have only a nominal value. We quote random cargoes at about \$24@25 per M.; ordered cargoes, \$24@26 do.; green flooring boards, \$25@26 do.; and dry do. do. \$25@27. Cargoes at the South \$18@18 per M. for rough, and \$20@21 for dressed at Gulf ports.

Hardwood retain quite as cheerful a tone as any portion of the lumber market. There was recently a pretty full accommodation of Walnut in first hands and a few holders weakened a trifle. The bulk of the offering, however, appears to have found a place and values are well sustained, while all other grades of desirable quality are scarce and firm. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. cills, \$18@20 do. cherry, \$45@47 do; white wood, 1/2 and 5/8 inch, \$25@27.50, and do. inch, \$23@25 do; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

At the yards the movement is good and the general tone quite steady and satisfactory. Sales are in a few cases making above quotations, but this appears to be due to greater risk assumed by sellers or on the strength of some special selection allowed.

From among the lumuer charters recently reported we select the following:

A Br. brig, 296 tons, from Portland to Bowling (Scotland), Spool Wood, private terms; a new Am. barque, 648 tons, from Bangor to Palermo, Box Shooks, 4c.; a Br. schr., 313 tons, from Montreal to Buenos Ayres, Lumber, \$15.50 net; a schr., 312 tons, from Pensacola to Jamaica, Lumber, \$9.75; a Br. barque, 500 tons, from Fernandina to Montevideo or Buenos Ayres, Lumber, \$19 net; a Ger. barque, 440 tons, from Portland to Paysandeu and back north of Hatteras, Lumber out \$18, covering the return freight; a schr., 384 tons, and a brig, 290 tons, from Portland to Matanzas, Shooks and Heads, 32c.; a Br. schr., 206 tons, from Portland to Cardenas or Matanzas, Shooks and Heads, 32c.; a schr., 351 tons, from Portland to Cardenas, Shooks and Heads, 32c.; a schr., 223 tons, from Portland to Havana, Shooks and Heads, 35c.; a schr., 382 tons, same voyage, 33c.; a brig, 242 tons, same voyage, Shooks and Heads, 33c, and Hoops on deck, \$6.50; two schrs, hence to Wilmington, N. C., Phosphate, \$1.75, thence to Hayti, Lumber \$8 and port charges, and back to New York, Logwood, \$5.75; a schr., 200 M Lumber, from Jacksonville to New York, \$8.75, or Philadelphia \$8.50; a brig 300 M Lumber, from Brunswick to Norfolk, \$6.50; a schr., from Portland to New York, Lumber, \$1.80.

Exports of lumber from the port of New York:

	This Week, feet.	Since Jan. 1, feet.
West Indies	661,263	24,909,123
South America.....	345,795	16,180,774

Europe, Continent.....	64,000	2,707,021
Europe, United Kingdom.....	51,000	7,398,515
Total.....	1,418,375	57,638,704

GENERAL LUMBER NOTES. STATE.

The Albany lumber market, for the week ending November 2, is reported by the Argus as follows:

The general trade in the District since our last report has been good, though not active, with about the usual trading we have in the week which precedes the State election. We have not any change in prices to report. Receipts, though not so free as at a corresponding date last year, are ample for the trade demand and sustain a good and well assorted stock.

The manufacturers of coarse lumber are actively at work, the recent rains having set the northern mills in motion and floated logs to the booms; prices are firm.

Up Lake and canal freights are firm, with an upward tendency.

The receipts of lumber by lake at Buffalo for the week were 7,010,000 feet and ——— car loads with firmer canal freights. At Oswego, 4,350,000 feet.

The receipts at Albany by canal from the opening of navigation to November 1st were:

Bds & Sctg. ft.	Shingles, M.	Timber, c.f.	Staves, D
1879..	289,361,600	9,860
1880..	332,900,500	6,379	5,400 638,300

Freights from Bay City to Buffalo and Tonawanda, \$3.00 M feet; from Saginaw, \$3.50. From Buffalo to Albany \$2.75; from Tonawanda to Albany, \$2.40 M feet. Lake Ontario freights from Port Hope to Oswego, \$1.25 M feet, from Toronto to Oswego,

\$1.50, and from Oswego to Albany, \$1.90@ \$1.95. From Ottawa to Albany \$3.50 M. feet. River freights are without change.

THE WEST.

From the weekly summary of the *Northwestern Lumberman*, we select the following:

Boston reports a continued good feeling, with an increased firmness in the values of Western stock. Prices are gradually stiffening, and figures are now refused which would have been gladly accepted a few weeks ago. An advance in freights has been an important factor in this regard, dealers valuing their stock fully up to the old basis with increase of freight added. Eastern stock is much wanted, and with a continuance of dry weather in the Northeast, this market exhibits a bullish tendency in this department. Dealers are now laying in their winter's supplies in all grades, which tends to equalize the market. The lack of lumber vessels at the docks is noticeable. Little change is noted in Southern stock and the weekly receipts reach about 1,300,000 feet.

Canadian advices represent a fair but not heavy local trade, while the mills of the East are in the same trouble from lack of water to float their logs as are the lumbermen of Maine. In the Ottawa district, a lack of logs has been experienced in some quarters, and the sales of manufactured stock to the States has absorbed about all the available supplies. Some complaint is being raised regarding the specific character of the custom's duties on lumber shipped to the United States, by which culls worth from \$5 to \$8 per thousand feet are charged \$2 per thousand, while the better grades, worth from \$25 to \$35, pay no more, that which can least afford it being charged at the rate of nearly 40 per cent. ad valorem, while the more valuable escapes with only about 5 to 10 per cent. on its value. As perhaps nearly one-half the stock comes under the lower designation of grade, the manufacturers complain of the duty as of a discriminating character. Deals are moving freely toward Quebec, and the demand for barges from Montreal is large. The freight from Ottawa to Quebec is \$2.50 and to Montreal \$1.15. Cull lumber is plentiful at the mills, but better grades are difficult to obtain and prices rule higher. A large demand is noted from Europe for sash, doors, blinds, &c., and the exportations from the Dominion are said to be unprecedented.

At Saginaw no material change is noted since last week. The better grades are in large request at full prices and difficult to obtain, while in coarse stock an accumulation is reported, with a disposition to shade prices. The weather during the past fortnight has not been favorable to those sections which mainly rely upon water transportation in the shipment of lumber, and this has, no doubt, had its effect upon the trade of the Saginaw Valley and lake region. Freights have materially advanced, which will have a tendency to check sales for the rest of the season, while an early closing of navigation is predicted and generally expected. The stock to be carried over winter on the docks of the river mills, will probably exceed the figures of any previous season, while the manufacture and the extent of the season shipments are far in advance of any previous experience.

In interior Michigan the railroad mills generally are unable to supply the demands upon them for want of cars. The prices of timber and lumber rules firm.

Private advices mention a growing stringency in the pine land market of Michigan. One prominent operator upon the west shore informs us that for many years he has been accustomed to have stumpage or cut logs urged upon him at this season of the year, but so far has not only not been approached by timber owners, but finds it exceedingly difficult to make any contracts. He says that his experience is that of mill men generally, and that the sudden dropping out of holders of small lots of pine, has awakened a consciousness that the concentration of the supply, in the hands of a comparatively few holders, has attained much greater proportions than had been generally supposed.

From Wisconsin points and the Mississippi river we have a uniform assurance of a demand for lumber which cannot be supplied promptly for want of cars.

A review of the entire field shows no symptoms of a decline in prices, but rather of a steady trade at full the present figures, with a tendency to an advance, especially at such points as are affected by the advancing freight rates. The indications point to a strenuous endeavor in all sections to fill the streams with logs during the coming winter to an extent never before realized. If success attends this endeavor, none need argue as a result a vastly reduced market value, as the increased value of stumpage, and the increased cost of the natural expense attending the work of getting it to the streams in the increased price of provisions and wages, must effectually preclude any warrantable reduction in the value of lumber. Stumpage is, this winter, nearly—if not quite—double what it was a year ago.

LUMBERMAN AND MANUFACTURER, } MINNEAPOLIS, Minn., }

Piece stuff quoted at Chicago at \$7 tells a long story in few words. A drop of \$2.50 in two weeks and a reduction to about \$4.75 per M at the Michigan mills. Somebody is getting hurt and others will be before this folly is ended. It would seem as if the manufacturers are crazy to be hurrying 40 cargoes per day on to a market with the bottom knocked out of it. The enormous stocks which have been laid in at Chicago at summer and fall rates if sold at the decline, ought to bankrupt a large part of the dealers. But we are inclined to think that the wonderful demand for lumber and the fact that navigation will soon close will have the effect of reviving prices.

The Times quotes common boards at \$14.50 to \$15,

and common dimensions at \$11 to \$11.50 at the city yards, which shows a strong probability that these cheap purchases have been made by yard men who intend to reap some benefit from the transaction. If so all is serene.

St. Louis is now shipping about one million feet per day at quotations, but watching carefully her trade and territory, ready to meet any emergency that may arise. The same may be said of Hannibal, where they have all the orders they can get cars to fill. The other river ports are doing a business far in excess of last years trade, and with the exception of Minneapolis there is no difference in lists and no cutting that we can hear of. There has been an excess of orders accumulating at nearly all points. At Eau Claire great complaint is made of a want of cars. The Lumber Co. are over 250 cars behind orders.

Logging operations are inaugurated on a large scale in Minnesota and Wisconsin. The snow of last week set many to hauling logs on the upper Mississippi. Very few Western mills have shut down, but cannot expect to run more than two weeks longer.

THE EAST.

The Boston Commercial Bulletin says:

There continues a good distribution of supplies, and prices evince the stability which has characterized most grades during the month. This week, however, like its predecessor, has not been marked by any extensive price fluctuations, nor has the demand assumed any increased proportions. The large accessions of water at the Eastern mills has stimulated operations and eastern grades, especially spruce, are readily obtained. Prices for the latter, however, have gradually improved during the month under the stimulus of an actual demand, and as high as \$17 has been realized. Supplies, although small at the moment, promise to be larger, in view of the increased activity at the mills.

Western grades are firm, with an upward tendency, in view of the approaching advance in freights at the West. Receipts here just now are exceedingly large, but the accumulations are not sufficient to depress values. Southern pine shows increased strength on dimension factory, which is quite scarce, particularly in sizes. Shipstock is quiet. Floorings meet with a fair demand.

Mr. Lysander Strickland of the firm of L. & F. Strickland, lumber manufacturers and dealers at Great Works and Bangor, Maine, has for many years kept a complete memoranda of the lumber operations of the Penobscot river, and supplies the Bangor Commercial with the following statistics of the logs rafted for the past 10 years through the Penobscot boom:

Year.	Feet.
1870.....	139,000,000
1871.....	996,000,000
1872.....	216,000,000
1873.....	135,000,000
1874.....	120,000,000
1875.....	126,000,000
1876.....	82,000,000
1877.....	81,000,000
1878.....	110,000,000
1879.....	101,000,000
1880.....	112,000,000

Surveyed from the commencement of spring 1880 to August 1, 1880:

	Feet.
Green pine.....	4,388,241
Dry pine.....	2,142,298
Hemlock.....	5,530,558
Spruce.....	42,411,067
	55,172,124

About 22,000,000 feet of logs are hung up. They have not been driven into the boom, and will not be until the spring of 1881. The prospect is that a larger amount of logs will be cut in the coming winter than for some years past. The water in the Penobscot remains too low for the operation of all the mills. There may be 15,000,000 feet of logs to winter over on the Penobscot. The price of logs and manufactured lumber are improving each month. The prices are now higher than for some years.

Twenty million feet of logs are hung up in the headwaters of the Kennebec, between Carratunk and Skowhegan, waiting a rise in the river. Two million feet of these belong to Sturges, Lombard & Co., of Augusta. Lumbermen never experienced so much difficulty in getting their logs down as this season. H. W. Jewett has just finished a large building for storing lumber near his mill. His logs are all piled for his winter's use, and entire preparations made for a good winter's work. The lumbermen in the city generally will endeavor to make up their lack of summer business—occasioned by want of logs—by increased activity during the winter.

The Augusta, Me., Journal says: "The rise in the water makes the hearts of our lumbermen rejoice. It will be worth to them a mint of money. Lumber is booming in price, and as logs will now come down after a lively fashion, the large orders can be filled, and a good fall and winter's work will follow, making business lively on all our lumber rivers."

FOREIGN.

From the *Timber Trades Journal* the following:

LIVERPOOL.

The import during the past week has been very light, only about six vessels having arrived here with entire cargoes of timber, deals, sleepers, &c.; the part shipments from Canada and the Baltic might perhaps amount to three more moderate-sized cargoes, and, as these are all upon contract, our market has been very quiet, and has been confined entirely to the retail business. The large importation of last month has had a depressing effect upon buyers here, who are now inclined to stay their hands until they

can clearly see that the late prices demanded by shippers abroad are warranted by the cessation of shipments; for, should they continue, even at a much less rate than was the case last month, lower prices must inevitably be submitted to if sales are to be made.

At the same time Importers do not seem to be disposed to accept the prices offered, and several cargoes of spruce deals are being stored to await the further course of events; what this will be time only can show.

Redwood deals are now offering upon this market, and consequently there is a weaker feeling for these goods, for these are not generally put forward excepting early in the season; hence the fear that some cargoes may possibly be sent here, which would tend to depress a market that cannot at the best of times carry many redwood goods.

Pitch pine continues firm, and there is no change in prices, sellers holding out for late rates, and what business is done is for future delivery, the business on the spot being confined to sales by retail at the recent high rates, which are likely to be maintained for some months to come.

TYNE.

The arrivals of wood goods during the last seven days have been larger, several ships from Harnosand and district having come to hand; a few more are expected before the close of the season, and also some from Quebec; but so far as I can glean the quantity to come forward is not large. No change has taken place in the demand since the date of my last report. Prices remain, on the whole, very firm, and, stocks not being large, no abatement need be anticipated. The only goods for which any demand appears to be felt are for shipbuilders, and these are mainly confined to Quebec shipments.

GLASGOW.

The past week has been an unusually quiet one in the trade here, the brokers not having held any public sales at Clyde ports, and there are no arrivals of any consequence. The trade, however, including house and shipwrights, and other consumers, appear to be fairly supplied at present with all the varieties of merchantable wood.

Of American walnut, which has come more into common use than at any former period, the import for the past week or two has not been on so sparing a scale as usual, over 500 logs having been imported within the month, and most of these have been at once taken up by consumers.

With reference to pine deals, mentioned in last note as assuming a bulky appearance in Yorkhill yard, large portions have been sold privately, so that the stock in first hands is materially reduced.

Recent mails from Rio de Janeiro report:

Pitch Pine Deals.—Market very firm, good cargoes being worth 33\$000 rs. per dozen 3x9x14. The only arrivals is the Helen Angier from Mobile, which vessel brought 450,828 feet which were sold at 37\$000 rs. per dozen 3x9x14.

Spruce Pine Deals.—No arrivals. Worth 33\$000 rs. per dozen. Needed.

White Pine Lumber.—The Lorena, from New York, is the only arrival and brought 109,022 feet, of which 10,191 were on order and the balance, 98,831 feet, fetched 110 rs. per foot. Market closes very firm and we quote 115 rs. per foot.

METALS.—COPPER.—Ingot has found a slow demand, and almost entirely for jobbing parcels with no great change on the general situation of the market. Supplies are under good control. We quote at 183¼@187½c. for Lake. Manufactured Copper selling along slowly in small lots, and as a rule held steadily at combination rates. We quote at 183¼@187½c. for Lake. Manufactured Copper not quite so active, but the movement, on the whole, fair, and values steadily maintained. We quote as follows: Brazier's Copper ordinary size over 16 oz per square foot, 28c. per lb; do do do, 16 oz and over 12 oz per square foot, 30c per lb; do do, 10 and 12 oz, per sq foot, 32c per lb; do do, lighter than 10 oz per sq foot, 34c per lb; circles less than 84 inches in diameter, 31c per lb; do 84 inches in diameter and over, 34c per lb; segment and pattern sheets, 31c per lb; locomotive fire box sheets, 28c per lb; Sheathing Copper, over 12 oz per sq foot, 26c per lb and Bolt Copper, 28c per lb. Iron

—Scotch Pig has found a moderately active demand, buyers taking only enough for early requirements, but the supply of really desirable goods offering was moderate, with holders in most cases inclined to carry with a somewhat steady showing. We quote at \$.02@.23 per ton, according to brand, delivery and quantity. American Pig has been held with a showing of considerable steadiness in many instances. The demand shows no unusual animation, but, in a quiet way, there is evidences of growing interest among buyers, and holders of desirable parcels are much less inclined to realize. Advice from primary points are as a rule stronger. We quote at \$24@25.50 per ton for No. 1; \$21@22 do for No. 2; and 19@20 for forge. Rails have found some demand, and of Steel fair sales were made. Quite a number of Iron Rails were also called for, but buyers and sellers remained too far apart in their views for much business. We quote at \$42@45 for iron and \$58@63 for steel, according to delivery. Old Rails \$25@27 per ton; scrap \$25@27. Manufactured Iron has been dull, including some falling off in structural shapes, and prices a little unsettled, though without much strength. We quote Common Merchant Bar, ordinary sizes at 23@24c. from store, and Refined at 25@26c.; wrought beams at 3½c. Fish plates quoted at 2¼@2½c.; track bolt and nuts, 3¼@3½c.; railway spikes, 3¼c.; tank, 3@3.1c.; angle, 3c.; best flange, 6c.; and domestic sheet on the basis of 3½c. for common Nos. 10@16. Other des

criptions at corresponding prices, with 1-10c. less on large lots from cars. LEAD.—Domestic Pig found about an ordinary demand with plenty of stock offering, and holders as a rule willing to accept about former rates. We quote 4 1/4 @ 4 1/2 c. The manufactures of lead are steady and quoted: Bar, 6c; Pipe, 6 1/2 c., and Sheet, 7c., less the usual discount to the trade; and Tin lined pipe 15c. Block Tin pipe, 40c., on same terms. Tin—Pig has met with a better demand, in part speculative, and new strength was infused into the market, with offerings of stock reduced. We quote 20 @ 20 1/2 c. for Australian. 20 1/4 @ 20 1/2 c. for Straits, 20 @ 20 1/4 c. for English Refined, 19 3/4 @ 20 c. for do. Common. Tin Plates have sold freely for future delivery, but on the spot the movement mostly of a jobbing character, and without positively new features. We quote I. C. Charcoal, third cross assortment, \$6.00 @ 6.12 1/2 for Allaway grade, and \$6.25 for Melyn grade; I. C. Coke \$4.87 1/2 @ 5.00 for B. V. grade; \$5.12 1/2 @ 5.25 for Yspitty grade; Charcoal terne \$5.25 @ 5.50 for Allaway grade. 14x20: \$11 @ 11.12 1/2 for do., 20x28: Coke terne, \$1.80 @ 1.87 1/2 for Glais grade, 14x20, and \$10 @ 10.12 1/2 for do., 20x28—all in round lots. Spelter remains comparatively quiet, with the line of value showing no great variation, and quoted 5 @ 5 1/4 c. Sheet Zinc in moderate demand, and ruling steady at 7 1/2 @ 7 3/4 c., according to quantity.

NAILS.—Demand has been somewhat irregular, and not on the whole so active as general. Dealers appear to have sufficient accumulation on hand to satisfy immediate wants, and incline to move with greater caution, and, with shipping orders falling away, the movement is curtailed. The line of valuations about as before, the list rates remaining at old figures, and outside lots at all sorts of figures down to \$2.85 @ 2.90 per keg.

We quote nominally 10d to 60d common fence and sheathing, per keg, \$3.15 @ 3.25; 8d and 9d, common do, per keg, \$3.40 @ 3.50; 6d and 7d, common, do per keg, \$3.65 @ 3.75; 4d and 5d, common, do per keg \$3.90 @ 4.00; 3d and 4d, light, per keg, \$4.65 @ 4.75; 3d, fine, per keg, \$5.40 @ 5.50; 2d, per keg, \$5.40 @ 5.50. Cut spikes, all sizes, \$3.40 @ 3.50. Floor casing and box, \$3.90 @ 4.65. Finishing, \$4.15 @ 4.90.

CLINCH NAILS.

1 1/4 inch, \$5.65 @ 5.80; 1 3/4 inch, \$5.40 @ 5.50; 2 inch, \$5.15 @ 5.30; 2 1/2 @ 2 3/4 inch, \$4.90 @ 5.00; 3 inch and longer, \$1.65 @ 1.75.

PAINTS AND OILS.—Business continues to fall away somewhat, and the market lacks positive animation on all outlets. There is, however, still a great deal of stock likely to be wanted at near-by interior points, and more or less on local account, and holders do not weaken much in their ideas of value. As a rule, the supply and assortment is equal to all calls. Leads are still somewhat unsettled, but most of the regular dealers appear inclined to retain the regular list rates. Linseed Oil has not been very active, and the movement in the main covers the ordinary run of trade orders. On prices former figures are retained, and the feeling is pretty firm. We quote at 5 1/2 @ 5 1/4 c. per gallon from crushers' hands.

PITCH.—Operations are moderate and in ordinary form, with little that is really new or interesting to be found on the market. Supplies ample and prices unchanged. We quote at \$1.90 @ 2 for City, delivered.

SPIRITS TURPENTINE.—The general situation about as before. Most of the supply is under control of speculative holders, and full rates are in all cases asked, but the movement of buyers careful, and not much stock called for except as a matter of actual necessity. Southern accounts are firm. As this report is closed, the quotations stand at about 45 1/4 @ 46 c. per gallon, according to the quantity of stock handled.

TAR.—Demand fair in a jobbing way, and at full rates, the supply proving somewhat moderate and very well under control. On the wholesale market sellers have most of the advantage, and insist upon extreme prices. We quote \$3 @ 3.25 for Newberne and Washington, and \$3 @ 3.37 1/2 for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for Quit Claim deed i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranty.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

ALPHABETICAL INDEX.

NOTE.—Names in SMALL CAPITALS convey property from husband to wife.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded. Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date

SOAP-STONE BASE BURNING STOVES
a specialty.

TO INVESTORS.

THE NEW YORK & NEW JERSEY RIPARIAN LAND AND DOCK IMPROVEMENT COMPANY, CAPITAL TWO MILLION DOLLARS, divided into shares of TWENTY-FIVE DOLLARS each, offer a limited amount of their working capital stock for sale on very favorable terms.

This company control a large frontage on the New Jersey side of New York Bay, adjoining the New Jersey Central Railroad, and are about to dredge out a Ship Canal, 20 feet wide, 26 feet deep, running out 3,500 feet into New York Bay toward the Narrows; thereby creating a new outlet to the ocean for the produce of the Great West and Southwest. They also are to create upward of 100 acres of solid ground out in the Bay, upon which Grain Elevators, Warehouses, and factory buildings can be erected.

The importance of this enterprise to the commercial and manufacturing interests to New York and New Jersey, as well as to the growing Western country, can well be understood by those who are seeking safe investments if they avail themselves of the opportunity to be thoroughly informed by calling at the office of the above-named company, 64 and 66 Broadway. The few thousand shares of stock now on the market can be obtained through the EXECUTIVE COMMITTEE, or through any Banker or Broker of Wall street, who can communicate with said committee.

ELISHA W. ANDREWS,

President.

Thos. L. James,

Treasurer.

H. E. SEWALL & CO.—THE GENERAL CO partnership heretofore existing between the undersigned, under the firm name of H. E. SEWALL & CO., is this day dissolved by mutual consent.
Dated, New York, September 30th, 1880.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

H. E. SEWALL & CO.—THIS IS TO CERTIFY that the undersigned have formed a limited Partnership, pursuant to the provisions of the revised Statutes of the State of New York.

1. That the name or firm under which said partnership is to be conducted is H. E. SEWALL & CO.
2. That the general nature of the business to be transacted is the purchase and sale of coal.
3. That the names of all the general and special partners and the residences of each are as follows: Henry E. Sewall, who resides in the City of New York, in the State of New York; Rufus R. Sewall, who resides in Keyport, in the State of New Jersey, are the general partners, and Anthony V. Winans, who resides in the City of New York, the State of New York, is the special partner.
4. That the said Anthony V. Winans, the said special partner has contributed the sum of eighteen hundred (1,800) dollars in cash, as capital to the common stock.
5. That the said partnership is to commence on the first day of October, one thousand eight hundred and eighty, and is to terminate on the thirtieth day of September, one thousand eight hundred and eighty-five, unless sooner dissolved by mutual consent, in accordance with the provisions of the aforesaid statutes.

Dated this 29th day of September, one thousand eight hundred and eighty.

HENRY E. SEWALL,
RUFUS R. SEWALL,
A. V. WINANS.

C. W. SWEET,

No. 137 BROADWAY

NOW SECURE GRANT.

Ex-President U. S. Grant having become a permanent resident of this city, by taking possession of an elegant mansion in Fifty-second street, between Fifth and Madison avenues, ought now to be prevailed upon at once to take charge of the World's Fair to be held in our midst in 1883.

There can be no excuse now that he is mixed up with political affairs, and we doubt very much if he will ever lend his name to any mining or other speculative enterprise, where stockholders only can be benefited by having this illustrious citizen at the head of their respective speculations.

The International Exhibition to be held in this city, however, will, if successful, reflect great credit upon the people of the entire country, South as well as North, West as well as East, and the very fact that the name of the first citizen of the Republic is at the head of the World's Fair will secure that success.

Time will prove the great wisdom of this selection, and the appointment of General Grant, as President of the International Exhibition of 1883, will at once stamp it with the badge of "Excelsior."

NEW YORK'S GROWTH IN A QUARTER OF A CENTURY.

It has been said by one of our leading political economists, that "there is no man living who can at all imagine the future grandeur of these United States, and that his very imagination would fall short of the actual facts, if our lives only lasted long enough to witness them." It is not our purpose at all to dilate upon these prognostications. On the contrary, we prefer to adhere to facts as they come under our observation, lay them in their bare nakedness before our readers and subscribers and let them draw their own conclusions therefrom.

We are led to these remarks by a casual glance we had the other day, at a New York lot book, of the year 1854. This is only a little more than a quarter of a century ago.

At that time there was a large quantity of vacant lots, and an immense number of frame dwellings on the streets crossing from Sixth to Eighth avenues, between Twenty-third and Twenty-seventh streets. On the block bounded by Twenty-sixth and Twenty-seventh streets, and Seventh and Eighth avenues, there were, at that time, only twenty-seven buildings on sixty-four lots. There were hardly any buildings west of Eighth avenue between Twenty-second and Twenty-seventh streets. The block bounded by Twenty-seventh and Twenty-eighth streets, and Sixth and Seventh avenues, contained exactly fifteen brick buildings on sixty-four lots. The vicinity of Thirty-fourth street and Sixth avenue was about one third improved. In fact, the space below Twenty-third street, from river to river, then vacant, was sufficiently large to take in all the buildings then existing above Twenty-third street. In 1854 there were only eighty-eighth buildings on Fifth avenue above Twenty-third street, and fifty-four buildings on Madison avenue.

Now let us remember that during this period, from 1854 to 1880, we have passed through a bloody civil war, unprecedented as to destruction of values, and two panics, one in 1857 and one in 1873.

And yet here stands New York City to-day, risen from a second to a first-class city of the habitable globe. The city is built up solidly from river to river as far as Fifty-ninth street, and on the east side of the Central Park the vacant property below One Hundred and Tenth street would not be more than sufficient to take in the houses already erected in Harlem. Practically considered, New York is built up solidly to-day to Fifty-ninth street, and on the East Side as far as One Hundred and Tenth street. This, of course, leaves out of consideration all the houses in the annexed district beyond the Harlem River.

While now with rapid transit we can reach Harlem in less time than it used to take us to go from the Battery to Twenty-third street, it must not be forgotten that, during all the period above mentioned we were, owing to the absence of rapid transit, forcing people out continually to New Jersey and other suburban districts.

Look at the picture presented by Manhattan Island to-day, in the face of all the untoward circumstances and events that have surrounded us during the past quarter of a century, and is there, indeed, any one living "who can at all imagine the future grandeur of this American metropolis?"

And in conclusion, let us remind those who have no faith in every word said herewith, that there are persons to-day living, who distinctly remember that to one of the

Lutheran churches, was offered, about six acres near the head of Canal street and Broadway, but the trustees declined to take it because, as they said, "it would not pay to fence it in."

Let this lesson engraft itself upon the minds of investors, before it is too late. The time may come, even in their life time, that not a single foot of ground can be obtained on Manhattan Island, even at prices now considered extravagant.

FINANCIAL HINTS AND POINTS.

That C., C. & I. C., is likely to have a rise, if the court decides against the Pennsylvania road.

That Missouri, Kansas & Texas stock is a very good thing to have in the house, in view of the surrender of the road by the receiver to the company and the building of the line to Mexico.

That Rome, Watertown & Ogdensburg bonds are a purchase, as the unpaid coupons are to be funded.

That Chicago & Alton is a dangerous stock to hold at present prices, some of the directors having already sold out. The advance was engineered by a young speculator who put the price up on general principles, without special knowledge.

That the Omaha stocks will have a rise when the insiders in Northwest get ready.

That Calaveras mining stock may take a jump any day.

That Gold Stripe when put on the market may be worth buying.

That no one can make a mistake who buys unimproved property at current rates on the upper part of this island or in the Twenty-third and Twenty-fourth Wards.

That the market for miscellaneous stocks is a good thing to leave alone until the speculative tide sets more steadily, either up or down.

That Erie will, some time during the coming year have a very great rise, its business being better than ever before in its history. With its present income Erie could pay six per cent. on the preferred, and three per cent. on the common; and would do so this year were it not for the need of money to make permanent improvements, which will eventually be of great benefit to the stock.

That the shorts in Western Union may get hurt some fine day.

That New York Central cannot be kept down much longer; it being the cheapest investment stock on the list.

That this is a "special" market, every few days bringing out new combinations and a fresh deal which helps to keep up the whole list of prices.

WILL THE BANKS CONTRACT?

A short time since we pointed out the fact that the national banks were contracting their issues. They had found that with the present rate of taxation it was not profitable to issue currency based upon government bonds at the present price. We have always doubted the wisdom of the purchase of bonds in the open market before they were due. By this forcing process governments were run up to a price which their investment value did not warrant. Mr. John Thompson has been in communication with Mr. John Jay Knox, Comptroller of the Currency, and publishes a table, upon which he makes the following comments:

Deducting the surrendered currency still outstanding, namely: "Lawful money on deposit," a contraction of \$5,533,859 is shown since January 1. During the ten months (from January 1 to November 1), circulating notes have been scarce; only mutilated notes have been sent in for redemption.

By the table of bonds held to secure the notes of national banks, it is shown that almost \$200,000,000 (the 5s and 6s) mature before July next, and that only \$119,150,100 of 4s (out of \$738,264,000), have been deposited for circulation. With the 4s at 110 or 3½s at par, and with a Federal tax of 1 per cent. on currency, the banks can have but a very small profit on their currency issues, even while their circulation does not flow in for redemption.

The banks take a risk in the decline of bonds, and another risk in having their currency flow in for redemption. It is hardly possible that the present high price of bonds is to be permanent, and it is quite probable that the currency will again flow in for redemption.

From the aversion of the banks to issue currency when 4 per cents were at par, or a small premium, we are led to expect a large contraction of currency, as the 5 and 6 per cent. bonds are redeemed. We are prepared to see one-half of the \$200,000,000 held as security withdrawn from Washington, and \$90,000,000 of currency surrendered, unless the banks are relieved from the 1 per cent. tax on their currency and the stockholders are relieved from the personal tax on their shares. Relief from these taxes will enable the banks to sustain the present volume of currency on a 3½ or even a 3 per cent. bond.

This is a startling exhibit. It will be in the power of the banks, by refusing to buy bonds, after the issues they now hold are redeemed, to so contract the currency as to make a disastrous break in prices. It is idle to expect that Congress will further favor the bondholder and national bank shareholders by relieving them of taxation. The feeling is adverse to the national banks. It is within their power during the next six months to seriously interfere with the upward course of prices, for the withdrawal of even a quarter of their currency would be followed by a semi-panic. People who speculate on future values would do well to bear this matter in mind.

BI-METALISM.

The *Commercial Bulletin* comments upon the failure of Germany to make gold the sole unit of value. It regards the return of that country to bi-metalism as inevitable; and the *Bulletin* adds:

It is not a trifling matter to the national banks of the Old World that, within the last two years, instead of receiving \$100,000,000 of gold from the United States, according to the custom of many years, they have sent hither over \$100,000,000 of their accumulated stock, amounting to a deprival of \$200,000,000, as compared with the past normal distribution. So much loss has already actually occurred. This was not a matter of great practical moment so long as values were low and trade generally depressed; but now that prices are advancing and business is becoming generally active, this deprival of a large portion of the basis of banking operations is a matter of the gravest practical

moment to both financial and commercial interests. It yet remains to be seen whether the exchanges will take a turn that will send back to Europe an important part of the accumulations of gold in this country. But, apart from that, another very important factor is appearing in a rapid declension of the world's product of gold. Since 1873, the yield of Victoria and New South Wales has fallen from £7,500,000 to £3,500,000; and our own product has decreased from \$51,000,000 in 1878 to less than half that sum; making in these two sources of supply a loss of about \$50,000,000 a year. Under circumstances like these, the question of standards must begin to assume an entirely new phase to Europe. It will be less a question whether the single standard is intrinsically preferable to the double, than whether the single can in future suffice to satisfy imperative monetary requirements, and whether Europe may not be compelled to accept the double standard irrespective of its merits. To intelligent observers, it has been for some time apparent that the question was drifting towards a solution through necessities of this kind; and the change of temper with which the issue is now treated suggests a consciousness that the supporters of the single standard may have to bow before a situation that makes their system impracticable.

The *Bulletin* is not warranted in saying that America has supplied \$100,000,000 in gold per annum to the world, we never had so much gold to export, for our total bullion production has rarely exceeded \$110,000,000 per annum, of which about forty-five per cent. has been silver.

It is understood that the President and Secretary of the Treasury are about to make certain recommendations respecting the currency, the effect of which may somewhat disturb prices. Mr. Sherman wants the silver coinage law repealed, and the legal-tender quality taken away from the Greenbacks. Should either or both of these recommendations be adopted, a sharp contraction in prices would follow. If, however, Congress and the Executive could agree to fully remonetize silver, on the basis of the old proportion between the two metals which attained from the commencement of our history up to 1873, we would then see a revivification of business in every direction and a rise in the price of silver the world over.

Should Germany follow our example and again become bi-metallic, it would necessarily be followed by a recovery in prices on the continent. The prime factor of market values is the relative abundance or scarcity of money, whether it is gold, silver or paper. The blow dealt at silver in '73 in the United States and Germany, was followed by the hard times, because of the crippling of one of the agents of exchange. The first change for the better was upon the passage of the American silver bill; and were we to put silver on an equality with gold, so that silver bullion owners will have the same privilege of coinage now monopolised by the owners of gold bullion, we could afford to dispense with the forced coinage of the silver dollar. We judge, however, that in the short session of Congress about to assemble, there is not likely to be any radical measures adopted.

HIGH-PRICED SECURITIES.

It will be noticed that the chief advance in prices during the past season has been in the high-priced stocks. Those who dabbled in minor shares have not, indeed, lost their money, but they have wasted their time. It is New York Central, Lake Shore, Chicago & Burlington and similar stocks which have netted the largest profits for those who

operated in them. On October 2d THE REAL ESTATE RECORD made the following prediction:

Last fall the mania was for the low-priced railroad properties, and in many cases the profits in these were extraordinarily large. The condition of affairs was such that it did not take much courage to buy any cheap shares. They had been unduly depressed; the business of the country, especially the West, was at low ebb; they were wanted as links between old roads or continuations into new regions, and hence the extraordinary rise in Iron Mountain, Kansas Pacific, Kansas & Texas, San Francisco, and other more obscure properties. No doubt there is money yet in many low priced stocks, especially those in our mineral regions west of the Missouri, where the tides of emigration are taking up new lands, and new crops have to be moved or new mines opened. But to speculate wisely in these outlying properties requires special knowledge, which the general public cannot procure. Hence it follows that the ordinary investor is forced to choose between the various well-known securities which are dealt in on our New York Stock Exchange, and it is to the high not the low priced that he will be attracted.

Governments barely yield 3½ per cent. interest; gilt edged bonds not more than 4½ to 5. Money is easy in Europe, and securities which pay 3 per cent. there are considered desirable above par. We shall never again here, at the East, see the very high prices for money which obtained before the civil war. A 5 per cent. investment, whether in land or railway shares, will be considered as being worth par. Hence it follows that all securities which are certain to pay more than 5 per cent., are very sure in time to command more than par. New York Central pays 8 per cent. and could pay 11. It is not dear, therefore, at \$130. Lake Shore earns 12 per cent. per annum, and pays 8. It is very cheap at \$107. Chicago, Burlington & Quincy earns 15 per cent. It ought to command \$150. Morris & Essex is better than most of the bonds on the market, and would not be dear at \$120, although it pays but 7 per cent., and so through the entire list. We believe that there is still a large margin for a permanent rise in all the first-class investments now dealt in on the New York Stock Exchange.

We argue then, that stocks are not too high; that they cannot be called high until they bring less than 5 per cent. upon the investment. Eight per cent. stocks selling at less than \$120 are really very low, and there is a margin of profit in nearly all the good stocks which are to-day dealt in upon the New York Stock Exchange.

We based this forecast upon the patent fact that, whereas the money last year was in the minor securities, which were vivified by the return of better times, this year it would be in the first-class securities which would be favorably affected, not only by the general traffic of the country, but by these smaller feeders. There is, however, one potent cause for the advance in the stocks above mentioned, which should be plainly kept in mind. It is because of the foreign demand. Everyone of the securities which have advanced the most are quoted upon the London Stock Exchange, while the others which have advanced are well known at Amsterdam, Paris, Berlin and the other Bourses of the Continent. For years past the wealthy European has not known what to do with his money. It would only return two and a half to three per cent. on a sure investment. The investor has been looking around the world for larger profits. The English capitalist was attracted for a long time to the securities of semi-barbarous nations, but in these he got bitten, and for several years he has been cautious. The recuscitation of industry on this Continent, the immense crops that we have marketed abroad, and the general prosperity of the country, has been noted by the average European investor, and the consequence is that the United States is now the favorite field for the investment of foreign monies. We see it to-day in the low price which money has commanded during

the past season. We see it in the flood of gold that has kept pouring across the Atlantic in face of a larger import of goods than was the export of domestic productions. The money of Europe is at our command, but capitalists over there, and bankers who understand the situation, advise the purchase of those stocks which are in the highest favor on this side of the Atlantic. Hence it is that the foreign purchasers affected stocks that are known there, and which command high prices here. Hence the sudden jumps, the amazing strides made by Rock Island, Chicago & Alton, Burlington & Quincy, Lake Shore, Illinois Central, Morris & Essex and the like. Hence, also, the exceptional favor with which Reading and Erie are regarded. Not but what they have had bad histories, but then they have been in the habit of dealing in them abroad, and are aware of the possibilities of these two fine properties.

But how long will this continue?

Not very long, we apprehend. There must be a break and prices will surge back as rapidly as they advanced. Yet, still we adhere to the opinion that January next will see higher prices than the records of the street have yet shown in the flush times, or even during the paper money era. We are in for a great railway mania, and will next year or the year after be converting a great deal of our floating capital into fixed capital in the form of new railway lines and extensions. It will be followed, as all such crazes have been in the past, by a convulsion and panic, but will be recommenced upon the recovery of industry. The building of railroads is a very pleasant occupation while it lasts, but it is not without its bad effect upon the country. It consumes immense blocks of capital, and makes money unavailable for other enterprises while the mania lasts. However, the capital of Europe is coming to our aid, and there is little danger of money becoming permanently tight here, because of the willingness of the English and Continental capitalists to again buy the bonds of new roads in the United States.

CONSOLIDATION STILL GOING ON.

It is rumored that St. Paul and the Northwestern railway system are about to be consolidated. This is not improbable, but it will hardly be done this year. Ever since the building of local roads the tendency has been towards consolidation, so as to bring all the converging lines between important commercial points under one management. The first great consolidation was that which put upon the market the New York Central. Since the revival of industry this work of uniting roads having a common goal, has been going on rapidly. The Wabash system is a case in point, the Louisville & Nashville another. It seems very certain that in time the Southern Pacific Road, running from California to the tide waters of Virginia, will be under a common management. It is not improbable that New York Central may coalesce with Lake Shore, and the latter may purchase or build a line of its own to Chicago, Kansas City and St. Louis. But the

tendency is towards still greater aggregations of railroads until the time may come when there will be one management of them all. Indeed, the various pooling arrangements is simply a combination of the railroads to do the work of the country without competition. It in effect brings the acquiescing roads under one management, so that it is not Utopian to look forward to the day when the whole railway system of the country will be under one set of directors, even if it has not a common list of stockholders.

The practical value of this forecast is that it calls the attention of the investor to side roads and connecting links, which will eventually be incorporated into the general railway system of the country. There is scarcely any property running between important points which may not be taken into the consolidated roads of the United States. This ought in time to weaken the so-called trunk lines, for these various parasites will suck out the life blood of the great corporations; but values will become uniform and stocks will not fluctuate so violently. It is to be remarked, also, that every new combination seeks to get its outlet into New York City. The Baltimore & Ohio has been for two years endeavoring to get through Philadelphia in order to use the Jersey Central as its eastern terminus. It is true that the Southern Railway to the Pacific now looks as if it wished to make its eastern terminus at Newport News, on the James River, but undoubtedly it will be intersected in Virginia or Tennessee by roads tributary to the metropolis. It follows that every property which has an entrance into New York must in time prove of value to those who own the stock. There is nothing to prevent New York from controlling the traffic of the country by means of the railways which necessarily converge at this port. With the completion of the tunnel under the Hudson River the vast business now transacted on the Jersey shore will be transferred to this island. New York is destined to be the center of the exchanges of the world, and its population in time will rival that of London itself.

GARRISON vs. FIELD.

When Commodore Garrison transferred his interest in the Wabash Railway Company to Cyrus W. Field, the stock was selling in the neighborhood of \$15. The Commodore is reported to have said, when the transaction was completed, "I am very sorry for Field; he and his friends have paid a very high price for a poor property; but he did it with his eyes open, and he has only himself to blame. Commodore Garrison was on the inside, and thought he knew all about it—but Cyrus W. Field within a year marketed that same Wabash upon his friends and the public at between \$40 and \$50, and there are those who believe that the new purchasers, if they hold on for a few months longer, will sell their Wabash shares in the neighborhood of par.

But Cyrus W. Field and Commodore Garrison found themselves together in the elevated roads, in which both had large interests. Both were on the inside and knew

thoroughly the past, present and prospective value of elevated stock and bonds. Field and his friends parted with their interest in Metropolitan; sold Manhattan down from 70 to 22, and the stock thus gotten rid of, because Field believed it worthless or nearly so, was bought by Commodore Garrison and his friends; and Metropolitan, which has been sold down to 89, is now quoted at 115, while Manhattan from 22 has risen to 42, and its friends claim will be sold at par within two years' time.

All of this shows the uncertainty of stock operations. Garrison thought he was ruining Field when he sold him Wabash for \$15, while Field was certain that Manhattan was worthless at any price. Yet, here is Garrison and his friends ready to pay \$40 and over for all the stock that is offered.

The moral is, that even insiders, no matter how intelligent and experienced they may be, are as liable to be mistaken as the ignorant outside speculative public.

CO-OPERATIVE LAND COLONIES.

It was eminently fit that the leading literary club of New York should have given Tom Hughes a dinner. Mr. Hughes' career, as an author and a philanthropist, entitles him to the respectful consideration of the American people. The occasion, however, suggests some thoughts on colonies and co-operation, which may, at least, be timely.

The emigration of modern times has not been carried out by means of organized colonies. In ancient times it was the only means by which new or barbarous countries were settled. The early history of Greece is one of military colonization, in which the new settlers took with them not only their wives and families, but their arms, and were ready for the conflict upon reaching their new homes. Those were barbarous times, when all the world was at war. But modern emigration has been peaceful and unorganized. Of the myriads who have landed on these shores, how few have come in organized companies. The Mormons have done something towards organizing emigration, and, during the early history of the anti-slavery agitation, portions of Kansas were settled by banded emigrants from New England. It is supposed there will be nearly half a million people come to this country during the present year. Of these, probably not five thousand will come in any other way than as individuals or as families. The class of emigrants which Mr. Hughes wishes to bring to this country are no doubt very desirable. They are English farmers, more or less educated. They will at once rank with our best middle class. But we frankly confess that we doubt the practicability of organized colonization on any large scale in this age. Nor do we take much stock in co-operation. Good people, who have the interests of the working classes at heart, have sounded the praises of co-operation for the last forty years, but, beyond the establishment of some stores in England, co-operation has made no headway throughout the world. Of course we use the name in the popular sense. The co-operation of organized companies for the transaction of

general business has been a very great success. The public works, which have been built by organized capital, would have been delayed many years if they had to depend upon individual enterprise. Corporate enterprise has much to show in the way of great works undertaken, and great projects completed, but the kind of co-operation which the newspapers speak about, and which Mr. Hughes and his friends have advocated, is that of the workmen uniting and employing their own "boss" and transacting their own business. As we have said, this has partially succeeded in Great Britain in the field of distribution. That is to say, the co-operators have bought certain goods at wholesale, and retailed them to their shareholders at a reduced price from that which they could be procured in ordinary trade.

We have all heard the praises of Rochdale sung, and we know of the civil service stores which have succeeded so well in London, but productive co-operation—that in the union of workmen as shoemakers, tailors, house builders, silversmiths, machinists, machine makers and the like are still unknown. The thing has been attempted in Europe and in this country time and time again and has always failed. Yet when distress occurs among the working classes the cry goes up, why don't the men work for themselves? Why have bosses at all? Why should not the employed get all the benefit from their own labor? We believe that it is wholly chimerical to expect that the class who work can also think, organize, plan and do business. The employer, or boss, is a necessary differentiation in the progress of industry. All human work includes leaders who can lead, and followers who will follow; hence we find that absolutely no success has attended co-operation in this sense in the United States. The co-operative stores succeeded in England because of the bad retail trade system which obtained. The English store-keeper gave long credits. The co-operative stores insisted upon cash payments. Yet these stores could not succeed in the city of New York in competition with Stewart's and Macy's, Sterns' and Park & Tilford's. The one thing which gave the foreign co-operative stores the advantage was cash payments, but this reform has already been affected in the conduct of the retail business in New York, and hence a co-operative store would find no profit in contesting the field with private enterprise.

It follows, then, that the two ideas put forth by Mr. Hughes—the value of co-operation and the value of organized land colonies—are somewhat fallacious. Modern emigration does not require the organization of colonies. Co-operation is a dream and will remain so until armies are able to command their generals and the crews the captains of their ships. We wish all success to Mr. Hughes' colony at Rugby, Tenn., but we have no doubt that before five years is over the colony will become an ordinary settlement, the co-operative feature will have departed out of it and emigrants will come and emigrants will go, without reference to any organization. The fact that emigrants do not

naturally go from the North to the South is against the probability of the success of these organized colonies. There is an instinct which carries emigrants to the place where their services are needed, and in which they can make the most money. The experience of all who emigrate to Virginia or Tennessee is, that as yet farming in those States is not profitable. Indeed, the one business on earth that gives the least profit, is farming. In a shrewd book, written by John Humphrey Noyes, the socialist, he pointed out that all the communities which depended upon farming, failed. The few that succeed were those that depended upon manufactures, such as the Shakers, the Oneida Communists, and a few others. But there have literally been a thousand communities started in this country, all of which have failed, because of the fact, which seems to have been overlooked, that of all business on earth that which is the poorest paid is farming.

But here let us be understood. We do not say that purchasing a farm at \$5 an acre, working on it for fifteen years and then selling it at \$50 an acre, is not a very good business. What we mean is, that purchasing a farm at its full price requires incessant toil on the part of its owner to make it pay ordinary interest. We have a rich farming class in this country, but it is a class which have made their wealth, not by taking it out of the earth, but by waiting until the country was settled and some competition arose for their improved property. In other words, the profit in farming has been in buying cheap land and selling it at a large advance. But the actual production, even of the best farms, affords but little more than a mere living. All through New England and the Middle States the tendency of the young and the ambitious is, away from the farms and towards the villages, towns and cities. This voluntary expatriation of the sons and daughters of the farmers is an evidence that, as a business, it does not pay.

To sum up, we confess that we look with a good deal of indifference upon the establishment of this colony of Englishmen in Tennessee. We wish them well, but are satisfied that the attempt will result, in the long run, in a failure.

ON TO MEXICO.

All the money has been raised for extending the Missouri, Kansas & Texas Road to the city of Mexico. Nearly a thousand miles of the road are to be built by the construction company, which is formed of the inner ring of capitalists who make their money whether the stockholders do or not. The construction bonds are usually secured by the first mortgage bonds and, in addition, there are bonuses of stock, to such as advance their money to build these new lines. The stockholders of the Missouri, Kansas & Texas will soon meet at Parsons, Kan., to ratify a bargain already made. Of course the building of this extension will be a good thing for the Missouri, Kansas & Texas road. It will, all its way, run through a country very fertile and productive, and every mile that is built brings more cattle, corn and cotton

to be sent North in return for manufactured articles and building material which are needed for the South. One point should be kept in mind, The extension from the Missouri, Kansas & Texas line will be distant from the Iron Mountain and its branches but eventually both roads will meet to go through the pass in the mountains at Lerado. At that point it is understood there will be a coalition and uniting of interests, and one line will be built to serve the two roads from that point to the city of Mexico. On looking sharply at the map it will be noticed that the shortest line from St. Louis to the city of Mexico or to the Lerado Pass, is by way of the Iron Mountain road, so that perhaps, after all, it is the latter property which will profit most by the extension to the city of Mexico. Indeed, it is whispered that the one great object of Jay Gould is not so much to get possession of Missouri, Kansas & Texas, (for, indeed, that is under his control) but to in some way seize upon the Iron Mountain road. Those who know Gould personally say that his ambition is to take passengers on palace cars in the city of New York bound for the city of Mexico without any change of cars or detention on the way. The business of both the Iron Mountain and the Missouri, Kansas & Texas will be very largely increased by the building of these extensions and the branches which will run into them. These two roads have now a monopoly. It may be that the St. Louis & San Francisco will also profit by this vast business, as it connects with the Missouri, Kansas & Texas at Venita, in the Indian Territory, and gives the shortest line to St. Louis from that point, but still it would seem manifest that the Iron Mountain road will monopolize most of the Mexican trade, from the fact that the line is shorter than it possibly could be by way of the Missouri, Kansas & Texas.

THE ELEVATED ROADS.

The Manhattan Company has passed out of the control of Cyrus W. Field's friends and into the Metropolitan combination, represented by the Garrisons, father and son, and I. F. Navarro. The elevated system will now have the advantage of harmonious management and will be under the control of men who have always been successful in their business operations. We may now expect a full development of the earning capacity of the elevated road system. The stockholders will doubtless profit by the change. Whether the public will be equally benefited, is as yet, to be determined. It must be admitted that the Metropolitan Company has, in many respects, been more lavish in its expenditures than the New York Elevated Company. The cars built by Pullman cost, it is said, thirty-five per cent. more than those constructed for the Third avenue line. The Sixth and the Second avenue tracks are far more substantial and costly than those on the Third avenue. But then, as an offset, it is understood that the Field interest wished to experiment further in the direction of cheap fares. Commodore Garrison's past business history does not warrant us in expecting any further reduction of fares.

It is now understood the directors of the Manhattan will attempt to accomplish the following objects:

1st. Speedy connection with all the principal ferries. The Sixth avenue line to be connected

with the South ferry; branches to the Cortlandt and Desbrosses street ferries; possibly a direct connection also with Fulton and Grand street ferries.

2d. Through trains which will not stop between Chatham square and Thirty-fourth street, or at most, make stoppages at intervals one mile apart. This will involve the building of additional tracks. There is a possibility that the Second and Ninth avenue may be reserved at certain hours of the day for the through trains.

3d. Preparations to accommodate freight traffic as soon as the two bridges over the Harlem at Second avenue and near the High Bridge are completed.

4th. Building of a market, probably near High Bridge, in connection with the great Union depot, for the purpose of supplying the retail trade with meats and vegetables, by the elevated road system.

5th. A parcel express to be organized to deliver goods purchased at retail stores.

6th. Preparations to accommodate the World's Fair, at Inwood or any of the projected locations on the Harlem River. Fifteen cents fare will be exacted, which is the utmost limit allowed by the charters of the elevated roads.

It will be seen that this programme is a large one and will call for the expenditure of a good deal of money, as well as the issue of new bonds. But the report shows that the traffic is steadily increasing and the new freight and through business will pay handsomely on any fresh investment of new money.

WILL STOCKS ADVANCE?

The *Public* thinks they will, and gives the following reasons:

(I.) Since the election, orders from abroad for American securities have become very large. (II.) The purchases of stocks on foreign account effect foreign exchange as much as purchases of a like value of wheat or cotton, and therefore bring gold into the country. (III.) The foreign news indicates that exports of grain, nearly or quite equal to the entire available surplus of this country, may now be expected, unless prices should be unnaturally advanced. (IV.) The trunk lines have not yet raised East-bound rates, as is usual at this season, though navigation will soon be stopped. The natural inference is that those who control the matter want to buy stocks and look for higher prices during the winter. (V.) The general business of the country, already large, will certainly be stimulated and expanded by the removal of political and financial uncertainties. (VI.) It will necessarily be the policy of the administration to prepare the way for advantageous refunding, and therefore for sales of bonds bearing a low rate of interest. But stringency or general depression would operate unfavorably.

These points are well taken; but there are other factors which must be considered: 1st the railroad war between the Wabash and the rival systems which threaten to be severe—2d, the hardening rates for money—3d, the approaching session of Congress, and the disquieting issues that will be raised—4th the experiences of past years, that full movements are rare during the months of November and December—5th the gradual withdrawal of bank issues, and the fear of a large contraction in this direction. We agree with the *Public*, that sometime this winter much higher prices will obtain, but they may not come before January.

ABOUT MINES.

STORMOUT.

We have reason to believe that the price at which this stock is quoted on the regular Board is the result of manipulation. The silver reef region of Utah, where this mine is situated, is a very treacherous one. The ore is found in the form of a chloride in sandstone rock; but the formation is irregular and the product unreliable. The original promoters of the Stormout were wealthy New Yorkers and Philadelphians. But they man-

aged so badly as to buy debts as well as mines. It is a good stock to leave alone.

HERSHAW.

We warned investors not to pay high prices for this stock. It was selling for 20 only six weeks since, when we published the warning. The last quotation of this stock was \$5, which is probably more than it is worth. This property was put on the market last spring, Louis Janan being the expert upon whose report it was purchased by New York and Boston capitalists. As a mine, we believe in the property; but the high price was the result of a deal.

STANDARD OF BODIE.

The stock of this famous mine has shown marked weakness recently. If the mine is not a good one, then a number of very respectable gentlemen are first class romancers. Mr. Seth Cook is in town. He is one of the original owners of the property, and he says his interest in it is still very large. He declares it to be the greatest gold mine in the world. Mr. John F. Boyd, one of the trustees, has been in town some time past, and has been connected with the mine from the beginning. It was on his representation that the Cook Brothers bought it. He declares there are lots of dividends in sight. William Irwin, the superintendent, pledged everybody when in town recently that the mine would pay dividends for four years. These gentlemen all seem truthful; and yet the market price has run down from 26 to 20 within a week. Several very respectable reputations will suffer if the stories told have been with the intent to deceive the investing public. Standard is held by numerous small investors, many women having their meagre means in the stock. It is one of the mines which has borne an excellent reputation; and should it prove a delusion, the whole mining interest in New York will suffer severely.

PLUMAS COUNTY MINES.

We have frequently referred to the mines floated on this market by Messrs. Bidwell & Cortright. So far, investors have had no cause of complaint. Green Mountain, which started at \$2, has steadily and persistently risen in price, until it now sells at \$1.80, all the while paying regular dividends of 5 and 7½ cents per share per month. A new sixty stamp mill, making 92 stamps in all, is now in operation and 30 cents per share quarterly is promised after the opening of the new year. The same firm floated Cherokee at \$1.50. It has sold as high as \$1.85 during the past week; although it has paid no dividends. But these are promised within a short time. A new venture of the same firm is the Gold Stripe, of which Prof. W. P. Blake speaks highly. It has been placed on the New York Mining Board. If these properties continue as well as they have begun and pay regular dividends, Messrs. Bidwell & Cortright will achieve a reputation second only to Lounsbury & Haggin. As mining investments will continue to be made in New York, it is certain firms who will become known rather than particular districts. The public will begin to rely upon promoters who have not deceived them and whose judgment has not been at fault in the properties they offer the public. There is such a world of deception and fraud in connection with mining investments, that it is a difficult matter to be in the business and retain a clean reputation. But those who do so will command the more attention from the contrast that will be made between them and their associates in the business.

CALAVERAS.

Certain disturbing elements in this company having been harmonized, it is believed that there is quite a future for the Calaveras Company. A Mr. Southwick is the principal owner and the whole organization will be managed by him and in his interests. The manipulation of this stock

in the past has been very discreditable. All the brokers and their friends have been repeatedly deceived. The statements made by persons connected with the Company were intended to mislead. It commenced at 35 cents a share and was "hooped up" to \$2.10 a share. Then the bubble burst and it sunk by easy stages to under 20 cents. It is now to be merged with a new company, which will include water rights, five shares of Calaveras to make one share of stock in the new organization.

MOOSE.

The stock of this company has a history. It has sold at over \$8 a share. Quite recently it was quoted as low as 30 cents a share. Insiders profess to have good news from the mine and the stock has recently doubled in price. The report is that a new body of ore has been discovered in the centre of the mine which promises an extraordinarily rich development. Should Moose again become dividend paying it would do much towards restoring confidence in mining stocks.

THE BREAK IN STANDARD.

A correspondent wants us to give him some advice respecting the Standard mine. It has suddenly broke in price from 25 to 20 and less. We prefer to deal in warnings rather than in inducements to purchase. The brokers interested in Standard say that a large operator has been "caught out," and that his shares have been forced on the market. They declare that all the news from the mine is good, that there is no danger of any stoppage of dividends, and that the officers and those acquainted with the mine are buyers at present prices.

There is, however, this misfortune about all mining property. One's own judgment counts for something in the purchase of land or railway stocks, but in a mine one has to depend entirely on the information furnished by the insiders. Other properties, such as land or railways, renew their business day by day or year by year; but the lives of the best mines are mortal, that is to say, the time will come when the ore that pays will all be taken out, and, naturally, the inside people will be the first to get out. Daniel and Seth Cook, of California, M. R. Cook, of New York, Col. John F. Boyd, a trustee, and William Irwin, the superintendent, all agree in declaring that the ore in sight is certain to yield from \$25 to \$35 per share, even if no more pay ore is discovered. If this is not so, those gentlemen must go upon record as deliberate liars, which there is no reason for believing they are. They are rich and respectable enough to be honest.

THE INTERNATIONAL EXHIBITION.

ADVANTAGES OF THE INWOOD SITE—A DECISION LIKELY TO BE MADE WITHOUT DELAY.

Since THE RECORD went to press, last week, the United States International Commission have held two interesting meetings, at the first of which the Inwood site was urged upon the Commissioners, and at the second representatives from Brooklyn tendered the license of Prospect Park.

General Egbert L. Viele, in his remarks about the Inwood site, said:

"It is the spot of all others within the corporate limits of the city, the most readily accessible by land and water, being immediately contiguous to the Hudson River, to the Harlem River and to all the great lines of railway that enter the city from the north and east. Any site that excludes the Hudson River, with its vast facilities, leaves out the most available, and the principal source of transportation. Without the Hudson it would be utterly impossible to convey, except at great inconvenience, the millions of people who will flock to the Exposition from the South and West.

The area secured beyond all contingencies and to which even more can be added, it necessary, embraces more than 250 acres of rolling surface admirably adapted in every way to the purposes proposed.

Its perfect salubrity is secured from the fact that there are no natural or artificial obstacles to the free flow of the water of drainage. There are no obstructions to water-courses, or to the flow of the tide at its borders. The largest ships from foreign ports can discharge their cargoes and passengers at this point.

Located here the Exposition will form a part and parcel of the great metropolis, sharing in its municipal development and civic embellishment. The approaches will be through its incomparable park, its grand Boulevards and its broad avenues, lined with as fine specimens of domestic architecture as can be seen in any city in the world. All of the vast hotel accommodation now existing in the city, as well as that subsequently supplied, will be equally available. If there are those who conceive that there is an element of distance that interposes itself to the disadvantage of this site, I suggest that distance, especially in this case is a matter of comparison. Longitudinal distances are the necessary features of New York's topography, that time and progress has familiarized. What was "up town," yesterday, is as it were "down town" to-day. The annihilation of space and utilization of time are the two features of American civilization that are the most strikingly exhibited in the metropolis, and this location of the Exhibition will form no exception to the rule.

Finally, it is assumed that there are three conditions to be fulfilled in order to secure the perfect success of the Exposition. These are: 1st. The presence of several millions of people, whose admission fees will secure the necessary financial assets.

2d. Such internal arrangements, and such a display as will satisfy these millions of people that they have received the worth of their money.

3d. Such a residuum of the Exposition as will be a permanent advantage to the city.

The first condition requires ample and expeditious transportation, as free from inconvenience as possible.

The second requires territorial space, salubrity of ground, and a skillfully arranged design.

The third requires a situation at all times accessible and convenient in the future. These conditions, so far as situation is concerned, are amply fulfilled in the Inwood site."

At yesterday's conference of the commission, the expediency of at once coming to a decision in regard to a site, so as to further the subscriptions to the fund was discussed, but up to the hour of going to press no agreement had been reached. It appeared to be, however, the general impression that not many days would elapse before at least two sites would be fixed upon, the final selection to be left to the permanent committee when appointed.

FERNANDO WOOD PROTESTS AGAINST THE USE OF THE CENTRAL PARK.

The following letter was read and handed to the Commissioners yesterday:

New York, November 12.

CYRUS CLARK, ESQ.

MY DEAR SIR: Finding it impossible for me to attend the meeting to-day held to hear persons in regard to the proposed site for the Grand Exposition, to be held in 1883, I desire to express my views in this manner:

I have no suggestions to make in favor of any site. I am not sufficiently acquainted with those prepared to offer an opinion in favor of either of them. But I have decided convictions against taking the Central Park for any such object. I am identified with the origin, planning, and present landscape designing of that now world-renowned park. It was during my first term in the Mayor's office that the city acquired this land, and it was my good fortune to be the first and only authority to lay it out and to resist the powerful efforts made to prevent its consummation. Indeed, it is no undue self-praise for me to say that I am the father of this truly noble national distinction. It is true, of late years it has been neglected, and has lost much of its attractive features, but, nevertheless, it is a source of joy and pride to all men, and should not be desecrated by the erection of such buildings and temporary sheds as will of necessity be placed upon its fair fields and swards, if this Fair shall be allowed within its borders.

I protest against it in the name of the millions who now enjoy its beauties.

Yours truly,

(Signed) FERNANDO WOOD.

ELEVATED ROADS AS REAL ESTATE.

Those familiar with the legal history of taxation in this State claim that the elevated roads ought not to be surprised at the decision just rendered by the Court of Appeals, declaring their structures taxable as real estate. Ex-Tax Commissioner Geo. H. Andrews states that the same court several years ago decided that the track and appendages of a street railroad are liable to taxation as real estate. The case arose from the refusal of a street railroad company in the town of Dunkirk to pay taxes on their structure, on the ground that the company did not own the land in fee, and was not liable to taxation for structures erected upon it. But the law, as defined in that decision by the Court of Appeals, was not applied to street railways in this City, because of a doubt whether the tenure by which the public right in the street was held, particularly below Fourteenth street, was of the same character as that at Dunkirk. There was a prevalent impression that the fee of the land occupied by the streets in the lower part of the City was, under provisions of an ancient charter, vested in the adjoining owners, not in the public.

The effect of this decision will be to bring about half a million of dollars per annum into the city treasury, and to that extent will benefit other real estate now paying taxes.

The officers of the Manhattan road, however, will decide, within a few days, whether they will abide by this decision or have a part of it appealed to the Supreme Court of the United States. The litigation was originally begun by the New York Elevated Company, but since the lease the taxes, whatever they may be, will have to be paid by the Manhattan.

The decision also affects the surface roads and the telegraph companies, and if enforced against the latter will still further reduce the aggregate of taxes now paid by individual owners.

IMPROVEMENTS IN HARLEM.

Mr. Joseph Murray, who, some time ago, sold to Mr. Libby, of A. T. Stewart & Co., a large number of small houses in One Hundred and Sixteenth street, all of which are now occupied by respectable families, is now building six more on the same street, between First and Second avenues, but some of them are of large dimensions. Two are twenty foot houses, they are all three-story and basement brown stone and with cabinet trimming. These are held at \$17,000 each. Four other houses have a frontage of 16.8 feet, are also trimmed with hardwood and are held at \$12,000 each. Mr. Murray has also under way two houses on One Hundred and Twenty-first street, west of First avenue, each 16.8x60. They are sufficiently advanced to permit of examination by buyers. We desire also to call the attention of investors to the First avenue apartment houses, just completed, advertised in another column. His work can stand thorough inspection and while the demand for houses is increasing, we would advise buyers to examine all of these in process of erection under Mr. Murray's supervision.

WHERE TO GET YOUR TILES.

It is a source of satisfaction at all times to THE RECORD when chronicling the success of its advertisers. Messrs. T. Aspinwall & Son, the well-known importers of Minton's Tiles, have steadily kept their business before the builders and architects of New York, and we print therefore with pleasure the following letter, which has just been received by them.

19 East 23d st., Oct. 12th, 1880.

MESSRS. T. ASPINWALL & SON:

GENTLEMEN.—Please find enclosed an order upon our Treasurer for the amount of your bill. We cannot but express to you our hearty satisfaction at the work you have done for our church, and the manner in which it was done. The taste of the designs and the variety of tiles introduced have made the work so pleasing that it has won the approval of our entire congregation. Nor would we express all our feeling in the matter unless we referred to your superintendent, Mr. Irwin, whose faithfulness in the performance of his duty and whose courteous consideration of all the suggestions made, gave us from the first, confidence that we were in good hands.

Respectfully yours,

[Signed] WM. D. WALKER, Pastor.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv, v and vi of advertisements.

The auction sales were not numerous, neither were the offerings important, but the attendance at the Exchange Salesroom was quite large throughout the week. The most interesting public sale was the one held by Howard W. Coates on Thursday, when, in addition to some improved property on Tenth street, two vacant lots were sold on Eighty-fourth street, west of Fourth avenue. They were secured by J. D. Crimmins at prices given in detail at foot. The foreclosure sale by A. H. Muller & Son of the northwest corner of Fifth avenue and One Hundred and Nineteenth street, also attracted considerable attention, but quite a number of announcements previously made were either withdrawn or adjourned.

During the coming week, however, there will be several very important auction sales, especially on Wednesday, which will be a field day in the Salesroom. A partition sale of valuable property, in Pearl and Pine streets, will be held on that day by John H. Draper, who will also offer two block fronts on Houston, between Greenwich and West streets, also valuable East Side property, along Goerck and Stanton streets, full details and description of which can be found in our advertising columns.

Investors ought also to pay particular attention on the same day to the partition sale to be held at the same hour by E. H. Ludlow & Co. Five lots, excellently located on the southeast corner of the Boulevard and Sixty-second street, a locality now in course of improvement, will be offered, as well as other vacant lots along Fifty-second, Fifty-third, One Hundred and Fifty-second streets, Tenth and Twelfth avenues. The hook maps for this sale can be had of the auctioneers or of J. H. Glover, Esq., 110 Broadway.

On Tuesday, as well as on Wednesday next, Mr. R. V. Harnett will offer valuable business property in various parts of the city and also vacant lots on the West Side, the latter on Seventieth, Ninety-fifth and Ninety-sixth streets, west of Eighth avenue. The store, No. 106 Franklin street, as well as some leasehold property on Houston street will be offered on the first day, while other eligible parcels by the same auctioneer are announced for following days in our advertising columns.

GOSSIP OF THE WEEK.

There has been a fair business doing in nearly all of the brokers' offices during the week and here and there the first dawn of renewed speculative feeling is noticeable. Of course, there are always those anxious to exaggerate a revival of long looked for activity into "a boom," which does not exist, but everywhere evidence is accumulating that there will be a very active market in real estate during the winter, and only those preparing themselves for the coming fray before it is too late and prices have gone higher will reap the advantage therefrom.

The transactions at private contract during the past week have been varied and numerous, several eligible residences, as well as vacant lots, having been sold in the upper and central part of the island, two vacant lots on Fifth avenue, between Sixty-seventh and Sixty-eighth streets, having been purchased for \$95,000 by Mr. Augustus C. Downing.

A 16.8 foot house on Fifth avenue, opposite the Windsor Hotel, formerly occupied by a Mr. Harley, has been sold by Mr. M. A. J. Lynch, for \$63,000, to J. W. George, a Wall street broker, who intends to open there an office for the purchase and sale of stocks.

Messrs. L. J. & I. Phillips have sold at private contract during the week, two houses built by Parson & Son, one on the southwest corner of Fourth avenue and Sixty-fifth street, and the one adjoining, for \$67,000, also one house in Thirty-ninth street, between Fourth and Lexington avenues, for \$26,000. The same firm has sold the following vacant property during the week: A plot of eighteen lots on Sixth avenue, One Hundred and Thirtieth and One Hundred and Thirty-first streets, for \$85,000, being eight lots on the avenue and ten in the rear; also three lots on Eighty-sixth street, between Fourth and Lexington avenues, for \$21,000.

Jno. Gorman, of Third avenue, sold seven lots on the north side of Seventy-fifth street, 98 feet east of Lexington avenue, to Moritz Bauer, for \$40,000; also

two lots on north side of Eighty-first street, 55 feet west of Lexington avenue, to Jno. Donnellon, for \$9,500.

John J. Clancy has sold to Robert Pembroke, two lots on the west side of the Grand Boulevard, 50.6 north of Sixty-eighth street, for \$24,400.

Three lots on the north side of Sixty-third street, 95 feet west of Madison avenue, have been sold by Lionel Froehlich, at private contract, for \$75,000.

The following vacant property has been sold during the week by Mr. W. J. Barnes, two lots (20 feet each), on the north side of One Hundred and Thirteenth street, between Third and Lexington avenues, for \$5,100; two lots on the north side of One Hundred and Eighteenth street, near First avenue, for \$6,500; the latter were purchased last month for \$4,000; two lots on One Hundred and Twenty-second street, First and Second avenues, for \$4,800, and resold for \$5,200; two lots on the east side of First avenue, between One Hundred and Eighteenth and One Hundred and Nineteenth streets, for \$5,400, and resold for \$6,400; three lots on the south side of One Hundred and Twenty-eighth street, between Sixth and Seventh avenues, for \$10,500.

Messrs. Kuhn, Loeb & Co., bankers, have bought two of Mr. Connolly's houses, on Fifty-seventh street, between Fifth and Sixth avenues, recently described in these columns, for \$200,000, through Siegmund T. Meyer & Son. The latter firm have, at the same time, sold, for Kuhn, Loeb & Co., some factory property, in First avenue and Twenty-eighth street, for \$112,500, also, for the Mutual Life Insurance Company, five small houses, on Sixtieth street, between Tenth and Eleventh avenues, for \$40,000.

Mr. C. W. Luyster, the builder, has had remarkable success with his houses on Lenox Hill. During the last two weeks, as already stated, he has sold three of them, and to-day we have to chronicle the sale of No. 9 East Sixty-sixth street, 28x100, effected for him by Riker & Co., to Mr. L. H. Niles, a stockbroker, for \$71,000. Mr. Luyster has five more houses in the same street ranging from 19 to 34 feet front, the excellent construction of which have heretofore been fully described in these columns. He expects to sell all of them, within the next few weeks, at advantageous figures.

Messrs. B. S. Levy and J. W. Cole have sold, at private contract, during the past week, the northeast corner of Madison avenue and Eighty-fourth street, 62x75, vacant, for \$26,000. Other transactions, in vacant property, have been closed by this firm of brokers, but the details are as yet withheld.

Mr. Robert Irwin, the builder, has sold his house No. 12 West Fortieth street, to a Mr. Enos for \$75,000. The house has a frontage of 25 feet.

Mr. A. B. Darling, of the Fifth Avenue Hotel, has purchased, from Mr. Schieffelin, No. 15 East Twenty-sixth street, 30x200, for \$125,000.

Mr. Fred. Zittel has sold during the week No. 114 East Sixty-second street, 18.9x100, for \$18,250; also another house on Seventy-fourth street, east of Lexington avenue, 17x100, for \$12,000.

Mr. V. K. Stevenson, Jr., has sold No. 58 West Fifty-second street for \$30,000 to J. H. Lichtenauer. No. 55 in the same street, 25x65x100, is reported to have been purchased by Mr. G. Anthon for \$52,000.

Mr. Stevenson has also sold No. 21 West Fifty-eighth street, 18x65x100, for \$50,000, with gas fixtures, to Mr. L. B. Shaw, a gentleman well known in Brooklyn. This price is considered the very best yet paid for an eighteen foot house. A lot (No. 333), on West Fourteenth street, 25x125, has also been sold by the same firm to Mr. P. Harrman.

Messrs. McCafferty & Bulkley, the well-known builders, have sold one of their fine houses, No. 44 West Fifty-third street, 25x65, and dining room extension, to Mr. Brewster, the carriage man, for \$65,000.

Mr. W. P. Birdsall has sold No. 9 West One Hundred and Twenty-sixth street, another of his Harlem houses recently described in these columns, for \$20,000.

In our last week's report of the purchase of No. 32 Park row by Mr. Jay Gould, it should have been added that Messrs. E. H. Ludlow & Co. effected this sale.

No actual work is to be done by the New Assessment Commission until December 7, after which date they are to meet on Tuesday of each week. A calendar of the applications for relief is now being made. They number about one thousand.

It may interest some of our readers to know that several blocks of money can now be had at $4\frac{1}{2}$ per cent. in Pine street, but of course the mortgages must be first-class improved city property.

The new opera house at Madison and Vanderbilt avenues, is to cost \$450,000 for its construction. The main entrance will be on Forty third street. The exterior will be of brick and terra-cotta; but whether the structure, when completed, will be an ornament to the metropolis—such as the Grand Opera House is in Paris—is very doubtful indeed, considering the limited space at command and the extraordinary locality. The time may come, perhaps, that we will have an opera house on some open space near the Park—say the Fifth avenue circle, and then there will be a chance for our American Violet le Ducs to display their architectural talent.

A new Roman Catholic Church, to cost \$70,000, is to be built at the northwest corner of First avenue and Fifty-fifth street. Mr. Arthur Crook is the architect. Three four-story brown-stone apartment houses are being erected on the southwest corner of Third avenue and One Hundred and Eighth street; and plans have been prepared for the construction of a five-story apartment house on Fifty-first street, 125 feet west of Ninth avenue.

Mr. Hume, the architect and builder, is constructing for Mr. Warren Beman a thirty-foot wide apartment house on Sixteenth street, between Seventh and Eighth avenues, and, by special permission of the Board of Health, is allowed to cover eighty-one per cent. of the lot, owing to the excellent arrangements made for light and ventilation.

Geo. W. Sickles has sold at private contract, in Brooklyn, a three-story brown stone house on Union street, between Smith and Hoyt, for \$8,500, also, No. 143 Wyckoff street, for \$3,000.

The estate of Schermerhorn will shortly begin the construction of four-story apartment houses, on Smith street, in Brooklyn. The vacant property on State street, recently sold for \$22,000, is to be improved with three-story houses.

In the list of Brooklyn projected buildings it will be seen that five three-story brown stone dwellings are to be built in St. Marks avenue, near Carlton avenue, five more on Throop avenue, near Monroe street, and also several others on State street and Rogers avenue. The following are the sales at the Exchange Sales-room for the week ending Nov. 12:

** Indicates that the property described has been bid in for plaintiff's account:*

Broome st, No. 525, s. s. 90 e Sullivan st, 20x60.6, three-story frame (brick front) store and dwell'g. George J. McFadden. (Amount due, abt \$6,800)	\$7,500

*10th av, n w s, 100 n e 16th st, 20x97.10. James Hardie	500
Total	\$26,440

BUILDING MATERIAL MARKET.

BRICKS.—The general situation of the market for Common Hards remains much the same as for some time advised. The wants of consumers are keeping up to a good full volume, and are met as rapidly as stock can be reached, with occasionally sufficient anxiety in the demand to induce buyers to engage cargoes before arrival. Dealers, it is understood, are not as yet making much of a collection against winter wants, owing in the main to the absence of a surplus over the amounts required to satisfy the calls from regular customers, but now and then a desirable cargo is secured, which can be saved from the general distribution, and is piled away for use when the receipts from the river shall have been checked. At the moment the shipments from primary points are about equal to the average at this season. Manufacturers have no overrun of supplies to trouble them, and are drawing upon the accumulations recently made, with shipments confined principally to the regular run of vessels, and no additional transportation sought. We hear but little complaint over quality, the favorable weather of the season still being apparent in the good condition of the stock offering. On prices there has been further advance during the week, and, as we close, the feeling is very strong at \$5.75@5.87½ for "Up River" and \$6@6.50 for Haverstraws, the two grades now commencing to assume their natural relative position as to value. Everything afloat is sold, and all taken for actual consumption. Pale Brick remain firm and in good, quick demand at \$3.25@3.50 as to condition. Fronts move fairly and are firmly held at full former figures.

CEMENT.—Within the past three or four weeks the tone of this market has materially improved, and promises to remain in good shape during the balance of the season. For Rosendale the demand has shown good full volume from all regular sources, but is probably most anxious on shipping orders, especially from the Eastward. At this time of the year it is difficult to secure vessels to make a trip in the latter direction, and as this is a natural influence to increase the cost of transportation, the desire is to move stock quickly, and to the full extent of the facilities offered. A considerable amount is also wanted for the South, and to meet interior orders, and the mills find their capacity pretty well taxed. Indeed, manufacturers of some of the favorite brands are much behind with their orders, and inclined to enter into additional engagements with much caution. The price has stiffened up somewhat also, and while 80c. is still in some instances quoted, 90c. is about an average inside rate, and in many cases sellers will not accept less than 95c@1.00 except under special negotiations. American Portland participates in the benefits of the improvement, and has a full steady sale at firm prices. Imported stock continues to arrive with comparative freedom, but the heavy pressure of supplies noticeable during mid summer has been removed, and with a good current demand, has the market is well maintained. A great many invoices from the current receipts have been placed before arrival, and as all good brands not unsold appear to receive quick attention, not much of an accumulation remains in first hands, and sellers can insist upon full former figures at least, still there is enough competition to check any positive buoyancy, and on special contract the figuring is frequently made on a very narrow margin over cost of importation.

HARDWARE.—The demand is very moderate from all quarters, and the market as a whole in a comparatively dull condition, with the outlook doubtful. Dealers expect a fair sale of holiday goods, but beyond, few will predict much of a trade until after the turn of the year. There is, however, an occasional expression of confidence in an early revival of call from state and other near-by sources premonitory symptoms of which have already been shown. Prices are about steady though in a few cases buyers have gained moderate advantage. The following changes are published: Black and Tinned Iron Rivets in M packages, and Black and Carriage Rivets in C packages, discount 10 per cent. instead of 40 per cent. Iron Rivets in bulk or per lb, and Burrs, discount 30 per cent. instead of 20 per cent. as formerly. On Wollensok's Transom Lifters the discount has been placed at 35 per cent.

LATH.—A somewhat irregular tone has at times been shown, but dealers in most cases still express

themselves with confidence. This feeling is based on the belief that the recent heavy arrivals brought forward the major portion of stock accumulated at primary points, and more especially such lots as holders felt it necessary to realize upon, with a probability that during the balance of the season cargoes will come to hand in a more uniform manner, and permit of comparatively careful handling. Manufacturers, too, manifest dissatisfaction at anything less than \$2, and increase their limits accordingly on parcels in transit. We do not, however, find that our dealers develop any unusual degree of anxiety, and some with whom we have conversed feel or assume quite an indifferent tone, and assert that they run no great risk either as to supply or price by holding off. It is claimed that even with a scarcity of desirable lumber, it does not of necessity follow that the supply of lath will run short, owing to the variety of stuff from which they can be produced, and repeated experiences of the past leads to the expectation that a tendency to full prices will result in many offerings from outside the regular sources of supply. Up to the present writing this week the supply has been small, and the feeling firm, with closing quotations standing at \$.85@1.90 as the bidding and asking figures.

LUMBER—Some portions of the general market show a slight irregularity, causing dissatisfied sellers to grumble, and buyers who may have scored a small gain on one or two transactions to ventilate their advantage for all it is worth. Taken as a whole, however, the position is a good one, and there appears no reason to expect a set back during the balance of the season. Many, if not the majority of our larger dealers have secured pretty much all the stock they expect to handle for the winter season, with a fair proportion already in hand or near by; but a great number of the small buyers who have been banging back from week to week and month to month, find they will be short of supplies unless they hurry themselves, and this creates a demand for the bulk of the offering. We hear of the supplies becoming available at some of the primary points on a somewhat reduced limit of price, but a balance is found in the addition to cost of bringing it forward, and there appears to be nothing gained by the time it reaches our market. Our local consumption and distribution shows a seasonable average.

Spruce continues to show some irregularity, but still about all coming to hand meets with custom. A number of dealers, no doubt, have about all they require, but others are still short either on quantity or assortment, and while prices fluctuate occasionally under the influence of large or small offerings, careful handling of cargoes brings a fair average return. Receivers, too, are called upon to discriminate in the matter of credit, and the financial status of buyers is not without influence in fixing a price. It also leads to secrecy among operators, and exact figures on transactions are not in all cases made public. On the general range, however, \$1.00@20.00 covers the average quotation at present given.

White Pine is now in very good stock. Considerable more is expected, and a large proportion of it will probably come through, but the amount available will meet a fair outlet. The demand for it at present is of seasonable average, and holders are generally very confident that the winter trade will meet the expectations against which they have made provision. We quote \$17@19 per M. for West India shipping boards; \$23@24 for South American do; \$15.50@16.50 for box boards; \$17@17.50 for do. wide and sound do.

Yellow Pine on the call of fresh orders is steady, and buyers for future delivery here, or who contract for shipment to other points, domestic or foreign, from primary markets, find the views of sellers quite as full as ever. Stock on hand, however, to a large extent remains on hand, and has only an uncertain sort of value; outside, of course, of the usual run of standard grades jobbed from yard. We quote random cargoes at about \$23@25 per M; ordered cargoes, \$24@26 do.; green flooring boards, \$24@25 do.; and dry do. do. \$25@26.50. Cargoes at the South \$14@17 per M. for rough, and \$19@20 for dressed.

Hardwoods continue to be well sustained, on all grades and holders in a confident mood, with much indifference about negotiating, except at extreme figures. The general demand is good. We quote at wholesale rates by carload about as follows: Walnut, \$77@85 per M.; ash, \$33@36 do.; oak, \$35@40 do.; maple \$30@35; chestnut, 1st and 2d, \$30@35; do. do. cilia, \$18@20 do. cherry, \$45 @47; white wood, 1/2 and 3/4 inch, \$25@27.50, and do. inch, \$3@3.50 do.; hickory, \$35@45 do., for Western, and \$65@75 for good nearby stock.

Shingles are firm still, and the export trade is taking off a fair proportion of the stock laid aside for it. We quote Cypress at about \$6 for saps, and \$8.50@9 for hearts; pine shipping shingles, \$4 for 18-inch, and Eastern saw grades at \$2.50@4.50 for 16 inch as to quality and to quantity. Machine dressed cedar shingles quoted as follows: For 30-inch, \$16@22.25 for A and \$28.75@33.25 for No. 1; for 24-inch, \$6.50@16 for A and \$16.75@23 for No. 1; for 20-inch \$5@10.50 for A and \$11.25@11.75 for No. 1.

The demand for goods from yard keeps up well, and full prices are obtained, the majority of dealers appearing satisfied with the current state of the market. Exports of lumber from the port of New York:

GENERAL LUMBER NOTES.

STATE.

The Albany lumber market, for the week ending November 9, is reported by the *Argus* as follows:

The trade in the District is good and doubtless will continue so to the close. The demand since our last has been largely for Common Box, but the general trade has been healthy. Prices have not undergone any change and are steadily held. There was a good attendance of buyers this A. M. Shipments from the river and from the slips are large.

The manufacturers of coarse Lumber now have too much water, and if supplies are checked it will be from that cause alone. The demand is large and is in excess of the supply and many orders, unless from their regular customers, are declined by the trade. Prices are steadily held.

Saginaw manufacturers prefer cross piling on mill docks rather than accepting prices which pay no profit; yet an active trade is looked for throughout November. The market is well stocked.

At Chicago the receipts for the week ending 3d were 50,100,000 feet against 35,000,000 feet for the corresponding week in 1879; the shipments, 21,000,000 feet against 19,100,000 feet. The receipts since January 1st are 1,777,422,000 feet against 1,281,000,000 feet for a corresponding period in 1879; the shipments, 670,000,000 feet against 622,100,000 feet.

The receipts of lumber by lake at Buffalo for the week were 5,251,000 feet and 123 car loads with advanced canal freights from Tonawanda. At Oswego, 3,366,000 feet.

The receipts at Albany by canal from the opening of navigation to November 1st were:

Bds & Sctg. ft.	Shingles, M.	Timber, c. f.	Staves, D.
1879..	299,521,100	10,156
1880..	340,627,000	6,379	10,685 638,200

Freights from Bay City to Buffalo and Tonawanda, \$3.00 per M feet; from Saginaw, \$3.50. From Buffalo to Albany \$2.75; from Tonawanda to Albany, \$2.75 per M feet. Lake Ontario freights from Port Hope to Oswego, \$1.40 per M feet, from Toronto to Oswego, \$1.50, and from Oswego to Albany, \$1.90@1.95. River freights are without change.

THE WEST.

[Special correspondence of REAL ESTATE RECORD].

CHICAGO, Nov. 11, 1880.

A considerable fleet was at the Franklin street Market on Monday, and a good attendance of buyers, so that business opened up quite briskly. The first day's operations, however, cleared out the offerings, and since there have been only a few cargoes for sale each day. The buyers take hold rather more freely than they did before election, and there is a larger sprinkling of out of town dealers. The latter mostly come from towns along the line of the Illinois & Michigan Canal, which means of transportation they are anxious to make use of before cold weather closes it for the season. The demand has been so good, in fact, that no difficulty has been experienced in disposing of all the stuff offered this week, and this market is now nearly empty. But the commission men have not succeeded in getting any advance upon the prices of a week ago, which will be found quoted in the list below. The market is steady, and no concessions are made. Freights are slowly advancing in order to make good the advance in sailor's wages, and it is hardly thought possible that another week can pass without a change in lumber prices. Buyers are taking the stock as fast as it arrives, but do not pay any advance upon quoted rates, though they will undoubtedly have to do it presently.

Up to this date the receipts for the season over-run those for last year about 140,000,000 feet, which figure it is hoped will be considerably reduced before the season ends. It is claimed here that the manufacturers in Michigan are already cross-piling to some extent, and that many of them will hold all of their stocks if freights go any higher. There is danger, however, that this expectation will not be fully realized, and that there is a considerable amount yet coming forward. Various opinions are expressed, but it is a matter of grave doubt whether those responsible for them know very well what they are talking about.

Following are the quotations current to-day:

Green joist and scantling.....	\$8 25@ 8 50
Green boards and strips, common.....	9 50@10 50
Green boards and strips, medium.....	11 50@13 50
Green boards and strips, good to choice.....	14 00@18 00
Standard Shingles.....	2 25@ 2 30
Extra shingles.....	2 35@ 2 50
Lath.....	1 70@ 1 75

The price-list meeting, of which mention was made in my last letter, was held on the 30th inst., and an attempt made to brace up. It succeeded partially, and I think prices since have averaged considerably better in consequence. With a few modifications the list established in August was readopted.

The following is a condensation of it:

YARD PRICES.

1st and 2d clear, 2in.....	\$45 00
1st and 2d clear, 1 1/4 and 1 1/2 in.....	43 00
1st and 2d clear, 1in.....	41 00

2x1, 18 feet.....	11 00@12 00
2x4, 10 and 20 ft.....	12 50@13 50
20 feet.....	12 00@13 00
22 feet.....	15 00@16 00
24 feet.....	16 00@17 00
26, 28 and 30 feet.....	19 00@20 00
Clear shingles.....	3 10@ 3 25
Extra A shingles.....	2 75@ 2 90
Standard A shingles.....	2 50@ 2 65
Lath.....	2 00@ 2 25

With a view to making this list of some effect in the market, one of the dealers, before the prices were acted upon, offered the following resolution:

Resolved—That we do hereby agree, one with another, that in case any dealer sees or believes that occasion exists for a reduction in the price of any item or items of the price list this day adopted, it shall be considered an act of bad faith to issue any price list containing any such reduction, or any delivered list less than the price list and freight added, without first notifying the President of the Exchange, and requesting, through him, the calling of a trade meeting to consider the advisability of such reduction.

It created some discussion of course, but was finally passed by a nearly unanimous vote, the trade generally agreeing that it was a good thing, and would tend to keep cut lists, which have always been the chief source of trouble, away from the country dealers to some extent. It is recognized as an impossibility to do away with them entirely, as there are some who, as they did not attend the meeting, or assent in any way to the above resolution, will not consider themselves bound by it. But it will affect perhaps two-thirds of the trade and, as this includes nearly all the principal operators, will no doubt exert a large influence in keeping up the price during the balance of the season.

The meeting also discussed the difficulty experienced in getting cars, and passed several resolutions regarding the railroads, which are, however, matters of merely local interest.

It cannot be said that there has been any marked improvement in the condition of trade, though the reports from the dealers are a shade more encouraging. It is pretty generally admitted, now, that the business of the past three months has not been quite what many expected, though the figures show that it has exceeded that for the corresponding time in 1879 by a liberal percentage. The election excitement has interfered to some extent with business, and has probably lessened the volume of trade in this market. The receipt of orders this week has been fair for the time of year, and the general impression is that the amount of business doing is somewhat greater than it was a year ago. The shipments keep ahead of last season, but they are an uncertain index of the condition of trade, as the quantity of accumulated orders on hand tends to make them run ahead of the sales, while the scarcity of cars affects them the other way, and it is not easy to discover which overbalances the other. Reports from the interior seem to indicate that there is still considerable lumber wanted by consumers, and as long as the roads keep in passable condition it is thought that trade will continue moderately good.

The inventory of stock on hand, which was issued by the Exchange yesterday, makes a favorable showing of last month's business. The excess as compared with last year in the stock of lumber on hand is only 89,949,004 feet, against 94,728,741 feet

In Cleveland, hardwoods command current rates with an upward tendency.

In Boston, prices of walnut are well sustained, the market is active, and the demand fully absorbs the supply. This applies to the higher grades. Poor culls are a drug, from which we might infer that Boston furniture makers put up better goods than some of their western competitors. Last year, at this time, 1sts and 2ds, $1\frac{1}{4}$ to 2 inches, were worth from \$63 to \$70, and thick, from \$70 to \$75. The same grades are now worth from \$75 to \$80, and from \$80

Also a cargo from Puerto Cortes, consisting of 248 logs of Honduras mahogany and 102 logs of cedar, nearly the whole of which was disposed of at prices ranging from 4d to 5½d per ft. The log ends, of which there were 100, realized 95s per ton.

The Timber Trades Journal has the following on prices thirty years ago:

As showing the prices which were obtained in London for pine timber about thirty years ago, we have lately come across some extracts from the catalogue of a sale held by Messrs. Churchill and Sim on the 10th March, 1848, from which it would appear that of yellow pine timber (duty paid) from Quebec there were sold 31,126 feet at prices ranging from £2 12s to £2 18s per load, the average being £2 15s 11d, and from New Brunswick 26,921 feet were disposed of at from £2 9s to £3 6s per load, the average being £2 14s 7d. Of red pine timber from Quebec there were sold on the same occasion 12,103 feet at from £3 5s to £3 7s 6d per load, and 4,765 feet from New Brunswick at from £2 10s to £2 12s 6d per load.

NAILS.—The market is unsettled, and by no means satisfactory to sellers. Both the local and interior demands have proven disappointing, and while the continuation of a good consumption seems assured dealers are unwilling to stock up against it to any great extent. Cost continues to range over a very wide line, and some lots of stock can be reached pretty low. The Association list remains unchanged, but as matters stand it seems folly to publish it, and we quote on a basis of \$2.85@3 per keg for 10d to 60d covering the prices named on outside lots.

PAINTS AND OILS.—The demand for paints and colors of most kinds is moderate, and confined to local jobbers or the ordinary run of mail orders from the interior, and the market shows few really new or striking features. Supplies are full and well under control, which prevents undue pressure to realize, but there is not a solid support to values at the moment, and careful buyers can gain some advantages on pretty much all grades. The domestic production is undergoing some curtailment. For Linseed Oil the demand has shown some irregularity and moved a fair amount of stock, but the outlet fairly met and about former prices accepted. We quote at 57@51c from crushers' hands.

PITCH.—Demand has been a trifle more active at times, but not of unusual volume or calculated to materially influence the position. Stocks under good control, and prices firm. We quote at \$1.90@2.00 for city delivered.

SPIRITS TURPENTINE.—For jobbing parcels the market has been fairly active, and without new features of a very decided character. The wholesale market continues more or less under control of speculative operators, and values are uncertain, owing to the tendency for sudden changes growing out of manipulations for a position. Export trade, however, is light, and this rather weakens the position. As this report is closed, the quotations stand at about 45@45½c per gallon, according to the quantity of stock handled.

TAR.—Supplies are small, the prospect poor for any important addition, and with this advantage holders naturally remain firm and confident at full former rates. The general jobbing movement keeps up to the average. We quote \$3.00@3.25 for Newberue and Washington, and \$3@3.25½ for Wilmington, according to size of invoice.

CONVEYANCES.

Wherever the letters Q. C. and C. a. G. occur, preceded by the name of the grantee, they mean as follows: 1st—Q. C. is an abbreviation for Quit Claim deed i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranties.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or incumbered.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded. Wherever the letters "P. M." occur, preceded by the name of a street in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date.

DIRECTORY OF

RELIABLE REAL ESTATE AGENTS.

We have carefully investigated the responsibil-
ity of all Real Estate Agents named in this Direct-
ory, and find them to be in every way competent
and responsible. We therefore recommend them
to capitalists and real estate operators generally as
being the best agents to be secured in their re-
spective section, as shown by letters from
prominent business firms, which may be seen at
the office of the REAL ESTATE RECORD.

TO INVESTORS.

THE NEW YORK & NEW JERSEY RIPARIAN LAND AND DOCK IMPROVEMENT COMPANY, CAPITAL TWO MILLION DOLLARS, divided into shares of TWENTY-FIVE DOLLARS each, offer a limited amount of their working capital stock for sale on very favorable terms.

This company control a large frontage on the New Jersey side of New York Bay, adjoining the New Jersey Central Railroad, and are about to dredge out a Ship Canal, 200 feet wide, 26 feet deep, running out 3,500 feet into New York Bay toward the Narrows; thereby creating a new outlet to the ocean for the produce of the Great West and Southwest. They also are to create upward of 100 acres of solid ground out in the Bay, upon which Grain Elevators, Warehouses, and factory buildings can be erected.

The importance of this enterprise to the commercial and manufacturing interests to New York and New Jersey, as well as to the growing Western country, can well be understood by those who are seeking safe investments if they avail themselves of the opportunity to be thoroughly informed by calling at the office of the above-named company, 64 and 66 Broadway. The few thousand shares of stock now on the market can be obtained through the EXECUTIVE COMMITTEE, or through any Banker or Broker of Wall street, who can communicate with said committee.

ELISHA W. ANDREWS,
President.

Thos. L. James,
Treasurer.

THE UNDERSIGNED, DESIROUS OF FORMING A Limited Partnership, pursuant to the provisions of the Statutes of the State of New York, hereby certify:

1. That the name or firm under which such partnership is to be conducted is **H. TILESTON & CO.**

2. That the general nature of the business to be transacted is buying and selling on commission stocks, bonds, specie, securities and cotton.

3. That the names of all the general and special partners interested in said partnership are as follows: Henry Tileston, who resides at New Brighton, in the County of Richmond, and State of New York; and James Davis Tileston, who resides at New Brighton, in the County of Richmond, and State of New York, are the general partners; and Cornelius Fellowes, who resides at No. 570 Fifth Avenue, in the City of New York, in the County and State of New York, is the special partner.

4. That the said Cornelius Fellowes has contributed the sum of fifty thousand dollars as capital to the common stock.

5. That the period at which the said partnership is to commence is the 21st day of October, A. D., 1880, and the period at which the said partnership is to terminate is the first day of October, A. D. 1884.

Dated at the City of New York, this 20th day of October, A. D. 1880.

C. W. SWEET.

No. 137 BROADWAY

There are so many of our friends and subscribers who own shares in the various elevated roads, in fact, there are in our midst such a large number of enterprising citizens, who have, by their cash investments attested their confidence in our present rapid transit system, that we deem it but a simple duty, on our part, to give them all the information we possibly can in regard not only to the financial status, but also the legal relations existing between the various elevated railway corporations. We publish, therefore, in its entirety to-day the lease as recorded, between the New York, Metropolitan and Manhattan roads during the past year. By the terms therein expressed and printed can be gauged the importance, more or less, of the recent decision rendered by our Court of Appeals. Every stockholder, whether interested in New York, Metropolitan or Manhattan, can, by studying the various articles—which, by-the-by, see the light in public print for the first time to-day, in our columns—see for himself in how far the corporation to which he has entrusted his surplus fund, can at all be affected by the legal decision, surely to be enforced, and recently rendered by the Court of last resort in this State.

A GREAT MARITIME FEATURE FOR THE EXHIBITION.

It cannot be too frequently impressed upon the minds of those having charge of matters connected with the World's Fair, that the great and imperial City of New York must, in the very conception of this vast enterprise, be superior not only to Philadelphia, but also to Paris, London and Vienna. It must not be forgotten, while arranging the details, that the commanding position we occupy to-day, as the financial centre of the American continent, with fair prospects of becoming the financial centre of the entire civilized world, is due mainly to the concentration of a vast commerce in our midst, fostered not only by the energy of our merchants but favored by our unparalleled geographical position.

Our grand harbor has been the mainspring of New York's good fortune, and our maritime trade has made Manhattan Island the

great depot of the products of South America, the West Indies and trans-atlantic countries. Our river and harbor traffic stand to-day second to none, and thousands upon thousands of merchants are indebted to the natural facilities vouchsafed to this port for the successes which have followed their respective enterprises. In inviting therefore, the nations of the world to compete with us for the crown of superiority during the great Fair, we should make the maritime branch of the exhibition the great distinctive and novel feature. It is a vast undertaking, but if any one shrinks at this early day from the vast proportions which the great Fair must of necessity assume, he had better step "down and out" of the committee, and leave the arrangement of the various details to those men of broad views who will not tolerate an exhibition of secondary merit. We want no ordinary country fairs or circus pranks to act as precedents. The entire enterprise must be on a grand scale and such for which inland cities like Paris and Vienna offered no opportunity.

The maritime feature thoroughly elaborated upon will bring to our harbor the models of crafts of all nations, anything in the shape of a steamer, a tugboat, a ferry or river boat, a yacht, a shell, a canoe, will come here from every section of the world. A Great Eastern as well as a twenty ton craft will seek recognition at our hands. Marine engineering as well as nautical instruments, oars as well as fishing tackle, iron rams as well as paper shells will compete for superiority along the banks of the Hudson, and the entire world will watch with the closest scrutiny the progress made not only in marine and naval architecture, but in the thousand and one articles that are required to make up either the war vessel of the future, the ocean steamer of the period, and the floating palaces of our coast and rivers.

Hamburg, not by any means such a pretentious city as New York, had, about a year ago, a maritime exhibition which had a wonderful success; vessels built even in Australia having been brought over especially to take part in the contest. We, here, without this feature, can only repeat what Philadelphia has done. With the maritime feature here suggested, we will surpass in grandeur and excellence anything ever attempted at an international exhibition, either here or in Europe. It is upon our broad, magnificent Hudson, where must be congregated all the vessels entered for exhibition, and this can be done without at all interfering with the ordinary traffic of the river. The buildings containing the other features of the exhibition can easily be constructed along the banks of the Hudson, so as to be contiguous to the great maritime display. Any

number of sites can be found all along the Hudson, say from One Hundred and Twenty-fifth street up as far as One Hundred and Seventy-fifth street, and the united display, both on land and water, will, indeed, be one that will challenge the admiration of the entire world.

Whatever may be the idea of those whose recommendations will have to be passed upon by the permanent executive committee, when appointed, we trust that this maritime feature will at once be taken into serious consideration, and by its adoption by those in authority, secure for the great World's Fair of 1883 the adherence and applause of all who have the greatness of our country and the pre-eminence of our own city at heart.

NEW TELEGRAPH COMPANIES.

Unknown to the public, new and important telegraph lines are in process of construction. A company has been formed to erect very substantial poles, and to lay wires between New York, Boston, Philadelphia and Washington, as well as intermediate points. The right of way has been secured in Boston and New York, but not, we understand, as yet in Philadelphia. The poles are already erected, but all the wires are not yet up.

There is this novelty about this new company: The wires are not designed for the general public, but are to be hired to firms, corporations and private persons. Those who use the telegraph know how vexatious are the delays under the present system. At the utmost, one cannot send more than a few messages during the day to any point outside of the city. Between the despatch of a boy, the taking of the message, the writing it out and the delivery, there is a waste of time not noticed, perhaps, for ordinary domestic business, but when it is a matter of immediate moment, involving large commercial transactions, it has been found to be a very great drawback. But this new company proposes that John Smith, in New York, shall communicate directly with Tom Robinson, in Boston. There is to be no delay, but the transaction can be completed within the moment, and a thousand messages a day, if necessary, can be passed to and fro. The importance of this means of communication will be at once apparent to those especially who deal in stocks. If any broker in New York, receives an order in his office from a person at the other end of the wire, in Boston or Philadelphia, he can fill it immediately. There is no time lost. All the really large brokers, such as Prince & Whitely, Vermilyea, O'Connor, Trask & Francis, and others, have already opened branch offices in Albany, Schenectady, Sara-

toga, Philadelphia, Boston, Washington and, little by little, all the leading brokers are forming branch establishments in every city in the Union. It is of the supremest moment that stocks should be bought within the shortest time possible. This can never be done by a telegraph company where customers have to take their turn, and messages are liable to be delayed sometimes for an hour. It is understood that the new company have already rented a sufficient number of wires to pay a good interest upon the investment, and, as yet, their business has scarcely begun. After the line from Boston to Washington is completed, work will be commenced to extend it to Chicago, St. Louis and still further West. For the present there is no intention of entering the general news field, or supplying the press or the general public. It is to be exclusively a line for business houses who will have direct communication with their agents or correspondents at distant points. It is not impossible, also, that these new wires can be made use of for telephonic communication, though that is to be further considered. So far the telephone has not proved as useful as was expected, owing to the electrical disturbances caused by the great number of wires on a single pole. Then, the instrument is, as yet, imperfect. It does not communicate for any great distance, and there are mechanical difficulties which are yet to be overcome. It is evident, however, that in course of time telephonic communication will be possible between very distant points, and here the solid poles of the new company will come into play. But it should always be borne in mind that there is a possibility of these poles being sometime used as a rival to the Western Union and American Union Telegraph Companies. The American Telegraph, so far, is merely a creature of Jay Gould's, to work the stock of Western Union up and down, at the will of that great stock manipulator. There does not seem to have been any intention in the construction of the new telegraph company to give any facilities to the general public. It was simply to be used as a lever to work telegraph stock on the market. In this it has so far proved quite successful. Western Union is very mercurial, at one time being shoved up to \$115, then down to \$86. It lately seems to have been on the down track. In time, we presume, the government of the United States will find out what all other governments have discovered, that the agency by which news is disseminated and which controls prices throughout the world should be in some responsible hands, and the most responsible, of course, is the general Government. In every other country on earth, save alone the United States, the telegraph is a part of the postal service. The public is then not at the mercy of any great stock jobbing corporation for their news or the prices of the markets. How much use is made of the latter by press superintendents and agents or by inside operators of the telegraph is not known, but that there is a liability of abuse is clearly evident. The Government must in time own a telegraph line of its own for the general public. Then, and not till then, will

we have cheap telegraphy. But this need not interfere with organizations such as we sketched above, in which wires will be used for expediting commercial and stock transactions.

We have frequently said in these columns that New York was destined in time to do an enormous stock business. The "ticker," with its stock quotations, now extends to all parts of this continent. Yearly the amount of business done by our Stock Exchange grows larger. When facilities such as will be afforded by our leading brokers, which will place the operator in Chicago, St. Louis, Boston or Portland upon the same advantageous plain as the operator in Wall or Broad streets, then we will see a speculative feeling invoked for which the past furnishes no precedent. We are without lotteries in this country, such as are common in France and Southern Europe, but the stock market is fast affording a means of betting on prices superior to any lottery that was ever established.

FUTURE GREATNESS OF THE METROPOLIS.

This dwelling on the misgovernment of New York City is likely to mislead those who are not acquainted with the growth and future prospects of New York. It is very true that we have unclean streets, a wasteful city government and little public spirit among the great mass of the voters, but, after all, the metropolis steadily advances in population, size, wealth and splendor. The property holders and improvers are giving us a city of palaces. On every part of the island builders are at work reconstructing or recreating whole sections of the town. On one street an old house is giving place to a much finer new one; in another, vast stores are replacing antiquated dwelling-houses; in a third whole blocks are being erected for the housing of the thousands who come here in excess of the buildings to accommodate them. Then look at the number of apartment houses already built or about to be constructed. If the hundreds of thousands who vote know little or care less about the efficiency of our local executive and legislature, yet there are scores, if not more, of New Yorkers who are intent upon adding to the beauty and attractiveness of the metropolis. Every few months sees some new statue put up in the Central Park or on our public squares. New edifices as homes for art and education are constantly in progress of construction. Great corporations have given us structures like the Equitable Building or the Western Union headquarters, while among the schemes which will some day be realized is a new Opera House, a great Zoological Garden, and a novel but gigantic house of entertainment on the site of the old Hippodrome. And it is in this direction that we must progress. It is individuals who must take the initiative. We must encourage and applaud men like Peter Cooper as well as all who have given of their private means to adorn the city in which we live. The Vanderbilts, the Jay Goulds, the Garisons must understand that, as they mad

their money in New York, and by aid of the advantages it afforded them, they should do something towards making the metropolis more fit to live in. We ought to have the best polytechnic or scientific school in the world; we should have the finest Woman's College in the country; we should have an art school second to none in any of the large capitals. There is room for a thousand more statues and busts to adorn the Central Park and all our public places. Public benefactions, like that of Peter Cooper's, are yet in order. The Vanderbilts do well to erect magnificent private residences in the city, and their example should be followed by other capitalists. Men like Mr. Clark, who build great apartment houses that will improve and ornament the city, are also to be commended. In other words, we want to cultivate a race of *de Medieis*. Let us recall the memories of Florence, Genoa and Venice as an example to our merchant princes, and hint to them what New York expects of its rich men. This city is destined to transact the commerce of two continents. It will not be many years before it will control the exchanges of the world. Day by day we are becoming more and more independent of London and Paris. At this very time the process is going on of transferring the cheap capital of Europe to this city for employment at better rates here than can be obtained in the Old World. So far our citizens have woefully neglected our shipping interests. Some day that must revive. Congress must aid in the work to take away the monopoly from Germany, Great Britain and France of carrying our productions away from our shores. With the increase of the shipping of the country come an inevitable addition to the growth of the metropolis.

The moral of all this is, that New Yorkers should bear in mind that the destinies of the city are not in the hands of the people of the City Hall, so much as in those of its own citizens. It is the men who are building up New York who are adding to its commerce and its trade, who beautify its homes, who increase the number of its educational, scientific and artistic institutions, who give us noble statues and fine galleries of art. It is they to whom honor should be paid for what they have done for the metropolis.

Following up the statistics furnished in last week's RECORD, where we gave the growth of New York during the past twenty five years, as illustrated by the small number of buildings above Twenty-third street in 1854, we have been asked to take into consideration the future of this city on the basis of the increase already mentioned since 1854. We then find that there are not more than enough lots below One Hundred and Fifty-fifth street to accommodate the population that will come and remain here within the next twenty-five years. As already stated, during the past quarter of a century we passed through two panics and one civil war, and did not have rapid transit. With the next ten or fifteen years, as prosperous as people believe they will be, it is safe to calculate that this city will increase in

population within the next twenty years more than it has during the past twenty-five years.

That general prosperity is slowly making itself felt among all classes of people, is evidenced by the prompt manner in which rents are now being paid. "Ever since last spring," said a prominent landlord to the writer yesterday, "rents are being paid more regularly than at any time since the panic of 1873."

The market is all "bullish" and undoubtedly stocks will go higher. The rise has been steady and healthful. We have said repeatedly in these columns, that the highest prices ever known on the Stock Exchange will be scored this year. New York Central leads the van; and it is the high-priced stocks which are the greatest favorites. There will probably be a break about the time of the assembling of Congress; as it will be feared that disquieting financial topics will be broached. It is the abundance of money in the country which is putting up prices.

Of course, the re-action must come sometime; but there is no probability of any serious setback until spring, when there will naturally be doubts about the new crop.

Delaware & Hudson is said to be a good purchase, as the property is intrinsically as valuable as Lackawanna, and sells for less.

Real Estate, for all who want a sure thing, is better than any stocks; vacant lots, on either side of the Harlem, at fair prices, are a splendid purchase.

In mining stocks it is said that Calaveras, Bulwer and Bechtel are good purchases for a long term. The next boom on the Comstock may be Belcher.

ABOUT MINES.

STANDARD.

This stock seems to have recovered from the panic which the weakness of a well-known operator precipitated. It is known that he was forced to throw over some seven thousand shares. As soon as he was cleaned out, the stock began to recover and the sales fell off. It is an investment stock, strongly held; and, were it not for the disfavor in which mining ventures have fallen, would be selling for very high figures. A well-managed mine, that has over \$30 in dividends in sight, is very cheap at 23; for, unlike the Comstock, the Bodie region has not been explored below the thousand foot level. It should not be forgotten that all the rich pay ore in the Standard comes from one level, the 335th, the other ore bodies in the mine being of low grade. There is every likelihood that further explorations will develop more of these extraordinarily rich veins which have been found in the Bodie Mine. The railroad will soon be within forty miles of Bodie, instead of 122, as now; and the cost of freight will be diminished one-half. This will make some of the low grade ores of Bodie profitable. At the same time, our readers must not take it that we advise the purchase of any Bodie stock.

BODIE AND MONO.

People who own the stock of these two companies would do well to keep them. There will be several assessments on Mono, and perhaps one on Bodie. But the part of Bodie Bluff in which the Bodie-Mono shaft is now sinking is full of rich veins; ore bodies, running into the hundreds and even thousands. It is as certain as anything in mining that the new shaft will strike one or more of these veins, and another phenomenal

rise in Bodie and Mono stock will follow. But this may not be for a year yet. The Noonday, Oro and Addenda look very cheap, at present prices. Goodshaw is a probable swindle—ditto, Bodie Tunnel; while the prospect is not brilliant in Belvidere and Consolidated Pacific.

THE COMSTOCK, AGAIN.

Another swarm of assessments. No wonder that San Francisco looks blue and business is depressed, in spite of the splendid grain and grape harvest. Then, John W. Mackay has got tired and quit. He will arrive in this city to-morrow, on his way to Paris. Col. Fair is going to the Senate, in place of Sharon. Still, it is noted that stocks are scarce in San Francisco. The broker's offices have not one-tenth as many as they had a year since. Somebody has been buying the shares and putting them away. Alta, at the extreme South End, shows signs of life and the stock which has been selling at one is up to six, upon hopes of a bonanza. But the North End stocks are very weak and an assessment has been put upon Union Consolidated. Things do not look hopeful on the Comstock. But, then, the darkest hours sometimes come just before the dawn. At last accounts, there was a better feeling and higher prices.

FINDLEY.

From the past experience of mines on the Atlantic coast a wise man would have nothing to do with them. Among the most promising properties put on this market was Findley, of Georgia, which sold at one time at 90, on a capitalization of 200,000 shares. Recently the stock has sold down to 15. It is a magnificently equipped mine, with two fine mills, extensive water privileges and the mining and milling can be done for 50 cts. per ton. The mine got in debt, because the superintendent ran his tunnels in one direction rather than another. A new superintendent has known where to tunnel, and the result is a return which is rapidly paying off the debt. The mine is owned principally by Trask & Francis, and E. C. Stedman is one of the directors. There is a probability of this property becoming valuable. S. L. M. Barlow has a very profitable Georgia mine in the same district as the Findley, but it is not on the market. There is a good deal of capital now developing the Georgia mineral belt; so far with poor success.

GAME RIDGE.

A new company has been organized in the Silver Cliff region and owns a great deal of valuable patented land; \$150,000 has been raised to build a mill. Among the owners are J. H. and C. M. Godsell, Wm. M. Lent, J. M. Harper, Charles F. Coulter, ex-Senator Dorsey, ex-Gov. Foote, of Vermont and others. This promises to be a splendid property, provided the two Silver Cliff mills can be made next spring to show good returns. Everything will depend upon the economy in which the abundant silver chloride ores of this district can be manipulated. The problem is, how to get the silver out of the rock, at a low figure. If this is accomplished successfully, the Silver Cliff region will be a favorite investment for persons and companies with large means.

WHAT MARK McDONALD SAYS.

Mr. Mark McDonald was in his day known as the great "bear" on the Comstock, but he deserted San Francisco a year since and is understood to be a very successful operator in mining and railroad shares on the New York market. Said the writer to Mr. McDonald, "How about the Comstock?"

"It seems dead," was the reply. "There is nothing to warrant a belief that they have as yet found a bonanza. John W. Mackay is leaving for Paris, and Fair is going to the United States Sen-

ate. I don't think there is much money in the Comstock."

"What other news have you heard from the Pacific coast?"

"The State," replied Mr. McDonald, "was never so prosperous—outside of the Comstock. There is probably more money from the quartz mines and the gravel deposits than ever before. The gold production of California this year will equal any year in its history."

"Yes," said the writer, "Mr. Seth Cook told me the same story. He said that in Plumas, Butte and Amador Counties there was never so much gold produced, and then the gravel mines are worked as they never were worked before. This has been a good year for water. Do the people of California feel blue?"

"Why should they? There was never such a wheat crop. They don't know what to do with the wheat. Lately the price per bushel has gone up in this market to \$1.06@1.07, and there is a handsome profit in growing wheat in California. Then the grape or wine crop will be enormous this year. No, California is in a very good way, and it is prospering in spite of the disappointment about the Comstock."

"What do you think about this market?"

"Well, the two Mining Boards ought to be consolidated. If there was one interest here there would be good properties sufficient to interest the investing public, but there is not business enough for two boards."

"Well, I hear there is a movement on foot to consolidate, and that the opposition comes from the old board?"

"Yes; I look for a good market next spring if the two boards will consolidate and make a united interest."

ABOUT THE SUTRO TUNNEL.

[A Conversation.]

"Well, sir, I believe that in five years time, whoever owns a hundred shares of Sutro Tunnel stock will be worth \$10,000."

"That is a startling prediction. To-day a hundred shares of the stock is not worth more than \$100. How do you make out that this great advance is at all likely?"

"The Comstock lode is full of low grade ore. There are millions and millions of tons which does not pay to raise in the shafts, cart to a mill and there reduce and bring out the bullion. But if it was stoped down from above, let fall into cars, which could be run to the mouth of the tunnel, there transferred to mills, run by water from the drains, the cost of mining and milling would be reduced to a minimum. In the Black Hills \$2 a ton will mine and mill the gold ore. As this (Comstock) ore is a mixture of gold and silver, it would probably cost considerably more to reduce it to bullion, but even supposing you offered \$6 a ton, there are now millions of tons of the ore that will run \$16 to \$18, which it does not pay to raise in the shafts, but which could be shot down into the tunnel and there transferred to the mills."

"When will this take place?"

"It will come when people get through paying assessments on the Comstock. Just as long as investors are willing to put up money to the Bonanza managers they will not use the tunnel. But let the misguided people who are now paying assessment after assessment decline to do so any longer, and then the tunnel will be utilized. I believe that Mackey and his friends are securing possession of the stock of Sutro Tunnel with a view to working the lode through it. There is a bigger bonanza in the millions of tons of low grade ore than there was in any of the high pay rock in Consolidated Virginia, Crown Point or Belcher."

"Upon what do you base this opinion?"

"I get it from several sources. My special informant was a scientific gentleman, who has just come from the Comstock lode: who has examined it thoroughly and who is convinced by personal inspection that the money is in the Sutor Tunnel, and that it is the way to make the old Comstock pour forth its golden and silver tides."

"But, pray, are there no other sources of revenue in the tunnel besides the low grade rock to be taken from the several mines?"

"Oh, yes. In cutting through the tunnel some fifteen different veins were crossed. These have not been drifted upon. They may develop two or three great pay veins equal to any ever opened on the Comstock lode. Then the continuation of the tunnel towards Mt. Davidson may show bonanzas in the syenite rock which lies just beyond the Comstock lode. This rock in Europe is gold producing, and it is yet to be proven that it will not produce gold in this country. Yes, I confidently look for the time when Sutor Tunnel stock will command very high figures."

THE TRIPARTITE AGREEMENT.

FULL TEXT OF THE LEASE MADE TO THE MANHATTAN COMPANY BY THE NEW YORK AND METROPOLITAN ROADS - IMPORTANT INFORMATION TO SHAREHOLDERS, AFFECTED BY THE RECENT DECISION OF THE COURT OF APPEALS.

An exact and complete copy of the important agreement by which the property belonging to the Metropolitan and New York Elevated roads, was leased last year to the Manhattan Company, is herewith published for the first time, no journal having heretofore given its full text, but only garbled extracts. This publication is the more important just now, as by the terms of this lease it can be seen in how far the various roads are liable, under the recent decision of the Court of Appeals, declaring their property taxable as real estate. The question of the payment of other charges, incidental expenses and occasional damages is also provided for in this instrument, of which the following in an authenticated copy, as on file in the Register's office of this city:

THIS INDENTURE, made the 20th day of May, 1879, between the New York Elevated Railroad Company, a corporation duly organized and existing under the laws of the State of New York, hereinafter called the New York Company, party of the first part, and the Manhattan Railway Company, a corporation duly organized and existing under the laws of the State of New York, hereinafter called the Manhattan Company, party of the second part, WITNESSETH that, whereas the party of the first part is authorized to construct and operate a line of elevated railway, in the City of New York and in the county of Westchester, a portion of which railway in the City of New York is now completed and in operation, and it is engaged in constructing other parts of its said elevated railways; AND WHEREAS, a certain other railroad company, organized and existing under the name of the Metropolitan Elevated Railway Company, is the owner of and engaged in operating certain lines of elevated railway in the City of New York over routes heretofore established by law for said company, which railways and routes at various places unite with the railways and routes of the New York Company and cross and connect and unite therewith at the same level; AND WHEREAS, the development of the business of passenger traffic on elevated railways in the City of New York has made it necessary for each of said companies to run trains in such manner with such speed and frequency that the crossing of the trains of one company over and upon the tracks of the other company, and the running of the trains of both companies upon the portions of track and route jointly owned or used by them, is deemed impracticable except at the risk of inconvenience and delay to the public and danger to human life; AND WHEREAS, after protracted efforts to devise plans for operating all said lines so as to afford to the public perfect accommodation and safety, it is the opinion of both companies that such management cannot be assured while the trains of the two companies are running under the control of different managing officers or otherwise than by placing the lines of both companies under one control, with power to change from time to time the termini of routes, to regulate and limit the passage of trains from the tracks of one company upon the tracks of the other at the connecting and cross-

ing points; and to do such other things and make such other changes from time to time in the management of traffic upon the line of both railways as experience may show to be necessary or desirable; AND WHEREAS, the Manhattan Company is by law authorized to construct and operate elevated railroads in the City of New York, whether owned or leased by it, and is willing and desirous to accept; and the New York Company and the Metropolitan Elevated Railway Company have agreed to execute and deliver to it leases of all their respective railways and properties as described in the instrument, and in a similar instrument of even date herewith to be executed by the Metropolitan Elevated Railway Company as lessor to the Manhattan Company upon all and singular the terms, agreements, and conditions herein and therein mentioned and set forth; AND WHEREAS, the New York Company has heretofore executed to certain trustees its first mortgage, bearing date the 1st day of January, 1876, and recorded in the office of the Register of the City and County of New York, in liber — of mortgages, page —, securing the bonds therein provided for the total amount thereof now issued and agreed to be issued, being the sum of eight million five hundred thousand dollars of principal; AND WHEREAS, the New York Company may be hereafter required by the Manhattan Company to issue further amounts of the said bonds secured by said mortgage in excess of said eight million five hundred thousand dollars for the purpose of constructing and equipping extensions of the line of the New York Company, payment of all of which bonds, principal, and interest is to be assumed by the Manhattan Company; AND WHEREAS, the New York Company has issued and agreed to issue its capital stock to the amount at its par value of six million five hundred thousand dollars, upon which stock the Manhattan Company has agreed to guarantee the payment of a dividend of ten per cent. per annum, as hereinafter provided. NOW, THEREFORE, this INDENTURE witnesseth that the New York Company, for and in consideration of the rents, covenants and agreements hereinafter mentioned, reserved and contained on the part and behalf of the Manhattan Company, to be paid, kept and performed, hath granted, demised and leased, and by these presents doth grant, demise and lease unto the Manhattan Company all and singular the railroad or railways now owned, operated or constructed by it in the City of New York, as above described, and all and singular the unfinished portions thereof now under construction, together with all its franchises, rights and privileges relating thereto, or to the construction and operation of its entire railway, as authorized, subject to the said mortgage and to the terms and conditions under which said franchises are held by the company, with all and singular the right, title, estate and interest which the New York Company has in any real estate in the City of New York, heretofore acquired by it, or which it may hereafter acquire under contracts already made therefor, being all and singular the entire property and estate of said New York Company, excepting such of its franchises, rights and privileges as are or may be necessary to preserve its corporate existence or organization and its interest in the covenants and conditions of this Indenture, TO HAVE AND TO HOLD the said railways, premises and appurtenances unto the Manhattan Company and its successors for the term of nine hundred and ninety-nine years from the date of organization of the Manhattan Company, to wit, November first, eighteen hundred and seventy-five, or so long as it shall continue to exist as a corporation and be capable of exercising all the functions herein stipulated in its behalf, the Manhattan Company and its successors yielding and paying therefor unto the New York Company, its successors and assigns, yearly in each and every year during the term hereby granted, the yearly rent of ten thousand dollars, payable semi-annually on the first days of January and July during the said term, the first payment of five thousand dollars to be made on the first day of July, eighteen hundred and seventy-nine, and keeping and performing all and singular the covenants and agreements herein-after set forth to be by the Manhattan Company kept and performed.

ARTICLE 1st. The Manhattan Company hereby assumes covenants and agrees to pay as the same respectively become due the principal and interest of the above recited first mortgage bonds of the New York Company, and keep it safe and harmless at all times from all claims and demands against it arising from or under the said bonds or any of them. ART. 2d. The Manhattan Company guarantees to the New York Company an annual dividend of ten per cent. on the capital stock of the New York Company to the amount of six million five hundred thousand dollars, that is to say, the Manhattan Company will each and every year during the term hereby granted, beginning with the 1st day of October, 1879, pay to the New York Company six hundred and fifty thousand dollars, free of all taxes, in equal quarter-yearly payments, one hundred and sixty-two thousand five

hundred dollars each on the first day of January, April, July and October, in each year, the first of such payments to be made on the first day of January, 1880, and the Manhattan Company will, from time to time, execute in proper form a guaranty to the above effect, printed or engraved upon the certificates of stock of the New York Company, and as such stock certificates are surrendered for cancellation and reissue will from time to time, upon request of the holder, renew such guaranty upon all reissued certificates. ART. 3d. The portions of the railway of the New York Company which were completed on the 31st day of January, 1879, shall be deemed to have been operated from the close of business hours on that day by the Manhattan Company; and all such operation from and after that time shall be for the account of the Manhattan Company. ART. 4th. The Manhattan Company shall at its own proper cost from time to time, and whenever necessary for the use of the New York Company, make out and furnish to said New York Company any and all reports and statements which the latter shall or may hereafter be by law required to make or file. ART. 5th. The Manhattan Company shall at its own proper cost and expense operate and run the demised railways during the said term in the same manner as the New York Company is now or shall at any time hereafter be required or authorized by law to do, and shall and will maintain, preserve and keep the railways and premises hereby demised and every part thereof in thorough repair, working order and condition, and supplied with rolling stock and equipments, so that the business of the said demised railways shall be preserved, encouraged and developed, the business thereof be done with safety and expedition, the public be accommodated in respect thereto with all practicable conveniences and facilities, and the future growth of such business as the same may arise or be reasonably anticipated, be fully provided for and secured. ART. 6th. In addition to the rental hereinbefore provided, the Manhattan Company shall also pay and discharge as the same may become due any and all taxes, assessments, duties, imports, dues and charges whatsoever, which shall become payable by or be levied, assessed or imposed during the said term by any lawful authority upon the New York Company or upon the demised railways, premises or any part thereof, or the business earnings or income of the same. ART. 7th. Possession of the demised railway and premises shall be given by the New York Company to the Manhattan Company on the 5th day of June, 1879, and upon delivery of such possession, the New York Company shall transfer and deliver to the Manhattan Company, for use upon the said demised railways and premises, all machinery, tools, implements, furniture, fuel, material, or other railroad supplies belonging to the New York Company, which shall have been procured for the use of the said railways. And the Manhattan Company shall and will at the end of the term aforesaid or other sooner termination of this lease, transfer and deliver in return to the New York Company all such machinery, tools, implements, fuel, material, and other railway supplies as may have been procured for the use of said railways, or any of them as shall then remain on hand, and which shall be at least equal in quantity and value to those received by it from the New York Company hereunder. ART. 8th. The Manhattan Company shall and will at all times during the term aforesaid hold, save and keep harmless and indemnify the New York Company from and against all expenses of operating the demised railways and premises, and from and all damage, liabilities, actions, causes of action, suits, claims and demands for injuries to persons or property, or for causing the death of any person, or for any other thing in the operation or management of the demised property, or for any breach of contract or wrong done or suffered by the Manhattan Company in the carrying on of the business pertaining thereto, and shall and will defend all suits and claims brought against the New York Company in respect to any manner or thing arising out of the management or operating of the said railways since the 31st day of January, 1879. ART. 9th. In case the Manhattan Company or its successors shall at any time during said term fail or omit to pay in full the cash rental hereinbefore mentioned, or the guaranteed dividend aforesaid, as the same shall become payable, or fail or omit to keep and perform the covenants and agreements herein contained, or any of them, and continue in default in respect to the performance of such covenant or agreement, or payments for the period of 90 days, then and in either and every such case it shall be lawful for the New York Company, its successors or assigns, at its or their own option, to enter upon the railways and premises hereinbefore demised and any and every part thereof, and to remove the persons therefrom, and from thenceforth the said demised railways and premises, with the equipments and appurtenances thereof, and all additions and improvements which shall or

may have been made to the same to have, hold, possess and enjoy as if the first or former estate of the said New York Company, and upon such entry for non-payment of cash rental or dividend or breach or non-performance of any covenant or agreement herein contained, all the estate, right title, interest, property, possession, claim and demand whatever of the Manhattan Company, or its successors, in or about the said demised railways and premises, or either or any part of either thereof, shall wholly and absolutely cease, determine and become void, anything hereinbefore contained to the contrary in anywise notwithstanding, but no re-entry shall waive or prejudice any claim or right of the New York Company to or for damage against the Manhattan Company on account of such non-payment or non-performance or breach, and all such claims and rights are hereby expressly reserved to the New York Company. ART. 10TH. The New York Company hereby covenants and agrees, that it shall and will at any time when requested by the Manhattan Company or its successors, execute, acknowledge and deliver to the Manhattan Company, or its successors, at their proper cost and expense, any and all such other or further instruments and assurances in the law for the better granting, demising and leasing of said railway and premises to the Manhattan Company and its successors, upon and subject to all and singular the rents, covenants, agreements and conditions hereinbefore reserved and mentioned as by the Manhattan Company or its successors, or by its or their counsel, learned in the law, shall reasonably be advised, devised or required, and the Manhattan Company covenants, promises and agrees to and with the New York Company, its successors or assigns, that it and its successors shall and will, whenever thereunto requested by the New York Company, its successors or assigns, execute, acknowledge and deliver any and all instruments for the more effectually assuring unto the New York Company, its successors or assigns, the payment of the cash, rental and dividends hereinbefore reserved or agreed to be paid, and the performance of the premises and agreements hereinbefore set forth on the part and behalf of the Manhattan Company to be performed as by the New York Company, its successors and assigns, or by its or their counsel, learned in the law, shall be reasonably advised, devised or required. ART., 11TH. This lease, the agreement herein contained, the term property and franchises hereby granted and demised, shall not, nor shall any or any part of the same be released, transferred, sublet, assigned or incumbered, except with the written consent of the New York Company and of the Metropolitan Company thereto first had and obtained, but nothing in this article contained shall extend to the case of a disposition by the Manhattan Company of any equipment or supplies replaced by it with other equivalent property, or to the case of a continuance or renewal of the corporate existence of the Manhattan Company, which continuance or renewal for the whole of said term hereby granted, the Manhattan Company agrees to procure before the expiration of the term of its existence now fixed in its article of association. ART. 12TH. The Manhattan Company agrees that it will establish and maintain a sinking fund for the payment of the said first mortgage bonds, and for that purpose will on or before the 1st day of January, 1880, and on or before each first day of January thereafter during the currency of any of the said bonds pay to the trustees of the said mortgage a sum equal to one percentum of the largest aggregate amount of the principal of said bonds which shall have been outstanding at any time preceding such payment, which sum, with the interest accrued thereon, shall be applied by such trustees to purchase in open market, within 90 days after the receipt thereof, of so many of the said bonds with their unmatured coupons as the trustees shall be able to acquire at the market price thereof, but not exceeding the rate of twelve hundred dollars for each such bond with its coupons, which bonds and coupons shall thereupon be cancelled by the trustees and delivered to the New York Company, so to remain, and in case and to the extent that such purchases cannot be so made, then the trustees shall notify the New York Company thereof, and any sums so remaining, with all accumulations thereof, shall be invested and reinvested, from time to time, by the trustees in such first-class railway securities or other sufficient securities, as shall from time to time be designated by the New York Company and approved by the trustees, all which investments and reinvestments shall be made in the name of and be held by the trustees until the said bonds mature, and thereupon the trustees shall apply the fund toward the payment of the bonds then outstanding, and as to all bonds not extinguished under the operation of the said sinking fund it shall be at the option of the Manhattan Company, by written notice duly served upon the New York Company, at any time within 6 and not

less than 3 months before the maturity of the present bonds, to require the New York Company to renew or extend the time of payment of the whole or any part thereof by agreement with the holders, and to all acts and things and execute and deliver all instruments or writings requisite for such extension or removal, or to execute and deliver to the present or any other trustees agreed upon by the parties, its mortgage upon all its then property, securing its bonds to be issued thereunder to an amount equal to the amount of its present bonds then outstanding and not provided for by said sinking fund, and the said new bonds to issue and deliver to the trustees to be sold or disposed of according to the directions of the Manhattan Company, and the funds thus realized, shall be applied to the payment and retirement of all said outstanding and unprovided for first mortgage bonds of the present issue. Said mortgage shall contain a sinking fund clause substantially like that herein, and shall be substantially in the terms of the present mortgage, and the bonds secured thereby shall be similar in terms to the present bonds of the New York Company and shall be due at such time or times and with such rate of interest as may be directed by the Manhattan Company, and payment of principal and interest on all of said bonds shall be assumed by and chargeable upon the Manhattan Company in all respects as is herein provided, as to the present outstanding bonds. ART. 13TH. For the better carrying into effect the provisions of this instrument, the New York Company hereby constitutes the Manhattan Company its agent and attorney, to do in its name any and all things necessary to be done for the complete execution of this instrument.

In witness whereof, the said two companies have caused this Indenture to be subscribed, with their names, by the presidents and secretaries of the said companies, and the corporate seals of the said companies to be hereto affixed the day and year first above written.

The New York Elevated Railway Company, by Cyrus W. Field, president; F. E. Worcester, secretary. [L. S.]

The Manhattan Railway Company, by Wm. R. Garrison, president; N. Guilford, secretary. [L. S.]

A document, similar to the above, between the Metropolitan Elevated Railway to the Manhattan Railway Company is also on file, the only difference being the substitution of the word "Metropolitan" for the word "New York."

DEFECTS OF OUR BUILDING SYSTEM.

To the Editor of THE REAL ESTATE RECORD:

SIR:—It is quite evident to thinking people that our methods of building need overhauling in many respects. A few of these defects the writer proposes to criticize.

Within the past year some fires have occurred, and not a few narrow escapes therefrom, owing to the prevailing method of arranging our houses, that places chimneys and fireplaces against the wainscoting and party wall of the next house. A friend of the writer, in Thirty-seventh street, recently burned out the greater part of his neighbor's house and narrowly escaped being burned up himself. Now if the front stoops of our houses were placed *each two together*, instead of separately, as now, that would bring the chimneys of the houses in juxtaposition, and if the breasts and chimneys were built solidly, all danger of fire from that source would be averted. Placing the front stoops together and arranging with porticoes and columns, gives more light to the houses and a better architectural effect, as it tends to break the cramped and uniform look now too apparent. Our fathers found these things out, but we have forgotten them or ignored them; that which our builders may think needless, they found desirable to give shelter alike from sun or rain.

Since the introduction of elevators, there is a tendency to build skyward, till now we find office buildings and apartment houses that tower up nine stories high, like sugar houses or shot towers, darkening all the streets around. Nor is it usual to leave any courts to these high structures, except the so-called light-shafts or well-holes be dignified by that term. In Paris all buildings must conform to a uniform height, while neither in Paris or London would such structures as those we term "French Flats," without court yards or sufficient interior light and air, be permitted. It is time that our Building Department and the Board of Health interfered in these matters, and not wait in a fancied security and prosperity till some epidemic strikes us and demonstrates these "French Flats" to be breeding spots for the pestilence.

The fashionable brown stone neighborhoods are not much better off. It is simple nonsense to build over nine tenths of a lot 17 to 25 feet front by 99 feet deep, stealing what light you can in the rear from your neighbor's yard, in order that you may have reception room, parlors, library, dining room and butler's pantry all on one floor. It is trying to get too much coat out of too small a piece of cloth, or, in other words, trying to eat your cake and still have it.

The houses that were built forty to sixty years ago in New York were spacious, roomy, light and comfortable, and many such remain about Washington square, lower Fifth avenue and adjacent streets, to point the lesson of our fathers wisdom in house building in contrast with our later folly. It is hard, however, to get people out of a rut, nor may we look for advanced improvements from our speculative builders, if they do not see a present profit therein, or our Board of Health and Building Department take action in these matters. But it is to be hoped, however, that people will wake up to the fact that sunlight and fresh air are needful in time to secure health and comfort, and that the house of the near future will care for these and many more things. F. S.

THE MERCANTILE SAFE DEPOSIT COMPANY.

SPLENDID ARRANGEMENTS FOR DEPOSITORS—NOVEL AND INGENIOUS FEATURES.

The re-construction and ornamentation of the offices and vaults of the Mercantile Safe Deposit Company, in the Equitable Building, Broadway, corner of Cedar, have made that institution exceedingly interesting to visitors. Hundreds have, during the past few days, visited the new rooms and been most agreeably surprised on examining the various novel features recently introduced.

The business of the company having largely increased, it became necessary to erect several new vaults, which now contain 5,500 safes. There are, altogether, between eighty and one hundred rooms, beginning with the large offices and halls and ending with the small coupon rooms.

The new reading room, 30x38, is comfortably and handsomely furnished. There are a number of small desks, with writing materials. Arrangements may be made to have letters forwarded to and received from the post office, and delivered on the premises. There are porters constantly in attendance, and the private coupon rooms have electric bells, and are fully furnished with writing material.

The rooms for the ladies' department are distinct from the general offices of the company, and comprise an ante-room and parlor, with separate coupon and toilet rooms, richly decorated and furnished, and in charge of a female attendant. This department, complete within itself, is unique, and is one of the special features of the institution.

The basement floor is reached by a marble staircase, which, with its elaborate and curious balustrades, its fountain and back-ground of tropical plants, presents a striking and novel appearance, and is itself worthy of a special visit.

While the facilities provided for the comfortable and expeditious transaction of business are unequaled, the more important consideration of safety has not been overlooked. Indeed, it is believed that there is no institution in the country where there is greater strength of construction or where such a combination of safeguards exist to insure absolute security.

The lower security vault rests upon the very foundations of the building. It is composed of courses of steel and iron bolted together, surrounded by a casing of huge blocks of solid granite. The upper security vault rests upon the other, and is composed of alternate courses of steel and iron of great thickness. The independent walls of this great granite and steel-lined vault are two feet thick. The entrances to the vaults are secured by massive double doors, every door having two or more complicated combination locks, thus making at least four sets of combinations for every entrance. No one person can open the vaults, two or more being required to act in concert.

The entrances to the great security vaults are further protected by chronometer (time) locks, supplied by Messrs Cady & Mossman, 100 Maiden lane. These are placed on the inside of the doors, and are inaccessible when the doors are fastened, and lock them when they are closed, rendering it impossible for them to be unlocked, except during business hours,

even by those knowing the combinations of the other locks.

One of the most attractive features is the wonderful effect produced by the electric light furnished by the United States Electric Lighting Company, 120 Broadway. The vaults, on account of their great size and massive construction, would necessarily be dark and obscure if lighted in the ordinary way, and if much gas were used the atmosphere would become heated and vitiated. The electric lights illuminate the vaults perfectly, producing an effect like that of sunlight, without either heat or bad air. These lights are produced by small dynamo machines, deriving their power from the engines in the Equitable Building. The large areas are illuminated by lamps of 4,000 candle power each, and the beams of light penetrate to every corner. The examination rooms are lighted by small incandescent lamps not larger than gas jets, and turned on or off in the same manner.

Mr. Edward E. Raht is the architect, and the following parties have done work or supplied material for this excellent institution: Iron work of the vaults has been supplied by G. W. & T. Smith, of Boston, Mass.; the iron work of store houses by S. B. Althouse & Co. and Post & McCord; the marble work by A. L. Fauchere & Co.; the plain painting has been done by Fred. J. Shaw, of 116 West Thirty-ninth street, and the decorative painting by Leissner & Louis, of 828 Broadway; the furniture in the reading and smoking rooms has been supplied by Roux & Co., of Fifth avenue, who have also furnished the richly carved mantle screen and all the architectural woodwork; the ornamental glass by Payne & Peine, of Orange, N. J.; the plain glass by Holbrook Brothers, Beekman street, and the gas and electric light fixtures by Archer & Pancoast Manufacturing Company, 67 Greene street.

MARKET REVIEW.

REAL ESTATE MARKET.

For list of lots and houses for sale see pages iv, v and vi of advertisements.

The past week has been one of extraordinary activity at the Exchange Salesroom, and the transactions both public and private of improved as well as unimproved property fully confirm all that has been said recently in these columns in regard to the revival of activity in the real estate market. Of course prices do not rise as rapidly as is the case in the markets of other commodities which are easier to handle, but when, as will be noticed by the detailed information given below, bankers, bank officers, leading merchants and others invest their surplus funds once more as they do now in real estate, the time cannot be far distant when they will be followed by others, anxious to imitate their example even if then they have to pay higher for their investments.

During the first days of the week Messrs. A. F. Muller & Son and also Mr. Richard V. Harnett opened the ball by offerings of property in various parts of the city, the Messrs. Muller disposing of five lots on the northeast corner of Madison avenue and One Hundred and Fourteenth street for \$13,600, and the same auctioneers sold on Thursday four lots on the northwest corner of First avenue and Thirty-fourth street at fair prices. No. 106 Franklin street, a five-story brick and iron store, 25x100, which rents for over \$4,000 per annum, was disposed of by Mr. Harnett at \$86,700, considered a very excellent investment. He also sold on the same day to Mr. M. P. Palmer, four vacant lots on Ninety-fifth, Ninety-sixth streets, Eighth and Ninth avenues, at \$4,600 each, also a lot on Seventieth street, 150 feet west of Eighth avenue for \$7,100. The purchaser, Mr. O. J. Munsell, has since resold it at quite an advance.

The auction sale of the Haggerty estate, held by Mr. John Draper on Wednesday, attracted a very large audience, mainly from the East Side, but also from several business streets down-town. The sale comprised property in Stanton, Columbia, Goerck, Houston, Washington, and other extreme East and West Side streets, also valuable real estate in Pearl and Pine, and leasehold property in Warren street. The bidding, though spirited, did, however, not hasten the proceedings of the sale, which continued without interruption until past four o'clock. There was considerable competition for the bulkhead property, especially at the foot of West Houston street, and it

was disposed of at prices showing increased confidence in that locality for its future occupancy by leading steamship companies. Among the buyers were Messrs. Cammann, Otterberg, Yoran, J. Weeks, Reegan, Meyer, Stoddart, S. D. Bahcock and Nesbitts, the printers. The latter purchased the premises now occupied by them for \$34,500. The aggregate amount realized by this sale was \$416,000, and all interested were quite satisfied with the total result.

The partition sale held on the same day by Messrs. E. H. Ludlow & Co., was also largely attended and closely watched by leading dealers, investors and brokers, the five lots on the southeast corner of the Boulevard and Sixty-second street being the great attraction. They were disposed of separately amid spirited bidding, the corner lot, 29.5x121.8, being knocked down for \$24,700, the adjoining lots being sold respectively for \$17,400, \$14,000 and \$13,600, and the street lot, 25x75.5, for \$10,300. Total, \$78,000 for the plot, of which Mr. James D. Fish, President of the Marine Bank, became the purchaser. Before Mr. Bernard Smyth, his representative, left the auction room, an advance of \$10,000 on the total purchase was offered him, but was declined. Since, we understand, a still further advance has been offered from another source, which is still held under advisement. Six lots, on One Hundred and Fifty-second and One Hundred and Fifty-third streets, 100 feet east of Tenth avenue, were purchased at the same sale for \$10,900 by Mr. Cashman.

In Brooklyn, Messrs. Cole & Murphy sold, at auction, the northwest corner of Atlantic avenue and Oxford street, 73.9x69.7x28.10, for \$6,100, a figure fully \$1,500 higher than the property had been appraised. The northeast corner of Sixth avenue and St. John's place, 20x87.4, was sold to a Mr. Lester, by J. Cole, for \$10,000.

For the coming week a very important announcement is made by Messrs. E. H. Ludlow & Co., who will sell on Tuesday next the northwest corner of Madison avenue and Twenty-sixth street, fronting Madison square, 30x71x98.9, a very valuable and eligible residence, in excellent condition; adjoining lots on the avenue will also be offered at this sale. The full terms and particulars can be found on the second page of this issue.

The attention of investors and builders is also directed to the sale of the four Boulevard and One Hundred and Tenth street lots, announced by J. T. Boyd for the 2d of December. These lots belonged to the late well-known Comptroller, Matthew T. Brennan, and are in a locality now coming to the front amid the rapid improvements going forward in that section of the city.

Next week also, Mr. Harnett will sell very valuable store property on Third avenue, and during the following week Broadway property, near White and Leonard streets, also an excellent plot on Walker street, particulars of which will be found in our advertising columns.

GOSSIP OF THE WEEK.
